1 Executive Summary

EXP Services Inc. (EXP) was retained by BryDec Developments Inc. ("Client") to complete a Phase One Environmental Site Assessment (ESA) for the properties with the municipal addresses of 1022 Gallagher Road and 235 Plains Road East, in Burlington, Ontario (hereinafter referred to as the 'Site' or the 'Phase One Property').

The Site is located on the northwest side of Plains Road East, approximately 30 metres (m) northwest of the intersection of Plains Road East and Gallagher Road, in Burlington, Ontario (refer to Figure 1). The Site measures approximately 0.28 hectares (0.69 acres) and consists of two (2) residential properties. Further details of the Site are as follows:

- 235 Plains Road East – measures approximately 0.22 hectares (0.56 acres) and is occupied by one (1) two-storey residential dwelling with a building footprint measuring approximately 185 square m (m^2), (2,000 square feet [ft^2]). A detached garage is situated north of the residential building. This municipal address comprises the south portion of the Site.

- 1022 Gallagher Road – measures approximately 0.12 hectares (0.29 acres) and is occupied by one (1) two-storey residential dwelling with a footprint measuring approximately 150 square m (m^2), (1,615 square feet [ft^2]). This municipal address comprises the northeast portion of the Site.

The Phase One Property is bound by residential properties to the west, northwest, south, and southeast, institutional and parkland to the northeast, and residential followed by commercial properties to the southwest.

It is EXP's understanding that the Site is proposed for residential development with an eleven (11) storey condominium, consisting of two (2) levels of underground parking. Based on the proposed development of the Site, a Record of Site Condition (RSC) is not required; however, this report will support the filing of a RSC in accordance with Ontario Regulation (O.Reg.) 153/04 (as amended), if required.

A Phase One ESA is a systematic qualitative process to assess the environmental condition of a site based on its historical and current uses. This Phase One ESA was conducted in accordance with the Phase One ESA standard as defined by O.Reg. 153/04, and in accordance with generally accepted professional practices. Subject to this standard of care, EXP makes no express or implied warranties regarding its services and no third-party beneficiaries are intended. Limitation of liability, scope of report and third-party reliance are outlined in Appendix A.

It should be noted that the objective of this review was to identify any environmental concerns associated with the Site.

It is noted that general environmental management and housekeeping practices were reviewed as part of this assessment insofar as they could impact the environmental condition of the property. However, a detailed review of regulatory compliance issues was beyond the scope of our investigation. This Phase One ESA does not constitute an audit of environmental management practices, indicate geotechnical conditions, or identify geologic hazards.

Based on the Phase One ESA findings, the following information is provided in Table 1-1 in support of the Phase One Qualified Person's (QP's) conclusion:

Table 1-1: Areas of Potential Environmental Concern:

Area of Potential Environmental Concern (APEC) (1)	Location of APEC on Site[3)]	Potentially Contaminating Activity (PCA)[(2)]	Location of PCA (on-Site or off-Site)	Contaminants of Potential Concern	Media Potentially Impacted (Groundwater, soil and/or sediment)
APEC 1: Former Orchard On-Site *(PCA Identifier 1)*	Northwest portion of the Site	PCA#40 – Pesticides (including Herbicides, Fungicides and Anti-Fouling Agents) Manufacturing, Processing, Bulk Storage and Large-Scale Applications	On-Site	Organochlorine Pesticides (OCs), Metals, Hydride Forming Metals (HFMs)	Soil

(1) Area of Potential Environmental Concern means the area on, in or under a phase one study area where one or more are potentially present, as determined through the PI ESA, including through (a) identification of post or present uses on, in or under the phase one property, and (b) identification of potentially contaminating activities.

(2) Potentially contaminating activity means a use or activity set out in Column A of Table 2 of Schedule D (O.Reg.153/04, as amended) that is occurring or has occurred in a phase one Study area.

Based on the findings of the Phase One ESA and conclusions, an additional investigation is required to assess the soil conditions at the Site.

It is noted that access was not provided onto all exterior portions of the Site property or inside the Site buildings. There is potential for additional APECs to be identified based on the pending Site observations.

This executive summary is a brief synopsis of the report and should not be read in lieu of reading the report in its entirety.

2 Introduction

EXP Services Inc. (EXP) was retained by BryDec Developments Inc. ("Client") to complete a Phase One Environmental Site Assessment (ESA) for the properties with the municipal addresses of 1022 Gallagher Road and 235 Plains Road East, in Burlington, Ontario (hereinafter referred to as the 'Site' or the 'Phase One Property').

The Site is located on the northwest side of Plains Road East, approximately 30 metres (m) northwest of the intersection of Plains Road East and Gallagher Road, in Burlington, Ontario (refer to Figure 1). The Site measures approximately 0.28 hectares (0.69 acres) and consists of two (2) residential properties. Further details of the Site are as follows:

- 235 Plains Road East – measures approximately 0.22 hectares (0.56 acres) and is occupied by one (1) two-storey residential dwelling with a building footprint measuring approximately 185 square m (m^2), (2,000 square feet [ft^2]). A detached garage is situated north of the residential building. This municipal address comprises the south portion of the Site.

- 1022 Gallagher Road – measures approximately 0.12 hectares (0.29 acres) and is occupied by one (1) two-storey residential dwelling with a footprint measuring approximately 150 square m (m^2), (1,615 square feet [ft^2]). This municipal address comprises the northeast portion of the Site.

The Phase One Property is bound by residential properties to the west, northwest, south, and southeast, institutional and parkland to the northeast, and residential followed by commercial properties to the southwest.

It is EXP's understanding that the Site is proposed for residential development with an eleven (11) storey condominium, consisting of two (2) levels of underground parking. Based on the proposed development of the Site, a Record of Site Condition (RSC) is not required; however, this report will support the filing of a RSC in accordance with Ontario Regulation (O.Reg.) 153/04(as amended), if required.

A Phase One ESA is a systematic qualitative process to assess the environmental condition of a site based on its historical and current uses. This Phase One ESA was conducted in accordance with the Phase One ESA standard as defined by O.Reg. 153/04, and in accordance with generally accepted professional practices. Subject to this standard of care, EXP makes no express or implied warranties regarding its services and no third-party beneficiaries are intended. Limitation of liability, scope of report and third-party reliance are outlined in Appendix A.

It should be noted that the objective of this review was to identify any environmental concerns associated with the Site.

2.1 Phase One Property Information

Details of the Site are as follows:

Municipal Address	235 Plains Road East, Burlington, Ontario 1022 Gallagher Road, Burlington, Ontario
Current Land Use	Residential
Proposed Land Use	Residential
Legal Description	Part lot 5, Con 1 EF as in 437325 Part lot 5, Con 1 EF as In 570193
Property Identification Number (PIN)	07114-0158 (LT) 07114-0156 (LT)

Approximate Universal Transverse Mercator (UTM) coordinates	WGS84 17T 593617 m E 4796212 m N
Accuracy Estimate of UTM	10-15 m
Measurement Method	Global Positioning System (GPS)
Site Area	0.28 hectares (0.69 acres)
Property Owners, Owner Contact and Address	1001048533 Ontario Inc. Anndec Holdings Inc.
Name of Any Other Person Who Engaged the Qualified Person	Mr. Bryan Decunha BryDec Developments Inc 3324 Guelph Line Burlington, ON L7P 0S7

3 Scope of Investigation

The scope of work for the Phase One ESA consisted of the following activities:

- Reviewing the historical occupancy of the Site through the use of available archived and relevant municipal and business directories, fire insurance plans (FIPs), topographical maps, and aerial photographs;
- Contacting municipal and provincial agencies to determine the existence of records of environmental regulatory non-compliance, if any, and reviewing such records where available;
- Obtaining an Environmental Risk Information Services Ltd. (ERIS) report for the Site and surrounding properties within a 250-metre radius of the Site;
- Reviewing available geological maps, well records and utility maps for the vicinity of the Site;
- Obtaining and reviewing a chain of title and assessment rolls for the Site;
- Reviewing available reports previously completed at the Site;
- Conducting interviews with designated Site representative(s) as a resource for current and historical Site information, as well as to provide EXP staff with unrestricted access to all areas of the Site and Site buildings (as required by O.Reg. 153/04, as amended);
- Conducting a Site reconnaissance in order to identify any land use practices that may have impacted the environmental condition of the Site;
- Conducting a reconnaissance of the surrounding properties from the Site and publicly accessible areas in order to identify any land use practices that may have impacted the environmental condition of the Site; and,
- Preparing a report to document the findings.

The following sections summarize the information gathered by EXP during the Phase One ESA and identifies Potentially Contaminating Activities (PCAs) on the Phase One property and in the Phase One study area, and Areas of Potential Environmental Concern (APECs) associated with the Site. APECs and PCAs are defined in the O. Reg 153/04, as amended.

In completing the scope of work, EXP did not conduct any intrusive investigations, including sampling, analyses or monitoring.

EXP has confirmed neither the completeness nor the accuracy of any of the records that were obtained or any of the statements made by others.

EXP personnel who conducted assessment work for this project included Mr. Scott Grant-Hose, B.Sc., and Ms. Kate Miles, P.Eng., QPESA. An outline of their qualifications is provided in Appendix C.

4 Record Review

4.1 General

4.1.1 Phase One Study Area Determination

The Phase One Study Area consists of properties within a distance of approximately 250 metres from the Site boundaries.

The Phase One Study Area is bound by institutional and parkland properties to the north, residential properties to the northwest, south and east, and residential followed by commercial properties to the southwest.

The Phase One Study Area and a Surrounding Land Use Plan are shown on Figure 2.

4.1.2 First Developed Use Determination

Based on a review of historical aerial photographs, chain of title information, and interviews, the 235 Plains Road East portion of the Site has been occupied by an inferred residential dwelling since at least 1934. The 1022 Gallagher Road portion of the Site was developed with an inferred residential dwelling since at least 1975. Both addresses comprising the Site are currently used for residential purposes.

4.1.3 Insurance Products

4.1.3.1 Fire Insurance Plans

A search of Canadian Underwriter's Association Fire Insurance Plans (FIPs) for historic maps of the Site and surrounding Phase One Study Area was completed. Based on the search, an FIP from 1971 was available for review.

