NOTICE OF CLASS EA STUDY COMMENCEMENT

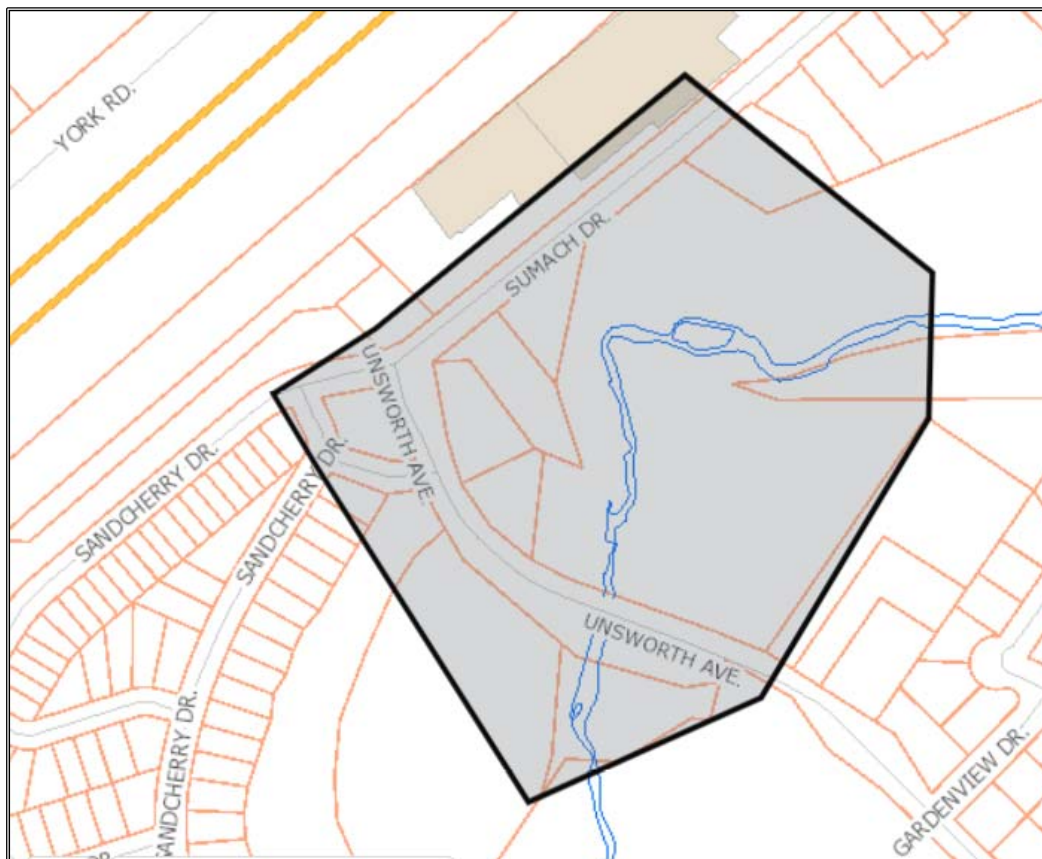

Grindstone Creek Erosion Control Project – Unsworth Avenue to Sumac Drive

The Study

The City of Burlington, through their consultant Ecosystem Recovery Inc., is undertaking a Municipal Class Environmental Assessment (EA) to address significant erosion concerns for Grindstone Creek, between Unsworth Avenue and Sumac Drive in the City of Burlington.

Alternative erosion mitigation strategies will be investigated, which will include channel restoration and stabilization of Grindstone Creek. Opportunities for natural channel design and native restoration practices will be looked at.

The study area is shown in this map:

The Process

The Study will be carried out under *Schedule 'B'* in accordance with the requirements of the Municipal Engineers Association (MEA), *Municipal Class Environmental Assessment for Municipal Projects*. The Study process includes public and stakeholder consultation and identification of measures to mitigate adverse impacts. Public consultation is a key component of this study. The Project Team invites public input and comments and will incorporate them into the planning and design of this project. A Public Information Centre (PIC) will be held as part of the process to provide an opportunity for the public to review and comment on the study findings. Notice of the PIC will be provided to the public and agencies as the study progresses.

Public Interaction

The City wishes to ensure that anyone with an interest in this study has the opportunity to provide input on the study alternatives. With the exception of personal information, all comments will become part of the public record. To provide your comments, request additional information concerning this project or to join the study mailing list, please contact either of the Project Team members:
