**OFFICIAL PLAN**  
**of the**  
**BURLINGTON PLANNING AREA**

**City of Burlington**  
**As approved by the Region of Halton, March 5, 1997**  
**Office Consolidation December 2019**

---

---

## EXPLANATORY NOTES

---

*The Official Plan (1994)* for the Burlington Planning Area was adopted by Council of the Corporation of the City of Burlington on July 11, 1994 through By-law 78-1994. It was subsequently approved, with modifications, by the Regional Municipality of Halton on March 5, 1997. Certain parts of the Plan were referred by the Region to the Ontario Municipal Board for a decision, and certain parts were deferred for further consideration.

The former Official Plan for the City that was adopted by Council on July 14, 1969 and approved by the Minister of Municipal Affairs on June 16, 1971, was repealed by City Council on February 24, 1997 through By-law 15-1997, but only to the extent that the new Official Plan (1994), has otherwise been approved by the Region. In other words, for those parts of the new Plan that have been deferred or referred by the Region, relevant sections of the former Official Plan will continue to be in effect until such time the deferral or referral has been resolved.

This Office Consolidation of *The Official Plan (December 2019)* incorporates all modifications, subsequent approvals, and amendments to the Plan up to and including the date - referred to as the Consolidation Date - shown on the inside cover of this document.

Table A is a list of deferrals and referrals that are still outstanding as of the Consolidation Date. Those portions of the Plan that have been deferred or referred are indicated with an asterisk (\*), followed by a reference notation.

Table B contains a list of amendments to *The Official Plan (1994)* considered by City Council and their status as of the Consolidation Date.

Office Consolidations are prepared for the purpose of convenience. For accurate reference, the reader should consult the legal documents as approved by the Region, which are the duplicate originals of *The Official Plan (1994)* and its amendments lodged in the Clerks Department of the City of Burlington, located at 426 Brant Street, Burlington, Ontario, L7R 3Z6.

These explanatory notes do not constitute part of the Official Plan under The Planning Act.

## **1.0 INTRODUCTION**

### **1.1 Review Process**

Policy framework

The City of Burlington initiated a review of its Official Plan to update policies and provide a long-range planning framework. The review process involved an assessment of relevant background information, the establishment of a community vision, and the development of principles, objectives and policies aimed at implementing the community vision.

Research, assessment and consultation

The vision for Burlington and the policy directions were initially established through research, assessment and consultation. Relevant social, economic and environmental matters and existing and emerging planning policies of the Regional, Provincial and Federal Governments were considered.

Community input

Input from the general public, community leaders, the business community, focus group participants and members of City Council was obtained and stated as principles or qualitative statements about the kind of urban and rural environment desired for Burlington. Background, issue and policy papers were prepared to define the future image of Burlington and the planning principles for managing *development* in the community.

Policy framework report and Policy Papers

A Policy Framework report established general guiding principles to be considered in preparing the principles, objectives and policies of the Plan. Policy papers outlining directions for areas such as housing, economic *development*, transportation, natural features, parks and open space were prepared. These papers were subject to public review and have formed the basis for the policies contained in the Plan.

Provincial policy statements and land use plans were also considered, as were the planning policies of the Region of Halton.

Five Year Review

A Five-Year Review of the Official Plan was initiated in March 2002. A series of background studies were prepared on various aspects of the Official Plan which resulted in a series of directions reports being released in early 2005, recommending a number of changes to the Plan. These directions were released for public consultation, and revised directions and recommended amendments to the Plan were approved by City Council in October 2006. The amendments were approved by the Region of Halton in January 2008 and by the Ontario Municipal Board in October 2008.

OPA 55

### **1.2 Organization of the Official Plan**

The Official Plan consists of a Preamble, eight Parts and Appendices.

OPA 55

---

---

## PREAMBLE

---

---

Preamble	<p><b>The Preamble</b> contains the introduction to the Plan and establishes the context under which it was prepared. The introduction section describes the purpose, review process and organization of the Plan. The background section outlines the main demographic, settlement and housing features of the City. The Preamble is presented for information purposes and is not considered part of the Official Plan.</p>
Policy framework	<p><b>Part I: Policy Framework</b> provides the vision and overall context within which the principles, objectives and policies of the Official Plan have been prepared.</p>
Functional Policies	<p><b>Part II: Functional Policies</b> presents principles, objectives and policies that apply regardless of land use designation, unless otherwise indicated. The functional policy areas included in this part are Sustainability and the Environment, Transportation, Institutional Uses, <i>Utilities</i>, Urban Design, Cultural Resources, <i>Cultural Heritage Resources</i>, Waterfront, Community Improvement, Phasing of <i>Development</i>, <i>Financial Impact Analysis</i> and <i>Agriculture</i>.</p>
Urban Land Use Policies	<p><b>Part III: Land Use Policies-Urban Planning Area</b> relates directly to the major land use activity areas and land use designations shown on the Settlement Pattern Plan and Urban Planning Area Comprehensive Land Use Plan. Principles, objectives and policies are presented for Residential, Employment, Major Retail, Mixed Use Activity, and Natural Features and Open Space.</p>
Rural Land Use Policies	<p><b>Part IV: Land Use Policies-Rural Planning Area</b> establishes principles, objectives and policies for major land use designations shown on the Settlement Pattern and Rural Planning Area Comprehensive Land Use Plan. Principles, objectives and policies are presented for Agricultural Rural Area, Greenlands, Escarpment Protection Area, Escarpment Urban Area, Mineral Resource Extraction Area, and Rural Settlement Area designations.</p>
North Aldershot Land Use Policies	<p><b>Part V: Land Use Policies – North Aldershot Policy Area</b> establishes principles, objectives and policies for major land use designations shown on the Settlement Pattern and North Aldershot Policy Area Comprehensive Land Use Plan. Principles, objectives and policies are presented for Residential Area, Office Area, Environmental Protection Area, Commercial Area, Parkway Belt West Area, Mineral Resource Extraction Area, Recreation/Open Space, Special Study Area and Niagara Escarpment Plan designations.</p>
Implementation	<p><b>Part VI: Implementation</b> establishes policies affecting the use and <i>development</i> of lands in the City under <u>The Planning Act</u>, and monitoring to achieve the stated vision for the City.</p>

OPA 55

---

---

## PREAMBLE

---

---

Land Use Schedules	<p><b>Part VII: Schedules and Tables</b> to the Plan includes a Settlement Pattern Plan showing major land use activity areas such as Mixed Use Activity, Residential, Employment, Major Retail, Natural Features and Open Space, Rural Lands and Rural Settlement Areas. Major Retail Areas shown on the Settlement Pattern Plan only include Regional and Community level commercial centres along with Employment Commercial areas. The Neighbourhood Commercial areas are included in the ‘Residential Areas’ designation on the Settlement Pattern Plan. This schedule shows, in broad terms, the spatial orientation and relationship of various major land use activity areas. Comprehensive Land Use Plans are presented for the Urban, Rural, and North Aldershot Planning Areas. These schedules show how lands within the major land use activity areas will be developed or maintained. Land use schedules that show the results of <i>secondary planning</i> studies are included for Rural Settlement Areas within the Rural Planning Area and for Mixed Use Centres within the Urban Planning Area. The City's roadway classification is shown on separate schedules.</p>	OPA 55
Transportation Tables	<p>This part of the Plan also includes tables outlining the function and classification of transportation facilities and road allowance widths.</p>	
Definitions	<p><b>Part VIII: Definitions</b> contains a glossary of terms used throughout the Plan. These terms are indicated in <i>italic</i> type throughout the text of the Plan.</p>	OPA 55
Appendices	<p><b>The Appendices</b> contain additional information that is not part of the Plan but which <i>shall</i> be applied in implementing the Plan policies, such as the long-term transit network and long-term bikeway system for the City, list of approved <i>Secondary Plans, Design Guidelines</i> and <i>Watershed Plans</i>, and <i>Regulatory Floodplain</i> mapping.</p>	OPA 55

## 2.0 BACKGROUND INFORMATION AND TRENDS

### 2.1 Location

Golden Horseshoe

The City of Burlington is situated on the western shore of Lake Ontario, adjacent to the City of Hamilton and approximately 70 km west of the City of Toronto. Burlington is located in the urbanized area of Southern Ontario that extends from the cities of Niagara Falls to Oshawa, known as the “Greater Golden Horseshoe,” and which forms the economic core of Ontario.

OPA 55

Distinct Urban and Rural Areas

Burlington's planning area includes 177.4 sq. km of land and comprises distinct urban and rural areas. The Urban Planning Area is generally defined as the area south of Dundas Street and Highway 407 as shown on Schedule ‘A’ Settlement Pattern. The lands north of this area comprise the Rural Planning Area. An additional area of land in the westerly portion of the City, north of Highway 403, comprises the North Aldershot Planning Area.

Strategic and desirable location

Burlington's location is distinguished by its accessibility to major urban centres such as Toronto and Hamilton, its proximity to the United States and its natural features including the Lake Ontario and Burlington Bay waterfronts, the Niagara Escarpment and Bronte Creek. The combination of an economically strategic location and environmental and aesthetic factors have contributed to Burlington's desirability as a place to live and as a location for business.

### 2.2 Regional Setting

Within Halton Region and GTA

Burlington is one of four Area Municipalities within the Region of Halton. The Regional Municipality of Halton and the Regional Municipalities of Peel, York, and Durham and the City of Toronto form the Greater Toronto Area (GTA), established by the provincial government for planning purposes.

The City's location within the GTA and as part of the Greater Golden Horseshoe is expected to result in pressure on Burlington's urban lands to accommodate an increasing portion of future GTA population growth, given the continued westward expansion of the GTA and the City's strategic location in proximity to the US border.

### 2.3 Population

Demographic changes

The City's population totalled 150,800 in 2001. Burlington's population profile is aging, which is the result of an increasing elderly population and a decreasing birth rate. During the 1996 to 2001 period, the proportion of the City's population less than 50 years of age declined by 2.5% to 68.3% of the total population. During the same period, the population group 50 years of age or older increased by 2.4% to 31.6% of the City's population. Burlington's 2001 population was fairly evenly divided amongst the 0-24 year age group (31%), the 25-50 age group (38%) and the over 50 age group (31%).

OPA 55

---

---

## PREAMBLE

---

---

### 2.4 Households/Housing

Non-family households

In 2001, the total number of households in Burlington was 59,020. Of this total, approximately 25% of the dwellings were rented.

OPA 55

Predominantly single detached

Burlington's housing mix has remained relatively stable with single-detached housing as the main housing form. The existing supply of housing is relatively new, with only 20% over 40 years old and approximately 36% less than 20 years old.

### 2.5 Economy/Employment

The local economic base is very diversified. Food processing is among the leading employers, along with software development, advanced manufacturing, financial services, and steel and metal fabrication businesses. In 2001, employment in the City was 77,100. Approximately 43% (33,150) of these jobs were held by City residents.

OPA 55

Burlington's total labour force (City residents aged 15-64 who were in the job market) was about 85,300 persons in the 2001 census, with a male participation rate of 77% and a female participation rate of 65%. According to the census, manufacturing at 16% accounted for the largest single share of total employment, followed by retail trade at 12%, health care and social assistance at 8%, professional, scientific and technical services at 8% and wholesale trade at 7%.

### 2.6 Settlement Pattern

Historically, settlement in Burlington's planning area occurred in small communities along the Lake Ontario and Burlington Bay waterfront and in a few northern communities. The Town of Burlington, created in 1873 from the villages of Wellington Square and Port Nelson, developed as a prime residential area through the early 1900s. In 1958, Burlington, Aldershot and Nelson Township were amalgamated and in 1973 the present planning area boundaries were established through The Regional Municipality of Halton Act.

Period of rapid growth

Since the 1950s, Burlington has experienced constant growth and expansion of its urban area. The period from 1958 to 1979 comprised the most extensive period of *development*, with construction activities occurring north of the Queen Elizabeth Way. Burlington's growth during this period resulted primarily from Hamilton's suburban expansion. The period from 1980 to 1990 contained significant residential *development* in Burlington's northern communities of Brant Hills, Headon and Rose and some *infill development* in the South Aldershot, Maple and Tyandaga communities. Since 1991, significant growth has continued in north-east Burlington in the Tansley, Uptown, Rose (Millcroft) and Orchard communities.

---

---

## PREAMBLE

---

---

### Rural Area

The majority of urban *development* has occurred south of Dundas Street, maintaining the rural character of the northern half of Burlington's planning area with limited residential *development* along roads and in existing settlement areas. Alton Community, which is bounded by Highway 407, Dundas Street and the Bronte Creek valley, is currently under *development*. The Alton Community is the last major greenfield area within the City. The entire Rural Area is within the Niagara Escarpment Plan and Provincial Greenbelt Plan boundaries.

OPA 55

---

---

## PART I - POLICY FRAMEWORK

---

---

### 1.0 MISSION STATEMENT

Mission                    The City is committed to attaining the highest standards of *Ecological Health*, Economic Growth and Community Development through implementation of the principles of *Sustainable Development*. \*D53                    OPA 55

### 2.0 PLANNING HORIZON

Plan to 2021                    The Plan will manage and direct the *development* and planning of land uses for a period extending to the year 2021. The Plan anticipates that the population of the City will not exceed approximately 182,000 people within approximately 73,600 households, by the end of the planning period. It is expected that the employment level in the City will be approximately 108,000 in the year 2021.                    OPA 55

Plan to be reviewed                    It is the intent of the Plan to accommodate and to plan for the growth associated with the underlying housing, population and employment projections. The planning horizon serves as an appropriate measure of the duration of the Plan and should not be regarded as a specific completion date for its implementation. Furthermore, the Plan should not be regarded as a static or inflexible document that is resistant to the pressures of economic, social or environmental change during the planning period. The validity and relevance of the Plan will be maintained through a process of monitoring, review and modification, as required.

### 3.0 GUIDING PRINCIPLES

The urban and rural environment that is desired for the City of Burlington is summarized as follows:

Attractive and liveable                    a)                    **Provide a community plan and growth strategy aimed at creating an attractive, liveable community that offers a wide range of housing, employment, transportation, and leisure opportunities for all its citizens.**                    OPA 55

The Plan enhances the quality of life for Burlington residents by providing a range of housing, job and leisure opportunities. Maintaining an attractive, liveable community involves a mix of land uses; innovative, functional community designs; integration of land uses to ensure ease of mobility; efficient delivery of services; preservation and enhancement of natural features; and accessibility to the City's public open spaces.

---

---

**PART I - POLICY FRAMEWORK**

---

---

Sustainable  
Community

- b) Support a healthy, clean and sustainable community based on an *ecosystem* approach and the implementation of the principles of *Sustainable Development*, by ensuring that environmental integrity and diversity, social and economic factors, and *compatibility* are considered in land use decisions.**

OPA 55

The Plan reflects the importance of maintaining and enhancing the City's natural features and resources such as Lake Ontario and Burlington Bay, the Escarpment, woodlots, creek valleys, *wetlands*, the Royal Botanical Gardens, public and private open spaces, and *agricultural* lands.

In its support of a sustainable community, the Plan serves to *preserve* and enhance the local economy, and the health and well-being of its citizens as well as the natural environment.

All *development* shall be undertaken in a manner that is consistent with the principles and objectives of *Sustainable Development* and protects the residents of the City from unacceptable social and environmental impacts. \*D53

OPA 55

Infrastructure

- c) Ensure that the City's *infrastructure* and services are maintained or expanded at a level that is fair, realistic and affordable.**

The Plan ensures that land use *development* is supported by appropriate services and *infrastructure* that are fair, realistic and affordable in terms of needs, environmental impact and municipal debt load.