A review of the FIP indicated the following environmentally significant information:

Year	Observations
1971	Site: • The Site was not depicted on the FIP. Surrounding: • 261 Plains Road East, situated approximately 20 m northeast of the Site, was occupied by Holy Rosary School and 283 Plains Road East, approximately 90 m northeast of the Site, was occupied by Holy Rosary Church. • The remainder of the Phase One Study Area was not depicted on the FIP.

Based on the review of the FIP, no items have been identified as Potentially Contaminating Activities (PCAs).

4.1.3.2 Insurance Reports

A search of for insurance products for the Site and surrounding area was completed by OPTA Services. No insurance reports were available for the Site.

4.1.4 Chain of Title

The search for the historical chain of title of the Site was completed by Dominic Bertucci, an independent title researcher, on December 11, 2025. The current owners of the Site are 1001048533 Ontario Inc. (235 Plains Road East) and Anndec Holdings Inc. (1022 Gallagher Road).

The completed chain of title is provided in Appendix D, and a list of previous owners of the Site is summarized in Table I. Significant findings for the addresses are as follows:

1022 Gallagher Road

- 1796 – Crown land
- 1796 – 1973 – Agricultural or other use
- 1973 – Present – Residential use

235 Plains Road East

- 1796 – Crown land
- 1796 – 1958– Agricultural or other use
- 1958 – Present– Residential use

4.1.5 Environmental Reports

At the time of this Phase One ESA, no previously completed environmental reports were available for review.

4.2 Environmental Source Information

4.2.1 Federal and Provincial Database Search

A search of provincial, federal and private environmental databases for records pertaining to the Site and properties within the Phase One Study Area was completed by Environmental Risk Information Services (ERIS) for the Site and surrounding Phase One Study Area on December 5, 2025. EXP has confirmed neither the completeness nor the accuracy of the records that were provided. The ERIS Report is provided in Appendix E.

A summary of the significant findings for the is Site provided below.

Location & Proximity to Site	Summary	Database	Associated PCA(s)
Site			
235 Plains Road	Ideal Gardening Limited was listed for a pesticide operator license.	*PES*	Based on an online review, operations were noted to be landscape design, construction, maintenance, and hardscaping. As the Site is residential, this record is anticipated to be associated with a tenants business and related to off-Site (job Site) pesticide application. No, PCAs were identified from these records
Surrounding Properties			
261 Plains Road East (~20 m northeast)	Halton Roman Catholic School Board was listed as a waste generator without defined wastes from 1993 to 1994.	*GEN*	None, based on educational nature of the operations (institutional).

Location & Proximity to Site	Summary	Database	Associated PCA(s)
226 Plains Road East (~35 m southeast)	Anthony Ledsham was listed for an active fuel oil tank.	*CFOT*	PCA#28 – Gasoline and Associated Products Storage in Fixed Tanks
276 Plains Road East (~130 m east)	RSC (#B-402-5266497287) of behalf of Dr. Colin Wellum, approved on July 11, 2024. Property use changing from commercial to residential and the RSC was filed with a Phase One ESA.	*RSC*	N/A
287 Plains Road East (~90 m northeast)	Holy Rosary Church was listed as a waste generator of unspecified waste in 2011.	*GEN*	Based on the nature of the activities associated with this religious institution, no PCAs were identified from these records
284 Plains Road East (~160 m east)	RSC (#230213) was filed on behalf of 284 Plains Road Development Inc., approved on December 16, 2021. The property use was changing from commercial to residential. The RSC was based on a Phase One ESA.	*RSC*	N/A
15-185 Plains Road East (~125 m southwest)	Royal Forest Pest Services Inc. was listed for a pesticide operator license .	*PES*	PCA#40 - Pesticides (including Herbicides, Fungicides and Anti-Fouling Agents) Manufacturing, Processing, Bulk Storage and Large-Scale Applications
185 Plains Road East (~125 m southwest)	Camelot Drapery Burlington Ltd. / Camelot Drapery (Burlington) / Camelot Drapery (Burlington) Ltd. / Camelot Drapery 2000 Ltd. was established in 1975 and described as a 'curtains and draperies / house furnishings, except curtains and draperies / curtain and linen mills / other home furnishings wholesaler-distributors / linen, drapery and other textile furnishings wholesaler-distributor' operation	*SCT*	Based on the wholesale/distribution nature of the activities associated with this company, no PCAs were identified from these records
181 Plains Road East (~125 m southwest)	Arc & Flame Welding was listed as an expired propane refill centre – cylinder fill.	*DTNK*	PCA#33 - Metal Treatment, Coating, Plating and Finishing
292 Plains Road East (~175 m east)	RSC (#230213) was filed on behalf of 284 Plains Road Development Inc., approved on December 16, 2021. The property use was changing from commercial to residential and the RSC filed with a Phase One ESA. The Intrepid was described as a 'periodical publisher' operation.	*RSC* *SCT*	Based on the lack of waste generation of printing operations noted, no PCAs were identified from these records

Location & Proximity to Site	Summary	Database	Associated PCA(s)
Various locations within Phase One Study Area	Two (2) observation wells, one (1) abandoned well, and one (1) borehole were listed within the Phase One Study Area. The general stratigraphy of the Phase One Study Area is sand and gravel, underlain by sand to a maximum depth of 10.6 m bgs.	*WWIS* *BORE*	N/A

Databases:

N/A – Not Applicable
BORE – Borehole
CFOT – Commercial Fuel Oil Tanks
DTNK – Delisted Fuel Tanks
GEN – Ontario Regulation 347 Waste Generators Summary
PES – Pesticide Register
RSC – Record of Site Condition
SCT – Scott's Manufacturing Directory
WWIS – Water Well Information System

4.2.2 Municipal Records

The available Mights and Digital City Directories between 1957 and 2024 were reviewed in approximately five (5) year intervals in order to identify the occupancy history of the Site, and properties within the Phase One Study Area.

Details of the tenants on-Site and within the Phase One Study Area that appeared to be associated with one or more PCAs as per Table 2, Schedule D of O.Reg.153/04, as amended, are listed as follows.

Address	Tenant	Years of occupancy	Associated PCA(s)
Site			
235 Plains Road East	Ideal Excavating Inc.	2005 - 2021	None, based on the review of chain of title documents, and historical aerial photographs, this portion of the Site was occupied by a residential dwelling and listings are anticipated to be associated with a tenants business and related to off-Site (job Site) projects (i.e., excavating and landscaping).
	Ideal Builders / Ideal Gardening Limited	1980 - 1995	
	Ideal Software	1990	
	Gallagher Properties Ltd.	1957 - 1975	
	Residential	1957 - 2005, 2023 - 2024	
1022 Gallagher Road	Residential	1975 - 2005, 2021	N/A
Surrounding Properties			
1040 Gallagher Road (~55 m northwest)	Gallagher Farms	1960	PCA#40 – Pesticides (including Herbicides, Fungicides and Anti-Fouling Agents) Manufacturing, Processing, Bulk Storage and Large-Scale Applications
195 Plains Road East (~125 m southwest)	Meena Cleaners	2021 - 2024	PCA#37 – Operation of Dry Cleaning Equipment (where chemicals are used)
	Factory Outlet Cleaners	2012 - 2017	

Address	Tenant	Years of occupancy	Associated PCA(s)
	Mint Cleaners	2000 - 2005	
	Cadet Cleaners	1995	
	Sketchley Cleaners	1990	
	Embassy Cleaners	1980 - 1985	
	Chemical Lab Bulk Cleaning Store	1990	PCA#8 – Chemical Manufacturing, Processing and Bulk Storage

4.2.3 Ontario Ministry of the Environment Records

4.2.3.1 Ministry of the Environment, Conservation and Parks (MECP)

The MECP was contacted through the Freedom of Information and Protection of Privacy Act (FOI) for copies of any records they had pertaining to the Site on December 5, 2025.

A response from the MECP was received on January 5, 2026, which indicated no records were identified for the Site.

A copy of the decision letter is included in Appendix G.

4.2.3.2 Ministry of the Environment and Climate Change Databases

The ERIS report summarized in the Federal and Provincial Database Search section of the report included a summary of MECP databases (see section 4.2.1). The databases include the following: Environmental Bill of Rights (EBR), Brownfields Environmental Site Registry, Hazardous Waste Information Network (HWIN) and Waste Disposal Sites.

4.2.4 Technical Standards and Safety Authority

A request was made to the Technical Standards and Safety Authority (TSSA) by email on December 5, 2025, for information regarding fuel storage at the Site and adjacent properties. As such, the TSSA maintains a database (approximately 1987 to present) of all registered fuel storage tanks in Ontario.

A written response for the TSSA was received on December 5, 2025. According to a search of their database, no records were found related to the Site or surrounding properties.

Copy of the request and response is provided in Appendix G.

4.2.5 Areas of Natural Significance

Based on the review of available resources from the Ontario Ministry of Natural Resources and Forestry website on December 5, 2025, no areas of natural significance were identified at the Site or within 30 m of the Site.

4.3 Physical Setting Sources

4.3.1 Aerial Photographs

Aerial photographs dated 1934, 1954, 1965, 1974, 1986, 1992, 2005, 2015, and 2025 were obtained in order to review the development and land use history of the Site, as well the land in the immediate vicinity of the Site. Copies of the aerial photographs are included in Appendix H.

The development and land use history of the Site and adjacent properties as depicted on the reviewed aerial photography is summarized in the table below.

