

Idling gets you nowhere

Turn your engine OFF

Protect our environment

- Idling for more than 10 seconds uses more fuel and makes more carbon dioxide than restarting your engine.
- Gasoline and diesel are made from fossil fuels, a non-renewable resource.

It's the law

- Unnecessary idling of more than one minute is prohibited in Burlington year round.
- You could be fined \$120 or more.
- Unattended idling vehicles can be ticketed, including those in your driveway.
