Executive Summary

B.I.G. Consulting Inc. (BIG) was retained by Kyle Camarro on behalf of Camarro Developments Inc. (Client), to complete a Phase One Environmental Site Assessment (ESA) at the property located at 789 and 795 Brant Street, in Burlington, Ontario (Site), as shown on Figure 1. The objective of the investigation was to support the filing of a Record of Site Condition (RSC) in accordance with Ontario Regulation 153/04 (O.Reg.153/04), as amended. It is BIG's understanding that the Site will be redeveloped for residential purposes in the future, which would require an RSC.

A Phase One ESA is a systematic qualitative process to assess the environmental condition of a site based on its historical and current uses. This Phase One ESA was conducted in accordance with O.Reg.153/04 and in accordance with generally accepted professional practices.

The Site is located to the south of Prospect Street and east of Brant Street, in Burlington, Ontario, as shown on Figure 1. For simplicity of this report, Brant Street is considered running north to south. The Site is irregular in shape and measures approximately 2,250 m^2 in size. The Site is currently occupied by one (1) irregularly shaped two-storey slab-on-grade commercial building at 795 Brant Street, and one (1) irregularly shaped two-storey commercial building with one (1) level of basement and a parking garage at 789 Brant Street (Site buildings). The Site buildings have a total footprint of approximately 420 m^2 and occupy approximately 19 % of the Site. The areas surrounding the Site buildings are covered with asphalt and landscaping.

Please note that general environmental management and housekeeping practices were reviewed as part of this assessment insofar as they could impact the environmental condition of the Site. However, a detailed review of regulatory compliance issues was beyond the scope of our investigation. Based on the Phase One ESA findings, the following information is provided in support of the Qualified Person's conclusion:

APEC	Location of APEC on Phase One Property	PCA	Location of PCA (On-Site or Off-Site)	Contaminants of Concern	Media Potentially Impacted (Groundwater, soil and/or sediment)
APEC 1: De-icing salts usage	Exterior of Site buildings	"Other" – Usage of De-icing Salts	On-Site	Electrical Conductivity, SAR, Sodium and Chloride	Soil and Groundwater
APEC 2: Former auto service	Northern portion	#10 – Commercial Autobody Shops	Off-Site	PHCs, BTEX, and VOCs	Groundwater
APEC 3: Former UST	Northern portion	#28 – Gasoline and Associated Products Storage in Fixed Tanks	Off-Site	PHCs and BTEX	Groundwater
APEC 4: Former auto service	Northwestern portion	#10 – Commercial Autobody Shops	Off-site	PHCs, BTEX, and VOCs	Groundwater
APEC 5: Former dry cleaner	Northwestern portion	#37 –Operation of Dry Cleaning Equipment (where chemicals are used	Off-site	VOCs	Groundwater

1) *Area of Potential Environmental Concern (APEC) means the area on, in or under a Phase One Study Area where one or more contaminants are potentially present, as determined through the Phase One ESA, including through:*

   a) identification of post or current uses on, in or under the phase one property, and

   b) identification of potentially contaminating activities.

2) *Potentially contaminating activity means a use or activity set out in Column A of Table 2 of Schedule D that is occurring or has occurred in a Phase One Study Area.*
3) *PHCs - petroleum hydrocarbons, BTEX - benzene, toluene, ethylbenzene, xylenes, VOCs - volatile organic compounds.*

Based on the findings and conclusions of this Phase One ESA, a Phase Two ESA is required to assess the soil and groundwater conditions at the Site prior to submitting an RSC.

This executive summary is a brief synopsis of the report and should not be read in lieu of reading the report in its entirety.

1. Introduction

B.I.G. Consulting Inc. (BIG) was retained by Kyle Camarro on behalf of Camarro Developments Inc. (Client), to complete a Phase One Environmental Site Assessment (ESA) at the property located at 789 and 795 Brant Street, in Burlington, Ontario (Site), as shown on Figure 1. The objective of the investigation was to support the filing of a Record of Site Condition (RSC) in accordance with Ontario Regulation 153/04 (O.Reg.153/04), as amended. It is BIG's understanding that the Site will be redeveloped for residential purposes in the future, which would require an RSC.

A Phase One ESA is a systematic qualitative process to assess the environmental condition of a site based on its historical and current uses. This Phase One ESA was conducted in accordance with O.Reg.153/04, as amended, and in accordance with generally accepted professional practices. Subject to this standard of care, BIG makes no express or implied warranties regarding its services and no third-party beneficiaries are intended.

1.1 Site Information

The Site is located to the south of Prospect Street and east of Brant Street, in Burlington, Ontario, as shown on Figure 1. For simplicity of this report, Brant Street is considered running north to south. The Site is irregular in shape and measures approximately 2,250 m² in size. The Site is currently occupied by one (1) irregularly shaped two-storey slab-on-grade commercial building at 795 Brant Street, and one (1) irregularly shaped two-storey commercial building with one (1) level of basement and a garage shed at 789 Brant Street (Site buildings). The Site buildings have a total footprint of approximately 420 m² and occupy approximately 19 % of the Site. The areas surrounding the Site buildings are covered with asphalt and landscaping.

The Site is bound to the west by Brant Street followed by commercial properties, to the south by a commercial property, to the east by residential properties, and to the north by Prospect Street followed by commercial and residential properties. The surrounding properties are shown on Figure 2.

The legal descriptions and property identification numbers (PINs) of the Site as obtained from the chain of title are "Part of Lot 85, RCP Plan 99, as in 835346; Burlington and Part of Lot 1, Plan 125, as in 662884 Except Part 1, 20R-9944; Together with 744916; Burlington". The property identification numbers (PINs) are 07076-0017 (LT) and 07076-0272 (LT). It should be noted the legal survey plan will be included when finalizing the report.

Property Identification Numbers (PINs)	**795 Brant Street:** 07076-0017 (LT) **789 Brant Street:** 07076-0272 (LT)
Property Size	2,250 m²
Approximate Universal Transverse Mercator (UTM) coordinates	Zone: 17 Easting: 596525.15 Northing: 4798603.12 (1m, NAD83, QGIS)

2. Scope of Investigation

The scope of work for the Phase One ESA consisted of the following activities:

a) Reviewing the historical occupancy of the Site through the use of available archived and relevant municipal and business directories, Fire Insurance Plans (FIPs), topographical maps, and aerial photographs;
b) Contacting municipal and provincial agencies to determine the existence of records of environmental regulatory non-compliance, if any, and reviewing such records where available;
c) Obtaining an EcoLog Environmental Risk Information Services Ltd. (ERIS) report for the Site and surrounding properties within a 250 metres (m) radius of the Site;
d) Reviewing available geological maps, well records and utility maps for the vicinity of the Site;
e) Obtaining and reviewing a chain of title and assessment rolls for the Site;
f) Reviewing available reports previously completed at the Site;
g) Conducting interviews with designated Site representative(s) as a resource for current and historical Site information, as well as to provide BIG staff with unrestricted access to all areas of the Site and Site buildings as required by O.Reg.153/04, as amended;
h) Conducting a Site reconnaissance in order to identify any land use practices that may have impacted the environmental condition of the Site;
i) Conducting a reconnaissance of the surrounding properties from the Site and publicly accessible areas in order to identify any land use practices that may have impacted the environmental condition of the Site; and,
j) Preparing a report to document the findings.

The following sections summarize the information gathered by BIG during the Phase One ESA and identifies Potentially Contaminating Activities (PCAs) on the Site and in the Phase One Study Area, and Areas of Potential Environmental Concern (APECs) associated with the Site. APECs and PCAs are defined in O.Reg.153/04, as amended.

In completing the scope of work, BIG did not conduct any intrusive investigations, including sampling, analyses or monitoring.

BIG personnel who conducted assessment work for this project included Ms. Shirley Li, M.Env.Sc., Ms. Eileen Liu, M.Env.Sc, P.Geo and Mr. Darko Strajin, P.Eng. An outline of their qualifications is provided in Appendix C.

3. Records Review

3.1 General

3.1.1 Phase One Study Area Determination

The Site is located on the southeast intersection of Prospect Street and Brant Street in Burlington, Ontario. The Phase One Study Area consists of properties within a distance of 250 m from the Site boundaries. The Phase One Study Area is bound by:

a) Residential properties to the north;
b) Commercial properties to the west;
c) Residential properties to the south; and,
d) Residential properties to the east.

The surrounding properties within the Phase One Study Area predominantly consist of residential land use. All properties wholly or partly within 250 m from the Site boundaries as presented in Figure 2 were included in the Phase One Study Area.

3.1.2 First Developed Use Determination

Based on the reviewed records, the Site was first developed from vacant and undeveloped to residential use in the 1930s and redeveloped to commercial use in the 1960s. A more detailed discussion of the Site history based on available documentation is provided in the following sections of the report.

3.1.3 Fire Insurance Plans

BIG contracted Opta Information Intelligence to perform a search for FIPs, Property Underwriters Reports and Property Underwriters Plans for the Site and/or lands within the Phase One Study Area. Based on the search, FIPs dated 1932 and 1971 from Opta covered the Site and the Phase One Study Area and a Multirisk Report dated 1996 covered the Site at 789 Brant Street. The FIPs and Multirisk Report are included in Appendix H.

The following table summarizes the features of the Phase One Study Area as indicated on the reviewed FIPs. Building details were limited on the FIPs as indicated below.

1932	
Site	a) The Site at 795 Brant Street was developed with an irregularly shaped residential building.
West	a) A creek is located west adjacent of the Site along Brant Street, that runs north to south that eventually goes east.
1971	
Site	a) The Site at 795 Brant Street is occupied by an irregularly shaped building and a rectangular garage shed. b) The Site at 789 Brant Street is occupied by an irregularly shaped building and a rectangular garage shed.
North	a) An auto service centre with an underground storage tank (UST) located on the central portion of the property, is located at 809 Brants Street, approximately 20 m north. b) A car dealership equipped with an auto repair and body shop is located at 850 Brant Street, approximately 150 m northwest.
West	a) An auto service with an UST located on the northern portion of the property is located at 796 Brant Street, approximately 30 m west.

	b) The property located at 814 Brant Street, approximately 50 m northwest, is occupied by an auto service centre. c) The property located at 1451 and 1453 Graham's Lane, approximately 85 m west, is occupied by a machine shop with an UST located to the north the building. d) The property located at 1439 Graham's Lane (formerly 825 Legion Road), approximately 140 m northwest, is occupied by a machine shop. e) A milk cap covers and seals manufacturer with storage of cardboard in rolls is located at 1416 Graham's Lane, approximately 225 m west.
South	a) A carwash with an UST located to the east of the building is located at 1448 Graham's Lane, approximately 85 m west. b) An UST is located on the western portion of the property at 2038 Ghent Avenue, approximately 140 m southeast.
1996	
Site (789 Brant Street)	• The Site building is for offices for computer software for automotive industry. • The Site building was built in 1950 and is a two-storey building with a basement that measures a total area of 429 m^2. • The walls are brick, the floors (excluding the basement) are wood joist, and the roof is made of wood joist, with tar and gravel as the surface material and was resurfaced in 1987. • Natural gas is used to heat the building with forced warm air and the appliances were replaced in 1991 and enclosed in a separate room.

Based on the information gathered from the review of the FIPs, the following PCAs were identified:

a) The property located at 809 Brant Street, approximately 20 m north, was occupied by an auto service building with a UST located on the central portion of the property in 1971. The property is associated with PCA#10 – Commercial Autobody Shops and PCA#28 – Gasoline and Associated Products Storage in Fixed Tanks.

b) An auto service with an UST located on the northern portion of the property was located at 796 Brant Street, approximately 30 m west in 1971. The property is associated with PCA#10 – Commercial Autobody Shops and PCA#28 – Gasoline and Associated Products Storage in Fixed Tanks.

c) The property located at 814 Brant Street, approximately 50 m northwest, was occupied by an auto service centre in 1971. The property is associated with PCA#10 – Commercial Autobody Shops.

d) A carwash with an UST located to the east of the building was located at 1448 Graham's Lane, approximately 85 m west in 1971. The property is associated with PCA#28 – Gasoline and Associated Products Storage in Fixed Tanks.

e) The property located at 1451 and 1453 Graham's Lane, approximately 85 m west, was occupied by a machine shop with an UST located to the north of the building in 1971. The property is associated with PCA#28 – Gasoline and Associated Products Storage in Fixed Tanks, PCA#33 – Metal Treatment, Coating, Plating and Finishing and PCA#34 – Metal Fabrication.

f) The property located at 1439 Graham's Lane (formerly 825 Legion Road), approximately 140 m northwest, was occupied by a machine shop in 1971. The property is associated with PCA#33 – Metal Treatment, Coating, Plating and Finishing and PCA#34 – Metal Fabrication.

g) An UST was located on the western portion of the property at 2038 Ghent Avenue, approximately 140 m southeast in 1971. The property is associated with PCA#28 – Gasoline and Associated Products Storage in Fixed Tanks.

h) A car dealership equipped with an auto repair and body shop was located at 850 Brant Street, approximately 150 m northwest in 1971. The property is associated with PCA#10 – Commercial Autobody Shops.

i) A milk cap covers and seals manufacturer with storage of cardboard in rolls was located at 1416 Graham's Lane, approximately 225 m west in 1971. The property is associated with PCA#43 – Plastics (including Fibreglass) Manufacturing and Processing.

3.2 Chain of Title

A chain of title was completed for the Site by Stewart Davey, an independent title searcher. The chronological Chain of Title provided to BIG is included in Appendix D, summarized in Table II, and indicated the following entities associated with the ownership as part of the Site:

Year	Name of Owner
789 Brant Street – 07076-0272 (LT)	
Prior to 1798	The Crown
1798 to 1810	Captain Joseph Brant
1810 to 1848	James Gage
1848 to 1859	Gilbert Davis
1859 to 1896	Frederick Bray
1896 to 1914	William Ghent
1914 to 1925	Arthur B. Burnett Ella Burnett
1925 to 1928	Murdoch Ferguson
1928 to 1929	Flora Beamish Thomas Beamish
1929 to 1931	Murdock Ferguson
1931 to 1932	Isabelle Jean Rolland Albert Edward Rolland
1932 to 1933	Alexander Lawrence Shaver
1933 to 1942	Mary Evelyn Thurbon
1942 to 1944	Helen Kroll Frank Thels
1944 to 1945	Nicholas Burkoski
1945 to 1953	Eli Luchuk Jennie Luchuk
1953 to 1957	John Arnold Rosina Arnold
1957 to 1959	Nicholas Chanka Mary Chanka
1959 to 1982	Roisina Arnold John Arnold
1982 to 1985	Rosina Arnold
1985 to 1986	Robert W. Best Margaret E. Best
1986 to 1987	Daniel D.F. Dulmage
1987 to 1987	Jim Pearson Automotive Systems Inc.
1987 to 1997	Royal Bank of Canada
1997 to 2002	Paul Culligan

Year	Name of Owner
	Robert Linton Gwen Linton Deborah Linton 3LC Enterprises
2002 to 2006	Jens Ewe Ebsen
2006 to 2021	1246235 Ontario Inc.
2021 to present	Brant Investment Holdings Inc.
795 Brant Street – 07076-0017 (LT)	
Prior to 1798	The Crown
1798 to 1810	Captain Joseph Brant
1810 to 1848	James Gage
1848 to 1859	Gilbert Davis
1859 to 1896	Frederick Bray
1896 to 1909	William Ghent
1909 to 1919	Edward Harness
1919 to 1923	John West
1923 to 1926	Major Maude and Wife
1926 to 1927	Walter Thomas Passant
1927 to 1929	John West
1929 to 1931	William T. Sloan
1931 to 1931	John A. McMillian William T. Sloan
1931 to 1936	Catherine Cochrane Brooks J. Adolphus Brooks
1936 to 1957	Anthony Wolf Catherine Cochrane Brooks J. Adolphus Brooks
1957 to 1957	The Corporation of the Town of Burlington Catherine Cochrane Brooks J. Adolphus Brooks
1957 to 1975	Nelson Properties Limited Catherine Cochrane Brooks J. Adolphus Brooks George Patrick Sweeney
1975 to 1983	The Corporation of the City of Burlington Scova Investments Limited
1983 to 1985	Pro-Brant Group Limited
1985 to 2021	Donna Yik Lee Khai Tuyen Ly
2021 to present	Brant Investment Holdings Inc.

3.3 Environmental Reports

No previous environmental reports were available for review.

3.4 Environmental Source Information

3.4.1 Federal and Provincial Database Search

A search of provincial, federal and private environmental databases for records pertaining to the Site and properties within the Phase One Study Area was conducted by ERIS. BIG has confirmed neither the completeness nor the accuracy of the records that were provided. A copy of the ERIS report is provided in Appendix E. A summary of the significant findings is provided below.

3.4.1.1 Waste Disposal Sites

The ERIS search included the following waste disposal sites databases:

a) Anderson's Waste Disposal Sites (1860s to present)
b) Waste Disposal Sites – MOE CA Inventory (October 2011 to February 2021)
c) Waste Disposal Sites MOE 1991 Historical Approval Inventory (Up to October 1990)

No records were identified for the Site or for the properties within the Phase One Study Area.

3.4.1.2 Boreholes (1875 to July 2018)

One (1) borehole was identified at the Site which was advanced for geotechnical or geological investigation in 1964 to a depth of 4.5 m. The general stratigraphy of the Site consisted of sand and silt fill, underlain by silty sand/sandy silt till, followed by silty clay/clayey silt and shale bedrock. Ten (10) borehole records were identified for the properties within the Phase One Study Area which were advanced for geotechnical or geological investigations between 1959 and 1968 up to a maximum depth of 8.9 m. The general stratigraphy of the Phase One Study Area as outlined in the borehole records consists of silt, sand and gravel fill, underlain by silty clay/clayey silt and shale bedrock.

3.4.1.3 Certificates of Approval (1985 to October 2011)

No records were identified for the Site in this database. The following records were identified for the properties within the Phase One Study Area:

a) The intersection located at Grovetree Lane and Ghent Avenue, approximately 90 m south, occupied by Abraham Construction, obtained a certificate of approval for municipal sewage in 1996 and a certificate of approval for municipal water in 1996. Based on the description of the records, no PCAs were identified.
b) The property located at 760 Brant Street, approximately 100 m south, occupied by Royal Canadian Naval Association, and Centre Francophone de Burlington Inc., obtained a certificate of approval for air for commercial kitchen exhaust hood in 1995 and 1996 and one (1) certificate of approval for air was cancelled in 1995. Based on the description of the records, no PCAs were identified.
c) The property located at 1440 Graham's Lane, approximately 125 m west, occupied by Etratech Designs Inc., underwent a certificate of approval revision for ventilation of new wave solder machine for tin, lead, isopropyl alcohol, and other contaminants in 1992. Based on the description of the record, no PCAs were identified.

3.4.1.4 Ontario Regulation 347 Waste Generator Summary (1986 to January 2021)

No records were identified for the Site in this database. The following records were identified for the properties within the Phase One Study Area:

a) The property located at 761 Brant Street, approximately 90 m south, occupied by Murray Laboratories Division of London Biochemistry Reference Lab, Dynacare Laboratories, Murray Laboratories Limited, and Gamma-Dynacare Medical Laboratories was listed as a waste generator of aliphatic solvents, pathological wastes, inorganic laboratory chemicals, organic laboratory

chemicals between 1986 and 2012. The property was listed as having operations as medical laboratories. As the medical laboratory has disposal protocol, no PCAs were identified.

b) The property located at 760 Brant Street, approximately 100 m south, occupied by 1086891 Ontario Inc., Burlington Ultrasound and Radiology, McArthur Properties, Trillium College Inc., Wentworth Halton X-Ray and Ultrasound Inc., Dr. Ronald Yim Dentistry Professional Corp., Oxford College of Arts, Business and Technology was listed as a waste generator for oil skimmings and sludges, pathological wastes, neutralized wastes – heavy metals, inorganic laboratory chemicals, photoprocessing wastes, neutralized solutions – containing heavy metals, miscellaneous wastes and inorganic chemicals between 2009 and 2021. The property is listed as having operations of medical and diagnostic laboratories, and technical and trade schools, all other school and instruction. As the medical laboratories and school have disposal protocol, no PCAs were identified.

c) The property located at 1440 Graham's Lane, approximately 125 m west, occupied by Dover Corporation (Canada) Limited, Thyssen Dover Elevator, BCT Business, Etratech Man, Ash Temple Ltd., Ontario Testing Labs, Bodycote Galt Materials Testing Ltd., Bodycote Testing Group, Exova, and Exova Burlington, was listed as a waste generator for emulsified oils, photoprocessing wastes, polymeric resins, acid waste-other metals, inorganic laboratory chemicals, organic laboratory chemicals, organic acids, oil skimmings and sludges, waste compressed gases, acid solutions – containing other metals and non-metals, miscellaneous wastes and inorganic chemicals, waste oil/sludges (petroleum based), miscellaneous waste organic chemicals, waste compressed gases including cylinders, miscellaneous wastes and inorganic chemicals, between 1992 and 2021. The property is listed as having operations of other machinery, warehouse, plate making, electric parts and computers, radiological lab, other chemical production, and testing laboratories. The property is associated with PCA#8 - Chemical Manufacturing, Recycling and Bulk Storage, PCA#19 – Electronic and Computer Equipment Manufacturing, PCA#33 – Metal Treatment, Coating, Plating and Finishing, and PCA#34 – Metal Fabrication.

d) The property located at 1439 Graham's Lane, approximately 140 m northwest, occupied by Burlington Hydro, was listed as a waste generator in 2004. The property was listed as an electric power distribution. Given the inadequate information provided by ERIS, no PCAs were identified.

e) The property located at 831 Legion Road, approximately 150 m northwest, occupied by Burlington Association for Community Living, was listed as a waste generator for acid waste-other metals between 1990 and 1998. The property was listed as operating as metal disabled handicapped. Based on the description of the operation, no PCAs were identified.

f) The property located at 850 Brant Street, approximately 150 m northwest, occupied by Discovery Ford, was registered as a waste generator for waste crankcase oils and lubricants in 2019. The property is associated with PCA#10 – Commercial Autobody Shops.

g) The property located at 849 Brant Street, approximately 185 m north, occupied by 1297760 Ontario Inc., was listed as a waste generator for light fuels in 2005. Given the inadequate information provided by ERIS, no PCAs were identified.

h) The property located at 2086 Ghent Avenue, approximately 235 m southeast, occupied by HSSCC #639 C/O Wilson Blanchard Management, was listed as a waste generator for oil skimmings and sludges, waste oils/sludges (petroleum based) between 2016 and 2021. The property was listed as having operations of residential building construction. Based on the description of the operation, no PCAs were identified.

i) The property located at 1416 Graham's Lane, approximately 225 m west, occupied by Sinclair-Smith Printing and Lithographing Co. Ltd., was listed as a waster generator between 1986 and 1994. The property was listed as having operations of letter acknowledgement. The property is associated with PCA#31 – Ink Manufacturing, Processing and Bulk Storage.

3.4.1.5 Dry Cleaning Facilities (January 2004 to December 2018)

No records were identified for the Site or for the properties within the Phase One Study Area.

3.4.1.6 National Pollutant Release Inventory (1993 to May 2017)

No records were identified for the Site or properties within the Phase One Study Area.

3.4.1.7 Fuel Oil Spills and Leaks (Up to July 2020) and TSSA Historic Incidents (2006 to June 2009)

No records were identified for the Site in this database. The following record was identified for the properties within the Phase One Study Area:

a) A natural gas incident occurred at 1449 Olga Drive, approximately 250 m south. Based on the description of the incident, no PCAs were identified.

3.4.1.8 Pesticide Register (1988 to February 2021)

No records were identified for the Site in this database. The following records were identified for the properties within the Phase One Study Area:

a) Two (2) records for the property located at 834 Brant Street, approximately 130 m northwest.
b) One (1) record for the property located at 2004 Maplewood Drive, approximately 140 m north.

These records indicated that the property was either a vendor or limited vendor or operator of pesticides and no manufacturing of pesticides was identified. As such, no PCAs were identified based on these records.

3.4.1.9 Fuel Storage Tanks

The ERIS search included a search of the following fuel storage tank databases.

a) Delisted Fuel Tanks (Up to July 2020)
b) Fuel Storage Tank (Up to July 2020)
c) Historic Fuel Storage Tank (Pre January 2010)
d) List of TSSA Expired Facilities (Up to July 2020)
e) Private and Retail Fuel Storage Tanks (1989 to 1996)
f) Retail Fuel Storage Tanks (1999 to December 2020)
g) Commercial Fuel Oil Tanks (Up to July 2020)
h) TSSA Variances for Abandonment of Underground Storage Tanks (Up to July 2020)
i) Anderson's Storage Tanks (1915 to 1953)

No records were identified for the Site in this database. The following records were identified for the properties within the Phase One Study Area:

a) The property located at 809 Brant Street, approximately 20 m north, occupied by Shell Canada Products, Clares Shell and Car Wash Inc., and Lamonts Services Ltd., had two (2) records of an expired facility in 1992 and 1993, five (5) records of expired piping, eight (8) records of expired fuel tanks in 1989 and 1992, three (3) records of 22700 L single wall USTs, five (5) records of 22700 L and 22730 L single wall USTs in 1989 and 1992, one (1) record of 90800 L retail storage tank in 1992, and one (1) record of retail storage tank in 1996. The property is associated with The property is associated with PCA#28 – Gasoline and Associated Products Storage in Fixed Tanks.
b) The property located at 1448 Grahams Lane, approximately 85 m west, occupied by 578122 Ontario Inc. and 845275 Ontario Inc., had one (1) record of an expired facility in 1995, three (3) records of expired piping, three (3) records of expired fuel tanks in 1992, three (3) records of 3000 L and 5000 L single wall USTs in 1992 and one (1) record of a 13000 L retail storage tank in 1994.

The property is associated with PCA#28 – Gasoline and Associated Products Storage in Fixed Tanks.

3.4.1.10 Pipeline Incidents (Up to October 2020)

No records were identified for the Site in this database. The following incident was identified for the property within the Phase One Study Area:

a) The property located at 2048 Grovetree Lane, approximately 205 m southeast, had two (2) natural gas pipeline incidents in 2014. Based on the description of the incidents, no PCAs were identified.