Aerial Photography Year	Observations
1934	• The south central portion of the Site, addressed as 235 Plains Road East, appeared developed with an inferred residential dwelling in generally the same configuration as the residential Site Building observed at the same time of the Site reconnaissance. • The northwest portion of the Site appeared to be part of a larger orchard. This item is associated with PCA#40 – Pesticides (including Herbicides, Fungicides and Anti-Fouling Agents) Manufacturing, Processing, Bulk Storage and Large-Scale Applications. • Plains Road East was present in a similar configuration to present day. • The Phase One Study Area is predominantly agricultural uses, including orchards, with farmsteads and/or residential dwellings interspersed along Plains Road East.
1954	• Due to the poor resolution of the aerial photograph, fine details are difficult to discern. • Gallagher Road, Shadeland Avenue, Townsend Avenue, Tangier Avenue, Merle Avenue, Filmandale Road, Mallard Avenue, Filman Place, and Teal Drive were present in a similar configuration to present day.
1965	• A structure has been constructed north of the residential structure at 235 Plains Road East, inferred to be a detached garage building. • Inferred residential dwellings appeared developed south, southeast, and northwest of the Site. • Inferred institutional structures were developed east of the Site. • Remaining portions of the Phase One Study Area were similar to 1954 aerial photograph.
1974	• The northeast portion of the Site addressed as 1022 Gallagher Drive appears developed with a residential dwelling, in generally the same configuration as the residential Site Building observed at the time of the Site reconnaissance. • A structure appeared developed on the parkland north of the Site. • An inferred commercial building appeared developed on the northwest side of Plains Road East, southwest of the Site. • Remaining portions of the Phase One Study Area were similar to 1965 aerial photograph.
1986	• Due to the poor resolution of the aerial photograph, fine details are difficult to discern. • The residential townhomes observed at the time of the Site reconnaissance have been developed on the southwest adjacent property. • Additional inferred commercial structures are developed on the northwest portion of Plains Road East, southwest of the Site. • An addition has been constructed to the institutional structure northeast of the Site. • The Site and remainder of the Phase One Study Area were similar to the 1974 aerial photograph.
1992	• Due to the poor resolution of the aerial photograph, fine details are difficult to discern. • The Site and Phase One Study Area were similar to the 1986 aerial photograph.
2005	• The Site and Phase One Study Area were similar to the 1992 aerial photograph; however, an inferred in-ground pool is observed on the west corner of the Site.
2015	• The Site and remainder of the Phase One Study Area were similar to the 2005 aerial photograph.
2025	• The Site and Phase One Study Area were similar to the 2015 aerial photograph.

4.3.2 Topography, Hydrology and Geology

The following physiographic, geological and soil maps were reviewed:

- “Toporama"; Natural Resources Canada. Map 030M11 – Oakville. Scale 1:10,000. 2008.
- "Quaternary Geology, Seamless coverage of the Province of Ontario"; Data Set 14 - Revised, Scale 1: 1,000,000 Issued 2000.
- "Bedrock Geology of Ontario, Southern Sheet," Ontario Geological Survey, MDR126-REV1. Scale 1:250,000. Issued 2011.

Based on the review of the above maps, the following information was obtained:

- The Site is approximately 100 m above sea level and is generally flat.
- A review of the topographic map indicated that the closet body of water were intermittent tributaries of Falcon Creek, located approximately 425 m south-southeast of the Site, which flows in a southeasterly direction towards Lake Ontario. Lake Ontario is located approximately 1.0 km southeast of the Site. Based on local topography, the anticipated groundwater flow direction is to the south/southeast.
- The Site and surrounding area is expected to consist of one or more of the following:
    - Post-Precambrian Bedrock consisting of undifferentiated carbonate and clastic sedimentary rock, exposed at surface or covered by a discontinuous, thin layer of drift from the Paleozoic period.
    - Halton Till consisting of silt to silty clay matrix, high in matrix carbonate content and clast-poor from the Pleistocene period
- The bedrock in the general area of the Site is part of a group belonging to the Queenston Formation consisting of shale, limestone, dolostone, and siltstone. The depth of the bedrock is anticipated to be approximately 10 m bgs.

4.3.3 Fill Materials

Fill material is typically brought to a property as a base for buildings and pavement areas. Fill can also be used to re-grade a property, and to backfill excavations.

Based on the review of historical records and interviews, EXP does not expect fill material of unknown quality to be present on the Site.

4.3.4 Well Records

4.3.4.1 Water Wells

A search of the water well database was conducted on the Ontario Well Records Database to identify water wells within the Phase One Study Area.

Based on a review of the ERIS report (refer to section 4.2.1) no well records were listed for the Site. Two (2) observation wells, one (1) abandoned well, and one (1) borehole were listed within the Phase One Study Area. The records indicated that the stratigraphy of the Phase One Study Area is sand and gravel, underlain by sand to a maximum depth of 10.6 m bgs.

4.3.4.2 Oil, Gas, and Salt Wells

A search of the Oil, Gas & Salt Resources Library (2014) was completed by ERIS. According to the findings of ERIS’s search, there are no Ontario oil and gas well sites within approximately 0.25 km of the Site.

4.4 Site Operating Records

In general, a request is usually made to the property representative for copies of any operating records pertaining to the environmental conditions at the Site. Records would include: regulatory permits; Material Safety Data Sheets (MSDS) for all

chemicals that were handled on-Site; underground utility drawings; inventories of chemicals, chemical usage, and chemical storage areas; inventory of aboveground storage tanks (ASTs) and underground storage tanks (USTs); environmental monitoring data; correspondence pertaining to an order or request by the MECP or TSSA; waste management records; process, production, and maintenance documents; records of spills and records of discharges of chemicals; emergency response and contingency plans, including spill prevention and contingency plans; environmental audit reports; and site plans of the facility showing areas of production and manufacturing.

There were no records of environmental significance available for review at the time of this Phase One ESA.

5 Interviews

Interviews were conducted by EXP with the individuals identified to be the most knowledgeable with respect to both the current and historical Site uses. The interviews were conducted in order to obtain information to assist in identifying areas of potential environmental concern and identify details of potentially contaminating activities or potential contaminant pathways, in, on or below the Site.