The City's existing *infrastructure* will be reviewed as a resource that, subject to ongoing maintenance, is capable of providing for cost-effective *development* and *re-development*.

OPA 55

Community  
identity

- d) Foster a unique, vibrant and strong community identity.**

The Plan contributes to the vision of Burlington as a "people place", offering an environment of managed *development*, an appealing downtown and an abundance of green space. The Plan will support the downtown as the *cultural* and *entertainment* centre of the City while fostering cultural activities throughout the community.

OPA 55

Support  
existing and  
new business

- e) Create a community *development* pattern that supports the existing business community and promotes new business development opportunities, by protecting critical areas of economic enterprise and promoting a variety of locations for economic activity.**

---

---

## PART I - POLICY FRAMEWORK

---

---

A strong and diverse local economy is essential to maintain and enhance the quality of life enjoyed by Burlington residents. The Plan contributes to a healthy local economy by supporting existing businesses as well as providing opportunities for new business development.

Local economy **f) Support a vigorous local economy.**

The Plan addresses the need to promote and foster new economic opportunities within the local community. This is based on an open economy, which is subject to internal and external influences. New opportunities must be created to maintain a desired level of economic prosperity and stability. The Plan recognizes the changing nature of businesses and jobs in the City and also recognizes the current restructuring of the local, provincial, national and international economies. As a result, an appropriate level of flexibility has been incorporated into the Plan to allow a range of economic activities and responses to changing circumstances.

Equitable access **g) Promote safety and health in the community as well as fair access to housing, municipal services, community facilities, education facilities and economic opportunity.**

The Plan addresses the need for social fairness by ensuring that all Burlington residents have equal access to housing in different areas by offering transit service to many employment areas and by maintaining a wide range of *community facilities*. The Plan addresses land use and *infrastructure* issues in order to promote health and safety within the City.

Intensification **h) Promote the efficient use of land through *intensification* within appropriate areas of the City, in accordance with Provincial growth management objectives, while recognizing the need for balancing this objective with other planning considerations.**

OPA 55

The Plan addresses the need to promote the *intensification* of residential and other land uses in the Urban Planning Area, the Settlement Areas, the Central Sector of the North Aldershot Planning Area, and to a limited extent in the East and West Sectors of the North Aldershot Planning Area, to fulfill Provincial Growth management objectives. However, the Plan also recognizes that the extent and type of *intensification* must be evaluated in light of other important planning considerations, such as the protection of the natural environment, health and safety and the need for *compatibility* with existing *residential neighbourhoods*.

Downtown Urban Growth Centre **The boundary of the Downtown Urban Growth Centre, referred to in the “Places to Grow” - Growth Plan for the Greater Golden Horseshoe, 2006, has been identified on Schedule B and Schedule D of this Plan. It is anticipated that much of the residential and employment *intensification* will occur within this area. The boundary of the Downtown Urban Growth Centre and the associated policies, *may* be refined as the Province develops more detailed policies to implement the growth plan and as a result of a municipal conformity exercise.**

OPA 55

## 4.0 LAND USE VISION

### 4.1 Background

Enhance City's character

The land use vision considers both a view of the physical landscape of Burlington in the future and a view of how the City will be experienced in terms of its quality of life. The vision is based on the mission statement of directing growth in a manner that enhances the City's character while providing a broad range of opportunities for its residents and businesses. The eight guiding principles provide further direction on the image to be created for the City in the future.

### 4.2 The Present Built Form and Natural Environment \*D53

Suburban community

The existing City structure is a typical suburban community. Burlington is composed mainly of *residential neighbourhoods* containing detached dwellings, separated from employment and shopping areas, and designed primarily around a transportation system based on automobile travel. Much of this *development* occurred in the 40 years following the end of the Second World War in a time of increasing average family size, increasing personal affluence and economic growth. This *development* reflected the belief that there were few limits to growth and reflected the abundant supply of developable land available at the time.

A Sustainable Development Community

A major shift has occurred in values and attitudes, demographics, and land use planning approaches, as the City approaches a mature state. Burlington residents are now more aware of environmental concerns, and limited resources. This awareness was apparent when the City was declared a "sustainable community" in 1989, with greater emphasis placed on quality of life issues and less on unlimited growth. Changes in demographic trends show an increasing number of smaller households and an aging population. In view of these changes, a different vision for the City has emerged. This vision anticipates that some aspects of the City structure will stay the same, however there will be changes in other areas, which are designed to increase opportunities for Burlington's residents and enhance their quality of life. As Burlington approaches a mature state, a significant amount of its future growth will be in the form of *intensification* and *re-development* within the existing urban boundary. With fixed urban boundaries as confirmed by the Provincial Greenbelt Plan, the challenge will be to accommodate the various demands for land while maintaining stability and *compatibility*.

OPA 55

**4.3 The Future Built Form and Natural Environment**

Stable neighbourhoods, Downtown and green space	Structural features that are expected to stay the same over time include: maintaining a variety of stable <i>residential neighbourhoods</i> ; an historic central downtown focused on the waterfront; <i>development</i> of employment areas along the Queen Elizabeth Way, Highway 403 and Highway 407 corridors; a variety of shopping areas to meet local and visitor needs; and an abundance of green space.	OPA 3 OPA 7 OPA 55
Key changes	Changes that are encouraged by this Plan are: i) the <i>development</i> of a greater diversity of housing types to meet the changing needs of the population; ii) the <i>development</i> of a more self-contained city by encouraging a greater live-work relationship and supporting designation of lands for a wide variety of <i>employment uses</i> ; iii) the focusing of more intense land uses into specified mixed use centres and along certain roads; iv) a move towards a more balanced transportation system; and v) a greater emphasis on the long term preservation and conservation of significant natural features with greater public access particularly to the waterfront and reasonable and responsible access to other areas. These changes, discussed in more detail below, will evolve gradually and will be designed to maintain the positive aspects of the City's neighbourhoods.	
Significant growth anticipated	Demographic and economic trends project continued increases in both population and the number of employees over the next twenty years. The Plan addresses how and where this growth can be best fostered.	
Shift in employment	The Plan also responds to the changes in the nature of the employment sector reflected by the addition to the traditional manufacturing and warehouse industrial sectors, of more information based technology, research and services. Future land use policies and designations aim to support existing businesses and provide opportunities for new jobs. This will promote the fiscal stability of the City and provide residents with an alternative to commuting beyond Burlington for work. Developing a strong live-work relationship is a key element of the land use vision.	
Direct growth to specific locations	The Plan directs population growth towards underutilized or vacant parcels in existing communities; to the Alton community in northeast urban Burlington; to certain mixed use corridors; and to the two mixed use centres: the Downtown and the Uptown.	OPA 31
Compact housing	To meet the needs of the changing population as shown by smaller households, an aging population, alternative family units and a broader range of income levels, and in response to greater environmental awareness and fiscal restraints, new residential growth will be mainly in the form of more compact housing. This <i>development</i> will be served by various <i>modes</i> of transportation and located in closer proximity to jobs, shopping and leisure areas.	

---

---

## PART I - POLICY FRAMEWORK

---

---

Broader mix of housing	The Plan encourages a broader mix of residential dwellings in terms of type, size, cost and ownership. Most residential <i>development</i> will be in <i>low and medium density</i> land use designations with some sites designated for <i>high density development</i> . While <i>infill developments</i> will be encouraged on vacant and under-utilized lands in existing neighbourhoods, the Plan provides that preservation and enhancement of the quality of life features of neighbourhoods must be considered in the review of any new and/or <i>intensified development</i> proposals in these areas.	
Transit and pedestrian oriented development	Provision of residential support services and amenities are a priority of the Plan. New residential <i>developments</i> will be planned considering all forms of travel and be supportive of safe pedestrian and vehicular movement with convenient connections to <i>employment areas</i> , neighbourhood shopping areas, public open spaces and recreational facilities, schools, churches and other institutional uses. The goal is to promote a sense of community identity that will continue to make Burlington a desirable place to live.	
Commercial development	The City will also maintain a variety of commercial uses to meet the needs of its residents, businesses and visitors. Commercial <i>developments</i> will be designed to integrate with surrounding uses, with particular attention focused on the design of neighbourhood shopping areas to promote safety, convenience and accessibility. <i>Regional commercial</i> areas, large retail uses, <i>community commercial</i> areas, and specialized retail uses will be considered in certain locations where supported by market studies, adequate levels of service and land use <i>compatibility</i> . Commercial <i>development</i> will also be allowed in the Mixed Use Centre and Mixed Use Corridor locations.	
Employment areas	Business growth will be concentrated along the Queen Elizabeth Way, Highway 403 and Highway 407 corridors, and in the two designated mixed use centres: Downtown and Uptown.	OPA 7 OPA 31
Downtown Mixed Use Centre	Burlington's historic Downtown is to maintain its role as the city centre. Special attention will be focused on this area to revitalize it as a traditional "people place" Downtown. This will involve encouraging retail and office <i>development</i> along the core streets, particularly Brant Street, basing government activities in this area, maintaining good quality housing stock, encouraging residential <i>development, re-development</i> and <i>intensification</i> in areas where appropriate, and providing a stronger link to the waterfront.	
Uptown Mixed Use Centre	The Uptown Mixed Use Centre recognizes the surrounding community, and will contain medium and high density, low rise <i>development</i> . Uptown is connected to other parts of the City by a Mixed Use Corridor running along Appleby Line. This Mixed Use Centre will contain a high proportion of residential land use, tied to commercial <i>development</i> at the intersection of Upper Middle Road and Appleby Line. Uptown will also provide office and industrial <i>employment uses</i> . It is expected that the Uptown Mixed Use Centre will have a total population of between 4,000 and 4,500 people.	OPA 55

---

---

## PART I - POLICY FRAMEWORK

---

---

Orchard Community	<p>The Orchard Community comprises several <i>residential neighbourhoods</i> developed with a full range of housing forms, community services and facilities and other complementary land uses. The Orchard Community is expected to have a total population of approximately 13,000 people. The overall number of dwelling units anticipated at full build-out is between 4,000 and 5,300. The overall housing mix anticipated is approximately 60 percent <i>low density</i>, 25 percent <i>medium density</i> and 15 percent <i>high density</i>. <i>Development shall be guided by the Orchard Community Secondary Plan.</i></p>	OPA 55
Alton Community	<p>The Alton Community is located north of Dundas Street, west of Bronte Creek and south and east of Highway No. 407. Alton is intended to be a mixed use community with <i>employment uses</i> concentrated along the south side of Highway No. 407, at the interchanges of Highway No. 407 with Dundas Street and Appleby Line, and along the railway corridor. The employment areas will provide opportunities for showcase and <i>gateway type development</i> as well as large land bases that will accommodate a wide range of office and industrial uses. Employment and residential uses <i>may</i> be located close to each other, with the guidance of urban design and land use <i>compatibility</i> standards. Mixed <i>residential neighbourhoods</i>, integrated with community uses and commercial <i>developments</i> are located predominantly in the central and western portion of the community. A transit corridor with higher density housing along each side will run through the centre of the residential area. The Alton Community is expected to have a total population of approximately 10,300 people and provide approximately 7,250 employment opportunities. <i>Development shall be guided by the Alton Community Secondary Plan.</i></p>	OPA 3
Preservation of natural features	<p>Another change to the City is the increased emphasis placed on the protection, preservation and conservation of significant natural resource features and providing accessibility to public open space along the waterfront. The Plan's "Greenlands" designation, much of which is found primarily on privately owned lands, recognizes the importance of the long-term preservation of significant natural resource features.</p>	
Integrated transportation system	<p>The City's transportation system will also gradually change. This Plan supports <i>development</i> of an integrated transportation system consisting of roads, public transit, pedestrian walkways and sidewalks and bikeways. While the automobile will remain the primary <i>mode</i> of transportation in the City, other forms of transportation will be encouraged to reduce congestion and improve environmental conditions. Land use decisions will coordinate transportation planning decisions so that higher density, mixed use and compact <i>developments</i> will be located where they can be well served by a safe, convenient and balanced transportation system.</p>	

