

LaSalle Park Marina Wave Break Study

NOTICE OF PUBLIC MEETING

The City of Burlington is holding a Public Information Centre (PIC) to obtain feedback on different design options for the preferred wave break alternative identified at the previous PIC held on May 15, 2012. This is the second and final PIC for the LaSalle Park Marina wave break study.

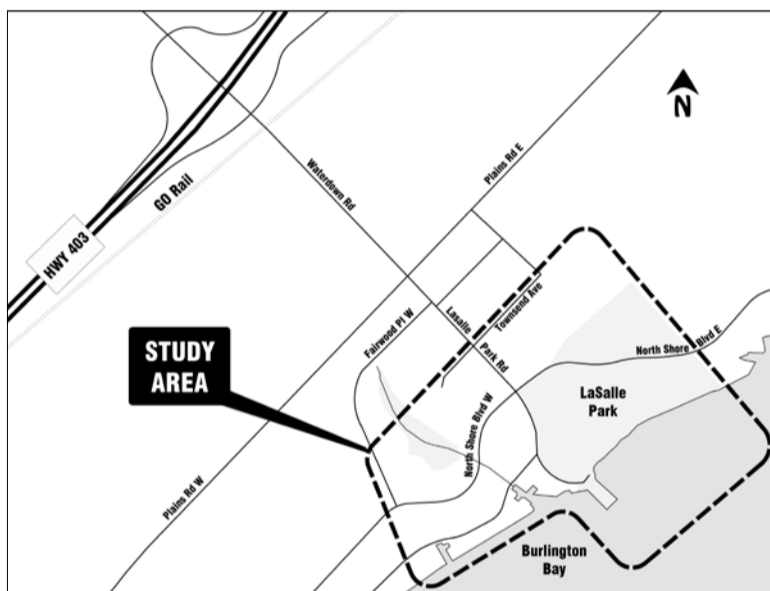

The marina is home to the LaSalle Park Marina Association and the Burlington Sailing and Boating Club. It also houses a public launch ramp and is one of the few accessible marinas in Hamilton Harbour.

A floating wave break is currently used to protect boats in the marina from waves. The system is insufficient during high winds. This study is looking at ways to manage waves at the marina.

The study is being conducted in compliance with the Municipal Engineers Association "*Municipal Class Environmental Assessment*," as a "Schedule C" project and will address all phases of the Class Environmental Assessment Process.

When: Tuesday, August 21, 2012
6:30 to 8:30 p.m.

Where: LaSalle Park Pavilion
50 North Shore Blvd.

Consultation is a key aspect of the study and your input is important. If you can't attend the meeting, please visit:

www.burlington.ca/LaSalle-wave-break.

Here you will find information from the previous public meeting as well as answers to frequently asked questions (FAQs).

Comments and information regarding the study are being collected to assist the city in meeting the requirements of the Provincial Environmental Assessment Act. Comments received will be maintained on file for use during the study and may be included in study documentation.

We would like to hear your comments and questions related to this study. Please contact either of the following with your input by Sept. 7, 2012:

Mr. Doug Pladsen
Recreation Planner - Community Development
