

**Appleby Line and Harvester Road – Road Improvements
Municipal Class Environmental Assessment**

Notice of Public Information Centre

The City of Burlington and Region of Halton are conducting a Class Environmental Assessment (Class EA) study on the reconstruction of the Appleby Line and Harvester Road intersection. The study will address the impacts of the expected increase in traffic on the operation of the intersection and surrounding road network. The study area covers a distance of about 1.2 km along Harvester Road from Zelco Drive to Century Drive and approximately 300 m north and south of the intersection on Appleby Line.

This study will be conducted as a “Schedule C” project following the Municipal Engineers Association “Municipal Class Environmental Assessment” (October 2000, as amended in 2007 and 2011), which will address Phases 1 through 4 of the Class EA Process. A problem statement will be documented and a number of alternative solutions will be identified, evaluated, and presented for public review and comment. The outcome of the study will be a preferred solution that minimizes the impacts on the natural, social, cultural, and economic environments.

Study Area

Consultation with the public is a key component of this study. A Public Information Centre (PIC) will be held for the public and interested stakeholders (land owners and regulatory agencies) to review and discuss issues related to the study. The PIC will be held:

**Tuesday, Nov. 12, 2013
Robert Bateman High School
5151 New St., Burlington, Ontario, L7L 1V3
6 to 8 p.m.**

We Want to Hear From You

We welcome any comments or input that you may have about this study. Comments and information regarding the study are being collected to assist the City of Burlington and Region of Halton in meeting the requirements of the Environmental Assessment Act. This material will be maintained on file for use during the study and may be included in study documentation.

If you require further information, would like to be added to the study mailing list, or have comments related to this study, please contact either of the following project managers:
