1.0 Executive Summary

Alinea Land Corporation (Client) retained Cambium Inc. (Cambium) to complete a Phase One Environmental Site Assessment (ESA) at Bronte Creek Meadows in Burlington, Ontario (Site or Phase One Property). The municipal addresses of the Site are 5164, 5366, 5470 and 5900 Upper Middle Road and 5201 Mainway in Burlington, Ontario. The Phase One ESA was completed to meet the requirements of Ontario Regulation (O.Reg.) 153/04 to support a Site Plan Approval application.

The roughly 126 hectare (312 acre) Site is located southeast of Upper Middle Road, southwest of Burloak Drive and northwest of Mainway in Burlington, Ontario. The first developed land use at the Site was for agricultural/residential operations prior to 1934.

The Phase One ESA identified thirty-four potentially contaminating activities (PCAs), four on-site and thirty off-site, within the phase one study area. The off-site PCAs are not considered to result in areas of potential environmental concern (APECs) at the Phase One Property given the nature of operations, their distance from the Phase One Property and/or their down-gradient or cross gradient location. The four on-site PCAs related to fill of unknown quality and agricultural operations contributed to four APECs at the Site. The related contaminants of potential concern (COPCs) were petroleum hydrocarbons (PHCs), volatile organic compounds (VOCs), polycyclic aromatic hydrocarbons (PAHs), metals, hydride-forming metals (antimony (Sb), arsenic (As), selenium (Se)), organochlorine pesticides, cyanide (CN-), hot water soluble boron (B-HWS), hexavalent chromium (Cr(VI)), mercury (Hg), electrical conductivity (EC), and sodium adsorption ration (SAR).

The potentially contaminated media was soil. Groundwater was not deemed to be a media of concern based on the APECs identified.

Based on the observations and information obtained for the site during the Phase One ESA, a Phase Two ESA is required.

2.0 Introduction

The Client retained Cambium to complete a Phase One ESA at the Site. It is understood that the Regional Municipality of Halton and the City of Burlington require the completion of a Phase One ESA for the Site consistent with O.Reg. 153/04 to support a Site Plan Approval application.

2.1 Phase One Property Information

The Site is on the southeast side of Upper Middle Road, the southwest side of Burloak Drive and the northwest side of Mainway, in Burlington, Ontario. Site information and property owner information are summarized below. The Phase One Property location is shown on Figure 1. A plan of survey is provided in Appendix A.

Property use surrounding the Site is as follows:

Northwest – Upper Middle Road followed by residential / commercial (office, dental office, restaurants)

Northeast – Burloak Drive followed by Bronte Creek Provincial Park

Southeast – Mainway followed by industrial / commercial (retail fuel outlet, print shop, etc.)

Southwest – Residential

The Site and surrounding land uses are shown on Figure 2

Site Identification Information

Municipal Address	5164, 5366, 5470 and 5900 Upper Middle Road and 5201 Mainway, Burlington, Ontario
Historical Land Use	Agricultural, residential
Current Land Use	Agricultural
Future Land Use	Mixed commercial and residential/parkland
PIN	07183-0189 07183-0212 07183-0213 07183-1218 07183-1254
Universal Transverse Mercator Coordinates*	Zone 17T 599165 m E, 4805966 m N
Legal Description	Part 1 on 20R-10977, Parts 2 and 3 on 20R-12331, Part 1 on 20R-10140, Parts 1 and 2 on 20R-7372, Parts of Lots 1, 2, 3 and 4, Concession 2 South of Dundas (Township of Nelson); City of Burlington, Regional Municipality of Halton
Site Area	≈126 ha (312 acres)

* The Universal Transverse Mercator measurements were obtained from Google Earth Pro.

Property Owner Information

Property Owner	Contact Information
PIN No. 07183-0189 Paletta Bros. Four Ltd.	Dave Pitblado Director of Real Estate Development Alinea Land Corporation 4480 Paletta Court Burlington, Ontario L7L 5R2 Phone: 905.632.6036 ext. 404 Email: dpitblado@thealineagroup.ca
PIN No. 07183-0212 Qualico Foods (1994) Inc.	
PIN No. 07183-0213 Paletta International (1990) Inc.

PIN No. 07183-1254 2362302 Ontario Inc.	

2.2 Current and Proposed Future Use

The Site is currently vacant and undeveloped. From approximately 1948 to 2013/2014, the Site was used for agricultural/residential purposes, with woodland and two watercourses (Sheldon Creek and a tributary of Bronte Creek).

Cambium understands the Client intends to develop the Site for residential, commercial, community and parkland land uses.

3.0 Scope of Investigation

This Phase One ESA was completed as specified in Schedule D of O.Reg. 153/04 and follows the mandatory reporting requirements stipulated in Table 1 of the schedule. This Phase One ESA included the following:

- A review of pertinent background and historical information including documents such as aerial photographs and topographic maps (as available)
- Review and summary of available environmental records obtained for the Site from the client and/or public and private sources
- Interviews with persons knowledgeable of the Site and adjacent properties and freedom of information requests
- A site reconnaissance including visual observation of properties within the phase one study area from publicly accessible areas
- Preparation of this report documenting the findings of the Phase One ESA and recommendations for further work, if required, to assess the environmental condition of the Site

This Phase One ESA report describes the methods used to document and identify PCAs associated with the Site and neighbouring properties within the phase one study area. While this report considers said environmental concerns, both past and present, it is limited by the availability of information obtained at the time of the assessment. No subsurface investigation or sampling was completed as part of the Phase One ESA.

4.0 Records Review

This assessment was based on a review of the following records. A detailed list of sources referenced in this Phase One ESA is presented in Section 9.0.

- Aerial photographs
- Business directories
- Chain of Title
- Fire insurance plans (FIPs) and property underwriters' reports
- An Environmental Risk Information Services Ltd. (ERIS) search of numerous provincial, federal, and private databases
- Ministry of the Environment, Conservation and Parks (Ministry) records
- Technical Standards and Safety Authority (TSSA) records
- Available reports, maps, and other information

4.1 General

4.1.1 Phase One Study Area Determination

O.Reg. 153/04 defines the phase one study area as the area that includes the Phase One Property, any other property that is located, wholly or partly, within 250 m from the nearest point on the phase one property boundary, and any property that the Qualified Person (QP_{ESA}) determines should be included as a part of the phase one study area.

Based on a review of current and historical land uses at the Site and surrounding properties, topography, and groundwater flow direction, the QP_{ESA} considered the area within 250 m from the property boundary sufficient to identify PCAs and APECs.

4.1.2 First Developed Use Determination

The first developed use of the Phase One Property is defined by O.Reg.153/04 to be the earlier of (a) the first use of a Phase One Property in or after 1875 that resulted in the

development of a building or structure on the property, and (b) the first potentially contaminating use or activity on the Phase One Property.

A review of aerial photographs, business directories, FIPs, and property ownership information was completed to determine the first developed land use for the Site. The chain of title review and aerial image review, which provided the oldest available property information, indicated that the Site was used for agricultural/residential operations prior to 1934.

4.1.3 Fire Insurance Plans

Cambium requested FIPs, inspection reports, and plans from Opta Information Intelligence (Opta). No records were available for review.

4.1.4 Chain of Title

A Chain of Title dating back to 1817 was reviewed to support the determination of first developed land use for the Site and identify PCAs. Copies of the Chain of Title documents are provided in Appendix C. Property ownership and use details are presented in Table 1 to Table 5.

The chain of title review identified the following:

- Various portions of the Phase One Property were first transferred from Crown between 1817 and 1846.
- There are permanent easements over the north portion of the Phase One Property for natural gas pipelines now owned by Enbridge and for an electric corridor. The natural gas easement was established in 1957. The electrical easement was established in 1954.

At the time of this report, the Phase One Property was owned by the following:

No pertinent listings contributing to PCAs were identified.

4.1.5 Environmental Reports

Cambium made appropriate inquiries to obtain copies of the following reports prepared in respect of all or part of the Site by or on behalf of a current or former owner respecting

environmental conditions at the Site as listed in Schedule D, paragraph 4, subsection 3 (2) of O.Reg. 153/04:

- ESA reports
- Remediation reports
- Reports prepared in response to an order or request from the Ministry
- Reports relating to the presence of a contaminant on, in, or under the Site, or the existence of an APEC

No previous environmental reports were provided for Cambium to review.

4.2 Environmental Source Information

Cambium made inquiries appropriate to obtain reasonably accessible records pertaining to the Site, including the following, as listed in Schedule D, paragraph 7, subsection 3 (2), of O.Reg. 153/04:

- National Pollutant Release Inventory information maintained by Environment Canada
- Polychlorinated biphenyl (PCB) information maintained by the Ministry
- Certificates of approval, permits to take water, certificates of property use or similar instruments related to the environmental condition of the phase one property and any property on, under or adjacent to the phase one property and issued pursuant to an Act administered by the Ministry, whether in force or not
- The *Inventory of Coal Gasification Plant Waste Sites in Ontario* (MOE, 1988b) and the *Inventory of Industrial Facilities Producing or Using Coal Tar or Related Tars in Ontario* (MOE, 1988a)
- Records concerning environmental incidents, orders, offences, spills, discharges of contaminants or inspections maintained by the Ministry where the incident, order, offence, spill, discharge or inspection affects the phase one property and any property on, under or adjacent to the phase one property

- Waste management records, including current and historical waste storage locations and waste generator and waste receiver information maintained pursuant to Regulation 347 of the Revised Regulations of Ontario, 1990 (General — Waste Management) made under the Act, or its predecessors with respect to the Phase One Property and any property on, under or adjacent to the Phase One Property
- Reports submitted to the Ministry related to the environmental conditions of the Phase One Property and any property on, under or adjacent to the Phase One Property
- Retail fuel storage tanks information maintained by the Technical Standards and Safety Authority
- Notices and instruments, including Records of Site Condition (RSCs), posted in the Environmental Registry
- Identification of areas of natural significance maintained by the Ministry of Natural Resources and Forestry
- Landfill information maintained by the Ministry - *Waste Disposal Site Inventory* (MOE, 1991)

4.2.1 City Directories

Cambium conducted a review of city directories for the Phase One property and neighbouring properties. Directories were reviewed in about 5 year increments from 1960 to 2010 at Library and Archives Canada in Ottawa, Ontario. Based on Cambium's review of city directories, the following was noted for the Phase One Property:

- 5164 Upper Middle Road was listed as residential from 1965 to 1995.
- 5470 Upper Middle Road was listed as residential from 1965 to 1980.
- Upper Middle Road was not listed in the 1960 city directory.

The majority of the surrounding properties were listed as residential with the following notable exceptions:

- Suncor Energy was listed at 5600 Mainway in 2010. This property is located approximately 30 m southeast and down-gradient of the Site. Based on the 2023 aerial photography, the pump islands are located approximately 50 m southeast of the Site and the UST nest is located approximately 75 m southeast of the Site (inferred down-gradient). This operation is a PCA. Based on the distance of the pump island and UST nest from the Site, this PCA does not represent an APEC at the Phase One Property.

A summary of the directory listings for the Site and surrounding properties is included in Appendix D.

4.2.2 ERIS Data

ERIS is a private environmental database and information service company. Cambium contracted ERIS to provide a database report for the phase one study area (ERIS, 2024). The ERIS report summarizes the findings of a search of various federal, provincial, and private source databases for all properties within 250 m from the site boundary. The ERIS report is presented in Appendix E.

On-Site Records

The following environmentally significant records were identified for the Site:

- The Waste Disposal Sites - MOE 1991 Historical Approval Inventory indicated that Site No. A210103 was located on Site. This historical waste disposal site was Class A1 – industrial liquid and hazardous wastes and closed in 1974.
- Anderson's Waste Disposal Sites database indicated that a closed waste disposal site was located north of the gas pipeline, south of Highway 5 (Dundas Street), adjacent to Millcroft Park Drive, near Sheldon Creek.

Based on Cambium's review of aerial photographs and site reconnaissance, no evidence of historical waste disposal activities were observed on-Site. Additionally, based on the information obtained from the Ministry of the Environment, Conservation and Parks through the FOI request, Waste Site No. A210103 is known as the closed Bayview Park Landfill which is

located on the west side of King Road, north of Highway 403 within the City of Burlington, which is approximately 10 km west of the Phase One Property.

Based on the description of the waste disposal site in Anderson's Waste Disposal Sites database, Millcroft Park Drive is located approximately 1 km west of the Phase One Property.

The Site Representative also indicated that the MECP attended the Phase One Property in 2015 following a complaint from a local resident about illegal dumping / waste disposal activities within Sheldon Creek. It is Cambium's understanding that this issue was addressed to the satisfaction of the local district office of the Ministry of the Environment, Conservation and Parks in 2015.

As a result, these waste sites are not deemed to be PCAs for the Phase One Property.

Off-Site Records

The following environmentally significant records were identified for properties within the phase one study area.

<u>Intersection of Mainway and Sutton Drive (15 m down-gradient)</u>

- Two Cs-of-A were issued to Limeside Development in 1989 for municipal water and municipal sewage. Based on the nature of the operations, these Cs-of-A do not represent PCAs.

<u>5600 Mainway (30 m down-gradient)</u>

- A C-of-A and an ECA for industrial sewage works were issued to Suncor Energy Products Inc. in 2007.
- The Delisted Fuel Tanks database indicated that a retail fuel outlet operated at this property as of May 2021.
- The Fuel Storage Tank database indicated that the following USTs were installed at this property in 2006:
    - 3 x 50,000 L double-wall fiberglass UST containing gasoline

  - 2 x 50,000 L double-wall fiberglass UST containing diesel
- Suncor Energy was listed as a generator of hazardous wastes (i.e., light fuels) from 2006 to 2022.

The operations at this property represent a PCA. The pump islands were located approximately 50 m southeast of the Site and the UST nest was located approximately 75 m southeast of the Site (inferred down-gradient). Based on the distance of the pump island and UST nest from the Site, the inferred groundwater flow direction and the lack of spill records presented in the ERIS report, this PCA does not represent an APEC at the Phase One Property.

5480 Mainway (30 m down-gradient)

- Bioshop Canada Inc. was listed in the Chemical Register as a distributor of chemicals. These operations represent a PCA. Based on the nature of the operations (i.e., distributor) and inferred down-gradient location of this property, this PCA does not represent an APEC.

5450 Mainway (30 m down-gradient)

- Hearthland, a wood kitchen cabinet and counter top manufacturer, was listed as a generator of hazardous wastes (i.e., petroleum distillates and aromatic solvents) from 2004 to 2010.
- Infinity Group Construction was listed as a generator of hazardous wastes (i.e., paint / pigment / coating residues, petroleum distillates, organic laboratory chemicals, and waste compressed gases) from 2018 to 2022.

The generation of hazardous wastes at this property represent PCAs. Based on the inferred groundwater flow direction, these PCAs do not represent APECs at the Phase One Property.

5420 Mainway (30 m down-gradient)

- Cs-of-A for air emissions were issued to ALS Canada Ltd. in 2005 and in 2011. ECAs for air emissions were also issued to ALS Canada Ltd. in 2005 and 2011. Based on the nature of the emissions (i.e., to air), these Cs-of-A and ECAs do not represent PCAs at the Phase One Property.
- ALS Canada Ltd. was listed as a generator of hazardous wastes (i.e., halogenated solvents, other inorganic acid wastes, aliphatic solvents, and other specified inorganics) from 2005 to 2015. Based on the nature of the operations (i.e., analytical laboratory), the generation of hazardous wastes by this tenant does not represent a PCA.
- The Ontario Spills database indicated that on September 21, 2010, an estimated 40 L of hydraulic oil was spilled to the asphalt ground surface at this property. Soil contamination was confirmed and the spill was reportedly cleaned. Based on the relatively small quantity of the spill and the downgradient location of the spill, this spill is a PCA but does not represent an APEC at the Phase One Property.

5250 Mainway (30 m down-gradient)

- Invitrogen Canada and Life Technologies Inc. were listed as generator of hazardous wastes (i.e., pathological wastes, organic laboratory chemicals and inorganic laboratory chemicals) from 2007 to 2013.
- Melrose Investments Inc. was listed as a generator of hazardous wastes (i.e., oil skimmings and sludges) from 2018 to 2019.
- Thermo Fisher Scientific was listed as a generator of hazardous wastes (i.e., petroleum distillates, organic laboratory chemicals and inorganic laboratory chemicals) from 2018 to 2022.

The generation of hazardous wastes at this property represent PCAs. Based on the inferred groundwater flow direction, these PCAs do not represent APECs at the Phase One Property.

5330 Mainway (30 m down-gradient)

- Amhil Enterprises, a plastic manufacturer, was listed as a generator of hazardous wastes (i.e., aliphatic solvents and waste oils and lubricants) from 2002 to 2022.
- Amhil Enterprises was listed in Scott's Manufacturing Directory as a plastic manufacturer.
- An ECA was issued to Amhil Enteprises for operation of an exhaust system, cooling towers and natural gas-fired HVAC equipment at 5330 Mainway in 2002.

The plastic manufacturing operations represent a PCA. Based on the inferred groundwater flow direction, this PCA does not represent an APEC at the Phase One Property.

5300 Mainway (30 m down-gradient)

- Konecranes Canada Inc., a machine shop, was listed as generator of hazardous wastes (i.e., petroleum distillates, transfer station oil wastes) from 2014 to 2022.
- Melrose Investments Inc. was listed as a generator of hazardous wastes (i.e., oil skimmings and sludges) from 2018 to 2019.

The machine shop operations and generation of hazardous wastes at this property represent PCAs. Based on the inferred groundwater flow direction, these PCAs do not represent APECs at the Phase One Property.

5200 Mainway (30 m down-gradient)

- CPC Pumps, a machine shop, was listed as generator of hazardous wastes (i.e., waste oils and lubricants, alkaline wastes – other metals, paint / pigment / coating residues, petroleum distillates, light fuels, and emulsified oils) from 2009 to 2022.
- Melrose Investments Inc. was listed as a generator of hazardous wastes (i.e., oil skimmings and sludges) from 2012 to 2019.
- CPC Pumps International Ltd. was listed in Scott's Manufacturing Directory as a pump and compressor manufacturer.

Based on the nature of the operations, the operations at this property are a PCA. Based on the

inferred groundwater flow direction, this PCA does not represent an APEC at the Phase One Property.

1350 Heine Court (115 m down-gradient)

- Normac Adhesive Products Inc., identified as a wholesaler, was listed as a generator of hazardous wastes (i.e., aliphatic solvents, oil skimmings and sludges, waste oils and lubricants, polymeric resins, paint / pigment / coating residues, and petroleum distillates) from 2009 to 2022.
- Normac Adhesive Products Inc. was listed in Scott's Manufacturing Directory as a wholesaler of chemical products.

The chemical wholesaling operations and associated hazardous waste generation represent a PCA. Based on the distance from the Phase One Property and the inferred groundwater flow direction, this PCA does not represent an APEC at the Phase One Property.

1330 Heine Court (175 m down-gradient)

- The Ontario Spills database indicated that on May 20, 2021, approximately 100 L of diesel was spilled at this property. This spill represents a PCA. Based on the distance of this property from the Site and the inferred groundwater flow direction, this PCA does not represent an APEC.

1240 Burloak Drive (90 m down-gradient)

- ALS Laboratory Group was listed as a generator of hazardous wastes (i.e., acid wastes – other metals, light fuels, acid wastes – heavy metals, halogenated solvents, waste oils and lubricants, and aliphatic solvents) from 2008 to 2017. Based on the nature of the operations (i.e., analytical laboratory), the generation of hazardous wastes by this tenant does not represent a PCA.
- Two ECAs for air emissions were issued to Staveley Services Canada Inc. in 2012 for operation of a laboratory fume hood. Based on the nature of the emissions (i.e., to air), these ECAs do not represent PCAs at the Phase One Property.

1220 Burloak Drive (220 m down-gradient)

- The Ontario Spills database indicated that on March 13, 2013, approximately 350 L of transformer oil was spilled at this property. This spill represents a PCA. Based on the distance of this property from the Site and the inferred groundwater flow direction, this PCA does not represent an APEC.
- K.N. Crowder was listed as a generator of hazardous wastes (i.e., oil skimmings and sludges) from 2005 to 2022. The generation of hazardous wastes represents a PCA. Based on the distance of this property from the Site and the inferred groundwater flow direction, this PCA does not represent an APEC.

5275 John Lucas Drive (135 m down-gradient)

- Controlchem Canada was listed in the Chemical Register database.
- Controlchem Canada was listed as a generator of hazardous wastes (i.e., acid wastes – other metals) from 1999 to 2012.
- CPC Pumps International Ltd. was listed as a generator of hazardous wastes (i.e., oil skimmings and sludges) in 2021.
- The Ontario Spills database indicated that on March 29, 2012 a spill was reported for Sheldon Creek. Sheldon Creek was observed to be white. No further details were included in the Ontario Spills database entry. Based on the limited information, this spill does not represent a PCA.

The operations at this property are a PCA. Based on the distance from the Phase One Property and the inferred groundwater flow direction, this PCA does not represent an APEC at the Phase One Property.

5150 Mainway (30 m down-gradient)

- An EASR was issued to Wentworth Tech Inc. in 2017 for air emissions.
- Ductmate Canada Limited was listed as a generator of hazardous wastes (i.e., graphic art wastes) in 2013.

- Irco Automation Inc. was listed as a generator of hazardous wastes (i.e., paint / pigment / coating residues) in 2020 to 2022.
- Mcorp Technologies Inc., a plastic bottle manufacturer, was listed as a generator of hazardous wastes (i.e., waste oils and lubricants) from 2009 to 2018
- Rowhedge Construction Limited was listed as a generator of hazardous wastes (i.e., oil skimmings and sludges) from 2012 to 2019.
- Mcorp Technologies Inc. and MTI Preforms Limited were listed in Scott's Manufacturing Directory as a plastic bottle manufacturer.

The hazardous waste generation and plastic bottle manufacturing operations at this property are PCAs. Based on the distance from the Phase One Property and the inferred groundwater flow direction, these PCAs do not represent APECs at the Phase One Property.

5276 John Lucas Drive (140 m down-gradient)

- Amcast Industrial Ltd., a plumbing warehouse, was listed as a generator of hazardous wastes (i.e., waste compressed gases) from 1995 to 2001.

Based on the nature of the waste generated, the historical generation of hazardous wastes at this property is not a PCA.

5280 John Lucas Drive (185 m down-gradient)

- A C-of-A was issued to Frost Products Limited in 1995 for industrial air emissions associated with operation of a powder curing oven and metal cleaning unit.
- Frost Products Limited was listed as a generator of hazardous wastes (i.e., organic laboratory chemicals, alkaline wastes – other metals, inorganic laboratory chemicals, wastes oils and lubricants, waste compressed gases, acid wastes – other metals, and paint / pigment / coating residues from 1994 to 2022.
- Frost Products Limited was listed in Scott's Manufacturing Directory as a metal fabricator of metal shelves, lockers and partitions.

The metal fabricating operations are a PCA. Based on the distance from the Phase One Property and the inferred groundwater flow direction, this PCA does not represent an APEC at the Phase One Property.

5295 John Lucas Drive (185 m down-gradient)

- Willard Manufacturing Inc., a soap and cleaning compound manufacturer, was identified at this property. These operations and associated hazardous wastes generation represent a PCA. Based on the distance from the Site, this PCA does not represent an APEC at the Phase One Property.
- RAMPF Composite Solutions Inc., a carbon fibre and fibreglass composite manufacturer, was identified at this property. These operations and associated hazardous wastes generation represent a PCA. Based on the distance from the Site, this PCA does not represent an APEC at the Phase One Property.
- Natrix Separations Inc., a fabric coating manufacturer, was identified at this property. These operations and associated hazardous wastes generation represent a PCA. Based on the distance from the Site, this PCA does not represent an APEC at the Phase One Property.

5305 John Lucas Drive (230 m down-gradient)

- Applus RTD Canada, a metal fabrication operation, was identified at this property. These operations and associated hazardous wastes generation represent a PCA. Based on the distance from the Site, this PCA does not represent an APEC at the Phase One Property.

Additional Waste Generators

Several other properties located within the Phase One study area were listed within the O. Reg. 347 Waste Generators database search results as waste generators and are considered PCAs. Details regarding the types of wastes and timeframe of waste generation are provided in the ERIS report in Appendix E. Based on their location and distance relative to the Phase One Property (i.e., greater than 150 m and/or inferred to be hydraulically down-gradient or cross-gradient of the Phase One Property) and/or the types and/or relatively small

quantities of hazardous wastes generated at these properties, the hazardous waste generation at these properties has not resulted in APECs at the Phase One Property.

4.2.3 Coal Gasification Plants

The *Inventory of Industrial Facilities Producing or Using Coal Tar or Related Tars in Ontario* (MOE, 1988a) was reviewed. No industrial facilities producing or using coal or related tars were identified within 1,500 m of the Site.

The *Inventory of Coal Gasification Plant Waste Sites in Ontario* (MOE, 1988b) was reviewed. No coal gasification plant wastes sites were identified within 1,500 m of the Site.

4.2.4 Waste Disposal Site Inventory

The *Waste Disposal Site Inventory* (MOE, 1991) was reviewed. Based on Cambium's review, the following was noted:

- Site A210103 was located at Lot 1, Concession 2 in Burlington. This historical waste disposal site was identified as class A1, indicating an urban waste disposal site accepting industrial liquid / hazardous wastes.

Based on Cambium's review of aerial photographs and site reconnaissance, no evidence of historical waste disposal activities was observed on-Site. Additionally, based on the information obtained from the Ministry of the Environment, Conservation and Parks through the FOI request, Waste Site No. A210103 is known as the closed Bayview Park Landfill which is located on the west side of King Road, north of Highway 403 within the City of Burlington, which is approximately 10 km west of the Phase One Property. As a result, this waste site is not deemed a PCA for the Phase One Property.

4.2.5 Freedom of Information

Freedom of information (FOI) requests were submitted to the Ministry and the TSSA. Responses are summarized below. Copies of the FOI requests and responses, if available, are included in Appendix F.

Ministry of the Environment, Conservation and Parks FOI Results

An FOI request for 5164, 5366, 5470 and 5900 Upper Middle Road and 5201 Mainway was submitted to the Ministry on August 21, 2024. A response to the FOI request was received on September 10, 20242024, indicating that records were found. A review of these records indicated that they were related to waste generator registration for the Halton Catholic District School Board, and MECP inspection records for Permits to Take Water for Nelson Aggregate Company and the Burlington Springs Golf and Country Club. A subsequent FOI request for Lot 2, 3, and 4 Concession 1 and 2 (known historic Lot 2, 3, 4, Conc 2, 3) Nelson, Burlington was submitted to the Ministry and a response was received on November 15, 2024, indicating that records were found. A review of these records indicated that they were related to the closed waste disposal site No. A210103 which was determined to be approximately 10 km from the Phase One Property. No additional PCAs were identified by these records.

TSSA FOI Results

An FOI request for 5164, 5366, 5470 and 5900 Upper Middle Road and 5201 Mainway was submitted on August 21, 2024. The TSSA reported they had no records for fuel storage tanks for the Site. No additional PCAs were identified by these records.

4.2.6 Brownfields Environmental Site Registry

Cambium searched for RSCs and transition notices filed in the Brownfields Environmental Site Registry. No RSCs or Transition Notices were found for the Site or properties within the phase one study area.

4.3 Physical Setting Sources

The following documents were available for review and were used to supplement the information database for this report.

- Historical aerial photographs
- Topography, hydrology, and geology maps (stratigraphic maps, topographic maps, Ontario base mapping (OBM), etc.)

- Areas of Natural or Scientific Interests (ANSI) maps
- Well records

4.3.1 Aerial Photographs

Aerial photographs dated 1934, 1954, 1965, 1979, 1998, 2002, 2010, and 2023 were reviewed to identify the first developed use of the Site and subsequent on-site activities, buildings, structures, PCAs, and APECs, as per Schedule D, paragraph 9, of O.Reg. 153/04. Detailed observations are provided in Appendix G. The aerial photographs are provided as Figure 5 to Figure 11.

Review of the aerial photographs indicated that the Site was developed for agricultural/residential use prior to 1934 including row crops and inferred orchards in the north and northwest portions of the Site. The use of the site for agricultural/orchards would indicate the potential use of OC pesticides on site and would be a PCA. No other PCAs were identified based solely on a review of the aerial photographs.

4.3.2 Topography, Hydrology, and Geology

Review of available topographic mapping indicates that the Site slopes downward locally to the southwest towards Sheldon Creek, and towards the on-site tributary of Bronte Creek. The Phase One study area also decreases in elevation towards Sheldon Creek, with a regional downward slope towards Lake Ontario (City of Burlington, 2024).

The Site is within the Iroquois Plain physiographic region (Chapman & Putnam, 1984), characterized by till and shale plains with drumlinized till. In the general area, the overburden is clay to silt-textured till derived from glaciolacustrine deposits or shale (OGS, 2010). The soils overlie Queenston Formation shale, limestone, dolostone, and siltstone (OGS, 2007). A review of Ministry water well records (MECP, 2024) for boreholes within 200 m of the Site indicated that the local stratigraphy consisted of sand, gravel, silt, and clay till with boulders. Shale bedrock was encountered between 2 to 3 m below ground surface (mbgs) in the Phase One study area. A previous geotechnical investigation indicated that the soil conditions consisted of

topsoil and/or fill material followed by silt and clay, glacial till and shale bedrock. Shale bedrock was encountered between 1.1 and 4.6 mbgs at the Site (MTE Consultants, 2024).

4.3.3 Fill Materials

Residential dwellings and agricultural buildings were historically located in the north and northwest portions of the Site, respectively. These buildings were demolished in the 1990s. The demolition of these buildings could have resulted in the import of fill to the Phase One Property. In addition, a previous geotechnical investigation completed at the Site identified fill material across the Site in the borehole logs (MTE Consultants, 2024). The historical placement of fill is a PCA that contributes to an APEC.

Given the possible presence of fill material at the Phase One Property, potential future development plans should incorporate the appropriate procedures for the characterization of soils that may require off-Site disposal. Further assessment and/or costs may be incurred through re-development of the Phase One Property and/or change in land use scenarios.

4.3.4 Water Bodies and Areas of Natural Significance & Ground Water Information

Sheldon Creek is on the southwest portion of the Site and a tributary of Bronte Creek bisects the central portion of the Site; therefore, the Site is within 30 m of a water body, as defined in O.Reg. 153/04.

Sheldon Creek and the tributary of Bronte Creek flow southeast towards Lake Ontario. Based on the direction of these waterbodies, the general ground water flow direction is inferred to be to the southeast.

The following were reviewed to identify if the Site includes, is adjacent to, or within 30 m of an area of natural significance:

1. Bronte Creek Provincial Park is located approximately 30 m northeast of the Site (Ontario, 2024).
2. The woodlands located along the Sheldon Creek corridor, the Sheldon Creek Woodlot located in the central-southwest portion of the Site, and the woodland located along the

southeast boundary of the Site are considered significant woodlands by the City of Burlington.

As such, the Phase One Property is considered environmentally sensitive under Section 41 (1) of O.Reg. 153/04.

4.3.5 Well Records

A search of the Ministry Water Well Information System by ERIS identified 10 records for on-site water wells and 62 water well records within the phase one study area ranging from about 15 m to 300 m from the Site. The wells were predominantly identified as observation wells, and monitoring and test holes. One water supply well record was identified from 1963.

Stratigraphy in the on-site wells was generally silt or clayey silt to about 2 to 3 mbgs underlain by shale bedrock.

4.4 Site Operating Records

A review of available site operating records is required when the Site is an Enhanced Investigation Property. A property is defined as an Enhanced Investigation Property as per paragraph 32 (1) (b) of O.Reg. 153/04 if it is used, or has ever been used, in whole or in part for an industrial use or for any of the following commercial uses:

- A garage
- A bulk liquid dispensing facility, including a gasoline outlet
- For the operation of dry cleaning equipment

Review of the site history and based on the information provided by the Site representative, the Site is not deemed to be an Enhanced Investigation Property. As such, a review of available site operating records was not completed.

5.0 Interviews

As per O.Reg. 153/04, interviews with persons described below are required in an effort to obtain further information regarding the Site use, occupancy history, and environmental conditions of the Site. This may include the following:

- Persons relevant to meeting the objectives of the Phase One ESA
- Current occupants and/or owners of the Site, or an individual with control of or authority over the owner
- Previous owners and/or occupants
- For industrial/commercial properties, a person that is knowledgeable of the Site activities (to be conducted on-site)
- Where the owner/occupant is not available, at least one owner or occupant of an adjacent property and one provincial or municipal government official, both of whom should be familiar with the Site

Mr. Dave Pitblado, an employee of the property owner provided information regarding the Site operations and history as outlined in Sections 2.2, 4.4 and 6.2.15. Mr. Pitblado has been associated with the property for about 16 years.

As described in Section 4.2.5, FOI requests were submitted to the Ministry and the TSSA for information they may have on file pertaining to the Site. Responses to the FOI requests are documented in Section 4.2.5.

6.0 Site Reconnaissance

6.1 General Requirements

Mr. Rowan Galashan, B.A.Sc. Hons conducted a site reconnaissance on August 19, 2024. At the time of the reconnaissance, the Site was unoccupied. Mr. Galashan also conducted a walk-by of the surrounding properties in the phase one study area to identify potential off-site PCAs that may contribute to an APEC on the Phase One Property. Surrounding properties were viewed from publicly accessible areas.

During the Site reconnaissance, the weather was overcast, windy with no precipitation and approximately 16 degrees Celsius. The entire Phase One Property was accessible, and all aspects of the property were inspected. Information obtained from the site reconnaissance is presented in Section 6.2. Select photographs taken during the site reconnaissance are included in Appendix H.

6.2 Specific Observations at Phase One Property

Cambium made all reasonable attempts to obtain the following information where applicable, as required by Schedule D, subsection 13 (1) of O.Reg. 153/04:

1. A general description of structures and other improvements, including the number and age of buildings
2. A general description of the number, age and depth of below ground structures
3. Details of all tanks, above and below ground, at the Phase One Property, including the material and method of construction of the tank, tank age, tank contents and tank volume, whether in use or not
4. Any potable and non-potable water sources
5. The type and approximate location of underground utility and service corridors, such as sewer, water, electrical or gas lines, located on, in or under the Phase One Property

With respect to the structures and buildings on the Site, none were observed to be present at the time of Cambium's site reconnaissance. As such, no details regarding structures and buildings are included herein.

Inquiries were also made to determine the following

6. Details including locations of current and former wells, including all wells described or defined in or under the *Ontario Water Resources Act and the Oil, Gas and Salt Resources Act*
7. Details of sewage works, including their location
8. Details of ground surface, including type of ground cover, such as grass, gravel, soil or pavement
9. Details of current or former railway lines or spurs and their locations
10. Areas of stained soil, vegetation or pavement
11. Stressed vegetation
12. Areas where fill and debris materials appear to have been placed or graded
13. Potentially contaminating activity
14. Details of any unidentified substances found at the Phase One Property

The following is a description of the various points of investigation noted during the Site reconnaissance conducted for the Phase One ESA. All observations made during the Site reconnaissance are discussed in the following sections in detail regarding any findings that are relevant to identifying PCAs and APECs.

6.2.1 Structures and Other Improvements

There were no buildings or structures present on the Phase One Property at the time of the site reconnaissance. A Bell communications tower was located on the northwest part of the Site with access from Upper Middle Road.

6.2.2 Underground Utility and Service Corridors

An Enbridge natural gas pipeline was observed running parallel to Upper Middle Road through the Site. A Bell communications tower was also observed in the northwest part of the Site, with an inferred underground utility connection. The remainder of the Phase One Property was undeveloped and there were no known underground utilities.

6.2.3 Storage Tanks – Above Ground and Underground

No evidence of ASTs or USTs was observed and TSSA records identified no USTs on the Site. Evidence of USTs was observed off-site at a Petro Canada gas station located approximately 50 m south-east of the Site, across the Mainway.

6.2.4 Oil/Water Separators

No oil/water separators were observed or reported at the Site.

6.2.5 Potable Water Sources

The phase one study area is municipally serviced for drinking water by the Regional Municipality of Halton. No drinking water wells were observed on the Site and no records of drinking water wells at the Site were identified by the records review.

6.2.6 Entry and Exit Points

The Site was accessible at the northwest corner via a parking lot for the Corpus Christi Catholic Secondary School and at the northwest side of the Site off Upper Middle Road via an access driveway to a Bell communications tower located on the Site.

6.2.7 Heating and Cooling Systems

No heating or cooling systems were observed or reported at the Site.

6.2.8 Drains, Pits, and Sumps

No sumps, drains, pits, or lagoons were observed or reported at the Site.

6.2.9 Unidentified Substances

No unidentified substances were observed or reported at the Site.

6.2.10 Current and Former Wells

Ten groundwater monitoring wells were observed across the Site that were installed as part of the previous geotechnical investigation completed at the Site (MTE Consultants, 2024). No potable drinking water wells were identified at the Site.

6.2.11 Septic Fields

No septic fields were observed or reported at the Site.

6.2.12 Ground Surface Conditions

Ground surface conditions at the Site consisted of fallow agricultural land with a mix of vegetated patches throughout the Site. A gravel access route was observed in the northwest portion of the Site leading to a Bell communications tower located on the Site.

Two creeks were identified on the Site flowing southeast towards Mainway, one running through the center of the site (a tributary of Bronte Creek) and the other running through the southwest portion of the Site (Sheldon Creek). Three woodlots were observed on the Site, as follows:

- Along the southwest portion of the Site around Sheldon Creek
- Along the southeast portion of the Site near Mainway
- Sheldon Creek Woodlot (an environmentally protected area by the City of Burlington). Cambium notes that Sheldon Creek Woodlot is excluded from the Phase One Property.

6.2.13 Railway Lines or Spurs

No evidence of current or historical rail lines were observed on Site.

6.2.14 Stained Soil, Vegetation, or Pavement

No evidence of stained soil, vegetation, or pavement was observed on Site.

6.2.15 Stressed Vegetation

No areas of stressed vegetation were observed on the Site. The site representative, Mr. Dave Pitblado, indicated that the agricultural fields on-site were left fallow to permit field investigations as part of the proposed development.

6.2.16 Fill and Debris Materials

No evidence of fill material was observed on the Site. The previous geotechnical investigation completed at the Site identified fill material in the borehole logs (MTE Consultants, 2024). The identification of fill of unknown origin on the Site is a PCA.

6.2.17 Unidentified and Other Hazardous Substances

No unidentified substances were observed at the Site.

6.2.18 Adjacent Land Uses and Environmental Concerns

Property use surrounding the Site was as follows:

Northwest – Upper Middle Road followed by residential / commercial (office, dental office, restaurants)

Northeast – Burloak Drive followed by Bronte Creek Provincial Park

Southeast – Mainway followed by industrial / commercial (retail fuel outlet, print shop, etc.)

Southwest – Residential

A Petro Canada gas station was observed about 50 m southeast of the Site at 5600 Mainway and was previously identified as a PCA.

Two oil-cooled transformers were observed at the property located at 5510 and 5540 Mainway. This property is located approximately 30 m southeast and downgradient of the Site. Based on

the distance and the inferred groundwater flow direction, this PCA does not represent an APEC at the Phase One Property.

The Site and surrounding land uses are shown on Figure 2.

6.2.19 Enhanced Investigation Property

Review of the Site history indicated the Site is not an Enhanced Investigation Property.

6.3 Written Description of Investigation

This Phase One ESA included a review of historical documents, an interview with a person knowledgeable about the historical and current uses of the Site, and a site reconnaissance to observe existing site conditions.

A reconnaissance of the Site was conducted to examine the exterior portions of the Site. The presence / absence of mechanical equipment (including heating and cooling systems) was documented, as was any evidence of USTs and ASTs. The exterior of the Site was examined for evidence of utilities and related infrastructure; water wells; site drainage and related infrastructure; stained areas; stressed vegetation; and, evidence of fill material.

The reconnaissance included an examination of all properties within the phase one study area from public access ways to document and characterize PCAs, water bodies, and areas of natural significance.

Further to the description of the investigations outlined above, the findings that are relevant to the existence of an APEC or PCA are described in Section 7.0.

7.0 Review and Evaluation of Information

7.1 Current and Past Uses

The first identified use of the Site was for agricultural/residential purposes based on available aerial photography, city directories, and land titles before 1934. The current land use is agricultural or other use, with the majority of the Site used for row crop agriculture and the remainder consisting of Sheldon Creek, a tributary of Bronte Creek and woodlands.

For information on the current and past uses and ownership refer to Table 1 through Table 5 and the Chain of Title report included as Appendix C.

7.2 Potentially Contaminating Activity

Cambium reviewed information available for the phase one study area to identify environmental issues normally assessed in a Phase One ESA. The Phase One ESA identified thirty-four PCAs (four on-site and thirty off-site) within the phase one study area. Refer to Table 6 for further description of the identified PCAs and Figure 3 for locations of the identified PCAs.

The following PCAs contribute to APECs:

PCA 1 – On-site: fill material associated with former residential dwelling and barn structures in the north and northwest portions of the Site and reported in the borehole logs for a previously completed geotechnical investigation (MTE Consultants, 2024); #30 - Importation of Fill Material of Unknown Quality

PCA 2 – On-site: former inferred orchard located in the north portion of the Site; #40 - Pesticides (including Herbicides, Fungicides and Anti-Fouling Agents) Manufacturing, Processing, Bulk Storage and Large-Scale Applications

PCA 3 – On-site: former inferred orchard located in the northwest portion of the Site; #40 - Pesticides (including Herbicides, Fungicides and Anti-Fouling Agents) Manufacturing, Processing, Bulk Storage and Large-Scale Applications

PCA 4 – On-site: Row crop agriculture across the majority of the site; #40 - Pesticides (including Herbicides, Fungicides and Anti-Fouling Agents) Manufacturing, Processing, Bulk Storage and Large-Scale Applications

The PCAs that do not contribute to APECs can be found in Table 6.

7.3 Areas of Potential Environmental Concern

As required by O.Reg. 153/04, all on-site PCAs contributed to an APEC. Based on the distance and/or direction from the Site, local topography, and inferred groundwater flow direction, none of the off-site PCAs contributed to an APEC. Refer to Table 7 for APEC details and Figure 4 for APEC locations.

APEC 1 – North, central, and southeast portions of the Site, associated with PCA 1, fill of unknown quality. COPCs include PHCs, VOCs, PAHs, metals, hydride-forming metals, EC, SAR, B-HWS, CN-, Hg, Cr(VI)

APEC 2 – North portion of the Site, associated with PCA 2, former inferred orchard. COPCs include OC Pesticides (OCPs), metals, hydride-forming metals, B-HWS, CN-, Hg, Cr(VI)

APEC 3 – Northwest portion of the Site, associated with PCA 3, former inferred orchard. COPCs include OCPs, metals, hydride-forming metals, B-HWS, CN-, Hg, Cr(VI)

APEC 4 – Majority of the Site, associated with PCA 4, pesticides applied for row crop agriculture. COPCs include OCPs, metals, hydride-forming metals, B-HWS, CN-, Hg, Cr(VI)

The potentially contaminated media was soil. Groundwater was not deemed to be a media of concern based on the APECs identified.

7.4 Phase One Conceptual Site Model

The following descriptions and discussion supplement Figure 3 and Figure 4, and together comprise the Phase One Conceptual Site Model (CSM). The purpose of the CSM is to assist the QP in illustrating the results of the Phase One ESA and to provide a basis for further work, if required.

7.4.1 Site Description

The roughly 126 ha Site is on the southeast side of Upper Middle Road, the southwest side of Burloak Drive and the northwest side of Mainway, in Burlington, Ontario. The legal description of the Site is *Part 1 on 20R-10977, Parts 2 and 3 on 20R-12331, Part 1 on 20R-10140, Parts 1 and 2 on 20R-7372, Parts of Lots 1, 2, 3 and 4, Concession 2 South of Dundas (Township of Nelson); City of Burlington, Regional Municipality of Halton*. The Property Identification Numbers (PINs) are 07183-0189, 07183-0212, 07183-0213, 07183-1218, and 07183-1254. The Universal Transverse Mercator (UTM) coordinates for the centroid for the Site are Zone 17 T, 599165 m E, 4805966 m N.

7.4.2 Existing Buildings and Structures

There were no buildings or structures present on the Phase One Property at the time of the site reconnaissance with the exception of a Bell communications tower located on the northwestern part of the Site.

7.4.3 Water Bodies and Areas of Natural Significance

Sheldon Creek is on the southwest portion of the Site and a tributary of Bronte Creek bisects the central portion of the Site; therefore, the Site is within 30 m of a water body, as defined in O.Reg. 153/04.

Sheldon Creek and the tributary of Bronte Creek flow southeast towards Lake Ontario. Based on the direction of these waterbodies, the localized ground water flow direction is inferred to be towards the on-Site creeks and the general ground water flow direction is inferred to be to the southeast.

The Site was considered an Area of Natural Significance, as defined in Section 1 of O.Reg. 153/04, due to the proximity to Bronte Creek Provincial Park 30 m northeast of the Site (Ontario, 2024) and the presence of significant woodlands along Sheldon Creek and the Sheldon Creek Woodlot.

7.4.4 Drinking Water Wells

The phase one study area is municipally serviced for drinking water by the Regional Municipality of Halton. No drinking water wells were observed on the Site and no records of drinking water wells at the Site were identified by the records review. A search of the Ministry Water Well Information System by ERIS identified 10 records for on-site water wells and 62 water well records within the phase one study area ranging from about 15 m to 300 m from the Site. The wells were predominantly identified as observation wells, and monitoring and test holes. One water supply well record was identified from 1963.

Stratigraphy in the on-site wells was generally silt or clayey silt to about 2 to 3 mbgs underlain by shale bedrock.

7.4.5 Potentially Contaminating Activities

Based on the records review, site reconnaissance, and interviews, thirty-four potentially contaminating activities (PCAs), four PCAs on-site and thirty PCAs off-site, were identified within the phase one study area. Thirty off-site PCAs were identified but these PCAs are not considered to result in areas of potential environmental concern (APECs) at the Phase One Property given the nature of operations, their distance from the Phase One Property and/or their down-gradient or cross gradient location. The four on-site PCAs related to fill of unknown quality and agricultural operations contributed to four APECs at the Site. Refer to Table 6 for further description of the identified PCAs and Figure 3 for locations of the identified PCAs.

The following PCAs contribute to APECs:

PCA 1 – On-site: fill material associated with former residential dwelling and barn structures in the north and northwest portions of the Site and reported in the borehole logs for a previously completed geotechnical investigation (MTE Consultants, 2024); #30 - Importation of Fill Material of Unknown Quality

PCA 2 – On-site: former inferred orchard located in the north portion of the Site; #40 - Pesticides (including Herbicides, Fungicides and Anti-Fouling Agents) Manufacturing, Processing, Bulk Storage and Large-Scale Applications

PCA 3 – On-site: former inferred orchard located in the northwest portion of the Site; #40 - Pesticides (including Herbicides, Fungicides and Anti-Fouling Agents) Manufacturing, Processing, Bulk Storage and Large-Scale Applications

PCA 4 – On-site: Row crop agriculture across the majority of the site; #40 - Pesticides (including Herbicides, Fungicides and Anti-Fouling Agents) Manufacturing, Processing, Bulk Storage and Large-Scale Applications

The PCAs that do not contribute to APECs can be found in Table 6.

The qualified person has determined that a substance has been applied to surfaces for the safety of vehicular or pedestrian traffic under conditions of snow or ice at the Site. As such, the exemption set out in paragraph 1 of section 49.1 of O.Reg. 153/04 will be relied upon.

7.4.6 Areas of Potential Environmental Concern

As required by O.Reg. 153/04, all on-site PCAs contributed to an APEC. Based on a review of potential to result in contamination at the Site, none of the off-site PCAs contributed to APECs. Refer to Table 7 for APEC details and Figure 4 for APEC locations.

APEC 1 – North, central, and southeast portions of the Site, associated with PCA 1, fill of unknown quality. COPCs include PHCs, VOCs, PAHs, metals, hydride-forming metals, EC, SAR, B-HWS, CN-, Hg, Cr(VI)

APEC 2 – North portion of the Site, associated with PCA 2, former inferred orchard. COPCs include OC Pesticides (OCPs), metals, hydride-forming metals, B-HWS, CN-, Hg, Cr(VI)

APEC 3 – Northwest portion of the Site, associated with PCA 3, former inferred orchard. COPCs include OCPs, metals, hydride-forming metals, B-HWS, CN-, Hg, Cr(VI)

APEC 4 – Majority of the Site, associated with PCA 4, pesticides applied for row crop agriculture. COPCs include OCPs, metals, hydride-forming metals, B-HWS, CN-, Hg, Cr(VI)

The potentially contaminated media was soil. Groundwater was not deemed to be a media of concern based on the APECs identified.

7.4.7 Contaminants of Potential Concern

COPCs were identified for each PCA contributing to an APEC. The COPCs specific to each APEC are summarized in Table 7. PHCs, VOCs, PAHs, metals, hydride-forming metals, OCPs, EC, SAR, B-HWS, CN-, Hg, and Cr(VI) were identified as COPCs related to the current and historical on-site PCAs.