The following individual was interviewed as part of this Phase One ESA:

1. Mr. Bryan Decunha, via emailed Phase One ESA questionnaire

Information collected from the above noted individual (herein after referred to as the "Site representative") was used in the completion of Section 6.0.

6 Site Reconnaissance

6.1 General Requirements

The Phase One Site reconnaissance was conducted on December 16, 2025, between 3:00 and 4:00 pm by Mr. Scott Grant-Hose under the supervision of Ms. Kate Miles, QPESA, a Qualified Person as defined by O.Reg. 153/04, as amended. On the day of the Site reconnaissance, the weather was snowy and approximately -8°C.

The Site and the adjoining properties were observed from publicly accessible areas as Site access was not granted at the time of the Site visit. The Site reconnaissance was conducted along the south and boundary east boundaries of the Site. Photographs documenting the Site visit are included in Appendix I.

It is noted that full access onto the Site and inside the Site buildings was not provided at the time of the Site reconnaissance, and only a visual inspection from publicly accessible areas was completed. Access to the interior of both Site Buildings is required prior to finalizing this Phase One ESA.

6.2 Specific Observations at Phase One ESA Property

6.2.1 Site Description and Buildings

The Site is located on the northwest side of Plains Road East, approximately 30 metres (m) northwest of the intersection of Plains Road East and Gallagher Road, in Burlington, Ontario (refer to Figure 1). The Site measures approximately 0.28 hectares (0.69 acres) and consists of two (2) residential properties. Further details of the Site are as follows:

- 235 Plains Road East – measures approximately 0.22 hectares (0.56 acres) and is occupied by one (1) two-storey residential dwelling with a building footprint measuring approximately 185 square m (m^2), (2,000 square feet [ft^2]). A detached garage is situated north of the residential building. This municipal address comprises the south portion of the Site.

- 1022 Gallagher Road – measures approximately 0.12 hectares (0.29 acres) and is occupied by one (1) two-storey residential dwelling with a footprint measuring approximately 150 square m (m^2), (1,615 square feet [ft^2]). This municipal address comprises the northeast portion of the Site.

The main characteristics of the Site building are as follows:

Building Surface	Building Material Description
Floor Surfaces	Unknown
Ceilings	Unknown
Interior Walls	Unknown
Exterior Walls	Brick, wood paneling

Landscaped areas (i.e., manicured lawns) were located on the southeast and northeast (street facing) sides of the Site buildings, along with paved driveways from Plains Road East (providing access to 235 Plains Road East) and from Gallagher Road (providing access to 2022 Gallagher Road). A detached garage was observed northwest of the residential structure at 235 Plains Road East and a temporary storage container was observed in the driveway. The areas considered to be the rear yards were not assessed during the Site visit as access was not granted at the time of the Site visit.

6.2.2 Heating and Cooling Systems

The Site building heating and cooling could not be confirmed as Site access was not granted at the time of the Site visit.

6.2.3 Site Utilities and Services

The Site utilities and services were identified at the Site based on information provided in environmental records, relevant utility infrastructure observed during the Site reconnaissance. The Site utilities are summarized in the table below and noted on Figure 3, where available. It is noted that the precise underground location of the utilities cannot be determined without professional locate services.

Utility	Source	Location	Site Entry
Natural Gas	Enbridge	Unknown	Unknown
Sanitary Sewer	City of Burlington/Halton Region	Unknown	Unknown
Storm Sewer	City of Burlington/Halton Region	Unknown	Unknown
Water	City of Burlington/Halton Region	Unknown	Unknown
Electricity	Burlington Hydro	Unknown	Unknown
Telecommunications	Unknown	Unknown	Unknown

6.2.4 Sewage and Wastewater Disposal

The Site and the surrounding area is serviced by the municipal sanitary and storm sewer systems.

6.2.5 Potable Water Sources

Potable water is provided to the Site building through the municipal water distribution system.

6.2.6 Abandoned and Existing Wells

No abandoned or existing wells were observed in the publicly accessible areas of 235 Plains Road East and 1022 Gallagher Road during the Site visit by EXP. The remainder of the Site was not inspected for abandoned or existing wells as Site access was not granted at the time of the Site visit.

6.2.7 Site Production and Manufacturing

There are no on-Site production or manufacturing activities.

6.2.8 Drains, Pits and Sumps

No drains, pits or sumps were observed in the in the publicly accessible areas of 235 Plains Road East and 1022 Gallagher Road during the Site visit by EXP. The remainder of the Site was not inspected as Site access was not granted at the time of the Site visit.

6.2.9 Storage Tanks

The presence/absence and condition (if present) of underground storage tanks (USTs) and aboveground storage tanks (ASTs) at the Site were assessed during the Site visit.

No evidence of active or inactive USTs or ASTs was observed by EXP in the publicly accessible areas of 235 Plains Road East and 1022 Gallagher Road during the Site visit. The areas considered to be the rear yards were not assessed during the Site visit as access was not granted at the time of the Site visit.

6.2.10 Water Wells

No water well was observed in the publicly accessible areas of 235 Plains Road East and 1022 Gallagher Road during the Site visit. The areas considered to be the rear yards were not assessed during the Site visit as access was not granted at the time of the Site visit.

6.2.11 Site Housekeeping

The publicly accessible areas of 235 Plains Road East and 1022 Gallagher Road were well maintained, with no evidence of misplaced/excessive waste or spills being observed at the time of the Site visit.

6.2.12 Chemical Storage and Handling and Floor Condition

No chemicals were observed on the Site at the time of the Site visit. It is noted access to the interior of the Site Buildings and rear yards was not granted at the time of the Site visit.

6.2.13 Areas of Stained Soil, Pavement or Stressed Vegetation

No evidence of staining or stressed vegetation was observed during the Site visit, however; the visit occurred during the winter months when vegetation is seasonally dormant and ground surfaces were snow covered at the time of the Site visit.

6.2.14 Fill and Debris

Fill material is typically brought to a property as a base for buildings and pavement areas. Fill can also be used to re-grade a property, and to backfill excavations.

Based on the review of historical records and interviews, EXP does not expect fill material of unknown quality to be present on the Site.

For a discussion on possible fill materials located beneath the surface at the Site (refer to Section 4.3.3).

6.2.15 Air Emissions

Air emissions in Ontario are regulated under the Environmental Protection Act (EPA) and its Regulations (O. Reg. 419/05, O. Reg. 245/11, O.Reg 1/17). Owners and operators of activities that may discharge a contaminant into the natural environment must seek permissions from the Ministry of Environment, Conservation and Parks (MECP) to carry out these activities. As of October 31, 2011, amendments to the EPA resulted in a two-path environmental approval process, the Environmental Compliance Approval (ECA) and Environmental Activity and Sector Registry (EASR). The EASR allows businesses to register certain activities with the ministry, rather than apply for approvals. The EASR is for common systems and processes, initially for heating systems, standby power systems and automotive refinishing, to which preset rules of operation can be applied. Effective January 3, 2017 additional activities were allowed through the EASR process based on the facility's North American Industry Classification System (NAICS) code but required full assessment for compliance of emissions under O.Reg. 419/05. Unless explicitly exempted, most industrial processes or modification to industrial processes and equipment require an ECA, formerly a Certificate of Approval (Air and Noise).

Based on the Site visit, no operations were observed on-Site that would require MECP approval for air emissions.

6.2.16 Polychlorinated Biphenyls (PCBs)

No evidence of PCB containing equipment was observed on the Site at the time of the Site visit.

6.3 Enhanced Investigation Property Observations

An Enhanced Investigation Property is "(i) a property used, or has ever been used, in whole or part, for an industrial purpose, or (ii) a commercial property used as a garage, a bulk liquid dispensing facility, including a gasoline outlet or for the operation of dry-cleaning equipment" (O.Reg. 153/04).

Based on the current and historical use of the Site (currently residential use and former agricultural), the Site is not classified as an Enhanced Investigation Property.

6.4 Adjacent and Surrounding Properties

A visual reconnaissance of the adjacent properties, and properties within the Phase One Study Area was conducted from publicly accessible areas to identify the occupants; and document any PCAs that may be contributing to an APEC at the Site.

Based on the visual reconnaissance of adjacent and surrounding properties within the Phase One Study Area, the following table describes the operations and tenants observed at the time of the Site visit. Properties that have operations that contribute towards a PCA as defined in Table 2 of Schedule D are indicated below:

Direction	Address	Occupants	Associated PCA
Southwest	195 Plains Road East	Neena Dry Cleaners	PCA#37 – Operation of Dry cleaning Equipment (where chemicals are used)

6.5 Written Description of Investigation

A reconnaissance of the Site was conducted by EXP to examine all portions of the Site. It is noted that full access onto the Site and inside the Site buildings was not provided at the time of the Site reconnaissance, and only a visual inspection from publicly accessible areas was completed. Access to the interior of both Site Buildings is required prior to finalizing this Phase One ESA.

Mechanical equipment (if any; including heating and cooling systems) were documented and characterized, as was any evidence of USTs and ASTs. The exterior portions of the Site were examined for evidence of utilities and related infrastructure; water wells; Site drainage and related infrastructure; stained areas; stressed vegetation; and evidence of fill material.

The reconnaissance of the Site included an examination of all properties within the Phase One Study Area from public access ways to document and characterize PCAs, water bodies and areas of natural significance.

7 Review and Evaluation of Information

7.1 Current and Past Uses

Based on a review of historical aerial photographs, chain of title information, and interviews, the 235 Plains Road East portion of the Site has been occupied by an inferred residential dwelling since at least 1934. The 1022 Gallagher Road portion of the Site was developed with an inferred residential develop since at least 1974. Both portions of the Site are currently used for residential purposes.

The surrounding properties consist of institutional, commercial, and residential occupants.

7.2 Potentially Contaminating Activities (PCAs)

A list of all the PCAs identified at the Site and within the Phase One Study Area are listed in the CSM Appendix J and shown on Figure 2.

7.3 Areas of Potential Environmental Concern (APECs)

As the inferred groundwater flow direction is inferred to be to the south/southeast, the properties within the Phase One Study Area south of the Site were considered to be hydraulically down-gradient of the Site; and the properties to the west and east of the Site were considered to be hydraulically trans-gradient to the Site. Furthermore, any PCAs located significantly distant from the Site (>100 m) were considered to be too distant to be contributing to an APEC on the Site.

