RE: 452 Locust Street Addition of Two Residential Floors

As per your request dBA Acoustical Consultants Inc. has been requested to issue a letter to confirm that the addition of two more residential floors would impact the noise study submitted to the City of Burlington for approval. The increase of floors would benefit the area residents as the proposed rooftop HVAC Units would be higher than the peak of the rooftop of nearest residential townhouses and have no noise impact on the neighbours. The noise mitigation measures required for the rooftop HVAC Units would still be required as noted in the approved noise study.

Should you require further information please feel free to contact the writer.

Respectfully submitted,
dBA Acoustical Consulting Inc.

A handwritten signature in black ink, appearing to read 'Frank Westaway', is written over a horizontal line. The signature is fluid and cursive.