7.4.8 Contaminant Distribution and Transport

An Enbridge natural gas pipeline runs parallel along Upper Middle Road through the Site. A Bell communications tower was also observed in the northwest portion of the Site, with an inferred underground utility connection. The remainder of the Phase One Property has remained undeveloped and there are no known underground utilities.

Groundwater was measure during a previous geotechnical investigation (MTE Consultants, 2024)between 1.3 and 4.7 mbgs, which may coincide with the depth to the natural gas pipeline and communication tower utilities. Therefore, it is considered possible that preferential migration of contaminants would occur via historical utility trenches.

No specific climatic or meteorological conditions were observed that may influence the distribution or migration of contaminants.

7.4.9 Geological and Hydrogeological Setting

Review of available topographic mapping indicated that the Site slopes downward locally to the southwest towards Sheldon Creek, and towards the on-site tributary of Bronte Creek. The Phase One study area also decreases in elevation towards Sheldon Creek, with a regional downward slope towards Lake Ontario (City of Burlington, 2024).

The Site is within the Iroquois Plain physiographic region (Chapman & Putnam, 1984), characterized by till and shale plains with drumlinized till. In the general area, the overburden is clay to silt-textured till derived from glaciolacustrine deposits or shale (OGS, 2010). The soils overlie Queenston Formation shale, limestone, dolostone, and siltstone (OGS, 2007). A review of Ministry water well records (MECP, 2024) for boreholes within 200 m of the Site indicated

that the local stratigraphy consisted of sand gravel, silt, and clay till with boulders. Shale bedrock was encountered between 2 to 3 mbgs in the Phase One study area. A previous geotechnical investigation indicated that the soil conditions consisted of topsoil and/or fill material followed by silt and clay, glacial till and shale bedrock. Shale bedrock was encountered between 1.1 to 4.6 mbgs at the Site (MTE Consultants, 2024).

7.4.10 Uncertainty or Absence of Information

All aspects of the Phase One ESA were conducted consistent with O.Reg. 153/04, and as such, the Site was investigated thoroughly. As access to the entire Site was possible, and adequate historical information was available through the interviewee's, records review, and FOI requests uncertainty or absence of information is not expected to result in environmental concerns at the Site.

Docusign Envelope ID: 4B41D837-7F8C-41EE-9A82-35EE44F150CA

8.0 Conclusions

The Phase One ESA conclusions regarding the current environmental conditions at the Site are based solely on the results of the document review, regulatory records review, interviews, and site reconnaissance as described in this report.

8.1 Requirement for a Phase Two Environmental Site Assessment

Based on the observations and information obtained for the Site and phase one study area, a Phase Two ESA is required.

8.2 Signatures

This Phase One ESA was completed under the supervision of Mr. John Kaasalainen P.Eng., QP_{ESA}, as per O.Reg. 153/04. Information presented in this report is true and accurate to the best of the assessors' knowledge.

Respectfully submitted,

Cambium Inc.

Signed by:

756936F0E7C5436...

10.0 Standard Limitations

Limited Warranty

In performing work on behalf of a client, Cambium relies on its client to provide instructions on the scope of its retainer and, on that basis, Cambium determines the precise nature of the work to be performed. Cambium undertakes all work in accordance with applicable accepted industry practices and standards. Unless required under local laws, other than as expressly stated herein, no other warranties or conditions, either expressed or implied, are made regarding the services, work or reports provided.

Reliance on Materials and Information

The findings and results presented in reports prepared by Cambium are based on the materials and information provided by the client to Cambium and on the facts, conditions and circumstances encountered by Cambium during the performance of the work requested by the client. In formulating its findings and results into a report, Cambium assumes that the information and materials provided by the client or obtained by Cambium from the client or otherwise are factual, accurate and represent a true depiction of the circumstances that exist. Cambium relies on its client to inform Cambium if there are changes to any such information and materials. Cambium does not review, analyze or attempt to verify the accuracy or completeness of the information or materials provided, or circumstances encountered, other than in accordance with applicable accepted industry practice. Cambium will not be responsible for matters arising from incomplete, incorrect or misleading information or from facts or circumstances that are not fully disclosed to or that are concealed from Cambium during the provision of services, work or reports.

Facts, conditions, information and circumstances may vary with time and locations and Cambium's work is based on a review of such matters as they existed at the particular time and location indicated in its reports. No assurance is made by Cambium that the facts, conditions, information, circumstances or any underlying assumptions made by Cambium in connection with the work performed will not change after the work is completed and a report is submitted. If any such changes occur or additional information is obtained, Cambium should be advised and requested to consider if the changes or additional information affect its findings or results.

When preparing reports, Cambium considers applicable legislation, regulations, governmental guidelines and policies to the extent they are within its knowledge, but Cambium is not qualified to advise with respect to legal matters. The presentation of information regarding applicable legislation, regulations, governmental guidelines and policies is for information only and is not intended to and should not be interpreted as constituting a legal opinion concerning the work completed or conditions outlined in a report. All legal matters should be reviewed and considered by an appropriately qualified legal practitioner.

Site Assessments

A site assessment is created using data and information collected during the investigation of a site and based on conditions encountered at the time and particular locations at which fieldwork is conducted. The information, sample results and data collected represent the conditions only at the specific times at which and at those specific locations from which the information, samples and data were obtained and the information, sample results and data may vary at other locations and times. To the extent that Cambium's work or report considers any locations or times other than those from which information, sample results and data was specifically received, the work or report is based on a reasonable extrapolation from such information, sample results and data but the actual conditions encountered may vary from those extrapolations.

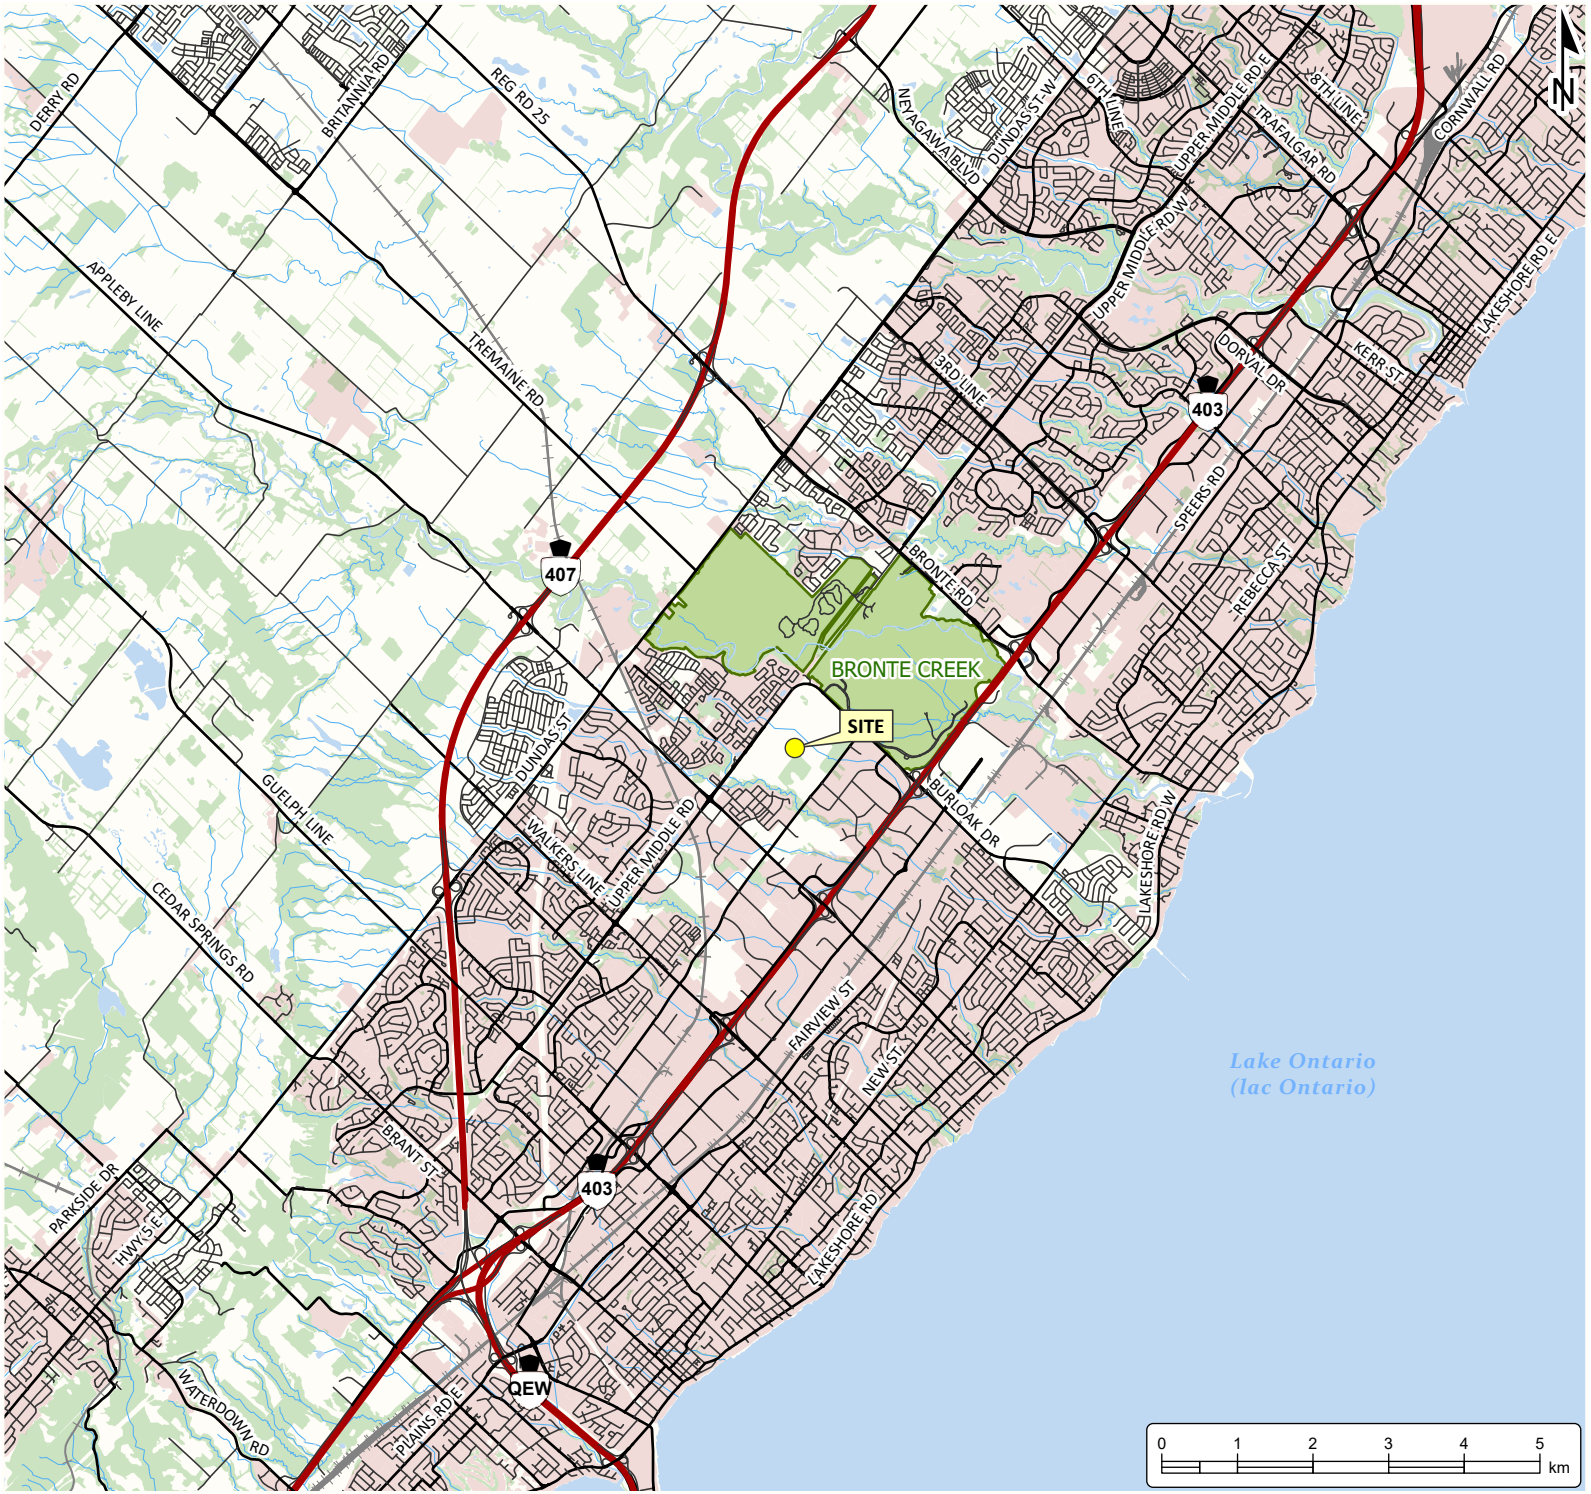
Only conditions at the site and locations chosen for study by the client are evaluated; no adjacent or other properties are evaluated unless specifically requested by the client. Any physical or other aspects of the site chosen for study by the client, or any other matter not specifically addressed in a report prepared by Cambium, are beyond the scope of the work performed by Cambium and such matters have not been investigated or addressed.

Reliance

Cambium's services, work and reports may be relied on by the client and its corporate directors and officers, employees, and professional advisors. Cambium is not responsible for the use of its work or reports by any other party, or for the reliance on, or for any decision which is made by any party using the services or work performed by or a report prepared by Cambium without Cambium's express written consent. Any party that relies on services or work performed by Cambium or a report prepared by Cambium without Cambium's express written consent, does so at its own risk. No report of Cambium may be disclosed or referred to in any public document without Cambium's express prior written consent. Cambium specifically disclaims any liability or responsibility to any such party for any loss, damage, expense, fine, penalty or other such thing which may arise or result from the use of any information, recommendation or other matter arising from the services, work or reports provided by Cambium.

Limitation of Liability

Potential liability to the client arising out of the report is limited to the amount of Cambium's professional liability insurance coverage. Cambium shall only be liable for direct damages to the extent caused by Cambium's negligence and/or breach of contract. Cambium shall not be liable for consequential damages.



Personal Liability

The client expressly agrees that Cambium employees shall have no personal liability to the client with respect to a claim, whether in contract, tort and/or other cause of action in law. Furthermore, the client agrees that it will bring no proceedings nor take any action in any court of law against Cambium employees in their personal capacity.

Appended Tables

Table 1 - Table of Current and Past Uses of the Phase One Property – PIN 07183-0189 (Northwest side of Mainway)

Year	Name of Owner	Description of Property Use	Property Use[1]	Other Observations from Aerial Photographs, Fire Insurance Plans, Etc.
Pre-1817	Crown	Assumed agricultural land	Agricultural or other use	None
1817-1836	James Goffin	Assumed agricultural land	Agricultural or other use	None
1836	Robert McGwillim	Assumed agricultural land	Agricultural or other use	None
1836-1894	Thomas Atkinson	Assumed agricultural land	Agricultural or other use	None
1894	William Lucas	Assumed agricultural land	Agricultural or other use	None
1894-1940	Sarah Adeline Sheppard, Thomas Wilbert Sheppard	Assumed agricultural land	Agricultural or other use	The 1934 aerial photograph indicated this property consisted of agricultural land use.
1940-1943	Thomas Wilbert Sheppard, Mabel Ann Elizabeth Freeman	Assumed agricultural land	Agricultural or other use	None
1943-1965	William Ernest Brockman	Assumed agricultural land	Agricultural or other use	The 1954 and 1965 aerial photographs indicated this property consisted of agricultural land use.
1965-1973	Lily Limited	Row crop agriculture	Agricultural or other use	The 1965 aerial photograph indicated this property consisted of agricultural land use.

Year	Name of Owner	Description of Property Use	Property Use[1]	Other Observations from Aerial Photographs, Fire Insurance Plans, Etc.
1973-1974	Cogan Developments Limited, Shefsky Developments Limited, The Greater York Group, 271160 Ontario Limited	Row crop agriculture	Agricultural or other use	This parcel was not listed in the reviewed city directories.
1974-1983	Eastcan Holdings Limited	Row crop agriculture	Agricultural or other use	The 1979 aerial photograph this parcel consisted of agricultural land use.
1983	Theodore Sherman, Harold Strom	Row crop agriculture	Agricultural or other use	This parcel was not listed in the reviewed city directories.
1983-1987	Silverstream Investments Limited, Bramcrage Investments Limited	Row crop agriculture	Agricultural or other use	This parcel was not listed in the reviewed city directories.
1987-1999	Limeside Developments Inc.	Row crop agriculture	Agricultural or other use	The 1999 aerial photograph indicated this property consisted of agricultural land use.
1999-2024	Paletta Bros. Four Ltd.	Row crop agriculture	Agricultural or other use	The 1999 to 2023 aerial photographs indicated this property consisted of agricultural land use.

Table 2 - Table of Current and Past Uses of the Phase One Property – PIN 07183-0212 (5366 Upper Middle Road)

Year	Name of Owner	Description of Property Use	Property Use[1]	Other Observations from Aerial Photographs, Fire Insurance Plans, Etc.
Pre-1828	Crown	Assumed agricultural land	Agricultural or other use	None
1828-1840	King's College	Assumed agricultural land	Agricultural or other use	None
1840-1869	Thomas Atkinson	Assumed agricultural land	Agricultural or other use	None
1869-1873	Robert Atkinson	Assumed agricultural land	Agricultural or other use	None
1873-1898	William Lucas	Assumed agricultural land	Agricultural or other use	None
1898-1934	George Walker Lucas	Assumed agricultural land	Agricultural or other use	The 1934 aerial photograph indicated that an inferred residential dwelling, barn structures, an inferred orchard, and agricultural row crops occupied this portion of the Phase One Property.
1934-1963	George Walker Lucas, Walter Maxwell Lucas	Residential dwelling, barn structures and agricultural row crops	Residential use	The 1934 and 1954 aerial photographs indicated that an inferred residential dwelling, barn structures, an inferred orchard, and agricultural row crops occupied this portion of the Phase One Property.
1963-1968	Janet Grace Ross	Residential dwelling, barn structures and agricultural row crops	Residential use	The 1965 aerial photograph indicated that an inferred residential dwelling, barn structures, an inferred orchard, and agricultural row crops occupied this portion of the Phase One Property.

Year	Name of Owner	Description of Property Use	Property Use[1]	Other Observations from Aerial Photographs, Fire Insurance Plans, Etc.
				This portion of the Phase One Property was listed as residential in the reviewed city directories from 1965 to 1980.
1968-1973	Wera Investments Limited, Goggin Holdings Limited, Estadek Construction Company Limited, Howard Gordon Savage	Residential dwelling, barn structures and agricultural row crops	Residential use	This portion of the Phase One Property was listed as residential in the reviewed city directories from 1965 to 1980.
1973	P & L Livestock Limited, Tullio Leonardelli	Residential dwelling, barn structures and agricultural row crops	Residential use	This portion of the Phase One Property was listed as residential in the reviewed city directories from 1965 to 1980.
1973-1974	Vicdom Investments Limited	Residential dwelling, barn structures and agricultural row crops	Residential use	This portion of the Phase One Property was listed as residential in the reviewed city directories from 1965 to 1980.
1974-1975	London Tower Construction Limited	Residential dwelling, barn structures and agricultural row crops	Residential use	This portion of the Phase One Property was listed as residential in the reviewed city directories from 1965 to 1980.
1975-1983	Eastcan Holdings Limited	Residential dwelling, barn structures and agricultural row crops	Residential use	The 1979 aerial photograph indicated that an inferred residential dwelling, barn structures and agricultural row crops occupied this portion of the Phase One Property. This portion of the Phase One Property was listed as residential in the reviewed city directories from 1965 to 1980.

Year	Name of Owner	Description of Property Use	Property Use[1]	Other Observations from Aerial Photographs, Fire Insurance Plans, Etc.
1983-1986	Theodore Sherman, Harold Strom	Residential dwelling, barn structures and agricultural row crops	Residential use	None
1986-1990	Ralph Clausi, Vicdom Investments Limited	Residential dwelling, barn structures and agricultural row crops	Residential use	None
1990	Vicdom Investments Limited	Residential dwelling, barn structures and agricultural row crops	Residential use	None
1990-1998	F. W. Woolworth Company Limited (renamed to Woolworth Canada Inc. and Venator Group Canada Inc.)	Residential dwelling, barn structures and agricultural row crops	Residential use	The 1998 aerial photograph indicated that an inferred residential dwelling, barn structures and agricultural row crops occupied this portion of the Phase One Property.
1998-Present	Qualico Foods (1994) Inc.	Vacant and undeveloped with agricultural row crop	Agricultural or other use	The 1998 aerial photograph indicated that an inferred residential dwelling, barn structures and agricultural row crops occupied this portion of the Phase One Property. The 2002 aerial photograph indicated that the former structures have been demolished and this portion of the Phase One Property is vacant and undeveloped, or agricultural row crops.

Table 3 - Table of Current and Past Uses of the Phase One Property – PIN 07183-0213 (5470 Upper Middle Road)

Year	Name of Owner	Description of Property Use	Property Use[1]	Other Observations from Aerial Photographs, Fire Insurance Plans, Etc.
Pre-1846	Crown	Assumed agricultural land	Agricultural or other use	None
1846-1852	Garnett Albertson	Assumed agricultural land	Agricultural or other use	None
1852-1870	Ralph Brecken	Assumed agricultural land	Agricultural or other use	None
1870-1872	John Brecken	Assumed agricultural land	Agricultural or other use	None
1872-1878	Henry Stephen Matthewman	Assumed agricultural land	Agricultural or other use	None
1878-1911	Joseph Matthewman, Eliza Matthewman	Assumed agricultural land	Agricultural or other use	None
1911-1927	John Easton	Assumed agricultural land	Agricultural or other use	None
1927-1930	Mary Pendlease, McKenzie Pendlease	Assumed agricultural land	Agricultural or other use	None
1930-1945	Delmur Washburn Baker, Margaret Jean Baker	Residential dwelling, barn structures, inferred orchard and agricultural row crops	Residential use	The 1934 aerial photograph indicated that an inferred residential dwelling, barn structures, an inferred orchard and agricultural row crops occupied this portion of the Phase One Property.

Year	Name of Owner	Description of Property Use	Property Use[1]	Other Observations from Aerial Photographs, Fire Insurance Plans, Etc.
1945-1956	Cecil Lloyd Barker, Gertrude Clarissa Barker	Residential dwelling, barn structures, inferred orchard and agricultural row crops	Residential use	The 1954 aerial photograph indicated that an inferred residential dwelling, barn structures, an inferred orchard and agricultural row crops occupied this portion of the Phase One Property.
1956	Peter Augustinavicius	Residential dwelling, barn structures, inferred orchard and agricultural row crops	Residential use	None
1956-1960	Paul Rychlitsky, Steve Solomon	Residential dwelling, barn structures, inferred orchard and agricultural row crops	Residential use	None
1960-1965	John Bachynaky	Residential dwelling, barn structures, inferred orchard and agricultural row crops	Residential use	The 1965 aerial photograph indicated that an inferred residential dwelling, barn structures, an inferred orchard and agricultural row crops occupied this portion of the Phase One Property. This portion of the Phase One Property was listed as residential in the reviewed city directories from 1965 to 1995.
1965-1971	Ernest Tornell Maine, Eugenie Marguerite Maine	Residential dwelling, barn structures, inferred orchard and agricultural row crops	Residential use	
1971-1973	Waryne Boyko	Residential dwelling, barn structures, inferred orchard and agricultural row crops	Residential use	This portion of the Phase One Property was listed as residential in the reviewed city directories from 1965 to 1995.
1973-1974	Rosa Clausi	Residential dwelling, barn structures, inferred orchard and agricultural row crops	Residential use	This portion of the Phase One Property was listed as residential in the reviewed city directories from 1965 to 1995.

Year	Name of Owner	Description of Property Use	Property Use[1]	Other Observations from Aerial Photographs, Fire Insurance Plans, Etc.
1974-1995	Vicdom Investments Limited, Ralph Clausi	Residential dwelling, barn structures, inferred orchard and agricultural row crops	Residential use	The 1979 aerial photograph indicated that an inferred residential dwelling, barn structures, an inferred orchard and agricultural row crops occupied this portion of the Phase One Property. This portion of the Phase One Property was listed as residential in the reviewed city directories from 1965 to 1995.
1995-1999	Vicdom Investments Limited	Vegetated land or agricultural land	Agricultural or other use	The 1998 aerial photograph indicated this portion of the site consisted of an inferred former orchard and row crop agriculture. This portion of the Phase One Property was listed as residential in the reviewed city directories from 1965 to 1995.
1999-Present	Paletta International (1990) Inc.	Vegetated land or agricultural land	Agricultural or other use	The 2002, 2010 and 2023 aerial photographs indicated this portion of the Site consisted of an inferred former orchard and row crop agriculture.

Table 4 - Table of Current and Past Uses of the Phase One Property – PIN 07183-1254 (Southeast of Upper Middle Road, Northwest of Mainway, Southeast of Burloak Drive)

Year	Name of Owner	Description of Property Use	Property Use[1]	Other Observations from Aerial Photographs, Fire Insurance Plans, Etc.
Pre-1846	Crown	Assumed agricultural land	Agricultural or other use	None
1846-1852	Benjamin Matthewman	Assumed agricultural land	Agricultural or other use	None
1852-1872	John Brecken	Assumed agricultural land	Agricultural or other use	None
1872-1878	Henry Stephan Matthewman	Assumed agricultural land	Agricultural or other use	None
1878-1911	Joseph Matthewman, Eliza Matthewman	Assumed agricultural land	Agricultural or other use	None
1911-1927	John Easton	Assumed agricultural land	Agricultural or other use	None
1927-1930	Mary Pendlease, McKenzie Pendlease	Assumed agricultural land	Agricultural or other use	None
1930-1945	Delmur Washburn Baker, Margaret Jean Baker	Row crop agriculture and vegetated land	Agricultural or other use	The 1934 aerial photograph indicated that this portion of the Phase One Property consisted of majority row crop agriculture and woodland (south portion).
1945-1956	Cecil Lloyd Barker, Gertrude Clarissa Barker	Row crop agriculture and vegetated land	Agricultural or other use	The 1954 aerial photograph indicated that this portion of the Phase One Property consisted of majority row crop

Year	Name of Owner	Description of Property Use	Property Use[1]	Other Observations from Aerial Photographs, Fire Insurance Plans, Etc.
				agriculture and woodland (south portion).
1956-1960	Paul Rychlitsky, Steve Solomon	Row crop agriculture and vegetated land	Agricultural or other use	None
1960-1965	John Bachynaky	Row crop agriculture and vegetated land	Agricultural or other use	The 1965 aerial photograph indicated that this portion of the Phase One Property consisted of majority row crop agriculture and woodland (south portion).
1965-1973	Paul Rychlitsky, Steven Solomon	Row crop agriculture and vegetated land	Agricultural or other use	
1973-1982	Jack Bloomberg	Row crop agriculture and vegetated land	Agricultural or other use	The 1979 aerial photograph indicated that this portion of the Phase One Property consisted of majority row crop agriculture and woodland (south portion).
1982-1999	505721 Ontario Limited	Row crop agriculture and vegetated land	Agricultural or other use	The 1998 aerial photograph indicated that this portion of the Phase One Property consisted of majority row crop agriculture and woodland (south portion).
1999-2013	Paletta International Corporation	Row crop agriculture and vegetated land	Agricultural or other use	The 2002 and 2010 aerial photographs indicated that this portion of the Phase One Property consisted of majority row crop agriculture and woodland (south portion).
2013-Present	2362302 Ontario Inc.	Row crop agriculture and vegetated land	Agricultural or other use	The 2023 aerial photograph and Cambium's site reconnaissance indicated that this portion of the Phase One Property consisted of majority row

Year	Name of Owner	Description of Property Use	Property Use[1]	Other Observations from Aerial Photographs, Fire Insurance Plans, Etc.
				crop agriculture and woodland (south portion).

Table 5 - Table of Current and Past Uses of the Phase One Property – PIN 07183-1218 (Southeast of Upper Middle Road, Northwest of Mainway, Southeast of Burloak Drive)

Year	Name of Owner	Description of Property Use	Property Use[1]	Other Observations from Aerial Photographs, Fire Insurance Plans, Etc.
Pre-1828	Crown	Sheldon Creek and assumed agricultural land	Agricultural or other use	None
1828-1841	King's College	Sheldon Creek and assumed agricultural land	Agricultural or other use	None
1841-1842	Thomas Atkinson Sr	Sheldon Creek and assumed agricultural land	Agricultural or other use	None
1842-1892	Thomas Atkinson Jr	Sheldon Creek and assumed agricultural land	Agricultural or other use	None
1892-1895	Charles Porter	Sheldon Creek and assumed agricultural land	Agricultural or other use	None
1895-1921	Hugh James Porter, David Alexander Porter	Sheldon Creek and assumed agricultural land	Agricultural or other use	None
1921-1940	John Blain Breckon	Sheldon Creek and assumed agricultural land	Agricultural or other use	The 1934 aerial photograph indicated that this portion of the Phase One Property consisted of majority row crop agriculture and woodland and Sheldon Creek (southeast portion).
1940-1948	John MacPherson Breckon, Joseph Carl Breckon, William Alton Breckon	Sheldon Creek and assumed agricultural land	Agricultural or other use	None

Year	Name of Owner	Description of Property Use	Property Use[1]	Other Observations from Aerial Photographs, Fire Insurance Plans, Etc.
1948-1973	John MacPherson Breckon	Sheldon Creek and assumed agricultural land	Agricultural or other use	The 1954 and 1965 aerial photograph indicated that this portion of the Phase One Property consisted of majority row crop agriculture and woodland and Sheldon Creek (southeast portion).
1973-1980	Monarch Construction Limited	Sheldon Creek and assumed agricultural land	Agricultural or other use	The 1979 aerial photograph indicated that this portion of the Phase One Property consisted of majority row crop agriculture and woodland and Sheldon Creek (southeast portion).
1980-1999	453217 Ontario Limited (renamed to Richview Investments Limited)	Sheldon Creek and assumed agricultural land	Agricultural or other use	The 1998 aerial photograph indicated that this portion of the Phase One Property consisted of majority row crop agriculture and woodland and Sheldon Creek (southeast portion).
1999-2013	Paletta International Corporation	Sheldon Creek and assumed agricultural land	Agricultural or other use	The 2010 aerial photograph indicated that this portion of the Phase One Property consisted of majority row crop agriculture and woodland and Sheldon Creek (southeast portion).
2013-Present	2362302 Ontario Inc.	Sheldon Creek and assumed agricultural land	Agricultural or other use	The 2023 aerial photograph and Cambium's site reconnaissance indicated that this portion of the Phase One Property consisted of majority row crop agriculture and woodland and Sheldon Creek (southeast portion).

