Presentation Format

Presentation (~10-15 Minutes)

- Land Acknowledgement
- Project Map
- General Scope of Work
- Schedule
- Budget
- Additional Project Information

Question & Answer Period

Please email specific questions concerning your property to :
Chris.Onishi@Burlington.ca

Land Acknowledgement

Burlington as we know it today is rich in history and modern traditions of many First Nations and the Métis.

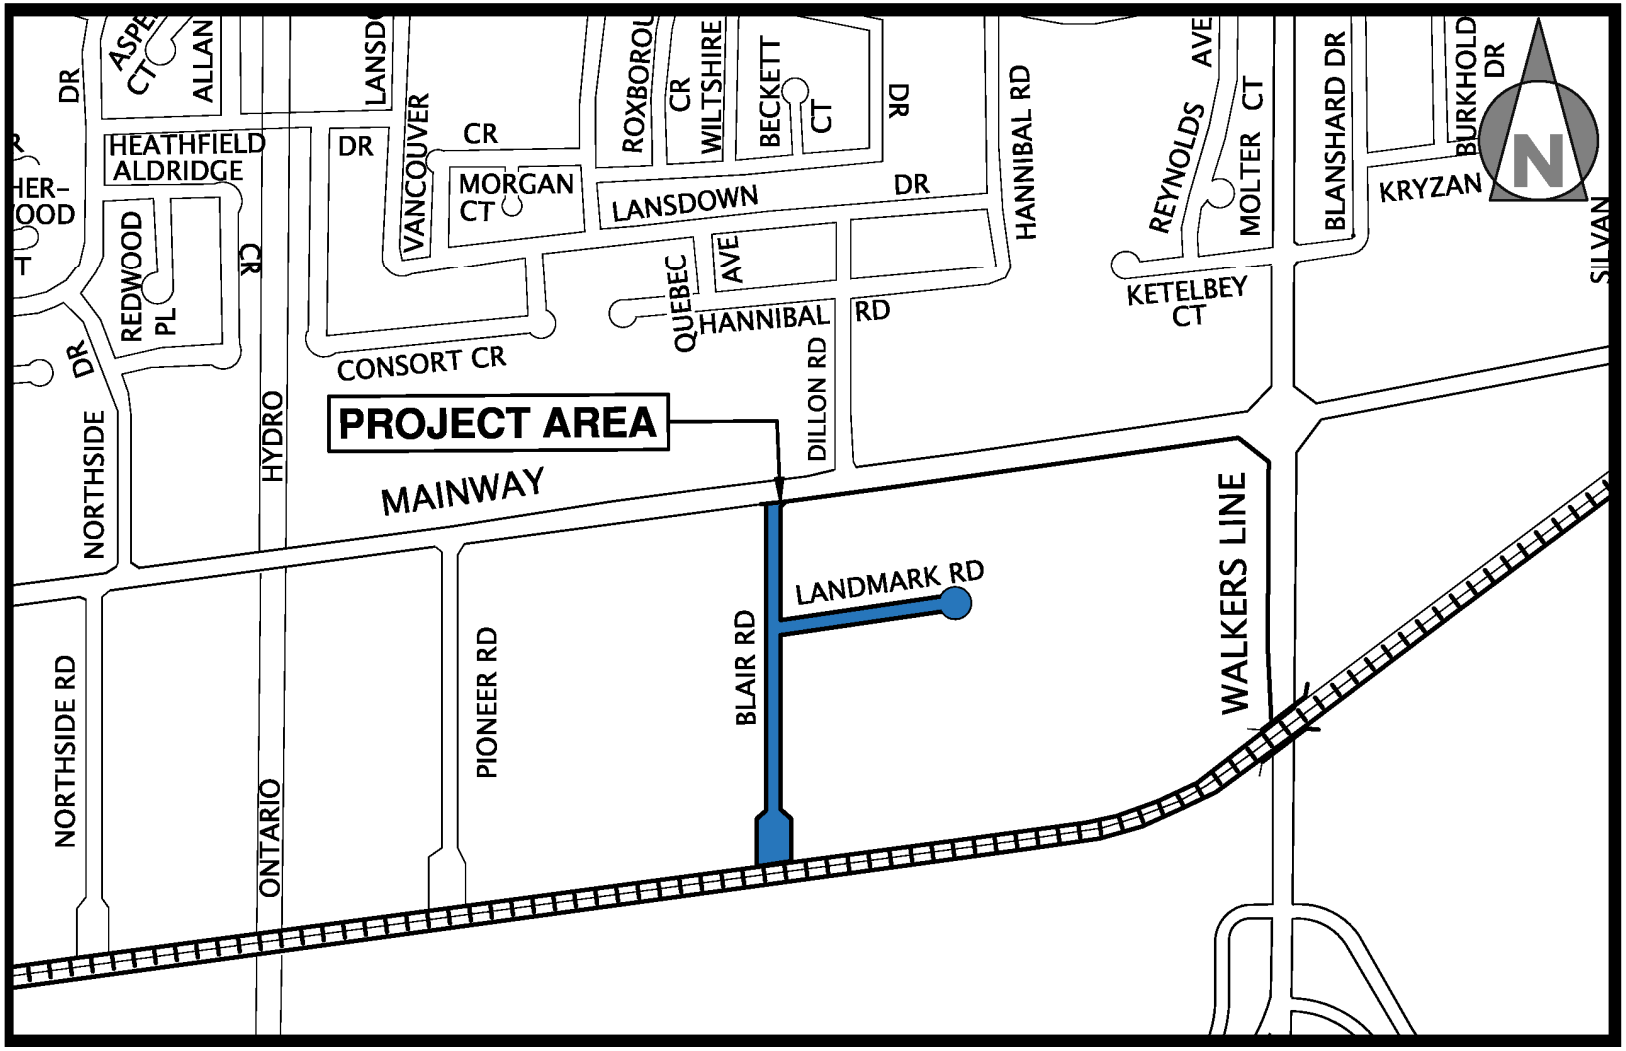

From the Anishinaabeg to the Haudenosaunee, and the Métis –

our lands spanning from Lake Ontario to the Niagara Escarpment are steeped in Indigenous history.

