

# Waterdown Road – Craven Avenue to Moutain Brow Road

# Project Update – April 2021

# www.burlington.ca/waterdown

## Advanced Retaining Wall Works

The Advanced Works continue at the north end of the project site. The tentative completion date is June 2021.

## Hydro Pole Relocations

Beginning at the end of May/early June, the hydro pole line on the east side of Waterdown Road and all guy poles on the west side of Waterdown Road will be relocated. The overhead utility relocation (hydro, Bell, Cogeco) will take place until mid 2022. Tree removals and pruning, as well as some minor grading will be required. In early May, stakes will be placed to indicate the pole locations. The work will start at Craven Avenue and head north.

## Advanced Watermain Works

Halton Region will be completing advanced watermain works from the Waterdown Reservoir Station (1376 Waterdown Road) to Flatt Road. The tentative schedule for construction is from late July to early December, 2021. The Region will maintain through traffic where possible, however, temporary road closures are anticipated during the construction; the Region is currently working with design specialists to try to limit the impacts of any road closures. Additional information will follow when available.

**Main Construction Contract**

At this time, we anticipate the main construction contract beginning in mid-to-late 2022. A public meeting will be held prior to the construction taking place.

**Garbage Pick up**

Please continue to put your garbage and recycling out on the usual day. It is the Contractor's responsibility to move your garbage to a location that can be accessed by the garbage truck and return your containers.

**Additional Project Information**
