

LaSalle Park Marina Wave Break Study

NOTICE OF PUBLIC MEETING

The City of Burlington is holding a public meeting and open house to obtain feedback on different options identified in the recently commenced LaSalle Park Marina wave break study. The city is evaluating ways to manage waves at the marina, including consideration of a fixed wave break.

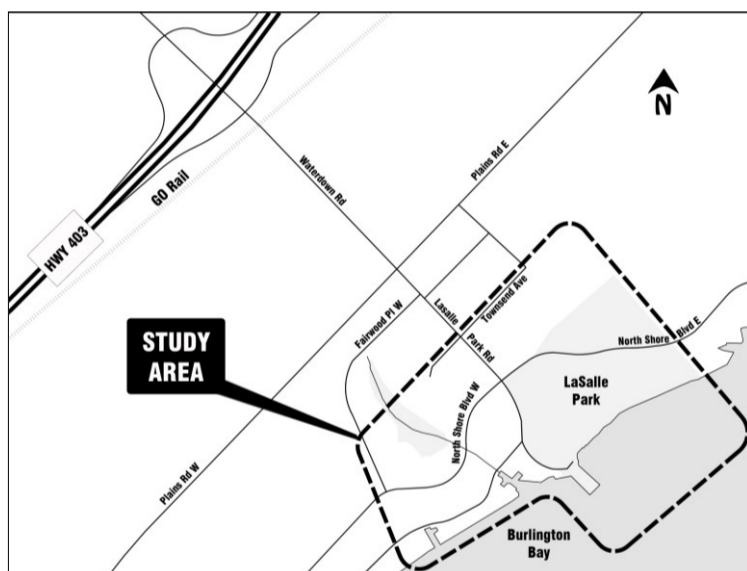

The marina is home to the LaSalle Park Marina Association and the Burlington Sailing and Boating Club. It also houses a public launch ramp and is one of the few accessible marinas in Hamilton Harbour.

A floating wave break is currently used to protect boats in the marina from waves. The system is insufficient during high winds.

The study area is bounded by LaSalle Park in the east, Aldershot Place/Townsend Avenue in the north, Fairwood Place West in the west, and Lake Ontario in the south (see map).

When: Tuesday, May 15, 2012
6:30 to 8:30 p.m.

Where: LaSalle Park Pavilion
50 North Shore Blvd.

Consultation is a key aspect of the study and your input is important. If you can't attend the meeting, please visit www.burlington.ca/LaSalle-wave-break

The study will be conducted in compliance with the Municipal Engineers Association "Municipal Class Environmental Assessment," as a "Schedule C" project and will address all phases of the Class Environmental Assessment Process.

Comments and information regarding the study are being collected to assist the city in meeting the requirements of the Provincial Environmental Assessment Act. Comments received will be maintained on file for use during the study and may be included in study documentation.

We would like to hear your comments and questions related to this study. Please contact either of the following with your input by May 30, 2012:
