

Plains Road Protected Bikeway and Resurfacing Project Update No. 2 – November 8, 2022

Burlington.ca/PlainsRoadResurfacing

Project Update and Schedule

Construction activity began as scheduled on June 6, 2022. Associated Paving & Materials Ltd progress towards the completion of the Plains Road project has been impacted due to delays in locate requests for underground utilities, nation wide concrete shortages, and delays by Burlington Hydro and Cogeco in removing the overhead lines crossing Plains Road and northside utility poles. As a result of these delays, the original completion date of November 15th, 2022 will not be reached. Construction of the Plains Road Protected Bikeways and Resurfacing project is expected to continue into the Summer of 2023.

Associated Paving & Materials Ltd. is currently working towards completing all concrete works (curb, concrete buffer strip, bus pads etc.) on the south side of Plains Road. Once these works have been completed, the existing paint markings will be removed, and the new lane configurations will be installed with temporary paint line markings on the existing asphalt surface.

Construction work on the north side of Plains Road in the late fall/winter of 2022 will be weather dependant and focused on the removal and replacement of the existing sidewalk to its new configuration complete with restoration of driveways and landscaping. Associated Paving Limited will ensure access is maintained over the winter and resident snow clearing efforts are not impeded.

Leaf Collection Cancellation

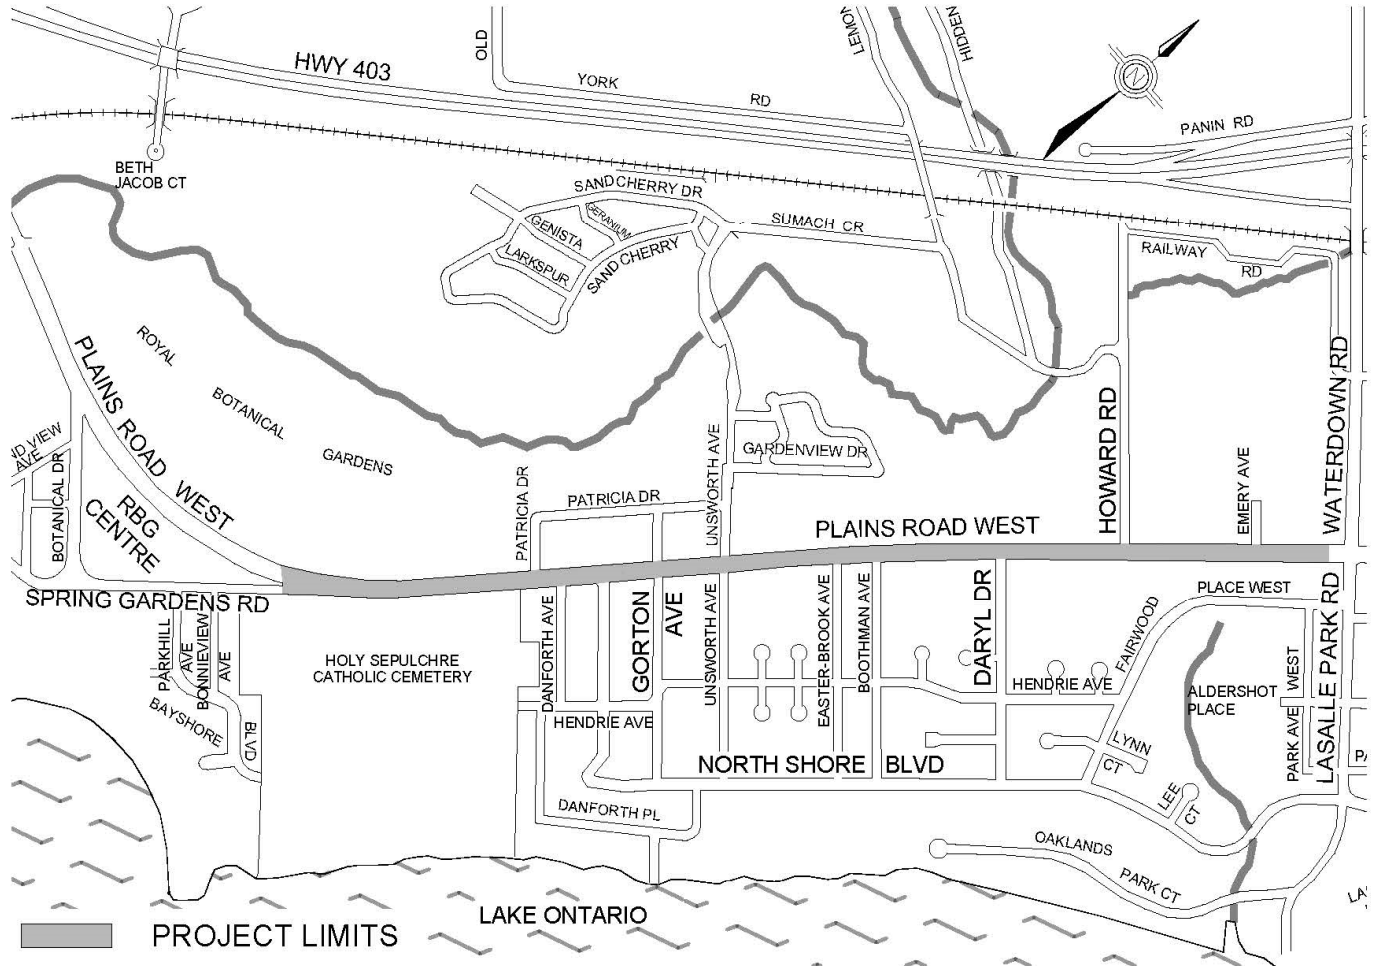

Due to the ongoing construction, the City is unable to complete curbside leaf collection within the project limits. Leaf pick-up will not take place on Plains Road from Waterdown to Spring Gardens this Fall 2022. Residents are asked to bag the leaves and place them at the roadside for Halton Region Yard Waste pick-up. Please refer to the Halton Region website's online waste collection schedule for scheduled pick-up dates for your area.
