Dear Resident/Business

Re: Harvester Road Sidewalk Construction
Contract: ES-21-05

File No.: 570.02-937

The City of Burlington is completing the construction of a new concrete sidewalk on Harvester Road from Walker's Line to Appleby Line and from the South Service Road intersection beyond Appleby Line to Century Drive. This new concrete sidewalk will be constructed on the North Side of Harvester Road. The project is expected to take three (3) months to complete and is tentatively expected to begin in July 2021.

The creation of a new concrete sidewalk along the North Side of Harvester Road is going to create some disturbances at the driveway entrance to your business. The sidewalk is to be constructed across all the driveways inside of the project area and create access restrictions while the work is being completed. In order to install this new sidewalk, driveways will need to be regraded to match the new sidewalk and create a smooth transition. In order to mitigate and reduce these disturbances to your business as much as is possible during our construction project, please send the following information to robert.stuart@burlington.ca:

- Your hours of operation
- Number of accessible driveway entrances
- Requirements and timing of typical deliveries to your business, including type/size of trucks that require access.

Please send this information to me no later than May 10th, 2021.

Thank you for your co-operation.

Sincerely,

Rob Stuart
Project Manager
Engineering Services, City of Burlington