---

---

## PART I - POLICY FRAMEWORK

---

---

Rural Area	This Plan supports previous planning approaches in terms of designating distinct urban and rural areas. <i>Development</i> in the Rural Planning Area will remain restricted to existing Rural Settlement Areas. Preservation of significant natural features, particularly the Niagara Escarpment, and promotion and protection of agricultural operations and aggregate resources and operations are supported by this Plan.
Agricultural operations	Existing agricultural operations are a permitted use in all land use designations outside of the Urban Planning Area. Within the Urban Planning Area, agricultural uses are encouraged and permitted as interim uses until the lands are required for the orderly phasing of urban <i>development</i> .
Land Use vision	The land use vision for the City of Burlington describes how the City will look and function in the future. It seeks to maintain a strong network of <i>residential neighbourhoods</i> , a diverse economic base, a sound <i>infrastructure</i> system and a community that is fiscally stable and environmentally sensitive to ensure an attractive, healthy and liveable environment for future generations. The Functional and Land Use policies that follow provide the means of implementing the future land use vision.

### 5.0 CONTEXT OF THE PLAN

#### 5.1 Overview

Repeal and replace	This document constitutes the Official Plan (the "Plan") for the City of Burlington. This Plan amends the new Plan adopted by the City in 1994 and approved in 1997, as subsequently amended thereafter. The Plan has been prepared and enacted to comply with <u>The Planning Act</u> of Ontario.
--------------------	--

OPA 55

Implementation	Implementation of the Plan will be through means of the powers conferred upon the City by <u>The Planning Act</u> , <u>The Municipal Act</u> , <u>The Town of Burlington Act</u> and other Provincial statutes and regulations that may apply. These means include the enactment of by-laws, conditions of approval on <i>development</i> , the construction of public works and the acquisition of lands.
----------------	--

#### 5.2 Purpose

Guide physical development	<u>The Planning Act</u> defines an Official Plan as a document containing objectives and policies established primarily to manage and direct the physical <i>development</i> of a municipality having regard for relevant social, economic and environmental matters.
----------------------------	---

Long-term vision	The purpose of the Plan is to outline a long-term vision of the community and quality of life for Burlington residents through statements of principles, objectives and policies. The Plan provides policy direction to the public and private sectors on land use, <i>development</i> and resource management matters to guide the future planning and <i>development</i> of the City of Burlington towards the desired community vision.
------------------	--

**5.3 Jurisdiction \*D53**

Senior  
Government  
policies

Burlington's Official Plan must conform to Provincial land use plans and regulations and to the Region of Halton Official Plan and must also be consistent with Provincial Policy Statements and Guidelines. The Plan has been prepared to meet these requirements within the context of both existing and emerging planning policies and initiatives. Burlington's Official Plan policies reflect the City's individual community interests within the Provincial and Regional planning frameworks. In this manner the Plan *may* be more restrictive than the policies contained in Provincial and Regional Government planning documents but is not permitted to conflict with these documents.

External policies and plans that will be referred to in conjunction with any interpretation or amendment of the City of Burlington Official Plan are:

- a) any Provincial Policy Statement issued by the Province of Ontario, as amended from time to time, subject to requirements under The Planning Act;
- b) Provincial Land Use Plans, including specifically The Niagara Escarpment Plan, the Provincial Greenbelt Plan (2005), the “Places to Grow” Growth Plan for the Greater Golden Horseshoe (2006), the Parkway Belt West Plan, and any applicable amendments;
- c) the Region of Halton Official Plan, and any applicable amendments; and
- d) other government agencies' policies and plans, where applicable.

OPA 55