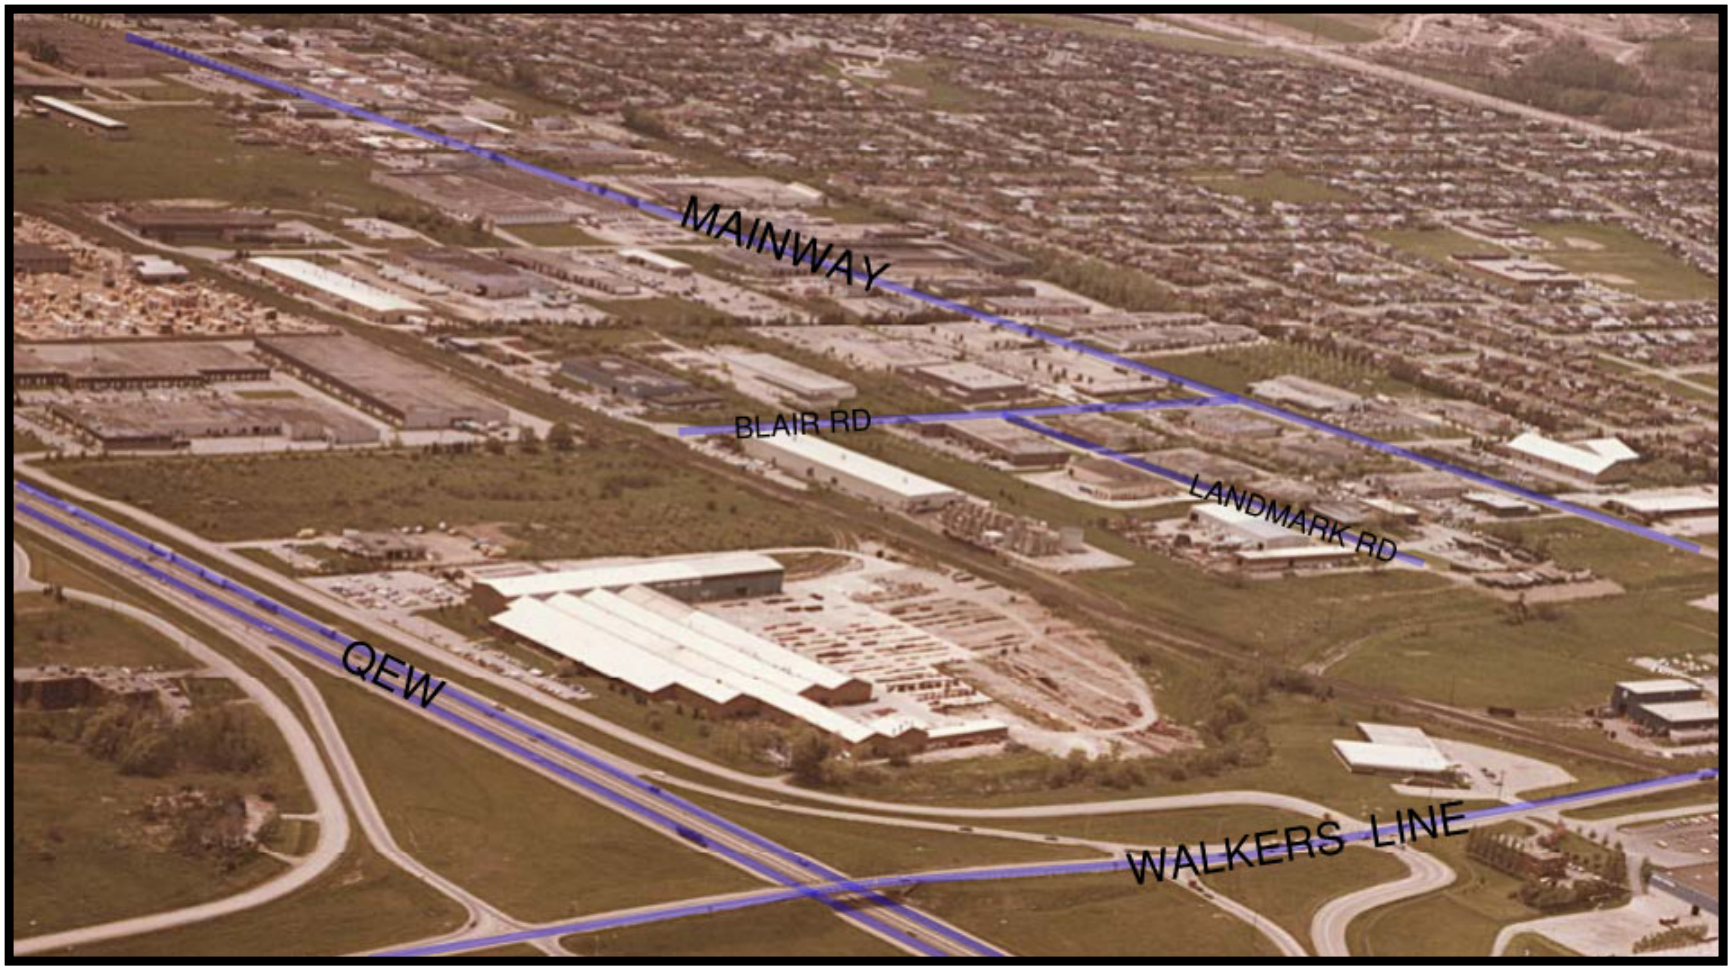

The territory is mutually covered by the Dish with One Spoon Wampum Belt Covenant, an agreement between the Iroquois Confederacy, the Ojibway and other allied Nations to peaceably share and care for the resources around the Great Lakes.

We would like to acknowledge that the land on which we gather is part of the Treaty Lands and Territory of the Mississaugas of the Credit.

Budget &Tentative Project Schedule

Public Information Centre:	May 26, 2026
Tender Close:	June 2026
Construction:	July – November 2026
City Budget:	$ 3,100,000

Additional Information

Trees

Tree protection barriers will be erected around all trees in the right-of-way, within the construction limits, with an opening to allow property owners access to maintain the area within.

If additional trees require removal due to unforeseen impact or conflict, property owners will be informed.

Lane Closures and Driveway Access

Lane closures and short-term driveway entrance closures will be necessary to complete the proposed works. Vehicle traffic will be able to detour around the construction areas.

If a short-term driveway closure is required to complete the road and underground work, the City inspector and Contractor will notify the businesses in advance of any planned work.

Garbage Pick-up

Please continue to put your garbage and recycling out on the usual day. To help the contractor return your bins to you when they need to be relocated for pick-up, we ask that you write your property number on your garbage cans, recycling bins, and green carts.

Noise

Construction noise levels will be enforced as per local By-Law

Additional Information…

Irrigation

- Please flag your irrigation system heads and pipes prior to construction to limit damage.
- Some irrigation damage is expected. If your system is damaged within private property limits, please contact the City.
- Repairs to your irrigation system from construction damage will typically be completed by the property owner's irrigation contractor and reasonable costs will be covered by the City.

Business Deliveries - During Construction

The City will provide regular mailouts and project webpage updates to inform local businesses of any planned lane closures due to construction.

For any businesses with regular scheduled deliveries – Please email City Staff with any critical timing so that the contractor can coordinate their work in the area. It is anticipated that there will be minor disruptions to travel times within the project area.

What's Next

Once the project is awarded and a schedule is provided to the City, a project update will be mailed out to the citizens in the area reiterating some of the points discussed above, as well as any additional information that has been acquired in the interim.

Questions/Comments

For more information, please visit the project web page:
