

Bromley Road Area Minor Reconstruction Project

Project Update – January 2025

Burlington.ca/BromleyRoad

D'Orazio Infrastructure Group Ltd. has been awarded the Bromley Road Area Minor Reconstruction contract.

Project Location

Project Scope

The City of Burlington and Halton Region will be working on:

Location	City Works	Region Works
Bromley Road Verhoeven Road Broughton Crescent Linwood Drive Maureen Court Brewer Court	• Full asphalt, sidewalk, and curb/gutter replacement • Localized storm sewer repairs • Street lighting upgrades • Sidewalk infill (Bromley Road)	• Watermain and service replacement • Wastewater main and lateral replacement/lining

Project Schedule

As this project's scope includes the replacement of both the water and wastewater system, as well as full surface works, the work on each street will be completed in phases, making the work on each street and area non-continuous. First, the wastewater main and laterals replacement, followed by watermain and services works, both with temporary restoration, and finally by surface works, i.e. curb, sidewalk, asphalt, driveways, sod, etc. There will be time in between each operation when work will be paused on your street while the contactor works on a different a task or street. We ask that residents are patient and understanding. Every effort will be made to expeditiously complete the works on each street.

The contractor has remobilized for 2025 works and a tentative construction timeline is as follows:

Location	Works	Timeline
Bromley Road Maureen Court Linwood Crescent Brewer Court	Wastewater main replacement	January to April 2025
Verhoeven Road Broughton Crescent	Wastewater main replacement	Spring 2025
All Streets	Wastewater lateral replacement Watermain and service replacement Street lighting	Spring to Fall 2025
	Permanent surface works and restoration	Late-2025 and Spring/Summer 2026

The construction timeline above is tentative and dependent on weather and other factors. A Project Update, with updated scheduling, will be provided to residents in Fall 2025.

Contacts

Inquiry	Contact
Day-to-day construction	Rob McQueen, Construction Inspector City of Burlington 289-983-6304 Robert.McQueen@burlington.ca
Water and Wastewater Main Replacement	Rama Garigipati, Project Manager Halton Region 905-825-6000, ext. 7256 Rama.Garigipati@halton.ca
All other construction inquiries	Ryan Stoneman, Project Manager City of Burlington 905-335-7600, ext. 7817 Ryan.Stoneman@burlington.ca

Utilities
Utilities, such as Union Gas, Hydro and Bell Canada, have already started to locate their existing infrastructure to prepare for this construction. Residents will see various coloured paint marks and flags on their lawn and roadway. These are noting the location of various underground utilities, i.e. gas (yellow), hydro (red) water (blue), etc. ***Please do not remove these marker stakes or paint markings. Staff will return to remove them once the project is complete.***

Water and wastewater disruptions
There will be disruption to your water service during the course of the project. Halton Region will provide at least 48 hours advance written notice of all scheduled shutdowns or disruptions.

Watermain installation and tie-in work may be required to take place at night. Advance notification will be provided.

Wastewater Works
The contractor may ask you to restrict your water usage at specific times during the course of construction. This will last for a limited amount of time while they rehabilitate and/or replace your lateral.

Access to Your Home
During normal construction hours (Monday to Friday, 7 a.m. to 6:30 p.m.) vehicle access to and from your properties may be difficult. Driveways will be temporarily closed when work is being carried out in the immediate area. Either the inspector or the contractor will notify you of access interruptions before the closure.

Driveway Impacts
During replacement of existing curb and sidewalk, and the installation of services and laterals, portions of existing driveways will require replacement. These driveways will be replaced full width to the limit of disturbance.

Road Closures/Lane Restrictions
Lane restrictions and short-term road closures will be in place at times during construction. You will still have access to your home. Additional information will be provided during construction.

Parking
For the duration of construction, enforcement of the “5-hour” maximum on-street parking by-law will be relaxed when your driveway is inaccessible or closed. Residents are asked to register their vehicle online at www.burlington.ca/parking or call 905-335-7816 Monday to Friday 8:30 to 4:30 p.m.

Vehicles are not permitted to park where signs are posted. (e.g. No Parking, No Stopping, and Fire Route etc.) In addition, vehicles are not to block fire hydrants, driveway access or park their vehicles facing the wrong direction.

How does a parking exemption work?

- It allows a vehicle to park on the street beyond the five-hour limit or overnight between 1 a.m. and 6 a.m., up to 15 days per calendar year, per licence plate.
- The only two parking offences waived AFTER a vehicle is registered for a parking exemption are:
    1. Park exceeding five-hour limit
    2. Park between 1 a.m. and 6 a.m.
- All other parking offences apply as they are not part of the parking exemption program.

During City construction projects, the extra days will not be included in the 15-day-per-year limit when your driveway is not accessible. However, it is important to register your vehicle for this program so that you will not receive a parking ticket.

Garbage Pick up
Please continue to put your garbage and recycling out on the usual day. It is the contractor’s responsibility to move your garbage and recycling to a location that can be accessed by the garbage truck and return your garbage/recycling containers. To help the contractor, we ask that you mark your house number on your bins.

Lawn Irrigation System
If you have a lawn irrigation system where curb and sidewalk are to be replaced or installed, we request that you flag all irrigation heads, to help avoid damage. The City is not responsible for damaged heads within the road allowance. This does not have to be done until work in your area is scheduled.

Vibration
You may at times experience minor vibration from construction equipment. We recommend that you remove small, light objects from shelving around the house.

Trees
Tree protection barriers will be erected around all trees in the right-of-way and in front of adjacent private trees within the construction limits, with an opening to allow homeowner access to maintain the area within.
There may be boulevard trees removed due to conflict with the installation of the new water and wastewater mains and services, as well as other unforeseen circumstances. If a conflict arises, alternate installation locations and methods will be reviewed in depth, but tree removals may be unavoidable. Homeowners adjacent to these removals will be informed prior to removal.

School Bus Access
Due to reduced access through the site during construction, school bussing routes may require modification. The service provider will provide additional information. Coordination will be made to ensure safe pick-up locations are maintained.

Canada Post
Due to access concerns regarding door-to-door mail delivery, temporary single-point mail pick-up location(s) will be coordinated by Canada Post.

Project Updates and Current Information
If you would like to receive notification via email when future Project Updates are available, please subscribe to the project webpage **Burlington.ca/BromleyRoad**

We would like to thank you for your co-operation and understanding during this construction period.

Kind Regards,

Ryan Stoneman