Notes:

1 - for each owner, specify one of the following types of property use (as defined in O.Reg. 153/04) that applies:

Agriculture or other use *Commercial use*

Community use
Industrial use
Institutional use
Parkland use
Residential use

Table 6 - Table of Potentially Contaminating Activities

PCA ID #	Potentially Contaminating Activity[1]	Location of PCA	PCA Description	APEC[2] (Yes/No)
PCA 1	#30 - Importation of Fill Material of Unknown Quality	**On-site:** across the Phase One Property in various locations identified in a previous geotechnical investigation and based on the historical presence of two residential dwellings	Imported fill material	Yes
PCA 2	#40 - Pesticides (including Herbicides, Fungicides and Anti-Fouling Agents) Manufacturing, Processing, Bulk Storage and Large-Scale Applications	**On-site:** north portion of the Phase One Property	An inferred orchard was observed in the north portion of the Phase One Property in the 1934, 1954 and 1964 aerial photographs.	Yes
PCA 3	#40 - Pesticides (including Herbicides, Fungicides and Anti-Fouling Agents) Manufacturing, Processing, Bulk Storage and Large-Scale Applications	**On-site:** northwest portion of the Phase One Property	An inferred orchard was observed in the north portion of the Phase One Property in the 1934, 1954 and 1964 aerial photographs.	Yes
PCA 4	#40 - Pesticides (including Herbicides, Fungicides and Anti-Fouling Agents) Manufacturing, Processing, Bulk Storage and Large-Scale Applications	**On-site:** across the Phase One Property, excluding the forested portions and Sheldon Creek	Agricultural row crops have been grown on the Phase One Property since at least 1934, based on the aerial photograph review.	Yes
PCA 5	#55 - Transformer Manufacturing, Processing and Use	**Off-site:** 5510 and 5540 Mainway	Two oil-cooled transformers were observed at this property.	No

PCA ID #	Potentially Contaminating Activity[1]	Location of PCA	PCA Description	APEC[2] (Yes/No)
		30 m southeast (down-gradient)		
PCA 6	#28 - Gasoline and Associated Products Storage in Fixed Tanks	**Off-site:** 5600 Mainway 30 m southeast (down-gradient)	An RFO has operated at this property since about 2006. Five USTs are located approximately 75 m southeast of the Site.	No
PCA 7	#8 - Chemical Manufacturing, Processing and Bulk Storage	**Off-site:** 5480 Mainway 30 m southeast (down-gradient)	Bioshop Canada Inc. was listed in the Chemical Register as a distributor of chemicals.	No
PCA 8	Not Applicable - hazardous waste generation	**Off-site:** 5450 Mainway 30 m southeast (down-gradient)	Waste generation of petroleum distillates, aromatic solvents, paint / pigment / coating residues, and organic laboratory chemicals.	No
PCA 9	Not Applicable - spill	**Off-site:** 5420 Mainway 30 m southeast (down-gradient)	An estimated 40 L spill of hydraulic oil was reported at this property in 2010.	No
PCA 10	Not Applicable - hazardous waste generation	**Off-site:** 5250 Mainway 30 m southeast (down-gradient)	Waste generation of oil skimmings and sludges, petroleum distillates, inorganic laboratory chemicals and organic laboratory chemicals.	No
PCA 11	#43 - Plastics (including Fiberglass) Manufacturing and Processing	**Off-site:** 5330 Mainway 30 m southeast (down-gradient)	A plastic manufacturer was identified at this property. Waste generation of aliphatic solvents and waste oils and lubricants were also reported for the plastic manufacturer.	No
PCA 12	#34 - Metal Fabrication	**Off-site:** 5300 Mainway 30 m southeast (down-gradient)	A machine shop was identified at this property. Waste generation of petroleum distillates, and transfer station oil wastes were also reported	No

PCA ID #	Potentially Contaminating Activity[1]	Location of PCA	PCA Description	APEC[2] (Yes/No)
			for this property, associated with the machine shop.	
PCA 13	Not Applicable - hazardous waste generation	**Off-site:** 5300 Mainway 30 m southeast (down-gradient)	Waste generation of oil skimmings and sludges.	No
PCA 14	#34 - Metal Fabrication	**Off-site:** 5200 Mainway 30 m southeast (down-gradient)	A machine shop was identified at this property. Waste generation of waste oils and lubricants, alkaline wastes – other metals, paint / pigment / coating residues, petroleum distillates, light fuels, and emulsified oils were also reported for this property, associated with the machine shop.	No
PCA 15	#8 - Chemical Manufacturing, Processing and Bulk Storage	**Off-site:** 1350 Heine Court 115 m southeast (down-gradient)	Normac Adhesive Products Inc was listed in the Chemical Register as a distributor of chemicals. Waste generation of aliphatic solvents, oil skimmings and sludges, waste oils and lubricants, polymeric resins, paint / pigment / coating residues, and petroleum distillates, associated with the chemical bulk storage operation.	No
PCA 16	Not Applicable - spill	**Off-site:** 1330 Heine Court 115 m southeast (down-gradient)	A 100 L diesel spill was reported at this property in 2021.	No
PCA 17	Not Applicable - spill	**Off-site:** 1220 Burloak Drive 220 m southeast (down-gradient)	A 350 L transformer oil spill was reported at this property in 2013.	No
PCA 18	Not Applicable - hazardous waste generation	**Off-site:** 1220 Burloak Drive	Waste generation of oil skimmings and sludges.	No

PCA ID #	Potentially Contaminating Activity[1]	Location of PCA	PCA Description	APEC[2] (Yes/No)
		220 m southeast (down-gradient)		
PCA 19	Not Applicable - hazardous waste generation	**Off-site:** 1325-1329 Heine Court 175 m southeast (down-gradient)	Waste generation of emulsified oils, paints / pigments / coating wastes, detergents and soaps and inorganic laboratory chemicals.	No
PCA 20	#8 - Chemical Manufacturing, Processing and Bulk Storage	**Off-site:** 5275 John Lucas Drive 135 m southeast (down-gradient)	Controlchem Canada was listed in the Chemical Register for bulk storage of chemicals. Waste generation of acid wastes – other metals and oil skimmings and sludges was also reported for the chemical operation.	No
PCA 21	#43 - Plastics (including Fiberglass) Manufacturing and Processing	**Off-site:** 5150 Mainway 30 m southeast (down-gradient)	A plastic bottle manufacturer was identified at this property.	No
PCA 22	Not Applicable - hazardous waste generation	**Off-site:** 5150 Mainway 30 m southeast (down-gradient)	Waste generation of graphic art wastes, paint / pigment / coating residues, and oil skimmings and sludges.	No
PCA 23	#34 - Metal Fabrication	**Off-site:** 5280 John Lucas Drive 185 m southeast (down-gradient)	Frost Products Limited was identified as a metal fabricator of metal shelves, lockers and partitions at this property.	No
PCA 24	Not Applicable - hazardous waste generation	**Off-site:** 5280 John Lucas Drive 185 m southeast (down-gradient)	Waste generation of organic laboratory chemicals, alkaline wastes – other metals, inorganic laboratory chemicals, wastes oils and lubricants, waste compressed gases, acid wastes – other metals, and paint / pigment /	No

PCA ID #	Potentially Contaminating Activity[1]	Location of PCA	PCA Description	APEC[2] (Yes/No)
			coating residues was also reported at this property.	
PCA 25	#54 - Textile Manufacturing and Processing	**Off-site:** 5295 John Lucas Drive 185 m southeast (down-gradient)	Natrix Separations Inc., a fabric coating manufacturer, was identified at this property.	No
PCA 26	#50 - Soap and Detergent Manufacturing, Processing and Bulk Storage	**Off-site:** 5295 John Lucas Drive 185 m southeast (down-gradient)	Willard Manufacturing, a soap and cleaning compound manufacturer, was identified at this property.	No
PCA 27	#43 - Plastics (including Fiberglass) Manufacturing and Processing	**Off-site:** 5295 John Lucas Drive 185 m southeast (down-gradient)	RAMPF Composite Solutions, a manufacturer of carbon fibre and fibreglass composites, was identified at this property.	No
PCA 28	Not Applicable - hazardous waste generation	**Off-site:** 5295 John Lucas Drive 185 m southeast (down-gradient)	Waste generation of waste oils and lubricants and oil skimmings and sludges.	No
PCA 29	Not Applicable - hazardous waste generation	**Off-site:** 1330 Sutton Drive 125 m southeast (down-gradient)	Waste generation of oil skimmings and sludges, petroleum distillates and emulsified oils.	No
PCA 30	Not Applicable - hazardous waste generation	**Off-site:** 5305 John Lucas Drive 185 m southeast (down-gradient)	Waste generation of halogenated solvents, aliphatic solvents, paint / pigment / coating residues, emulsified oils, petroleum distillates, and waste oils and lubricants.	No

PCA ID #	Potentially Contaminating Activity[1]	Location of PCA	PCA Description	APEC[2] (Yes/No)
PCA 31	#34 - Metal Fabrication	**Off-site:** 5305 John Lucas Drive 185 m southeast (down-gradient)	Applus RTD Canada, a metal fabrication operation, was identified at this property.	No
PCA 32	Not Applicable - hazardous waste generation	**Off-site:** 5335 John Lucas Drive 185 m southeast (down-gradient)	Waste generation of aliphatic solvents, petroleum distillates, waste oils and lubricants, and oil skimmings and sludges.	No
PCA 33	Not Applicable - hazardous waste generation	**Off-site:** 1200 Burloak Drive 230 m southeast (down-gradient)	Waste generation of petroleum distillates, oil skimmings and sludges, waste oils and lubricants and other specified inorganics.	No
PCA 34	Not Applicable - hazardous waste generation	**Off-site:** 1320 Heine Court 195 m southeast (down-gradient)	Waste generation of petroleum distillates and waste oils and lubricants.	No

Notes:
1 - Potentially Contaminating Activity means a use or activity set out in Column A of Table 2 of Schedule D that is occurring or has occurred in a phase one study area
2 - Area of Potential Environmental Concern means the area on, in or under a phase one property where one or more contaminants are potentially present, as determined through the phase one environmental site assessment, including through,
(a) identification of past or present uses on, in or under the phase one property, and
(b) identification of potentially contaminating activity.

Table 7 – Table of Areas of Potential Environmental Concern

APEC[1]	Location of APEC on the Phase One Property	PCA[2]		Location of PCA (on-site or off-site)	Contaminants of Potential Concern[3]	Media Potentially Impacted (ground water, soil, and/or sediment)
APEC 1	North, central and southeast portions of the Phase One Property	1	#30 - Importation of Fill Material of Unknown Quality	**On-site:** north, central, and southeast portions of Phase One Property	PHCs, VOCs, PAHs, metals, hydride forming metals (As, Sb, Se), EC, SAR, B-HWS, CN-, Hg, Cr(VI)	Soil
APEC 2	North portion of the Phase One Property (former orchard)	2	#40 - Pesticides (including Herbicides, Fungicides and Anti-Fouling Agents) Manufacturing, Processing, Bulk Storage and Large-Scale Applications	**On-site:** north portion of Phase One Property	OCPs, metals hydride forming metals (As, Sb, Se), B-HWS, CN-, Hg, Cr(VI)	Soil
APEC 3	Northwest portion of the Phase One Property	3	#40 - Pesticides (including Herbicides, Fungicides and Anti-Fouling Agents) Manufacturing, Processing, Bulk Storage and Large-Scale Applications	**On-site:** northwest portion of Phase One Property	OCPs, metals, hydride forming metals (As, Sb, Se), B-HWS, CN-, Hg, Cr(VI)	Soil
APEC 4	Former agricultural portions of the Phase One Property (majority of Site)	4	#40 - Pesticides (including Herbicides, Fungicides and Anti-Fouling Agents) Manufacturing, Processing, Bulk Storage and Large-Scale Applications	**On-site:** Majority of the Phase One Property	OCPs, metals hydride forming metals (As, Sb, Se), B-HWS, CN-, Hg, Cr(VI)	Soil

Notes

1 - Area of Potential Environmental Concern means the area on, in or under a phase one property where one or more contaminants are potentially present, as determined through the phase one environmental site assessment, including through,

(a) identification of past or present uses on, in or under the phase one property, and
(b) identification of potentially contaminating activity.

2 - Potentially Contaminating Activity means a use or activity set out in Column A of Table 2 of Schedule D that is occurring or has occurred in a phase one study area

3 - when completing this column, identify all contaminants of potential concern using the Method Groups as identified in the "Protocol for in the Assessment of Properties under Part XV.1 of the Environmental Protection Act, March 9, 2004, amended as of July 1, 2011, as specified below:

ABNs	*PCBs*	*Metals*	*Electrical Conductivity*	*SAR*
CPs	*PAHs*	*As, Sb, Se*	*Cr (VI)*	
1,4-Dioxane	*THMs*	*Na*	*Hg*	
Dioxins/Furans, PCDDs/PCDFs	*VOCs*	*B-HWS*	*Methyl Mercury*	
OCs	*BTEX*	*Cl-*	*high pH*	
PHCs	*Ca, Mg*	*CN-*	*low pH*

PLAN OF SURVEY OF
WITH TOPOGRAPHIC FEATURES
PART OF

LOTS 1, 2, 3 & 4
CONCESSION 2 S.D.S.

GEOGRAPHIC TOWNSHIP OF NELSON
NOW IN THE
CITY OF BURLINGTON
REGIONAL MUNICIPALITY OF HALTON

SCALE 1 : 400

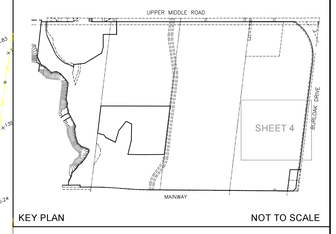
5 10 20 40 metres

THE INTENDED PLOT SIZE OF THIS PLAN IS 1220mm IN WIDTH BY 915mm IN HEIGHT WHEN PLOTTED AT A SCALE OF 1:400 (INCLUDING 15mm BEYOND EACH BORDER)



MacKAY, MacKAY & PETERS LIMITED - ONTARIO LAND SURVEYORS
© 2024

METRIC *DISTANCES SHOWN HEREON ARE IN METRES AND CAN BE CONVERTED TO FEET BY DIVIDING BY 0.3048*

COLOUR *THE ORIGINAL SIGNED PRINT OF THIS PLAN OF SURVEY CONTAINS COLOUR*

ASSOCIATION OF ONTARIO LAND SURVEYORS
PLAN SUBMISSION FORM
V-58243

THIS PLAN IS NOT VALID UNLESS IT IS AN EMBOSSED ORIGINAL COPY ISSUED BY THE SURVEYOR IN ACCORDANCE WITH REGULATION 1026, SECTION 29(3)

KEY PLAN NOT TO SCALE

BENCHMARK NOTE

CITY OF BURLINGTON BENCHMARK No. 421
ELEVATION = 129.726 m (CGVD28:78 ADJUSTMENT)

PLAQUE ON SOUTH SIDE OF MAINWAY ON EAST FACE OF CONCRETE HEADWALL, 0.1 METRES SOUTH OF NORTHFACE AND 0.02 METRES FROM TOP OF HEADWALL JUST WEST OF HEINE COURT.

BEARING REFERENCE

BEARINGS ARE ASTRONOMIC AND ARE REFERRED TO THE NORTH EAST LIMIT OF PART PLAN EX-234 HAVING A BEARING OF N36°58'40"E.

Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY

Reliance on information in Report: This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a database review of environmental records.

License for use of information in Report: No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

Your Liability for misuse: Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

No warranty of Accuracy or Liability for ERIS: The information contained in this report has been produced by ERIS Information Limited Partnership ("ERIS") using various sources of information, including information provided by Federal and Provincial government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

Trademark and Copyright: You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report (s) are protected by copyright owned by ERIS Information Limited Partnership. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

Certificate #: 7105-592Q7C
Application Year: 02
Issue Date: 5/7/02
Approval Type: Industrial air
Status: Approved
Application Type: New Certificate of Approval
Client Name: Amhil Enterprises
Client Address: 400 Traders Boulevard East
Client City: Mississauga
Client Postal Code: L4Z 1W7
Project Description: This application is for approval of the installation and operation of one (1) extrusion line to manufacture thermoformed products for the disposal packaging industry. This application also includes the installation of comfort heating equipment and two (2) cooling towers. The production line has a hopper, an extrusion die, a thermal former and a cutter followed by manual packaging.
Contaminants:
Emission Control: No Controls

NPRI ID: 10707
Facility ID: 344386, 244696
Latitude: 43.3933
Longitude: -79.7723
Note: Substances included on NPRI reports for this NPRI ID are summarized below in the NPRI ID Substances Summary section. Substances listed in the Substances Summary are included on the basis of NPRI ID only. For entities (NPRI ID) with mobile plants and/or more than one facility location, substances listed above may or may not have been reported for specific facilities/mobile locations. The list of substances additionally includes those which have been included on the NPRI report with an unknown quantity or a quantity of 0.

For specific details about substance quantities, years, release/transfer/disposal methods, the reader is referred the facility report:

https://pollution-waste.canada.ca/national-release-inventory/?fromYear=1993&toYear=2022&name=10707

Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. ***Note:*** *Databases denoted with " * " indicates that the database will no longer be updated. See the individual database description for more information.*

Abandoned Aggregate Inventory: Provincial AAGR

The MAAP Program maintains a database of abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.*

Government Publication Date: Sept 2002*

Aggregate Inventory: Provincial AGR

This database of licensed and permitted pits and quarries is maintained by the Ontario Ministry of Natural Resources and Forestry (MNRF), as regulated under the Aggregate Resources Act, R.S.O. 1990. Aggregate site data has been divided into active and inactive sites. Active sites may be further subdivided into partial surrenders. In partial surrenders, defined areas of a site are inactive while the rest of the site remains active.

Government Publication Date: Up to Nov 2023

Abandoned Mine Information System: Provincial AMIS

The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

Government Publication Date: 1800-Apr 2024

Anderson's Waste Disposal Sites: Private ANDR

The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1860s-Present

Aboveground Storage Tanks: Provincial AST

Historical listing of aboveground storage tanks made available by the Department of Natural Resources and Forestry. Includes tanks used to hold water or petroleum. This dataset has been retired as of September 25, 2014 and will no longer be updated.

Government Publication Date: May 31, 2014

Automobile Wrecking & Supplies: Private AUWR

This database provides an inventory of known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

Government Publication Date: 1999-Apr 30, 2024

Borehole: Provincial BORE

A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW.

Government Publication Date: 1875-Jul 2018

Certificates of Approval: Provincial CA

This database contains the following types of approvals: Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA). Please refer to those individual databases for any information after Oct.31, 2011.

Government Publication Date: 1985-Oct 30, 2011*

Dry Cleaning Facilities: Federal CDRY

List of dry cleaning facilities made available by Environment and Climate Change Canada. Environment and Climate Change Canada's Tetrachloroethylene (Use in Dry Cleaning and Reporting Requirements) Regulations (SOR/2003-79) are intended to reduce releases of tetrachloroethylene to the environment from dry cleaning facilities.

Government Publication Date: Jan 2004-Dec 2022

Commercial Fuel Oil Tanks: Provincial CFOT

Locations of commercial underground fuel oil tanks. This is not a comprehensive or complete inventory of commercial fuel tanks in the province; this listing is a copy of records of registered commercial underground fuel oil tanks obtained under Access to Public Information.
Note that the following types of tanks do not require registration: waste oil tanks in apartments, office buildings, residences, etc.; aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Oct 2023

Chemical Manufacturers and Distributors: Private CHEM

This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.).

Government Publication Date: 1999-Jan 31, 2020

Chemical Register: Private CHM

This database includes a listing of locations of facilities within the Province or Territory that either manufacture and/or distributes chemicals.

Government Publication Date: 1999-Apr 30, 2024

Compressed Natural Gas Stations: Private CNG

Canada has a network of public access compressed natural gas (CNG) refuelling stations. These stations dispense natural gas in compressed form at 3,000 pounds per square inch (psi), the pressure which is allowed within the current Canadian codes and standards. The majority of natural gas refuelling is located at existing retail gasoline that have a separate refuelling island for natural gas. This list of stations is made available by the Canadian Natural Gas Vehicle Alliance.

Government Publication Date: Dec 2012 -May 2024

Inventory of Coal Gasification Plants and Coal Tar Sites: Provincial COAL

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.*

Government Publication Date: Apr 1987 and Nov 1988*

Compliance and Convictions: Provincial CONV

This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here have been found guilty of environmental offenses in Ontario courts of law.

Government Publication Date: 1989-May 2024

Certificates of Property Use: Provincial CPU

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include CPU's on the registry such as (EPA s. 168.6) - Certificate of Property Use.

Government Publication Date: 1994 - Jun 30, 2024

Drill Hole Database: Provincial DRL

The Ontario Drill Hole Database contains information on more than 113,000 percussion, overburden, sonic and diamond drill holes from assessment files on record with the department of Mines and Minerals. Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted to the MNDM. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed company map; or from submitted a "Report of Work".

Government Publication Date: 1886 - Aug 2023

Delisted Fuel Tanks: Provincial DTNK

List of fuel storage tank sites that were once found in - and have since been removed from - the list of fuel storage tanks made available by the regulatory agency under Access to Public Information.

Government Publication Date: Oct 2023

Environmental Activity and Sector Registry: Provincial EASR

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval), Please see our ECA database.

Government Publication Date: Oct 2011-Jun 30, 2024

Environmental Registry: Provincial EBR

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

Government Publication Date: 1994 - Jun 30, 2024

Environmental Compliance Approval: Provincial ECA

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For certificates of approval prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

Government Publication Date: Oct 2011-Jun 30, 2024

Environmental Effects Monitoring: Federal EEM

The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This database provides information on the mill name, geographical location and sub-lethal toxicity data.

Government Publication Date: 1992-2007*

ERIS Historical Searches: Private EHS

ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical Profile" page.

Government Publication Date: 1999-Mar 31, 2024

Environmental Issues Inventory System: Federal EIIS

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety; and to prevent future environmental problems. The EIIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed.

Government Publication Date: 1992-2001*

Emergency Management Historical Event: Provincial EMHE

List of locations of historical occurrences of emergency events, including those assigned to the Ministry of Natural Resources by Order-In-Council (OIC) under the Emergency Management and Civil Protection Act, as well as events where MNR provided requested emergency response assistance. Many of these events will have involved community evacuations, significant structural loss, and/or involvement of MNR emergency response staff. These events fall into one of ten (10) type categories: Dam Failure; Drought / Low Water; Erosion; Flood; Forest Fire; Soil and Bedrock Instability; Petroleum Resource Center Event, EMO Requested Assistance, Continuity of Operations Event, Other Requested Assistance. EMHE record details are reproduced by ERIS under License with the Ontario Ministry of Natural Resources © Queen's Printer for Ontario, 2017.

Government Publication Date: Apr 30, 2022

Environmental Penalty Annual Report: Provincial EPAR

This database contains data from Ontario's annual environmental penalty report published by the Ministry of the Environment and Climate Change. These reports provide information on environmental penalties for land or water violations issued to companies in one of the nine industrial sectors covered by the Municipal Industrial Strategy for Abatement (MISA) regulations.

Government Publication Date: Jan 1, 2011 - Dec 31, 2023

List of Expired Fuels Safety Facilities: Provincial EXP

List of facilities and tanks for which there was once a fuel registration. This is not a comprehensive or complete inventory of expired tanks/tank facilities in the province; this listing is a copy of previously registered tanks and facilities obtained under Access to Public Information. Includes private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc; includes tanks which have been removed from the ground.
Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Oct 2023

Federal Convictions: Federal FCON

Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty.

Government Publication Date: 1988-Jun 2007*

Contaminated Sites on Federal Land: Federal FCS

The Federal Contaminated Sites Inventory includes information on known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government. Includes fire training sites and sites at which Per- and Polyfluoroalkyl Substances (PFAS) are a concern.

Government Publication Date: Jun 2000-Jun 2024

Fisheries & Oceans Fuel Tanks: Federal FOFT

Fisheries & Oceans Canada maintains an inventory of aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation.

Government Publication Date: 1964-Sep 2019

Federal Identification Registry for Storage Tank Systems (FIRSTS): Federal FRST

A list of federally regulated Storage tanks from the Federal Identification Registry for Storage Tank Systems (FIRSTS). FIRSTS is Environment and Climate Change Canada's database of storage tank systems subject to the Storage Tank for Petroleum Products and Allied Petroleum Products Regulations. The main objective of the Regulations is to prevent soil and groundwater contamination from storage tank systems located on federal and aboriginal lands. Storage tank systems that do not have a valid identification number displayed in a readily visible location on or near the storage tank system may be refused product delivery.

Government Publication Date: Oct 31, 2021

Fuel Storage Tank: Provincial FST

List of registered private and retail fuel storage tanks. This is not a comprehensive or complete inventory of private and retail fuel storage tanks in the province; this listing is a copy of registered private and retail fuel storage tanks, obtained under Access to Public Information.
Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Oct 2023

Fuel Storage Tank - Historic: Provincial FSTH

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks. Public records of private fuel storage tanks are only available since the registration became effective in September 1989. This information is now collected by the Technical Standards and Safety Authority.

Government Publication Date: Pre-Jan 2010*

Ontario Regulation 347 Waste Generators Summary: Provincial GEN

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

Government Publication Date: 1986-Oct 31, 2022

Greenhouse Gas Emissions from Large Facilities: Federal GHG

List of greenhouse gas emissions from large facilities made available by Environment Canada. Greenhouse gas emissions in kilotonnes of carbon dioxide equivalents (kt CO2 eq).

Government Publication Date: 2013-Dec 2022

TSSA Historic Incidents: Provincial HINC

List of historic incidences of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen recorded by the TSSA in their previous incident tracking system. The TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of historical fuel spills and leaks in the province. This listing is a copy of the data captured at one moment in time and is hence limited by the record date provided here.

Government Publication Date: 2006-June 2009*

Indian & Northern Affairs Fuel Tanks: Federal IAFT

The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

Government Publication Date: 1950-Aug 2003*

Fuel Oil Spills and Leaks: Provincial INC

Listing of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen reported to the Spills Action Centre (SAC). This is not a comprehensive or complete inventory of fuel-related leaks, spills, and incidents in the province; this listing in a copy of incidents reported to the SAC, obtained under Access to Public Information. Includes incidents from fuel-related hazards such as spills, fires, and explosions. Records are not verified for accuracy or completeness.

Government Publication Date: 31 Oct, 2023

Landfill Inventory Management Ontario: Provincial LIMO

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the Ministry of the Environment, Conservation and Parks compiles new and updated information. Includes small and large landfills currently operating as well as those which are closed and historic. Operators of larger landfills provide landfill information for the previous operating year to the ministry for LIMO including: estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills include information such as site owner, site location and certificate of approval # and status.

Government Publication Date: Mar 31, 2022

Canadian Mine Locations: Private MINE

This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database.

Government Publication Date: 1998-2009*

Mineral Occurrences: Provincial MNR

In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the plan metric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

Government Publication Date: 1846-Feb 2024

National Analysis of Trends in Emergencies System (NATES): Federal NATE

In 1974 Environment Canada established the National Analysis of Trends in Emergencies System (NATES) database, for the voluntary reporting of significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released.

Government Publication Date: 1974-1994*

Non-Compliance Reports: Provincial NCPL

The Ministry of the Environment provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act.

Government Publication Date: Dec 31, 2022

National Defense & Canadian Forces Fuel Tanks: Federal NDFT

The Department of National Defense and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on DND lands. Our inventory provides information on the base name, location, tank type & capacity, tank contents, tank class, date of tank installation, date tank last used, and status of tank as of May 2001. This database will no longer be updated due to the new National Security protocols which have prohibited any release of this database.

Government Publication Date: Up to May 2001*

National Defense & Canadian Forces Spills: Federal NDSP

The Department of National Defense and the Canadian Forces maintains an inventory of spills to land and water. All spill sites have been classified under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered.

Government Publication Date: Mar 1999-Nov 2023

National Defence & Canadian Forces Waste Disposal Sites: Federal NDWD

The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status.

Government Publication Date: 2001-Apr 2007*

National Energy Board Pipeline Incidents: Federal NEBI

Locations of pipeline incidents from 2008 to present, made available by the Canada Energy Regulator (CER) - previously the National Energy Board (NEB). Includes incidents reported under the Onshore Pipeline Regulations and the Processing Plant Regulations related to pipelines under federal jurisdiction, does not include incident data related to pipelines under provincial or territorial jurisdiction.

Government Publication Date: 2008-Jun 30, 2021

National Energy Board Wells: Federal NEBP

The NEBW database contains information on onshore & offshore oil and gas wells that are outside provincial jurisdiction(s) and are thereby regulated by the National Energy Board. Data is provided regarding the operator, well name, well ID No./UWI, status, classification, well depth, spud and release date.

Government Publication Date: 1920-Feb 2003*

National Environmental Emergencies System (NEES): Federal NEES

In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for previous Environment Canada spill datasets. NEES is composed of the historic datasets ' or Trends ' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.

Government Publication Date: 1974-2003*

National PCB Inventory: Federal NPCB

Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. Federal out-of-service PCB containing equipment and PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites. Some addresses provided may be Head Office addresses and are not necessarily the location of where the waste is being used or stored.

Government Publication Date: 1988-2008*

National Pollutant Release Inventory 1993-2020: Federal NPR2

The National Pollutant Release Inventory (NPRI) is Canada's public inventory of pollutant releases (to air, water and land), disposals, and transfers for recycling. The inventory, managed by Environment and Climate Change Canada, tracks over 300 substances. Under the authority of the Canadian Environmental Protection Act (CEPA), owners or operators of facilities that meet published reporting requirements are required to report to the NPRI.

Government Publication Date: Sep 2020

National Pollutant Release Inventory - Historic: Federal NPRI

Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances. This data holds historic records; current records are found in NPR2.

Government Publication Date: 1993-May 2017

Oil and Gas Wells: Private OGWE

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at www.nickles.com.

Government Publication Date: 1988-May 31, 2024

Ontario Oil and Gas Wells: Provincial OOGW

In 1998, the MNR handed over to the Ontario Oil, Gas and Salt Resources Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database include well owner/operator, location, permit issue date, and well cap date, license No., status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provide for each well record.

Government Publication Date: 1800-Aug 2023

Inventory of PCB Storage Sites: Provincial OPCB

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory.

Government Publication Date: 1987-Oct 2004; 2012-Dec 2013

Orders: Provincial ORD

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include Orders on the registry such as (EPA s. 17) - Order for remedial work, (EPA s. 18) - Order for preventative measures, (EPA s. 43) - Order for removal of waste and restoration of site, (EPA s. 44) - Order for conformity with Act for waste disposal sites, (EPA s. 136) - Order for performance of environmental measures.

Government Publication Date: 1994 - Jun 30, 2024

Canadian Pulp and Paper: Private PAP

This information is part of the Pulp and Paper Canada Directory. The Directory provides a comprehensive listing of the locations of pulp and paper mills and the products that they produce.

Government Publication Date: 1999, 2002, 2004, 2005, 2009-2014

Parks Canada Fuel Storage Tanks: Federal PCFT

Canadian Heritage maintains an inventory of known fuel storage tanks operated by Parks Canada, in both National Parks and at National Historic Sites. The database details information on site name, location, tank install/removal date, capacity, fuel type, facility type, tank design and owner/operator.

Government Publication Date: 1920-Jan 2005*

Pesticide Register: Provincial PES

The Ontario Ministry of the Environment and Climate Change maintains a database of licensed operators and vendors of registered pesticides.

Government Publication Date: Oct 2011-Jun 30, 2024

NPRI Reporters - PFAS Substances: Federal PFCH

The National Pollutant Release Inventory (NPRI) is Canada's public inventory of releases, disposals, and transfers, tracking over 320 pollutants. Per - and polyfluoroalkyl substances (PFAS) are a group of over 4,700 human-made substances for which adverse environmental and health effects have been observed. This listing of PFAS substance reporters includes those NPRI facilities that reported substances that are found in either: a) the Comprehensive Global Database of PFASs compiled by the Organisation for Economic Co-operation and Development (OECD), b) the US Environmental Protection Agency (US EPA) Master List of PFAS Substances, c) the US EPA list of PFAS chemicals without explicit structures, or d) the US EPA list of PFAS structures (encompassing the largest set of structures having sufficient levels of fluorination to potentially impart PFAS-type properties).

Government Publication Date: Sep 2020

Potential PFAS Handlers from NPRI: Federal PFHA

The National Pollutant Release Inventory (NPRI) is Canada's public inventory of releases, disposals, and transfers, tracking over 320 pollutants. Per - and polyfluoroalkyl substances (PFAS) are a group of over 4,700 human-made substances for which adverse environmental and health effects have been observed. This list of potential PFAS handlers includes those NPRI facilities that reported business activity (NAICS code) included in the US Environmental Protection Agency (US EPA) list of Potential PFAS-Handling Industry Sectors, further described as operating in industry sectors where literature reviews indicate that PFAS may be handled and/or released. Inclusion of a facility in this listing does not indicate that PFAS are being manufactured, processed, used, or released by the facility - these are facilities that potentially handle PFAS based on their industrial profile.

Government Publication Date: Sep 2020

Pipeline Incidents: Provincial PINC

List of pipeline incidents (strikes, leaks, spills). This is not a comprehensive or complete inventory of pipeline incidents in the province; this listing in an historical copy of records previously obtained under Access to Public Information. Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2021

Private and Retail Fuel Storage Tanks: Provincial PRT

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks and licensed retail fuel outlets. This database includes an inventory of locations that have gasoline, oil, waste oil, natural gas and/or propane storage tanks on their property. The MCCR no longer collects this information. This information is now collected by the Technical Standards and Safety Authority (TSSA).

Government Publication Date: 1989-1996*

Permit to Take Water: Provincial PTTW

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include PTTW's on the registry such as OWRA s. 34 - Permit to take water.

Government Publication Date: 1994 - Jun 30, 2024

Ontario Regulation 347 Waste Receivers Summary: Provincial REC

Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data.

Government Publication Date: 1986-1990, 1992-2021

Record of Site Condition: Provincial RSC

The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental cleanup orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up. RSCs filed after July 1, 2011 will also be included as part of the new (O.Reg. 511/09). The Government of Ontario states that it is not responsible for the accuracy of the information in this Registry.

Government Publication Date: 1997-Sept 2001, Oct 2004-Jun 2024

Retail Fuel Storage Tanks: Private RST

This database includes an inventory of retail fuel outlet locations (including marinas) that have on their property gasoline, oil, waste oil, natural gas and / or propane storage tanks.

Government Publication Date: 1999-Apr 30, 2024

Scott's Manufacturing Directory: Private SCT

Scott's Directories is a data bank containing information on over 200,000 manufacturers across Canada. Even though Scott's listings are voluntary, it is the most comprehensive database of Canadian manufacturers available. Information concerning a company's address, plant size, and main products are included in this database.

Government Publication Date: 1992-Mar 2011*

Ontario Spills: Provincial SPL

List of spills and incidents made available by the Ministry of the Environment, Conservation and Parks. This database identifies information such as location (approximate), type and quantity of contaminant, date of spill, environmental impact, cause, nature of impact, etc. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X. The Ministry of the Environment, Conservation and Parks cites the coronavirus pandemic as an explanation for delays in releasing data pursuant to requests. This database includes spill incidents that occurred in Mar 2023-Mar 2024, May 2024 in addition to those listed in the Government Publication Date.

Government Publication Date: 1988-Jan 2023; see description

Wastewater Discharger Registration Database: Provincial SRDS

Facilities that report either municipal treated wastewater effluent or industrial wastewater discharges under the Effluent Monitoring and Effluent Limits (EMEL) and Municipal/Industrial Strategy for Abatement Regulations. The Municipal/Industrial Strategy for Abatement (MISA) division of the Ontario Ministry of Environment keeps record of direct dischargers of toxic pollutants within nine sectors including: Electric Power Generation, Mining, Petroleum Refining, Organic Chemicals, Inorganic Chemicals, Pulp & Paper, Metal Casting, Iron & Steel, and Quarries.

Government Publication Date: 1990-Dec 31, 2021

Anderson's Storage Tanks: Private TANK

The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit year, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1915-1953*

Transport Canada Fuel Storage Tanks: Federal TCFT

List of fuel storage tanks currently or previously owned or operated by Transport Canada. This inventory also includes tanks on The Pickering Lands, which refers to 7,530 hectares (18,600 acres) of land in Pickering, Markham, and Uxbridge owned by the Government of Canada since 1972; properties on this land has been leased by the government since 1975, and falls under the Site Management Policy of Transport Canada, but is administered by Public Works and Government Services Canada. This inventory provides information on the site name, location, tank age, capacity and fuel type.

Government Publication Date: 1970 - Apr 2023

Variances for Abandonment of Underground Storage Tanks: Provincial VAR

Listing of variances granted for storage tank abandonment. This is not a comprehensive or complete inventory of tank abandonment variances in the province; this listing is a copy of tank abandonment variance records previously obtained under Access to Public Information. In Ontario, registered underground storage tanks must be removed within two years of disuse; if removal of a tank is not feasible, an application may be sought for a variance from this code requirement.
Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2022

Waste Disposal Sites - MOE CA Inventory: Provincial WDS

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

Government Publication Date: Oct 2011-Jun 30, 2024

Waste Disposal Sites - MOE 1991 Historical Approval Inventory: Provincial WDSH

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30st, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number.

Government Publication Date: Up to Oct 1990*

Water Well Information System: Provincial WWIS

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

Government Publication Date: Dec 31 2023

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

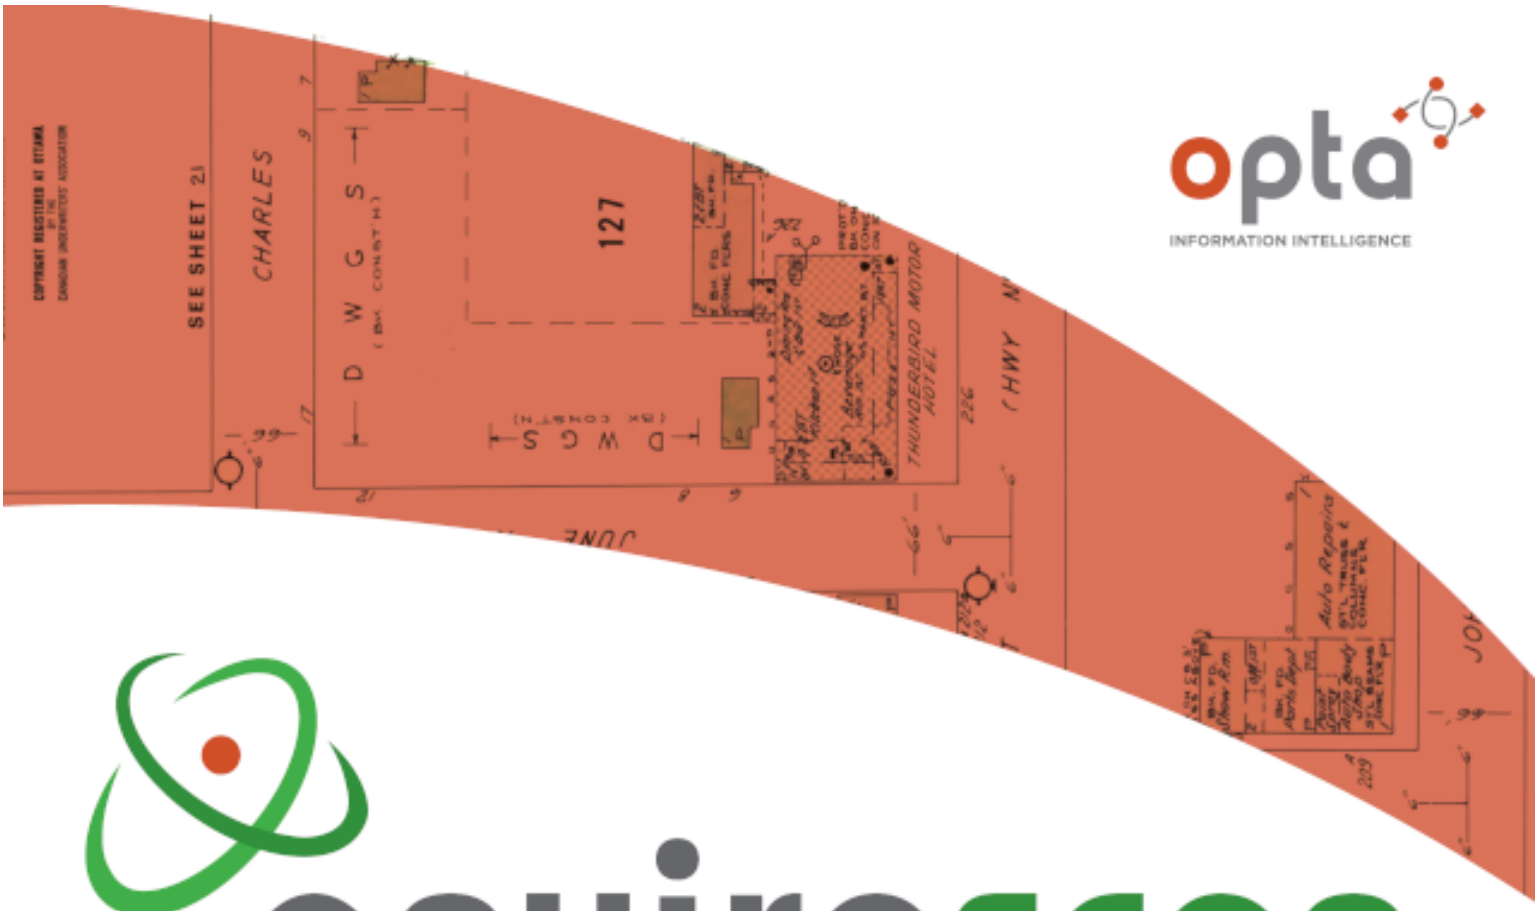
Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.



'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

Report

The documents (hereinafter referred to as the "Documents") to be released as part of the report (hereinafter referred to as the "Report") to be delivered to the purchaser as set out above are documents in Opta's records relating to the described property (hereinafter referred to as the "Property"). Opta makes no representations or warranties respecting the Documents whatsoever, including, without limitation, with respect to the completeness, accuracy or usefulness of the Documents, and does not represent or warrant that these are the only plans and reports prepared in association with the Property or in Opta's possession at the time of Report delivery to the purchaser. The Documents are current as of the date(s) indicated on them. Interpretation of the Documents, if any, is by inference based upon the information which is apparent and obvious on the face of the Documents only. Opta does not represent, warrant or guarantee that interpretations other than those referred to do not exist from other sources. The Report will be prepared for use by the purchaser of the services as shown above hereof only.

Disclaimer

Opta disclaims responsibility for any losses or damages of any kind whatsoever, whether consequential or other, however caused, incurred or suffered, arising directly or indirectly as a result of the services (which services include, but are not limited to, the preparation of the Report provided hereunder), including but not limited to, any losses or damages arising directly or indirectly from any breach of contract, fundamental or otherwise, from reliance on Opta Reports or from any tortious acts or omissions of Opta's agents, employees or representatives.

Entire Agreement

The parties hereto acknowledge and agree to be bound by the terms and conditions hereof. The request form constitutes the entire agreement between the parties pertaining to the subject matter hereof and supersedes all prior and contemporaneous agreements, negotiations and discussions, whether oral or written, and there are no representations or warranties, or other agreements between the parties in connection with the subject matter hereof except as specifically set forth herein. No supplement, modification, waiver, or termination of the request shall be binding, unless confirmed in writing by the parties hereto.

Governing Document

In the event of any conflicts or inconsistencies between the provisions hereof and the Reports, the rights and obligations of the parties shall be deemed to be governed by the request form, which shall be the paramount document.

Law

This agreement shall be governed by and construed in accordance with the laws of the Province of Ontario and the laws of Canada applicable therein.

Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY

Reliance on information in Report: This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a database review of environmental records.

License for use of information in Report: No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

Your Liability for misuse: Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

No warranty of Accuracy or Liability for ERIS: The information contained in this report has been produced by ERIS Information Limited Partnership ("ERIS") using various sources of information, including information provided by Federal and Provincial government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

Trademark and Copyright: You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report (s) are protected by copyright owned by ERIS Information Limited Partnership. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

Legal Description:	Trafalgar Con 1 SDS Lot 7
Location Description:	N of gas pipeline, S of Highway 5 [Dundas St], adj. Millcroft Pk Dr, nr Sheldon Ck
Municipality:	Burlington City
Current Municipality:	Burlington City
RM:	Halton Region
Facility:	Dump
Date Active:	1970s
Date Begun:	
Date Complete:	Aug 15 1974
Area (Ha):	
Landfill Type:	
Group Name:	Sheldon Creek
Operated By:	

Serial: MOEE a210103
NTS: 30M05
Diameter (m):

Historical Summary:

Trafalgar Con 1 SDS Dump MOEE 1994 Burlington Con 2 SDS lot 1 cited as a closed wsate disposal site [Ontario Ministry of the Environment [1994] Waste disposal site inventory, [Toronto]: Ontario Environment, 1994., i, 196 pp., maps, ISBN 0772984093: 109]. Datapoint plots to Trafalgar Con 1 SDS lot 7. 1996 MapArt Datapoint plots to N of gas pipeline, S of Highway 5 [Dundas St], adj. Millcroft Pk Dr, near Sheldon Ck ([1996] MapArt Corporation, Golden Horseshoe Atlas, 1996 Edition, ISBN 1-55198-384-2).

Certificate #: 7105-592Q7C
Application Year: 02
Issue Date: 5/7/02
Approval Type: Industrial air
Status: Approved
Application Type: New Certificate of Approval
Client Name: Amhil Enterprises
Client Address: 400 Traders Boulevard East
Client City: Mississauga
Client Postal Code: L4Z 1W7
Project Description: This application is for approval of the installation and operation of one (1) extrusion line to manufacture thermoformed products for the disposal packaging industry. This application also includes the installation of comfort heating equipment and two (2) cooling towers. The production line has a hopper, an extrusion die, a thermal former and a cutter followed by manual packaging.
Contaminants:
Emission Control: No Controls

NPRI ID: 10707
Facility ID: 344386, 244696
Latitude: 43.3933
Longitude: -79.7723
Note: Substances included on NPRI reports for this NPRI ID are summarized below in the NPRI ID Substances Summary section. Substances listed in the Substances Summary are included on the basis of NPRI ID only. For entities (NPRI ID) with mobile plants and/or more than one facility location, substances listed above may or may not have been reported for specific facilities/mobile locations. The list of substances additionally includes those which have been included on the NPRI report with an unknown quantity or a quantity of 0.

For specific details about substance quantities, years, release/transfer/disposal methods, the reader is referred the facility report:

https://pollution-waste.canada.ca/national-release-inventory/?fromYear=1993&toYear=2022&name=10707

NPRI ID Substances Summary

CAS No: 7647-01-0
Is VOC?: FALSE

Name English: Hydrochloric acid
Name French: Acide chlorhydrique
Sort English: Hydrochloric acid
Sort French: Acide chlorhydrique
Is PAH?: FALSE
NPRI: TRUE

CAS No: 107-21-1
Is VOC?: FALSE
Is DF?: FALSE
Name English: Ethylene glycol
Name French: Éthylène glycol
Sort English: Ethylene glycol
Sort French: Éthylèneglycol
Is PAH?: FALSE
NPRI: TRUE

CAS No: 7632-00-0
Is VOC?: FALSE
Is DF?: FALSE
Name English: Sodium nitrite
Name French: Nitrite de sodium
Sort English: Sodium nitrite
Sort French: Nitrite de sodium
Is PAH?: FALSE
NPRI: TRUE

CAS No: NA - M16
Is VOC?: FALSE
Is DF?: FALSE
Name English: Volatile Organic Compounds (VOCs)
Name French: Composés organiques volatils (COV)
Sort English: Volatile Organic Compounds (VOCs)
Sort French: Composés organiques volatils (COV)
Is PAH?: FALSE
NPRI: TRUE

CAS No: 7664-93-9
Is VOC?: FALSE
Is DF?: FALSE
Name English: Sulphuric acid
Name French: Acide sulfurique
Sort English: Sulphuric acid
Sort French: Acide sulfurique
Is PAH?: FALSE
NPRI: TRUE

CAS No: 67-56-1
Is VOC?: TRUE
Is DF?: FALSE
Is PAH?: FALSE
NPRI: TRUE

Name English: Methanol
Name French: Méthanol
Sort English: Methanol
Sort French: Méthanol

Note: Substances included on NPRI reports for this NPRI ID are summarized below in the NPRI ID Substances Summary section. Substances listed in the Substances Summary are included on the basis of NPRI ID only. For entities (NPRI ID) with mobile plants and/or more than one facility location, substances listed above may or may not have been reported for specific facilities/mobile locations. The list of substances additionally includes those which have been included on the NPRI report with an unknown quantity or a quantity of 0.

For specific details about substance quantities, years, release/transfer/disposal methods, the reader is referred the facility report:

https://pollution-waste.canada.ca/national-release-inventory/?fromYear=1993&toYear=2022&name=10707

NAICS 6 Description:	Lessors of Non-Residential Buildings (except Mini-Warehouses)		

Substance Release Report

CAS No:	11104-93-1
Report ID:	
Rpt Period:	2004
Subst Released:	Nitrogen oxides (expressed as NO2)
Air:	
Water:	
Land:	
Total Releases:	
Units:	tonnes

CAS No:	NA - M16
Report ID:	
Rpt Period:	2004
Subst Released:	Volatile Organic Compounds (VOCs)
Air:	
Water:	
Land:	

Total Releases:
Units: tonnes

CAS No: 74-82-8
Report ID:
Rpt Period: 2004
Subst Released: Methane
Air:
Water:
Land:
Total Releases:
Units: tonnes

CAS No: 10024-97-2
Report ID:
Rpt Period: 2004
Subst Released: Nitrous oxide
Air:
Water:
Land:
Total Releases:
Units: tonnes

CAS No: 630-08-0
Report ID:
Rpt Period: 2004
Subst Released: Carbon monoxide
Air:
Water:
Land:
Total Releases:
Units: tonnes

CAS No: 7446-09-5
Report ID:
Rpt Period: 2004
Subst Released: Sulphur dioxide
Air:
Water:
Land:
Total Releases:
Units: tonnes

CAS No: NA - M08
Report ID:
Rpt Period: 2004
Subst Released: PM - Total Particulate Matter
Air:
Water:
Land:
Total Releases:
Units: tonnes

CAS No: 811-97-2
Report ID:
Rpt Period: 2004
Subst Released: HFC-134a Hydrofluorocarbon
Air:
Water:
Land:
Total Releases:
Units: tonnes

CAS No: NA - M10
Report ID:
Rpt Period: 2004

Subst Released:	PM2.5 - Particulate Matter <= 2.5 Microns
Air:	
Water:	
Land:	
Total Releases:	
Units:	tonnes
CAS No:	124-38-9
Report ID:	
Rpt Period:	2004
Subst Released:	Carbon dioxide
Air:	
Water:	
Land:	
Total Releases:	
Units:	tonnes
CAS No:	NA - M09
Report ID:	
Rpt Period:	2004
Subst Released:	PM10 - Particulate Matter <= 10 Microns
Air:	
Water:	
Land:	
Total Releases:	
Units:	tonnes