3.4.1.11 Ontario Spills (1988 to March 2020, July 2020 to August 2020)

No records were identified for the Site in this database. The following spills were identified for the properties within the Phase One Study Area:

a) The property located at 809 Brant Street, approximately 20 m north, had a natural gas leak in 2015 and contaminated soil was found at closed service station in 2000. The property is associated with PCA#28 – Gasoline and Associated Products Storage in Fixed Tanks.
b) A spill of approximately 30 L of gasoline was leaked to the pavement in 1992 at 808 Brant Street, approximately 55 m northwest. The gasoline was likely transported to the nearest storm sewer, no PCAs were identified.
c) The property located at 761 Brant Street, approximately 90 m south, had a spill of 225 L hydraulic oil in 1992 and a leak of 20 lbs of refrigerant gas in 2007. Based on the description of the incidents, no PCAs were identified.
d) The property located at 2048 Grovetree Lane, approximately 205 m southeast, had two (2) natural gas leaks in 2014. Based on the description of the spills, no PCAs were identified.
e) A mercaptan air leak occurred in 1993 at 2060 Maplewood Drive, approximately 205 m north. Based on the description of the spill, no PCAs were identified.

3.4.1.12 Scott's Manufacturing Directory (1992 to March 2011)

The following manufacturers were identified at the Site and within the Phase One Study Area:

a) The Site at 789 Brant Street was occupied by American Optics Inc. was listed as having operations of glass product manufacturing from purchased glass and measuring, medical and controlling devices manufacturing in 2001. Based on the description of the operation, no PCAs were identified.
b) The property located at 817 Brant Street, approximately 75 m north, occupied by Advanced Integrated Resources, was listed as having operations of industrial and commercial fan and blower and air purification equipment manufacturing in 1985. Based on the desktop review, the property was likely used as an office, no PCAs were identified.
c) The property located at 2026 and 2056 Ghent Avenue, approximately 160 m southeast and 195 m southeast, respectively, occupied by The Graphic Attic, was listed as having operations of miscellaneous publishing in 1989. Based on the description of the operation, no PCAs were identified.
d) The property located at 1440 Graham's Lane, approximately 125 m west, occupied by Thyssen Dover Elevators, Scherzinger Pump Technology, Peters Steel Rule Dies Ltd., Pyramid Pumps, Burlington Laminating and Binder, Endress And Hauser Canada Ltd., Dover Corporation Canada, Thyssen Krupp Elevator Limited, and Magnus Chemicals Ltd., was listed as having operations of industrial machinery and equipment, equipment and supplies wholesaler-distributors, commercial printing, not elsewhere classified, bookbinding and related work, other metalworking machinery manufacturing, electrical wiring and construction supplies wholesaler-distributors,

industrial machinery, equipment and supplies wholesaler-distributors, service establishment machinery, equipment and supplies wholesaler-distributors, chemical (except agricultural) and allied product wholesaler – distributors between 1900 and 2002. The property is associated with PCA#31 – Ink Manufacturing, Processing, and Bulk Storage, PCA# 33 – Metal Treatment, Coating, Plating and Finishing and PCA#34 – Metal Fabrication.

e) The property located at 1423 Graham's Lane, approximately 185 m west, occupied by National Specialty Cakes Inc., and NSC Cakes Inc., was listed as having operations of retail bakeries, commercial bakeries and frozen bakery product manufacturing, and cookie and cracker manufacturing in 1996. Based on the description of the operations, no PCAs were identified.

f) The property located at 2071 Ghent Avenue, approximately 200 m east, occupied by Robert's Floral Factory, was listed as having operations of pottery products, not elsewhere classified in 1984. Based on the description of the operation, no PCAs were identified.

g) The property located at 1416 Graham's Lane, approximately 225 m west, occupied by Arctic Traveler (Canada) Ltd., was listed as having operations of heating equipment and commercial refrigeration equipment manufacturing, other new motor vehicle parts and accessories wholesaler-distributors, plumbing, heating and air-conditioning equipment and supplies wholesaler-distributors, and office and store machinery and equipment wholesaler-distributors in 1960. This property is associated with PCA# 33 – Metal Treatment, Coating, Plating and Finishing and PCA#34 – Metal Fabrication.

3.4.1.13 PCB Inventory

The ERIS search included a search of the following databases:

- National PCB Inventory (1988 to 2008)
- Inventory of PCB Storage Sites (1987 to October 2004; 2012 to December 2013)
- Ontario Regulation 347 Waste Receivers Summary (1986 to 2016)

The Site and properties within the Phase One Study Area were not identified in this database.

3.4.1.14 Water Well Information System (Up to April 2020)

There were no records identified at the Site. Seventeen (17) records were identified within the Phase One Study Area. The wells were installed between 2012 and 2019 for observation, monitoring and test hole purposes to a maximum depth of 6.1 m. Based on the well records, the general soil stratigraphy in the vicinity of the Site consisted of topsoil, followed by clay, silt, sand and gravel fill underlain by silty clay/clayey silt till and shale.

3.4.2 Municipal City Directories

A search for Burlington City Directory was completed by LGI Copy Service Canada in order to identify the occupancy history of the Site and properties within the Phase One Study Area for potential environmental concerns. Based on the review of the directories dated 1959, 1963, 1968, 1973, 1978, 1983, 1988, 1993, 1998, 2003, 2008, and 2013, summarized in Appendix F, the following significant findings were identified:

a) The Site at 789 Brant Street first appeared on the city directories in 1959 and was listed as residential from 1959 to 1983 and 2003 to 2013, Arnold John and Son Ltd. in 1959 and 1973, Pearson Automotive Systems Inc. in 1988, Pace Auto Systems Ltd. in 1993, We Care Home Health Services from 1998 to 2003, American Options from 2003 to 2008, Physical Development Nutrition Shoppe in 2008 and Edwards Jones in 2013. Based on the description of the city directories, no PCAs were identified.

b) The Site at 795 Brant Street first appeared on the city directories in 1959 and was listed as residential from 1959 to 1983 and 2003 to 2013, Green and Green and Tinerman G A Realty in

1978, Burnhill Realty Ltd. in 1988, Coldwell Banker Burnhill Realty in 1993, The Studio from 1998 to 2013, Erlene's Nail Design and Purely Esthetics Inc. in 2013. Based on the description of the city directories, no PCAs were identified.

c) The property located at 809 Brant Street, approximately 20 m north, was occupied by Goeree's White Rose Service Station in 1963, Brant Shell Wash in 1973, Tony's Lube Oil and Wash Service in 1978, Clare's Shell and Car Wash from 1983 to 1988, Jamie's Shell and Car Wash in 1993, Sleep Medicine Group, Ef Johnston Medicine Professional Corp, and Medexpress Pharmacy in 2013. The property is associated with PCA#10 – Commercial Autobody Shops and PCA#28 – Gasoline and Associated Products Storage in Fixed Tanks.

d) The property located at 796 Brant Street, approximately 30 m west, was occupied by Wiggins and Hardy Shell Station in 1963, Shell Station in 1968, Brant Shell Wash in 1973, and Frydays Fish and Chips from 1988 to 1993, The Family Food Counter from 1988 to 1998, Monfort Restaurant from 1998 to 2013, Hasty Market in 2003, Maplewood Variety and Maplewood Market from 2008 to 2013. The property is associated with PCA#28 – Gasoline and Associated Products Storage in Fixed Tanks.

e) The property located at 814 Brant Street, approximately 50 m northwest, was occupied by Bob's B A Service in 1959 and 1968, Russell's B A Service Station in 1963, Metropolitan Hamilton Real Estate Board, Innovation Cutz and Embassy Cleaners in 1983, Seven Eleven Store from 1983 to 1988, Show Bill Video, Double Top Dart Supplies and Accessories and Star Cleaners in 1988, 7 Food Variety from 1993 to 2013, Snow White Dry Cleaners, Bits'n Pcs and Burino 2 for 1 Pizza and Wings in 1998, Nail Centre, The Spices, and Electric Beach Tanning Studio from 2003 to 2013. The property is associated with PCA#10 – Commercial Autobody Shops and PCA#37 – Operation of Dry Cleaning Equipment (where chemicals are used).

f) The property located at 1451 Graham's Lane, approximately 85 m northwest, was occupied by Johnsen Machine Company Ltd. from 1973 to 1983, Kirk Mechanical Ltd. from 1988 to 2013. The property is associated with PCA#33 – Metal Treatment, Coating, Plating and Finishing and PCA#34 – Metal Fabrication.

g) The property located at 760 Brant Street, approximately 100 m south, was occupied by Aquarium Restaurant and Tavern, Fat Skipper, Classic Hair Fashions, The Juice Tree, B K's Paperback Exchange, Livingrooms Unlimited, Food City, Knight's Cleaners, Soundsation Inc., Drug City, Royal Mattress Manufacturing Co., Imperial Drapery and Upholstery, Adele's Shoes, Big Win Centre, International Travel, Funding World Inc., and Columbus McKinnon Ltd. in 1978, Halton Regional Health Department in 1983, Weight Loss Clinic and Hansen Transmission Ltd. from 1978 to 1983, Kemp Contact Lens Centre from 1983 to 1988, Burlington Square and Multi Tenant Leasing Office from 1973 to 2013, medical office from 1983 to 2013, Unique Limousine Ltd., Auto Helm and Marine Appraisers Inc. from 1988 to 1998, Halton ADAPT (Alcohol and Drug Addiction Center) in 1988, Burlington Ultra Sound and Radiology from 1993 to 2013, Burlington Therapy Clinic from 1993 to 2003, Serotech Laboratories Ltd. in 1998, Corporate Transportation Services in 1998, Amy Christine Photography, Sports Injury Clinic at Canadian Therapeutic Colleges, Schizophrenia Society of Ontario, International Care Management Services Inc., Brant Community Mental Health Services, and CDE Driver training in 2003, Masters Men's Clinic, Acclaim Health and Community Services, Canadian College of Dental Health, Clearview Chiropractic and PRG Transportation Services from 2008 to 2013, Young Drivers of Canada, Burlington Driver and Vehicle Issuing-CBI Home Health, CBI Home Health, Corporate Transportation Services, Dynamic Training and Rehabilitation, Ontario Breast Screening Program and Therapy Health Care Inc. in 2013. The property is associated with PCA#37 – Operation of Dry Cleaning Equipment (where chemicals are used) and PCA#57 – Vehicles and Associated Parts Manufacturing.

h) The property located at 1440 Graham's Lane, approximately 125 m west, was occupied by Endress and Hauser Instruments and Dover Elevator from 1993 to 2003, Tarbutt-Buttenham Construction Ltd. from 1993 to 1998, Rapido Alterations and Invisible Mending, Etratech Designs Inc., Darlex Inc. and Viking Instrument and Control Ltd. in 1993., Ash Temple Ltd. and Norseman Computer from 1998 to 2003, Peters Steel Rule Dies from 1998 to 2013, Burlington Laminating, Ontario Testing Labs, Printing Factory and Pala Simsek in 1998, Bodycote Material Testing – OTL Labs from 2003 to 2008, MacLean Media Systems Inc. in 2008, Pyramid Pumps and Skylinc Internet from 2008 to 2013, Instatel Communications, Cutting Edge Surgical and Exova Canada Inc. in 2013. The property is associated with PCA#19 – Electronic and Computer Equipment Manufacturing and PCA#31 – Ink Manufacturing, Processing and Bulk Storage.

i) The property located at 834 Brant Street, approximately 130 m northwest, was occupied by Bob's Gulf Service Centre in 1973, Pets and Gardens in 1973 to 1998, AA Major Appliances and Burlington's Store to Discover in 2003, La Luna Restaurant from 2008 to 2013. The property is associated with PCA#10 – Commercial Autobody Shops and PCA#28 – Gasoline and Associated Products Storage in Fixed Tanks.

j) The property located at 1439 Graham's Lane, approximately 140 m northwest, was occupied by Frank Tool and Die Co. Ltd. from 1959 to 1983, Canadian Fire Restoration Services in 1993 and Sonic Automotive from 2003 to 2013. The property is associated with PCA#10 – Commercial Autobody Shops and PCA#34 – Metal Fabrication.

k) The property located at 850 Brant Street, approximately 150 m northwest, was occupied by McAlister Motors (Burlington) Ltd. from 1973 to 1978, Snowdon Ford Sales Ltd. from 1983 to 1993, Discovery Ford Sales (Burlington) Ltd. from 1998 to 2013, Discovery Collision Inc. in 2008, and Fast Lane from 2008 to 2013. The property is associated with PCA#10 – Commercial Autobody Shops.

l) The property located at 1425 Graham's Lane, approximately 185 m west, was occupied by Maaco Auto Painting and Body Works from 1983 to 2008, Metro Collision Repair and Auto (Maaco), SWC Automotive, and Street Wyze Customs in 2013. The property is associated with PCA#10 – Commercial Autobody Shops.

m) The property located at 1416 Graham's Lane, approximately 225 m west, was occupied by Standard Cap and Seal (Can) Ltd. from 1959 to 1973, Parkdale Machine and Tool Co. Ltd. in 1968, Sinclair-Smith Printing and Lithographing Co. Ltd. in 1973 to 2003, Arctic Traveler (Canada) Ltd. in 1983 to 2013, Picture Perfect in 1988, and Sinclair-Smith Press in 1993. The property is associated with PCA#31 – Ink Manufacturing, Processing and Bulk Storage, PCA#33 – Metal Treatment, Coating, Plating and Finishing and PCA#34 – Metal Fabrication.

The remaining properties within the Phase One Study Area did not appear to be associated with any PCAs as per Table 2, Schedule D of O.Reg.153/04, as amended.

3.4.3 Ontario Ministry of Environment, Conservation and Parks Records

3.4.3.1 Ministry of the Environment, Conservation and Parks (MECP)

The Ministry of Environment, Conservation and Parks (MECP) was contacted through the Freedom of Information and Protection of Privacy Act (FOI) for copies of any records they had pertaining to the Site on April 22, 2021.

A written response from some of the regulatory agencies such as the MECP typically requires several weeks to months. A written response from the MECP is pending at the time of this Phase One ESA. The request is included in Appendix G.

3.4.3.2 MECP Databases

The ERIS report summarized in the Federal and Provincial Database Search section of the report included a summary of MECP databases. The databases include the following: MECP Environmental Bill of Rights (EBR), Environmental Activity and Sector Registry (EASR), Environmental Compliance Approval (ECA), MECP Brownfields Environmental Site Registry (BESR), MECP Hazardous Waste Information Network (HWIN) and MECP Waste Disposal Sites. The following record was identified:

a) The property located at 760 Brant Street, approximately 100 m south, occupied by Cogeco Cable Canada LP, was registered in the EASR database for standby power system in 2012. Based on the description of the record, no PCAs were identified.
b) The property located at 1440 Graham's Lane, approximately 125 m west, occupied by Ontario Testing Labs Inc., had an approval for discharge into the natural environment other than water in 1997. Based on the description of the record, no PCAs were identified.

3.4.4 Technical Standards and Safety Authority

A request was made to the TSSA by email on April 16, 2021 for information regarding fuel storage at the Site and the adjacent properties. A copy of the TSSA request is provided in Appendix G.

An email response from TSSA dated April 16, 2021 was received and is included in Appendix G. Based on the search results, the property at 809 Brant Street, approximately 20 m north, had two (2) records of an expired gasoline station and eight (8) of records of an expired liquid fuel tank. The property is associated with PCA#28 – Gasoline and Associated Products Storage in Fixed Tanks.

3.5 Physical Setting Sources

3.5.1 Aerial Photographs

Aerial photographs were obtained in order to review the development and land use history of the Site, as well as to the land in the immediate vicinity of the Site. Aerial photographs dated 1934, 1962 and 1989 were obtained from LGI Copy Service Canada and aerial photographs dated 1998, 2009 and 2019 were obtained from the City of Burlington Interactive Map. The aerial photographs were collected based on availability from the archives at intervals to best capture the changes at the Site. BIG notes that at the time of this Phase One ESA, the 1934 aerial photograph was the earliest available photograph for the Site and Phase One Study Area.

The development and land use history of the Site and adjacent properties as depicted on the reviewed aerial photography is summarized in Table 3-1. Copies of the aerial photographs are included in Appendix H.

Table 3-1: Aerial Photograph Observations

Aerial Photograph Year	Observations
1934	a) The Site at 795 Brant Street appears to have been developed with a residential dwelling. b) The Site at 789 Brant Street appears to be vacant and undeveloped. c) Brant Street appears to have been constructed. d) The Phase One Study Area appears to be mostly undeveloped.
1962	a) The Site at 789 Brant Street appears to have been developed with a building and the Site at 795 Brant Street appears to have been developed with a building. b) Prospect street appears to have been constructed.

Aerial Photograph Year	Observations
1989	a) The Site at 795 Brant Street appears to have been developed with an irregularly shaped building and the Site at 789 Brant Street appears to have been developed with an irregularly shaped building and a garage shed. The areas surrounding the buildings are covered with asphalt parking lot and landscaping. b) The property located at 809 Brant Street, approximately 20 m north, appears to be developed as a gas station with a pump island.
1998	a) The pump island located at 809 Brant Street, approximately 20 m north appears to have been demolished.
2009	a) The properties located at 2010 to 2060 Grovetree Lane, approximately 100 m east appear to have been developed with residential dwellings.
2019	a) The Site appears to remain unchanged since the 1989 aerial photo. b) The buildings at 784 Brant Street, approximately 30 m southwest, have been demolished.

Based on the review of the aerial photographs, the following PCAs were identified:

a) The Site appears to have asphalted surfaces that are used for parking in the 1989 to 2019 aerial photos. De-icing salts could potentially be applied during the winter months for health and safety purposes. The Site is associated with PCA"Other" – Usage of De-icing Salts.

b) The property located at 809 Brant Street, approximately 20 m north, was occupied by a gas station with a pump island in 1989. This property is associated with PCA#28 – Gasoline and Associated Products Storage in Fixed Tanks.

Based on the review of the aerial photographs, no additional PCAs as per Table 2, Schedule D of O.Reg.153/04, as amended, were identified.

3.5.2 Topography, Hydrology and Geology

The following physiographic, geological, soil and survey maps were reviewed on April 16, 2021:

a) Atlas of Canada – Toporama Topographic Map (Toporama);

b) Ontario Base Map (OBM);

c) Ontario Ministry of Energy, Northern Development and Mines (MENDM) website, Bedrock Geology of Ontario, 2011 – MRD 126; and Paleozoic Geology of Southern Ontario, 2007 – MRD 219 (KML format);

d) Ontario MENDM website, Surficial Geology of Southern Ontario, 2010. (KML format); and,

e) Ontario MENDM website, Physiography of Southern Ontario 2007.

Based on the review of the above maps, the following information was obtained:

a) The Site is at an elevation of approximately 92 metres above sea level (m asl), generally at the same elevation as properties to the north, east and west of the Site. The surrounding properties to the south are generally at lower elevation than the Site. The Site is relatively flat.

b) No water bodies are located on the Site. The closest surface water is Rambo Creek, located approximately 220 south of the Site. Lake Ontario is situated approximately 1.6 km southeast of the Site. The inferred groundwater flow direction is towards the south/southeast.

c) The bedrock in the general area consists of shale, limestone, dolostone and siltstone and is part of the Queenston Formation.

d) The surficial geology of the Site is described as coarse-textured glaciolacustrine deposits, consisting of sand, gravel, minor silt, and clay.
e) The physiography of the Site is within Iroquois Plain and characterized as sand plains.

3.5.3 Fill Material

Fill can be used to re-grade a property and to backfill excavations. Based on the review of historical information, no fill has been imported to the Site.

3.5.4 Water Bodies and Areas of Natural Significance

There are no water bodies located on the Site. The closest surface water is Rambo Creek, located approximately 220 m south of the Site. Lake Ontario which is situated approximately 1.6 km southeast of the Site.

Based on the review of available resources from the City of Burlington and the Ministry of Natural Resources and Forestry (MNRF) on April 16, 2021, no areas of natural significance were identified at the Site or within the Phase One Study Area.

3.5.5 Well Records

3.5.5.1 Water Wells

The MECP maintains a database (published from 1955 to present) of water wells drilled in Ontario in accordance with Ontario Regulation 903. The Ontario Well Record website was accessed on April 16, 2021, to identify if any wells exist on the Site or within the Phase One Study Area. Based on the search, no records were identified at the Site. Seventeen (17) records were identified within the Phase One Study Area. The well was installed between 2015 and 2019 for monitoring and test hole purposes to a maximum depth of 9.1 m. Based on the well record, the general soil stratigraphy in the vicinity of the Site consisted of silt and gravel fill underlain by clayey silt followed by shale.

Based on the water well records it has been determined that the Site and the Phase One Study Area properties do not have any potable water wells. The Site and all of the properties within the Phase One Study Area are supplied by the City of Burlington municipal water system, as defined in the *Safe Drinking Water Act, 2002.*

3.5.5.2 Well-Head Protection Areas

The MECP (2020) Source Protection Information Atlas was accessed on April 19, 2021. The search of the website indicated that the Site is not considered to be located in a well-head protection area or any other designation identified by the municipality in its municipal plan for the protection of groundwater.

3.5.5.3 Oil, Gas, and Salt Well

A search of the Oil, Gas & Salt Resources Library (2014) website was completed to identify oil, gas and salt wells within the vicinity of the Site on April 19, 2021. The search of the website indicated there were no oil, gas or salt wells identified to be located at the Site or within the Phase One Study Area.

3.5.6 Record of Site Condition (RSC)

An RSC summarizes the environmental conditions of a property as determined by a qualified person (QP) by conducting a Phase One ESA, and where necessary, a Phase Two ESA, confirmatory sampling and a risk assessment. Upon completion of the necessary environmental Site assessments, an RSC for an assessed property can be filed with the MECP and added to the BESR database. This online, publicly available database can be searched to identify what properties may have potential environmental concerns.

Based on the search of the MECP's BESR database completed by ERIS, no records were identified at the Site. The following records were identified for the properties within the Phase One Study Area:

a) The property located at 2071 Ghent Avenue, approximately 200 m east, field an RSC for residential use in 2016. No PCAs were identified.
b) The property located at 2087-2093 and 2097-2103 Prospect Street, approximately 250 m northeast, filed an RSC for residential use in 2019. No PCAs were identified.

3.6 Site Operating Records

ln general, a request is usually made to the property representative for copies of any operating records pertaining to the environmental conditions at the Site. Records would include: regulatory permits; Safety Data Sheets (SDS) for all chemicals that were handled on-Site; underground utility drawings; inventories of chemicals, chemical usage, and chemical storage areas; inventory of aboveground storage tanks (ASTs) and USTs; environmental monitoring data; correspondence pertaining to an order or request by the MECP or TSSA; waste management records; process, production, and maintenance documents; records of spills and records of discharges of chemicals; emergency response and contingency plans, including spill prevention and contingency plans; environmental audit reports; and site plans of the facility showing areas of production and manufacturing.

No Site operating records were available to review.

4. Interviews

An interview was conducted by BIG staff with the individual identified to be the most knowledgeable about both the current and historical Site uses. The interview was conducted during the Site reconnaissance and by phone in order to obtain information to assist in identifying details of potentially contaminating activities, potential contaminant pathways in, on, or below the Site, and areas of potential environmental concern. Any information provided during the interviews is presented alongside information from the Site reconnaissance in Section 5.

During the completion of this Phase One ESA, the following individuals were interviewed:

a) Mr. Kyle Camarro, CEO and President of Camarro Development Inc., has knowledge of the Site since January 2021.

Information obtained during the interview is provided below, in the relevant sections.

5. Site Reconnaissance

5.1 General Requirements

The Phase One ESA Site reconnaissance was conducted on Monday, April 26, 2021 between 8:30 am and 9:30 am by Ms. Shirley Li, M.Env.Sc. On the day of the Site reconnaissance, the weather was sunny (approximately 8°C).

The Site and the adjoining properties were observed from the Site and/or publicly accessible areas. Photographs documenting the Site visit are included in Appendix I.

5.2 Specific Observations at Phase One ESA Property

5.2.1 Site Description and Buildings

The Site is located to the south of Prospect Street and east of Brant Street, in Burlington, Ontario, as shown on Figure 1. For simplicity of this report, Brant Street is considered running north to south. The Site is irregular in shape and measures approximately 2,250 m² in size. The Site is currently occupied by one (1) irregularly shaped two-storey slab-on-grade commercial building at 795 Brant Street, and one (1) irregularly shaped two-storey commercial building with one (1) level of basement and a garage shed at 789 Brant Street (Site buildings). The Site buildings have a total footprint of approximately 420 m² and occupy approximately 19 % of the Site. The areas surrounding the Site buildings are covered with asphalt and landscaping. The Site at 789 Brant Street was occupied by a commercial business on the first floor and a resident on the second level and the Site at 795 Brant Street was vacant during the Site reconnaissance.

The characteristics of the Site building are summarized below:

Building Part	Material Description
Interior Wall	Drywall
Exterior Wall	Brick and Wood
Floor	Carpet, wood and ceramic
Ceiling	Drywall

5.2.2 Heating and Cooling Systems

The Site buildings are heated by natural gas fired furnace and cooled by air conditioning units.

5.2.3 Site Utilities and Services

The Site utilities and services were identified at the Site based on the relevant utility infrastructure observed during the Site reconnaissance and are summarized in the table below. It is noted that the precise underground location of the utilities cannot be determined without professional locate services.

Utility	Source	Location	Site Entry
Sanitary Sewer	Municipality – City of Burlington	North and West	A manhole was observed on Prospect Street. A manhole was observed on the grass area west of the Site building at 789 Brant Street. Sanitary sewer lines are anticipated to enter the Site from the northern and western Site boundaries.
Storm Sewer	Municipality – City of Burlington	North and West	Catch basins were observed along Prospect Street and Brant Street. Storm sewer lines are anticipated to enter the Site from the northern and western Site boundaries.

Utility	Source	Location	Site Entry
Natural Gas	Enbridge Gas	North and West	Given that the Site is located in a mixed residential and commercial area, the natural gas lines are anticipated to run along Prospect Street and Brant Street.
Electricity	Burlington Hydro	Northwest and West	A transformer is located to the northwest of the Site at 795 Brant Street. Overhead hydro lines were observed along Prospect Street; hydro lines along Brant Street are most likely buried underground. Hydro is anticipated to enter 795 Brant Street from the northwest corner and enter 789 Brant Street from the western boundary.

5.2.4 Site Production and Manufacturing

No on-Site production or manufacturing processes were observed at the Site during the Site reconnaissance.

5.2.5 Drains, Pits and Sumps

Based on the Site reconnaissance, floor drains were observed in the bathrooms of the Site buildings. No other drains, pits or sumps were observed during the Site reconnaissance.

5.2.6 Storage Tanks

5.2.6.1 Underground Storage Tanks (UST)

The presence/absence and condition (if present) of USTs at the Site was assessed during the Site reconnaissance. BIG did not observe any evidence of USTs during the Site reconnaissance, and the Site representative had no knowledge of any historical or current USTs at the Site.

