NOTICE OF STUDY COMMENCEMENT

Lower Rambo Creek Flood Mitigation
Municipal Class Environmental Assessment Study

The Study

The City of Burlington, through Aquafor Beech Limited, is conducting an Environmental Assessment (EA) for Lower Rambo Creek Flood Mitigation. The EA will be used to develop a preferred strategy to reduce flooding from Lower Rambo Creek between Caroline Street and Martha Street. The objective of this EA is to find potential infrastructure improvements to help reduce flood hazard risks, build climate change resiliency, and support growth and development in the downtown area.
When complete, the EA will have identified, evaluated and compared infrastructure improvements that will reduce the flood hazard. The EA will evaluate the flood hazard reduction provided by each alternative and assess the alternatives as a whole to determine infrastructure improvements that will best suit the City of Burlington. The EA will select a preferred alternative and provide direction for an approach that effectively and sustainably manages stormwater while considering current and future environmental needs.

The Process

This EA will follow the planning and design process as defined in the Municipal Engineers Association Municipal Class Environmental Assessment document (October 2000, as amended in 2007, 2011, and 2015) for a Schedule 'B' Class EA. Results from this study will be documented in an environmental assessment that will be made available for a public review period. At that time, residents, Indigenous communities, and other interested persons or groups will be informed of when and where the environmental assessment can be reviewed.

Comments Invited

We are interested in hearing any comments or concerns you may have with respect to this study. Comments received through the course of the study will be considered in selecting the preferred option. Information will be collected in accordance with the Municipal Freedom of Information and Protection of Privacy Act. With the exception of personal information, all comments will become a part of the public record. To provide your comments, request additional information, request to be placed on the study mailing list, or if you require this notice to be provided in an alternative format as per the Accessibility for Ontarians with Disabilities Act (2005). Please contact either one of the following project representatives listed below:
