

Snake Road Minor Reconstruction

Project Update – October 2026

[Burlington.ca/SnakeRoad](https://burlington.ca/SnakeRoad)

Rankin Construction is continuing work on Snake Road which began at the end of July. This work is to replace roadway surfaces and localized storm culverts in poor condition. This work will involve the removal and replacement of the asphalt pavement and replacement of steel beam guide rail. Also included will be isolated curb repairs/replacement where required.

The City will be installing traffic calming measures on the upper portion of Snake Road. Concrete speed tables will be installed within the roadway at strategic locations to address local concerns with vehicle speeds.

Please note that due to unexpected delays, the expected completion date has been extended the end of 2026.

The contractor and City will continue to make every effort to keep disruptions to a minimum. Construction signs will be posted, and the work site will be secured. For your safety, please use caution and obey all signs.

Project Location

Project Scope

The City of Burlington will be working on:

Location	City Works
Snake Road (From Old York Road CN Rail Bridge at City limit)	• Full asphalt replacement • Localized storm culvert replacement • Speed Calming via. Concrete Speed Table installations.

Project Schedule

The construction timeline for the above-mentioned streets is:

- May 2026 to the end of 2026

Contacts

Inquiry	Contact
Day-to-day construction	Todd Hedley, Construction Inspector City of Burlington 905-220-5493 Todd.Hedley@burlington.ca
All other construction inquiries	Chris Onishi, Project Manager City of Burlington 905-335-7600, ext. 7682 Chris.onishi@burlington.ca Steven Hyett, Contract Administrator City of Burlington 905-335-7600, ext. 7568 Steven.Hyett@burlington.ca

Utilities

Utilities such as Union Gas, Hydro and Bell Canada have already started to locate their existing infrastructure to prepare for this construction. ***Please do not remove these marker stakes or paint markings. Staff will return to remove them once the project is complete.***

Access to Your Home

Please note that during normal construction hours (Monday to Friday, 7 a.m. to 6:30 p.m.) vehicle access to and from your properties may at times be difficult, additionally, driveways will be temporarily closed when work is

being carried out in the immediate area. Either the inspector or the contractor will notify you of access interruptions before the closure.

Your Front Lawn and Driveway

As part of this project, the curb may be replaced. Minor regrading of your boulevard lawn near the road will be required. Any damage to your lawn, walkways, and driveways will be restored. For information regarding driveway credits, please visit the project website.

Road Closures/Lane Restrictions

Lane restrictions will be in place during construction. You will still have access to your home. Additional information will be provided during construction.

Garbage Pick up

Please continue to put your garbage and recycling out on the usual day. It is the contractor's responsibility to move your garbage and recycling to a location that can be accessed by the garbage truck and return your garbage/recycling containers. To help the contractor, we ask that you mark your house number on your garbage cans and recycle bins.

Lawn Irrigation System

If you have a lawn irrigation system where curb are to be replaced. We request that you flag all irrigation heads, so they are not damaged. The City is not responsible for damaged heads within the road allowance. This does not have to be done until work in your area is scheduled.

Vibration

At times, you may experience some minor vibration from construction equipment. We recommend that you remove small, light objects from shelving around the house.

If you require more details, please do not hesitate in calling the contacts below.

Trees

Tree protection barriers will be erected around all trees in the right-of-way, within the construction limits, with an opening to allow homeowner access to maintain the area within.

There will be a number of boulevard trees removed due to conflict with the construction, and it has been determined that these removals are unavoidable in order to maintain the roadway. Homeowners adjacent to these removals will each be informed prior to removal. The specific trees that require removal can be viewed on the project drawings on the project website.

If additional trees require removal due to unforeseen impact or conflict, homeowners will be informed.

Project Updates and Current Information

If you would like to receive notification via email when future Project Updates are available, please subscribe to the project webpage Burlington.ca/SnakeRoad.

We would like to thank you for your co-operation and understanding during this construction period.

Kind Regards,

Chris Onishi
Project Manager
City of Burlington

cc. Councillor Kelvin Galbraith, Ward 1