5.2.6.2 Aboveground Storage Tanks (AST)

The presence/absence and condition (if present) of ASTs at the Site was assessed during the Site reconnaissance. BIG did not observe any evidence of ASTs during the Site reconnaissance, and the Site representative had no knowledge of any historical or current ASTs at the Site.

5.2.7 Water Wells

One (1) monitoring well was observed on Site located at 789 Brant Street. No other potable or monitoring wells were observed at the Site or within the Phase One Study Area during the Site reconnaissance. The Site and the Phase One Study Area are supplied by the City of Burlington municipal water system, as defined in the *Safe Drinking Water Act, 2002.*

5.2.8 Site Housekeeping

The Site appears to be well maintained. A garbage bin was observed to be located outside of the Site building at 795 Brant Street. Five (5) soil drums were observed at 789 Brant Street, most likely from previous environmental investigation(s). No other debris, outdoor storage, or uncontrolled waste storage were noted during the Site reconnaissance.

5.2.9 Chemical Storage and Handling and Floor Condition

Household cleaning products were observed at the Site buildings. No other chemical storage was observed at the Site.

5.2.10 Areas of Stained Soil, Pavement or Stressed Vegetation

No staining on the pavement surfaces and no stressed vegetation was observed at the time of the Site reconnaissance.

5.2.11 Fill and Debris

Fill can be used to re-grade a property and to backfill excavations, such as locations of former USTs. No fill or stockpiles were observed at the Site during the Site reconnaissance.

5.2.12 Air Emissions

Regulatory control of air emissions in Ontario is the responsibility of the MECP. No sources of active air emissions were noted at the Site or within the Phase One Study Area during the Site reconnaissance.

5.2.13 Polychlorinated Biphenyls (PCBs)

The manufacture of PCBs in North America was prohibited under the Toxic Substances Control Act (1977). Their use as a constituent of new products manufactured in or imported into Canada was prohibited by regulations in 1977 and 1980. As such, sites developed or significantly renovated after 1980 are unlikely to have PCB-containing equipment on the Site. Potential equipment, which could contain PCBs include fluorescent mercury and sodium vapour light ballasts, oil filled capacitors and transformers. Any electrical equipment containing PCBs must be disposed in accordance with Ontario Regulation 362 when it is removed from service. Ongoing operation of equipment containing PCBs is permissible.

A transformer is located to the northwest of the Site at 795 Brant Street. It is associated with PCA#55 – Transformer Manufacturing, Processing and Use.

5.3 Enhanced Investigation Property Observations

An Enhanced Investigation Property is "(i) a property used, or has ever been used, in whole or part, for an industrial purpose, or (ii) a commercial property used as a garage, a bulk liquid dispensing facility, including a gasoline outlet or for the operation of dry cleaning equipment" (O.Reg.153/04).

Based on the records review, the Site is not classified as an Enhanced Investigation Property.

5.4 Adjacent and Surrounding Properties

A visual inspection of the adjacent properties and properties within the Phase One Study Area was conducted from publicly accessible areas to identify the occupants; and to document any PCAs that may be contributing to an APEC at the Site.

Location of Adjoining Properties	Property Use
North	Commercial (Burlington Sleep Medicine Centre) and residential
South	Commercial (Marie's Aesthetics)
East	Residential
West	Commercial (Montfront Mediterranean Grill, bookstore and flower shop)

Based on the visual inspection of adjacent and surrounding properties within the Phase One Study Area, the following PCAs were identified:

a) The property located at 1431 Graham's Lane, approximately 135 m northwest, is occupied by a hydro station. The property is associated with PCA#55 – Transformer Manufacturing, Processing and Use.
b) The property located at 1439 Graham's Lane, approximately 140 m northwest, is occupied by Sonic Automotive. The property is associated with PCA#10 – Commercial Autobody Shops.
c) The property located at 850 Brant Street, approximately 150 m northwest, is occupied by a Ford dealership. The property is associated with PCA#10 – Commercial Autobody Shops.
d) The property located at 1425 Graham's Lane, approximately 185 m northwest, is occupied by SWC automotive. The property is associated with PCA#10 – Commercial Autobody Shops.

5.5 Written Description of Investigation

A reconnaissance of the Site was conducted by BIG to examine the exterior and interior of all on-Site buildings and structures, and to examine the exterior portions of the Site. Access was provided to the interiors of Site buildings, if any. Mechanical equipment (including heating and cooling systems) was documented and characterized, as was any evidence of USTs and ASTs. The exterior portions of the Site were examined for evidence of utilities and related infrastructure; water wells; Site drainage and related infrastructure; stained areas; stressed vegetation; and, evidence of fill material.

The reconnaissance included an examination of all properties within the Phase One Study Area from public access ways to document and characterize PCAs, water bodies and areas of natural significance.

6. Review and Evaluation of Information

6.1 Current and Past Uses

Based on the reviewed records, the Site was first developed from vacant and undeveloped to residential use in the 1930s and redeveloped to commercial use in the 1960s. A more detailed discussion of the Site history based on the available documentation is provided in the following sections of the report. The current and past ownership of the Site is summarized in Table II.

6.2 Potentially Contaminating Activities (PCAs)

A list of all the PCAs identified at the Site and within the Phase One Study Area is summarized below and included as Table III and on Figure 2. Based on the inferred groundwater flow direction to the south/southeast, the properties within the Phase One Study Area to the north/northwest are considered to be hydraulically upgradient of the Site; properties to the west/southwest and east/northeast of the Site are considered to be hydraulically trans-gradient of the Site; and the properties to the south/southeast of the Site were considered to be hydraulically downgradient of the Site. Any PCAs located downgradient or trans-gradient of the Site are not considered to be contributing to an APEC on Site.

Furthermore, any PCAs located significantly distant from the Site were considered to be too far to be contributing to an APEC on the Site.

Rationale outlining whether a PCA contributed to an APEC at the Site is summarized below and provided in Table III.

PCA Identifier	Address	PCA	PCA Location	Contributing to APEC at the Site?	Rationale
1.	789 and 795 Brant Street	De-icing salts usage (PCA"Other" – Usage of De-icing Salts)	On-Site	Yes	On-Site
2.	809 Brant Street	Former auto service (PCA#10 – Commercial Autobody Shops)	Off-site (20 m north)	Yes	Upgradient
3.		Former USTs (PCA#28 – Gasoline and Associated Products Storage in Fixed Tanks)			
4.	814 Brant Street	Former auto service centre (PCA#10 – Commercial Autobody Shops)	Off-Site (50 m northwest)	Yes	Upgradient
5.		Former dry cleaner (PCA#37 –Operation of Dry Cleaning Equipment (where chemicals are used))			
6.	No municipal address	Transformer (PCA#55 – Transformer Manufacturing, Processing and Use)	Northwest adjacent	No	PCB is immobile
7.	796 Brant Street	Former auto service (PCA#10 – Commercial Autobody Shops)	Off-Site (30 m west)	No	Inferred trans-gradient

PCA Identifier	Address	PCA	PCA Location	Contributing to APEC at the Site?	Rationale
8.		Former UST and gas station (PCA#28 – Gasoline and Associated Products Storage in Fixed Tanks)			
9.	1448 Graham's Lane	Former USTs (PCA#28 – Gasoline and Associated Products Storage in Fixed Tanks)	Off-Site (85 m west)	No	Inferred trans-gradient
10.	1451 and 1453 Graham's Lane	Former UST (PCA#28 – Gasoline and Associated Products Storage in Fixed Tanks)	Off-Site (85 m west)	No	Inferred trans-gradient
11.		Former machine shop (#33 – Metal Treatment, Coating, Plating and Finishing)			
12.		Former machine shop (PCA#34 – Metal Fabrication)			
13.	760 Brant Street	Former dry cleaner (PCA#37 – Operation of Dry Cleaning Equipment (where chemicals are used))	Off-site (100 m south)	No	Located downgradient
14.		Former vehicle units and motors manufacturing (PCA#57 – Vehicles and Associated Parts Manufacturing)			
15.	1440 Graham's Lane	Former chemical production (PCA#8 – Chemical Manufacturing, Recycling and Bulk Storage)	Off-Site (125 m west)	No	Inferred trans-gradient
16.		Former electronic parts and computer manufacturer (PCA#19 – Electronic and Computer Equipment Manufacturing)			
17.		Former commercial printing (PCA#31 – Ink Manufacturing, Processing, and Bulk Storage)			
18.		Former machinery manufacturer (PCA#33 – Metal Treatment, Coating, Plating and Finishing)			
19.		Former machinery manufacturer (PCA#34 - Metal Fabrication)			
20.	834 Brant Street	Former service centre (PCA#10 – Commercial Autobody Shops)	Off-site (130 m northwest)	No	Located at a significant distance
21.		Former service centre (PCA#28 – Gasoline and Associated Products Storage in Fixed Tanks)			
22.	1431 Graham's Lane	Hydro Station (PCA#55 – Transformer Manufacturing, Processing and Use)	Off-Site (135 m northwest)	No	Located at a significant distance

PCA Identifier	Address	PCA	PCA Location	Contributing to APEC at the Site?	Rationale
23.	2038 Ghent Avenue	Former UST (PCA#28 – Gasoline and Associated Products Storage in Fixed Tanks)	Off-Site (140 m southeast)	No	Located downgradient
24.	1439 Graham's Lane	Automotive shop (PCA#10 – Commercial Autobody Shops)	Off-Site (140 m northwest)	No	Located at a significant distance
25.		Former machine shop and tool and die shop (PCA#33 – Metal Treatment, Coating, Plating and Finishing)			
26.		Former machine shop and tool and die shop (PCA#34 – Metal Fabrication)			
27.	850 Brant Street	Autobody shop (PCA#10 – Commercial Autobody Shops)	Off-site (150 m northwest)	No	Located at a significant distance
28.	1425 Graham's Lane	Auto collision and repair shop (PCA#10 – Commercial Autobody Shops)	Off-site (180 m west)	No	Inferred trans-gradient
29.	1416 Graham's Lane	Former printing facility (PCA#31 – Ink Manufacturing, Processing and Bulk Storage)	Off-site (225 m west)	No	Inferred trans-gradient
30.		Heating equipment and commercial refrigeration equipment manufacturing (PCA#33 – Metal Treatment, Coating, Plating and Finishing)			
31.		Heating equipment and commercial refrigeration equipment manufacturing (PCA#34 – Metal Fabrication)			
32.		Former milk cap covers and seals manufacturer (PCA#43 – Plastics (including Fibreglass) Manufacturing and Processing)			

No other PCAs that contribute to APECs were identified for the surrounding properties.

6.3 Areas of Potential Environmental Concern (APECs)

Based on the rationale provided in Table III, it is the opinion of the Qualified Person for Environmental Site Assessment (QP_{ESA}) that the following PCAs may have contributed to, or may be contributing to, APECs at the Site:

APEC	Location of APEC on Phase One Property	PCA	Location of PCA (On-Site or Off-Site)	Contaminants of Concern	Media Potentially Impacted (Groundwater, soil and/or sediment)
APEC 1: De-icing salts usage	Exterior of Site buildings	"Other" – Usage of De-icing Salts	On-Site	Electrical Conductivity, SAR, Sodium and Chloride	Soil and Groundwater
APEC 2: Former auto service	Northern portion	#10 – Commercial Autobody Shops	Off-Site	PHCs, BTEX, and VOCs	Groundwater
APEC 3: Former UST	Northern portion	#28 – Gasoline and Associated Products Storage in Fixed Tanks	Off-Site	PHCs and BTEX	Groundwater
APEC 4: Former auto service	Northwestern portion	#10 – Commercial Autobody Shops	Off-site	PHCs, BTEX, and VOCs	Groundwater
APEC 5: Former dry cleaner	Northwestern portion	#37 –Operation of Dry Cleaning Equipment (where chemicals are used	Off-site	VOCs	Groundwater

6.4 Phase One ESA Conceptual Site Model

This section presents the Phase One Conceptual Site Model providing a narrative, graphical and tabulated description integrating information related to the Site geologic and hydrogeologic conditions, areas of potential environmental concern/potential contaminating activities, and the presence and distribution of potential contaminants of concern. These components are discussed in the following sections.

Surface Features

The Site is located to the south of Prospect Street and east of Brant Street, in Burlington, Ontario, as shown on Figure 1. For simplicity of this report, Brant Street is considered running north to south. The Site is irregular in shape and measures approximately 2,250 m² in size. The Site is currently occupied by one (1) irregularly shaped two-storey slab-on-grade commercial building at 795 Brant Street, and one (1) irregularly shaped two-storey commercial building with one (1) level of basement and a garage shed at 789 Brant Street (Site buildings). The Site buildings have a total footprint of approximately 420 m² and occupy approximately 19 % of the Site. The areas surrounding the Site buildings are covered with asphalt and landscaping.

The legal descriptions and property identification numbers (PINs) of the Site as obtained from the chain of title are "Part of Lot 85, RCP Plan 99, as in 835346; Burlington and Part of Lot 1, Plan 125, as in 662884 Except Part 1, 20R-9944; Together with 744916; Burlington". The property identification numbers (PINs) are 07076-0017 (LT) and 07076-0272 (LT). It should be noted the legal survey plan will be included when finalizing the report.

Surrounding Land Use

The Site is bound to the west by Brant Street followed by commercial properties, to the south by a commercial property, to the east by residential properties, and to the north by Prospect Street followed by commercial and residential properties. The surrounding properties are shown on Figure 2.

Geological and Hydrogeological Conditions

The Site is at an elevation of approximately 92 metres above sea level (m asl), generally at the same elevation as properties to the north, east and west of the Site. The surrounding properties to the south/southeast are generally at lower elevation than the Site. The Site is relatively flat.

The surficial geology of the Site is described coarse-textured glaciolacustrine deposits, consisting sand, gravel, minor silt, and clay. The physiography of the Site is within Iroquois Plain and is characterized as Sand Plains. The bedrock in the general area consists of shale, limestone, dolostone and siltstone and is part of the Queenston Formation.

No water bodies are located on the Site. The closest surface water is Rambo Creek, located approximately 220 south of the Site. Lake Ontario is situated approximately 1.6 km southeast of the Site. The inferred groundwater flow direction is towards the south/southeast.

No potable wells were observed at the Site or within the Phase One Study Area. The Site and the Phase One Study Area are supplied by the City of Burlington municipal water system, as defined in the *Safe Drinking Water Act, 2002.*

Based on the review of available resources from the City of Burlington and the Ministry of Natural Resources and Forestry (MNRF) on April 16, 2021, no areas of natural significance were identified at the Site or within the Phase One Study Area.

Underground Utilities

The Site utilities and services were identified at the Site based on the relevant utility infrastructure observed during the Site reconnaissance and are summarized in the table below. It is noted that the precise underground location of the utilities cannot be determined without professional locate services.

Utility	Source	Location	Site Entry
Sanitary Sewer	Municipality – City of Burlington	North and West	A manhole was observed on Prospect Street. A manhole was observed on the grass area west of the Site building at 789 Brant Street. Sanitary sewer lines are anticipated to enter the Site from the northern and western Site boundaries.
Storm Sewer	Municipality – City of Burlington	North and West	Catch basins were observed along Prospect Street and Brant Street. Storm sewer lines are anticipated to enter the Site from the northern and western Site boundaries.
Natural Gas	Enbridge Gas	North and West	Given that the Site is located in a mixed residential and commercial area, the natural gas lines are anticipated to run along Prospect Street and Brant Street.
Electricity	Burlington Hydro	Northwest and West	A transformer is located to the northwest of the Site at 795 Brant Street. Overhead hydro lines were observed along Prospect Street; hydro lines along Brant Street are most likely buried underground. Hydro is anticipated to enter 795 Brant Street from the northwest corner and enter 789 Brant Street from the western boundary.

Potentially Contaminating Activities and Areas of Potential Environmental Concern:

A total of five (5) PCAs were identified on Site and within the Phase One Study Area that may potentially contribute to APECs at the Site, as presented in the following table.

Table 6-1: Areas of Potential Environmental Concern

APEC	Location of APEC on Phase One Property	PCA	Location of PCA (On-Site or Off-Site)	Contaminants of Concern	Media Potentially Impacted (Groundwater, soil and/or sediment)
APEC 1: De-icing salts usage	Exterior of Site buildings	"Other" – Usage of De-icing Salts	On-Site	Electrical Conductivity, SAR, Sodium and Chloride	Soil and Groundwater
APEC 2: Former auto service	Northern portion	#10 – Commercial Autobody Shops	Off-Site	PHCs, BTEX, and VOCs	Groundwater
APEC 3: Former UST	Northern portion	#28 – Gasoline and Associated Products Storage in Fixed Tanks	Off-Site	PHCs and BTEX	Groundwater
APEC 4: Former auto service	Northwestern portion	#10 – Commercial Autobody Shops	Off-site	PHCs, BTEX, and VOCs	Groundwater
APEC 5: Former dry cleaner	Northwestern portion	#37 –Operation of Dry Cleaning Equipment (where chemicals are used	Off-site	VOCs	Groundwater

7. Conclusions

Based on the findings and conclusions of the Phase One ESA, a Phase Two ESA is required to assess the soil and groundwater conditions at the Site prior to submitting an RSC.

7.1 Closure

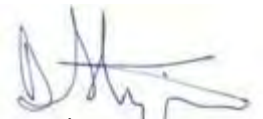

This Phase One ESA was conducted in accordance with O.Reg.153/04, as amended, and in accordance with generally accepted professional practices. Subject to this standard of care, BIG makes no express or implied warranties regarding its services and no third-party beneficiaries are intended. Limitation of liability, scope of report and third-party reliance are outlined in Appendix A.

Yours truly,

B.I.G. Consulting Inc.

Eileen Liu, M.Env.Sc., P.Geo
Project Manager

Darko Strajin, P.Eng.

Table II

TABLE OF CURRENT AND PAST LAND USES OF THE SITE (Refer to clause 16(2)(b), Schedule D, O.Reg.153/04) 789 and 795 Brant Street, Burlington, Ontario				
Year	**Name of Owner**	**Description of Property Use**	**Property Use**	**Other Observations from Aerial Photographs, Fire Insurance Plans, Etc.**
789 Brant Street – 07076-0272 (LT)				
Prior to 1798	The Crown	Undeveloped	Agricultural or other use	No FIP or aerial photograph coverage available prior to 1932.
1798 to 1810	Captain Joseph Brant	Undeveloped	Agricultural or other use	No FIP or aerial photograph coverage available prior to 1932.
1810 to 1848	James Gage	Undeveloped	Agricultural or other use	No FIP or aerial photograph coverage available prior to 1932.
1848 to 1859	Gilbert Davis	Undeveloped	Agricultural or other use	No FIP or aerial photograph coverage available prior to 1932.
1859 to 1896	Frederick Bray	Undeveloped	Agricultural or other use	No FIP or aerial photograph coverage available prior to 1932.
1896 to 1914	William Ghent	Undeveloped	Agricultural or other use	No FIP or aerial photograph coverage available prior to 1932.
1914 to 1925	Arthur B. Burnett Ella Burnett	Undeveloped	Agricultural or other use	No FIP or aerial photograph coverage available prior to 1932.
1925 to 1928	Murdoch Ferguson	Undeveloped	Agricultural or other use	No FIP or aerial photograph coverage available prior to 1932.
1928 to 1929	Flora Beamish Thomas Beamish	Undeveloped	Agricultural or other use	No FIP or aerial photograph coverage available prior to 1932.
1929 to 1931	Murdock Ferguson	Undeveloped	Agricultural or other use	No FIP or aerial photograph coverage available prior to 1932.
1931 to 1932	Isabelle Jean Rolland Albert Edward Rolland	Undeveloped	Agricultural or other use	Based on the FIP from 1932, the Site at 789 Brant Street appear to be undeveloped.
1932 to 1933	Alexander Lawrence Shaver	Undeveloped	Agricultural or other use	Based on the FIP from 1932, the Site at 789 Brant Street appear to be undeveloped.
1933 to 1942	Mary Evelyn Thurbon	Undeveloped	Agricultural or other use	Based on the aerial photograph from 1934, the Site at 789 Brant Street appears to be vacant and undeveloped.
1942 to 1944	Helen Kroll Frank Thels	Undeveloped	Agricultural or other use	No FIP or aerial photograph is available between 1942 and 1944. It is assumed the Site remained undeveloped.

Table II

TABLE OF CURRENT AND PAST LAND USES OF THE SITE (Refer to clause 16(2)(b), Schedule D, O.Reg.153/04) 789 and 795 Brant Street, Burlington, Ontario				
Year	**Name of Owner**	**Description of Property Use**	**Property Use**	**Other Observations from Aerial Photographs, Fire Insurance Plans, Etc.**
1944 to 1945	Nicholas Burkoski	Undeveloped	Agricultural or other use	No FIP or aerial photograph is available between 1944 and 1945. It is assumed the Site remained undeveloped.
1945 to 1953	Eli Luchuk Jennie Luchuk	Undeveloped	Agricultural or other use	No FIP or aerial photograph is available between 1945 and 1953. It is assumed the Site remained undeveloped.
1953 to 1957	John Arnold Rosina Arnold	Undeveloped	Agricultural or other use	No FIP or aerial photograph is available between 1953 and 1957. It is assumed the Site remained undeveloped.
1957 to 1959	Nicholas Chanka Mary Chanka	Residential dwelling	Residential use	Based on the city directories, the Site at 789 Brant Street first appeared on the city directories in 1959 and was listed as residential from 1959 to 1983.
1959 to 1982	Roisina Arnold John Arnold	A residential building with a garage shed and commercial business	Residential and Commercial use	Based on the FIP from 1971, the Site at 789 Brant Street is occupied by an irregularly shaped building and a rectangular garage shed. Based on the city directories, the Site at 789 Brant Street was listed as residential from 1959 to 1983 and occupied by Arnold John and Son Ltd. in 1959 and 1973.

				wholesaler-distributors, plumbing, heating and air-conditioning equipment and supplies wholesaler-distributors, and office and store machinery and equipment wholesaler-distributors in 1960. Based on the city directories, the property located at 1416 Graham's Lane, approximately 225 m west, was occupied by Standard Cap and Seal (Can) Ltd. from 1959 to 1973, Parkdale Machine and Tool Co. Ltd. in 1968, Sinclair-Smith Printing and Lithographing Co. Ltd. in 1973 to 2003, Arctic Traveler (Canada) Ltd. in 1983 to 2013, Picture Perfect in 1988, and Sinclair-Smith Press in 1993.	
32.			#43 – Plastics (including Fibreglass) Manufacturing and Processing	Based on the FIPs, a milk cap covers and seals manufacturer with storage of cardboard in rolls was located at 1416 Graham's Lane, approximately 225 m west in 1971.	

Notes:
(1) Distances are approximately only. Precise distances are not possible due to the age of some listings and the aggregation and/or loss of addresses.
(2) Potentially contaminating activity means a use or activity set out in Column A of Table 2 of Schedule D (O.Reg 153/04. as amended) which is occurring or has occurred in a Phase One Study Area.

Table IV

AREAS OF POTENTIAL ENVIRONMENTAL CONCERN (APECs)

(Refer to clause 16(2)(b), Schedule D, O. Reg. 153/04)

789 and 795 Brant Street, Burlington, Ontario

Area of Potential Environmental Concern (APEC)[1]	Location of APEC on Phase One Property	Potentially Contaminating Activity (PCA)[2]	Location of PCA (On-Site or Off-Site)[2]	Potential Contaminants of Concern	Media Potentially Impacted (Groundwater, soil and/or sediment)
APEC 1: De-icing salts usage	Exterior of Site buildings	"Other" – Usage of De-icing Salts	On-Site	Electrical Conductivity, SAR, Sodium and Chloride	Soil and Groundwater
APEC 2: Former auto service	Northern portion	#10 – Commercial Autobody Shops	Off-Site	PHCs, BTEX, and VOCs	Groundwater
APEC 3: Former UST	Northern portion	#28 – Gasoline and Associated Products Storage in Fixed Tanks	Off-Site	PHCs and BTEX	Groundwater
APEC 4: Former auto service	Northwestern portion	#10 – Commercial Autobody Shops	Off-site	PHCs, BTEX, and VOCs	Groundwater
APEC 5: Former dry cleaner	Northwestern portion	#37 –Operation of Dry Cleaning Equipment (where chemicals are used	Off-site	VOCs	Groundwater

Notes:

1, Area of Potential Environmental Concern means the area on, in or under a phase one study area where one or more contaminants are potentially present, as determined through the P1 ESA, including through,

(a) Identification of post or present uses on, in or under the phase one property, and

(b) Identification of potentially contaminating activities.

2. Potentially contaminating activity means a use or activity set out in Column A of Table 2 of Schedule D that is occurring or has occurred in a phase one study area

3. When completing this column, identify all contaminants of potential concern using the Method Groups as identified in the "Protocol for in the Assessment of Properties under Part XV.1 of the Environmental Protection Act, March 9, 2004, amended as of July 1, 2011, as specified below:

ABNs	*PCB:*	*Metals*	*Electrical Conductivity*
CPs	*PAHs*	*As, Sb, Se*	*Cr (Vi)*
1,4- Dioxane	*THMs*	*Na*	*Hg*
Dioxins/Furans, PCDDs/PCDFs	*VOCs*	*B-HWS*	*Methyl Mercury*
Ocs	*BTEX*	*Cl-*	*SAR*
PHCs	*Ca, Mg*	*CN-*	*high pH or low pH*

4. When submitting a record of site condition for filing, a copy of this table must be attached

SAR = Sodium Adsorption Ratio

Table IV

AREAS OF POTENTIAL ENVIRONMENTAL CONCERN (APECs)

(Refer to clause 16(2)(b), Schedule D, O. Reg. 153/04)

789 and 795 Brant Street, Burlington, Ontario

Area of Potential Environmental Concern (APEC)[1]	Location of APEC on Phase One Property	Potentially Contaminating Activity (PCA)[2]	Location of PCA (On-Site or Off-Site)[2]	Potential Contaminants of Concern	Media Potentially Impacted (Groundwater, soil and/or sediment)

PHCs = Petroleum Hydrocarbons

PCBs = Polychlorinated Biphenyl

(1) Distances are approximately only. Precise distances are not possible due to the age of some listings and the aggregation and/or loss of addresses.

(2) Potentially contaminating activity means a use or activity set out in Column A of Table 2 of Schedule D (O.Reg.153/04. as amended) which is occurring or has occurred in a Phase One Study Area

APPENDIX A: LIMITATION OF LIABILITY, SCOPE OF REPORT, AND THIRD-PARTY RELIANCE

Limitation of Liability, Scope of Report, and Third Party Reliance

The information presented in this report is based on visual site inspection and following the general guidance provided in the O.Reg.153/04 as amended. The objectives of the investigation were to evaluate the current environmental conditions of the subject property. The observations, conclusions and recommendations presented in this report are based on the site conditions existing at the time of BIG's site visit. If in the future, a Record of Site Condition (RSC) is pursued or additional information is become available or revealed through intrusive on-site testing, BIG should be contacted to re-evaluate the information presented in this report, if required.

This report was prepared for the exclusive use of Camarro Developments Inc. BIG's consent is required to reproduced this report in whole or in part. BIG is not responsible for any decision made or reliance by a third party makes of this report. BIG is not responsible for any damages, suffered by a third-party as result of the use of this report.

APPENDIX B: LEGAL SURVEY PLAN

APPENDIX C: QUALIFICATION OF ASSESSORS

Qualifications of Accessors

Ms. Eileen Liu, is a project manager at BIG. Eileen is a Professional Geoscientist in Ontario (P.Geo) and has a master's degree in Environmental Science from University of Toronto, and has completed numerous Phase One and Phase Two ESA reports under Ontario jurisdiction. She has been involved in Environmental Site Assessments, risk assessments, remediation projects and environmental management report reviews under Federal jurisdiction.

Mr. Darko Strajin, is the Partner of BIG, he is a licensed engineer in province of Ontario and has over 25 years of consulting experience. Darko has been involved in conducting Phase One and Phase Two Environmental Site Assessments for more than 20 years. Darko has been responsible for successfully managing numerous environmental investigations and site assessments. Darko has in depth knowledge of Environmental Regulations including experience in geology, hydrogeology and geotechnical engineering that enables him to provide superior services to his client in the environmental industry. Darko has registered with the MECP as QP (Environmental Site Assessment) and has filed number of Record of Site Condition documents over the years.

Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. ***Note:*** *Databases denoted with " * " indicates that the database will no longer be updated. See the individual database description for more information.*

Abandoned Aggregate Inventory: Provincial AAGR

The MAAP Program maintains a database of abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.*

Government Publication Date: Sept 2002*

Aggregate Inventory: Provincial AGR

The Ontario Ministry of Natural Resources maintains a database of all active pits and quarries. The database provides information regarding the registered owner/operator, location name, operation type, approval type, and maximum annual tonnage.

Government Publication Date: Up to Sep 2020

Abandoned Mine Information System: Provincial AMIS

The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

Government Publication Date: 1800-Oct 2018

Anderson's Waste Disposal Sites: Private ANDR

The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1860s-Present

Aboveground Storage Tanks: Provincial AST

Historical listing of aboveground storage tanks made available by the Department of Natural Resources and Forestry. Includes tanks used to hold water or petroleum. This dataset has been retired as of September 25, 2014 and will no longer be updated.

Government Publication Date: May 31, 2014

Automobile Wrecking & Supplies: Private AUWR

This database provides an inventory of known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

Government Publication Date: 1999-Dec 31, 2020

Borehole: Provincial BORE

A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW.

Government Publication Date: 1875-Jul 2018

Certificates of Approval: Provincial CA

This database contains the following types of approvals: Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA). Please refer to those individual databases for any information after Oct.31, 2011.

Government Publication Date: 1985-Oct 30, 2011*

Dry Cleaning Facilities: Federal CDRY

List of dry cleaning facilities made available by Environment and Climate Change Canada. Environment and Climate Change Canada's Tetrachloroethylene (Use in Dry Cleaning and Reporting Requirements) Regulations (SOR/2003-79) are intended to reduce releases of tetrachloroethylene to the environment from dry cleaning facilities.

Government Publication Date: Jan 2004-Dec 2018

Commercial Fuel Oil Tanks: Provincial CFOT

Locations of commercial underground fuel oil tanks. This is not a comprehensive or complete inventory of commercial fuel tanks in the province; this listing is a copy of records of registered commercial underground fuel oil tanks obtained under Access to Public Information.
Note that the following types of tanks do not require registration: waste oil tanks in apartments, office buildings, residences, etc.; aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Jul 31, 2020

Chemical Manufacturers and Distributors: Private CHEM

This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.).

Government Publication Date: 1999-Jan 31, 2020

Chemical Register: Private CHM

This database includes a listing of locations of facilities within the Province or Territory that either manufacture and/or distributes chemicals.

Government Publication Date: 1999-Dec 31, 2020

Compressed Natural Gas Stations: Private CNG

Canada has a network of public access compressed natural gas (CNG) refuelling stations. These stations dispense natural gas in compressed form at 3,000 pounds per square inch (psi), the pressure which is allowed within the current Canadian codes and standards. The majority of natural gas refuelling is located at existing retail gasoline that have a separate refuelling island for natural gas. This list of stations is made available by the Canadian Natural Gas Vehicle Alliance.

Government Publication Date: Dec 2012 -Dec 2020

Inventory of Coal Gasification Plants and Coal Tar Sites: Provincial COAL

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.*

Government Publication Date: Apr 1987 and Nov 1988*

Compliance and Convictions: Provincial CONV

This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here have been found guilty of environmental offenses in Ontario courts of law.

Government Publication Date: 1989-Nov 2020

Certificates of Property Use: Provincial CPU

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all CPU's on the registry such as (EPA s. 168.6) - Certificate of Property Use.

Government Publication Date: 1994-Feb 28, 2021

Drill Hole Database: Provincial DRL

The Ontario Drill Hole Database contains information on more than 113,000 percussion, overburden, sonic and diamond drill holes from assessment files on record with the department of Mines and Minerals. Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted to the MNDM. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed company map; or from submitted a "Report of Work".

Government Publication Date: 1886 - Sep 2020

Delisted Fuel Tanks: Provincial DTNK

List of fuel storage tank sites that were once found in - and have since been removed from - the list of fuel storage tanks made available by the regulatory agency under Access to Public Information.

Government Publication Date: Jul 31, 2020

Environmental Activity and Sector Registry: Provincial EASR

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval), Please see our ECA database.

Government Publication Date: Oct 2011-Feb 28, 2021

Environmental Registry: Provincial EBR

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

Government Publication Date: 1994-Feb 28, 2021

Environmental Compliance Approval: Provincial ECA

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For certificates of approval prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

Government Publication Date: Oct 2011- Feb 28, 2021

Environmental Effects Monitoring: Federal EEM

The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This database provides information on the mill name, geographical location and sub-lethal toxicity data.

Government Publication Date: 1992-2007*

ERIS Historical Searches: Private EHS

ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical Profile" page.

Government Publication Date: 1999-Jan 31, 2021

Environmental Issues Inventory System: Federal EIIS

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety; and to prevent future environmental problems. The EIIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed.

Government Publication Date: 1992-2001*

Emergency Management Historical Event: Provincial EMHE

List of locations of historical occurrences of emergency events, including those assigned to the Ministry of Natural Resources by Order-In-Council (OIC) under the Emergency Management and Civil Protection Act, as well as events where MNR provided requested emergency response assistance. Many of these events will have involved community evacuations, significant structural loss, and/or involvement of MNR emergency response staff. These events fall into one of ten (10) type categories: Dam Failure; Drought / Low Water; Erosion; Flood; Forest Fire; Soil and Bedrock Instability; Petroleum Resource Center Event, EMO Requested Assistance, Continuity of Operations Event, Other Requested Assistance. EMHE record details are reproduced by ERIS under License with the Ontario Ministry of Natural Resources © Queen's Printer for Ontario, 2017.

Government Publication Date: Dec 31, 2016

Environmental Penalty Annual Report: Provincial EPAR

This database contains data from Ontario's annual environmental penalty report published by the Ministry of the Environment and Climate Change. These reports provide information on environmental penalties for land or water violations issued to companies in one of the nine industrial sectors covered by the Municipal Industrial Strategy for Abatement (MISA) regulations.

Government Publication Date: Jan 1, 2011 - Dec 31, 2020

List of Expired Fuels Safety Facilities: Provincial EXP

List of facilities and tanks for which there was once a fuel registration. This is not a comprehensive or complete inventory of expired tanks/tank facilities in the province; this listing is a copy of previously registered tanks and facilities obtained under Access to Public Information. Includes private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc; includes tanks which have been removed from the ground.
Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Jul 31, 2020

Federal Convictions: Federal FCON

Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty.

Government Publication Date: 1988-Jun 2007*

Contaminated Sites on Federal Land: Federal FCS

The Federal Contaminated Sites Inventory includes information on known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government. Includes fire training sites and sites at which Per- and Polyfluoroalkyl Substances (PFAS) are a concern.

Government Publication Date: Jun 2000-Jan 2021

Fisheries & Oceans Fuel Tanks: Federal FOFT

Fisheries & Oceans Canada maintains an inventory of aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation.

Government Publication Date: 1964-Sep 2019

Federal Identification Registry for Storage Tank Systems (FIRSTS): Federal FRST

A list of federally regulated Storage tanks from the Federal Identification Registry for Storage Tank Systems (FIRSTS). FIRSTS is Environment and Climate Change Canada's database of storage tank systems subject to the Storage Tank for Petroleum Products and Allied Petroleum Products Regulations. The main objective of the Regulations is to prevent soil and groundwater contamination from storage tank systems located on federal and aboriginal lands. Storage tank systems that do not have a valid identification number displayed in a readily visible location on or near the storage tank system may be refused product delivery.

Government Publication Date: May 31, 2018

Fuel Storage Tank: Provincial FST

List of registered private and retail fuel storage tanks. This is not a comprehensive or complete inventory of private and retail fuel storage tanks in the province; this listing is a copy of registered private and retail fuel storage tanks, obtained under Access to Public Information.
Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Jul 31, 2020

Fuel Storage Tank - Historic: Provincial FSTH

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks. Public records of private fuel storage tanks are only available since the registration became effective in September 1989. This information is now collected by the Technical Standards and Safety Authority.

Government Publication Date: Pre-Jan 2010*

Ontario Regulation 347 Waste Generators Summary: Provincial GEN

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

Government Publication Date: 1986-Jan 31, 2021

Greenhouse Gas Emissions from Large Facilities: Federal GHG

List of greenhouse gas emissions from large facilities made available by Environment Canada. Greenhouse gas emissions in kilotonnes of carbon dioxide equivalents (kt CO2 eq).

Government Publication Date: 2013-Dec 2018

TSSA Historic Incidents: Provincial HINC

List of historic incidences of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen recorded by the TSSA in their previous incident tracking system. The TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of historical fuel spills and leaks in the province. This listing is a copy of the data captured at one moment in time and is hence limited by the record date provided here.

Government Publication Date: 2006-June 2009*

Indian & Northern Affairs Fuel Tanks: Federal IAFT

The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

Government Publication Date: 1950-Aug 2003*

Fuel Oil Spills and Leaks: Provincial INC

Listing of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen reported to the Spills Action Centre (SAC). This is not a comprehensive or complete inventory of fuel-related leaks, spills, and incidents in the province; this listing in a copy of incidents reported to the SAC, obtained under Access to Public Information. Includes incidents from fuel-related hazards such as spills, fires, and explosions. Records are not verified for accuracy or completeness.

Government Publication Date: Jul 31, 2020

Landfill Inventory Management Ontario: Provincial LIMO

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the Ministry of the Environment, Conservation and Parks compiles new and updated information. Includes small and large landfills currently operating as well as those which are closed and historic. Operators of larger landfills provide landfill information for the previous operating year to the ministry for LIMO including: estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills include information such as site owner, site location and certificate of approval # and status.

Government Publication Date: Feb 28, 2019

Canadian Mine Locations: Private MINE

This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database.

Government Publication Date: 1998-2009*

Mineral Occurrences: Provincial MNR

In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the plan metric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

Government Publication Date: 1846-Dec 2020

National Analysis of Trends in Emergencies System (NATES): Federal NATE

In 1974 Environment Canada established the National Analysis of Trends in Emergencies System (NATES) database, for the voluntary reporting of significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released.

Government Publication Date: 1974-1994*

Non-Compliance Reports: Provincial NCPL

The Ministry of the Environment provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act.

Government Publication Date: Dec 31, 2018

National Defense & Canadian Forces Fuel Tanks: Federal NDFT

The Department of National Defense and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on DND lands. Our inventory provides information on the base name, location, tank type & capacity, tank contents, tank class, date of tank installation, date tank last used, and status of tank as of May 2001. This database will no longer be updated due to the new National Security protocols which have prohibited any release of this database.

Government Publication Date: Up to May 2001*

National Defense & Canadian Forces Spills: Federal NDSP

The Department of National Defense and the Canadian Forces maintains an inventory of spills to land and water. All spill sites have been classified under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered.

Government Publication Date: Mar 1999-Apr 2018

National Defence & Canadian Forces Waste Disposal Sites: Federal NDWD

The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status.

Government Publication Date: 2001-Apr 2007*

National Energy Board Pipeline Incidents: Federal NEBI

Locations of pipeline incidents from 2008 to present, made available by the Canada Energy Regulator (CER) - previously the National Energy Board (NEB). Includes incidents reported under the Onshore Pipeline Regulations and the Processing Plant Regulations related to pipelines under federal jurisdiction, does not include incident data related to pipelines under provincial or territorial jurisdiction.

Government Publication Date: 2008-Dec 31, 2020

National Energy Board Wells: Federal NEBP

The NEBW database contains information on onshore & offshore oil and gas wells that are outside provincial jurisdiction(s) and are thereby regulated by the National Energy Board. Data is provided regarding the operator, well name, well ID No./UWI, status, classification, well depth, spud and release date.

Government Publication Date: 1920-Feb 2003*

National Environmental Emergencies System (NEES): Federal NEES

In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for previous Environment Canada spill datasets. NEES is composed of the historic datasets ' or Trends ' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.

Government Publication Date: 1974-2003*

National PCB Inventory: Federal NPCB

Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. Federal out-of-service PCB containing equipment and PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites. Some addresses provided may be Head Office addresses and are not necessarily the location of where the waste is being used or stored.

Government Publication Date: 1988-2008*

National Pollutant Release Inventory: Federal NPRI

Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances.

Government Publication Date: 1993-May 2017

Oil and Gas Wells: Private OGWE

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at www.nickles.com.

Government Publication Date: 1988-Feb 28, 2021

Ontario Oil and Gas Wells: Provincial OOGW

In 1998, the MNR handed over to the Ontario Oil, Gas and Salt Resources Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database include well owner/operator, location, permit issue date, and well cap date, license No., status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provide for each well record.

Government Publication Date: 1800-Jun 2020

Inventory of PCB Storage Sites: Provincial OPCB

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory.

Government Publication Date: 1987-Oct 2004; 2012-Dec 2013

Orders: Provincial ORD

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all Orders on the registry such as (EPA s. 17) - Order for remedial work, (EPA s. 18) - Order for preventative measures, (EPA s. 43) - Order for removal of waste and restoration of site, (EPA s. 44) - Order for conformity with Act for waste disposal sites, (EPA s. 136) - Order for performance of environmental measures.

Government Publication Date: 1994-Feb 28, 2021

Canadian Pulp and Paper: Private PAP

This information is part of the Pulp and Paper Canada Directory. The Directory provides a comprehensive listing of the locations of pulp and paper mills and the products that they produce.

Government Publication Date: 1999, 2002, 2004, 2005, 2009-2014

Parks Canada Fuel Storage Tanks: Federal PCFT

Canadian Heritage maintains an inventory of known fuel storage tanks operated by Parks Canada, in both National Parks and at National Historic Sites. The database details information on site name, location, tank install/removal date, capacity, fuel type, facility type, tank design and owner/operator.

Government Publication Date: 1920-Jan 2005*

Pesticide Register: Provincial PES

The Ontario Ministry of the Environment and Climate Change maintains a database of licensed operators and vendors of registered pesticides.

Government Publication Date: Oct 2011-Feb 28, 2021

Pipeline Incidents: Provincial PINC

List of pipeline incidents (strikes, leaks, spills). This is not a comprehensive or complete inventory of pipeline incidents in the province; this listing in an historical copy of records previously obtained under Access to Public Information. Records are not verified for accuracy or completeness.

Government Publication Date: Oct 31, 2020

Private and Retail Fuel Storage Tanks: Provincial PRT

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks and licensed retail fuel outlets. This database includes an inventory of locations that have gasoline, oil, waste oil, natural gas and/or propane storage tanks on their property. The MCCR no longer collects this information. This information is now collected by the Technical Standards and Safety Authority (TSSA).

Government Publication Date: 1989-1996*

Permit to Take Water: Provincial PTTW

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all PTTW's on the registry such as OWRA s. 34 - Permit to take water.

Government Publication Date: 1994-Feb 28, 2021

Ontario Regulation 347 Waste Receivers Summary: Provincial REC

Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data.

Government Publication Date: 1986-2016

Record of Site Condition: Provincial RSC

The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental cleanup orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up.
RSCs filed after July 1, 2011 will also be included as part of the new (O.Reg. 511/09).

Government Publication Date: 1997-Sept 2001, Oct 2004-Mar 2021

Retail Fuel Storage Tanks: Private RST

This database includes an inventory of retail fuel outlet locations (including marinas) that have on their property gasoline, oil, waste oil, natural gas and / or propane storage tanks.

Government Publication Date: 1999-Dec 31, 2020

Scott's Manufacturing Directory: Private SCT

Scott's Directories is a data bank containing information on over 200,000 manufacturers across Canada. Even though Scott's listings are voluntary, it is the most comprehensive database of Canadian manufacturers available. Information concerning a company's address, plant size, and main products are included in this database.

Government Publication Date: 1992-Mar 2011*

Ontario Spills: Provincial SPL

List of spills and incidents made available the Ministry of the Environment, Conservation and Parks. This database identifies information such as location (approximate), type and quantity of contaminant, date of spill, environmental impact, cause, nature of impact, etc. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X.

Government Publication Date: 1988-Mar 2020; Jul 2020 - Aug 2020

Wastewater Discharger Registration Database: Provincial SRDS

Information under this heading is combination of the following 2 programs. The Municipal/Industrial Strategy for Abatement (MISA) division of the Ontario Ministry of Environment maintained a database of all direct dischargers of toxic pollutants within nine sectors including: Electric Power Generation; Mining; Petroleum Refining; Organic Chemicals; Inorganic Chemicals; Pulp & Paper; Metal Casting; Iron & Steel; and Quarries. All sampling information is now collected and stored within the Sample Result Data Store (SRDS).

Government Publication Date: 1990-Dec 31, 2017

Anderson's Storage Tanks: Private TANK

The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit year, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1915-1953*

Transport Canada Fuel Storage Tanks: Federal TCFT

List of fuel storage tanks currently or previously owned or operated by Transport Canada. This inventory also includes tanks on The Pickering Lands, which refers to 7,530 hectares (18,600 acres) of land in Pickering, Markham, and Uxbridge owned by the Government of Canada since 1972; properties on this land has been leased by the government since 1975, and falls under the Site Management Policy of Transport Canada, but is administered by Public Works and Government Services Canada. This inventory provides information on the site name, location, tank age, capacity and fuel type.

Government Publication Date: 1970 - Dec 2020

Variances for Abandonment of Underground Storage Tanks: Provincial VAR

Listing of variances granted for storage tank abandonment. This is not a comprehensive or complete inventory of tank abandonment variances in the province; this listing is a copy of tank abandonment variance records previously obtained under Access to Public Information. In Ontario, registered underground storage tanks must be removed within two years of disuse; if removal of a tank is not feasible, an application may be sought for a variance from this code requirement.
Records are not verified for accuracy or completeness.

Government Publication Date: Jul 31, 2020

Waste Disposal Sites - MOE CA Inventory: Provincial WDS

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

Government Publication Date: Oct 2011-Feb 28, 2021

Waste Disposal Sites - MOE 1991 Historical Approval Inventory: Provincial WDSH

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30st, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number.

Government Publication Date: Up to Oct 1990*

Water Well Information System: Provincial WWIS

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

Government Publication Date: Apr 30, 2020

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

Hello

I would like to submit a request for Environmental Information for the following properties in Burlington, Ontario:

Brant St.: 783, 788, 789, 795,794, 796, 809
Prospect St: 2015, 2022, 2035

As part of our historical review for a Phase One ESA, I am requesting that the Technical Standards and Safety Authority (TSSA), Safety Fuel Division, review its database to identify to us any records of aboveground/underground storage tanks, spills, incidents, complaints, notices, tanks removals and/or remediation, etc. with the TSSA for the above-mentioned site.

Your earliest attention to this matter is much appreciated. For your convenience, you may email me or call me with any information you may have for the properties.

Thank you

Libby Kuit, B.E.S.
Environmental Scientist

Tenant (if applicable)

Previous Property

1. Owner — Date of Ownership (yyyy/mm/dd)

Tenant (if applicable)

 © Queen's Printer for Ontario, 2016 Disponible en français

3. Search Parameters

Search Parameters	Specify Year(s) Requested
Environmental concerns (General correspondence, occurrence reports, abatement)	All years
Orders	All years
Spills	All years
Investigations/prosecutions ► Owner and tenant information must be provided	All years
Waste Generator number/classes	All years

Files older than 2 years may require $60.00 retrieval cost. There is no guarantee that records responsive to your request will be located.

4. Environmental Compliance Approvals/Certificates of Approval

Environmental Compliance Approvals/Certificates of Approval	SD	Specify Year(s) Requested
air - emissions	☐	All years
renewable energy	☐	All years
water - mains, treatment, ground level, standpipes & elevated storage, pumping stations (local & booster)	☐	All years
sewage - sanitary, storm, treatment, stormwater, leachate & leachate treatment & sewage pump stations	☐	All years
waste water - industrial discharge	☐	All years
waste sites - disposal, landfill sites, transfer stations, processing sites, incinerator sites	☐	All years
waste systems - haulers: sewage, non-hazardous & hazardous waste, mobile waste processing units, PCB destruction	☐	All years

Proponent information must be provided and Environmental Compliance Approval/Certificate of Approval number(s) (if known). 1985 and prior records are searched manually. Search fees in excess of $300.00 may be incurred, depending on the types and years to be searched. Specify Approval number(s) (if known). If supporting documents are also required, mark SD box and specify type e.g. maps, plans, reports, etc.

B.I.G. Consulting Inc.
515 Consumers Road, Unit 804
Toronto, ON M2J 4V8

Dear Libby Kuit:

RE: ***Freedom of Information and Protection of Privacy Act*** **Request**
Our File # A-2021-03015, Your Reference BIGC-ENV-461A

This letter is in response to your request made pursuant to the *Freedom of Information and Protection of Privacy Act* relating to 789 and 795 Brant Street, Burlington.

After a thorough search through the files of the Ministry's Halton Peel District Office, Investigations and Enforcement Branch, Environmental Assessment and Permissions Branch, Environmental Monitoring and Reporting Branch, Sector Compliance Branch and Safe Drinking Water Branch, no records were located responsive to your request. To provide you with this response and in accordance with Section 57 of the *Freedom of Information and Protection of Privacy Act*, the fee owed is $30.00 for 1 hour of search time @ $30.00 per hour. **We have applied the $30.00 for this request from your initial payment. This file is now closed.**

You may request a review of my decision by contacting the Information and Privacy Commissioner/Ontario, 2 Bloor Street East, Suite 1400, Toronto, ON M4W 1A8 (800-387-0073 or 416-326-3333). Please note that there is a $25.00 fee and you only have 30 days from receipt of this letter to request a review.

If you have any questions regarding this matter, please contact Dany Briollais at 416-319-7739 or dany.briollais@ontario.ca.

Yours truly,

Noel Kent
Manager, Access and Privacy

Opta Historical Environmental Services Enviroscan™ Terms and Conditions

Report

The documents (hereinafter referred to as the "Documents") to be released as part of the report (hereinafter referred to as the "Report") to be delivered to the purchaser as set out above are documents in Opta's records relating to the described property (hereinafter referred to as the "Property"). Opta makes no representations or warranties respecting the Documents whatsoever, including, without limitation, with respect to the completeness, accuracy or usefulness of the Documents, and does not represent or warrant that these are the only plans and reports prepared in association with the Property or in Opta's possession at the time of Report delivery to the purchaser. The Documents are current as of the date(s) indicated on them. Interpretation of the Documents, if any, is by inference based upon the information which is apparent and obvious on the face of the Documents only. Opta does not represent, warrant or guarantee that interpretations other than those referred to do not exist from other sources. The Report will be prepared for use by the purchaser of the services as shown above hereof only.

Disclaimer

Opta disclaims responsibility for any losses or damages of any kind whatsoever, whether consequential or other, however caused, incurred or suffered, arising directly or indirectly as a result of the services (which services include, but are not limited to, the preparation of the Report provided hereunder), including but not limited to, any losses or damages arising directly or indirectly from any breach of contract, fundamental or otherwise, from reliance on Opta Reports or from any tortious acts or omissions of Opta's agents, employees or representatives.

Entire Agreement

The parties hereto acknowledge and agree to be bound by the terms and conditions hereof. The request form constitutes the entire agreement between the parties pertaining to the subject matter hereof and supersedes all prior and contemporaneous agreements, negotiations and discussions, whether oral or written, and there are no representations or warranties, or other agreements between the parties in connection with the subject matter hereof except as specifically set forth herein. No supplement, modification, waiver, or termination of the request shall be binding, unless confirmed in writing by the parties hereto.

Governing Document

In the event of any conflicts or inconsistencies between the provisions hereof and the Reports, the rights and obligations of the parties shall be deemed to be governed by the request form, which shall be the paramount document.

Law

This agreement shall be governed by and construed in accordance with the laws of the Province of Ontario and the laws of Canada applicable therein.

NOTE: The sole purpose of this report is to provide insurance pricing and underwriting information about the particular insured and location named. Only the person requesting this survey will receive a copy of the report, and IAO asks that it be kept strictly confidential. This report does not guarantee compliance with any standards or with any federal, provincial or municipal codes, ordinances or regulations. Tests of fire and other protection equipment have not been conducted or witnessed during this survey.

IAO reports, prepared in compliance with commonly accepted risk control standards existing at the time services are rendered, are developed from a survey of the premises and/or from data supplied by or on behalf of the Purchaser. IAO does not purport to list all hazards. While changes and modifications, referred to in the reports are designed to upgrade protection and loss prevention of the premises, IAO assumes no responsibility for management and control of these activities. IAO will not be responsible to the Purchaser for any loss or damages, whether consequential or other, however caused, incurred or suffered, as a result of the services being provided.

REMARKS:

* Fire, Liability & Basic Crime - The Insured premises are located on a busy street in an older area of Burlington. Traffic is heavy and the area is well lit. The premises are used for the preparation of computer software programs for the automotive industry.
The contact was helpful and appears interested in loss control.

RECOMMENDATIONS:

* 96-1 Fire, Liability & Basic Crime - Portable extinguishers should be serviced at least once a year and be tagged with the name of the servicing company and the date of service.

* 96-2 Fire, Liability & Basic Crime - Housekeeping in the basement furnace room should be improved by removing all combustibles from the area.
