

SPINNING

Spinning is not only fun but helps children develop necessary motor, social, sensory and cognitive skills. Kids will get a great workout, running, pushing and riding the Spinetic® which incorporates climbing in addition to spinning to create a whole new challenge and experience!

IMAGINATIVE PLAY

Imagination is an important part of child development. Often in play, children learn important life skills that transcend the playground. Skills such as understanding, empathy and working toward a common goal are all practiced in imaginative play.

3D Designer: Kendra

COGNITIVE

So many life skills are learned through play! Skills such as cognitive planning, mastering new concepts, problem solving and expression are developed naturally through play events like climbing, sliding and spinning.

CLIMBING

Climbing brings adventure and challenge to the playground while providing necessary developmental benefits such as balance, agility, upper and lower body strength and decision-making skills! When children climb, they develop confidence and take age appropriate risks that help build skills that will help them throughout their lives.

PLAY VARIETY

This design offers the perfect solution for a great playspace and ensures that the necessary and age-appropriate play components are included. With various slides, climbers and spinning events, kids will be able to enhance physical fitness while having fun playing.

SWINGING

The joy of swinging is a childhood staple and kids LOVE it! Best of all, it has so many developmental benefits, including inner ear development, spatial awareness and sensory integration.