The following PCAs were considered to contribute to an APEC:

- PCAs identified at the Site; and
- PCAs located on immediately adjacent properties (off-Site) or situated up-gradient to the Site with respect to the anticipated groundwater flow direction;

The APECs identified at the Site are summarized in the CSM (Appendix J) and on Figure 4.

8 Conclusions

8.1 Whether Phase Two ESA Required Before RSC Submitted

Based on the results and findings of the Phase One ESA, a Phase Two ESA is required before a RSC may be submitted to investigate the following APECs identified on the Phase One Property:

Area of Potential Environmental Concern (APEC) (1)	Location of APEC on Site[3)]	Potentially Contaminating Activity (PCA)[(2)]	Location of PCA (on-Site or off-Site)	Contaminants of Potential Concern	Media Potentially Impacted (Groundwater, soil and/or sediment)
APEC 1: Former Orchard On-Site *(PCA Identifier 1)*	Northwestern portion of the Site	PCA#40 – Pesticides (including Herbicides, Fungicides and Anti-Fouling Agents) Manufacturing, Processing, Bulk Storage and Large-Scale Applications	On-Site	Organochlorine Pesticides (OCs), Metals, Hydride Forming Metals (HFMs)	Soil

(1) Area of Potential Environmental Concern means the area on, in or under a phase one study area where one or more are potentially present, as determined through the PI ESA, including through (a) identification of post or present uses on, in or under the phase one property, and (b) identification of potentially contaminating activities.
(2) Potentially contaminating activity means a use or activity set out in Column A of Table 2 of Schedule D (O.Reg.153/04, as amended) that is occurring or has occurred in a phase one Study area.

It is noted that access was not provided onto the Site property or inside the Site buildings. There is potential for additional APECs to be added based on the Site observations.

8.2 RSC Based on Phase One ESA Alone

It is EXP's understanding that the Site is proposed for residential development. Should the development of the Site require a Record of Site Condition (RSC) the objective of this investigation will support the filing of an RSC in accordance with Ontario Regulation (O.Reg.) 153/04, as amended.

Based on the APEC identified above, an RSC cannot be filed on a Phase One ESA alone.

9 Closure

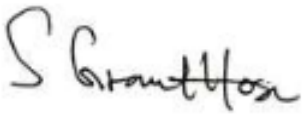

The findings and conclusions of this report have been supervised and reviewed by the undersigned Qualified Person.

As QPESA, I (Kate Miles), confirm that I have supervised the carrying out of this Phase One ESA, findings and conclusions of this report.

We trust this report is satisfactory for your purposes. Should you have any questions, please do not hesitate to contact this office.

Yours truly,

EXP Services Inc.

Scott Grant-Hose, BSc.

TABLE I

TABLE OF CURRENT AND PAST USES OF THE PHASE ONE PROPERTY
1022 Gallagher Road and 235 Plains Road East, Burlington, Ontario (PIN: 07114-0156 (LT) and 07114-0158 (LT))

Year	Name of Owner	Description of Property Use	Property Use	Other Observations from Aerial Photographs, Fire Insurance Plans, Etc.
Part lot 5, Con 1 EF as in 570193 (1022 Gallagher Road)				
Prior to 1796	Crown	Agricultural	Agriculture or other use	Based individuals names listed as owners, a review of aerial photographs of the Site and surrouding area, historical records, it is inferred that the Site was used for agricultural purposes until the 1970s.
1796-1804	Hon. Peter McGill			
1804-1831	John Fonger			
1831-1845	John Fonger & William Fonger			
1845-1880	David Fonger			
1880-1904	John Gallagher			
1904-1958	George T. Gallagher			
1958-1972	Gallagher Properties Limited			
1972-1973	John Peter Slaghter			
1973-1982	Berend Harsevoort & Catharina Harsevoort	Residential Use	Residential Use	Based on the city directories, it is inferred that the Site is used for residential purposes.
1982-1983	Albert Lambshead, Clem Jackson & Keneth F. Wright			
1983-2003	Ronald G. Gannett			
2003-2007	Ross Beaman & Kimberly Beaman			
2007-2020	Victor Leslie Szeverenyi & Wndy Darlene Szeverenyi			
2020-Present	Anndec Holdings Inc.			

Year	Name of Owner	Description of Property Use	Property Use	Other Observations from Aerial Photographs, Fire Insurance Plans, Etc.
Part lot 5, Con 1 EF as in 437325 (235 Plains Road East)				
Prior to 1796	Crown	Agricultural	Agriculture or other use	Based individuals names listed as owners, a review of aerial photographs of the Site and surrouding area, historical records, it is inferred that the Site was used for agricultural purposes (orchard) until the 1930s. Additionally, the property was first developed with a residential dwelling since at least 1934.
1796-1804	Hon. Peter McGill			
1804-1831	John Fonger			
1831-1845	John Fonger & William Fonger			
1845-1880	David Fonger			
1880-1904	John Gallagher			
1904-1958	George T. Gallagher	Aricultural and Residential		
1958-1972	Gallagher Properties Limited	Residential	Residential Use	Based on the Site visit and aerial photographs, it is inferred that the Site is used for residential purposes.
1972-1976	F. Percy Gallagher			
1976-2001	Albert Kenel & Maria Kenel			
2001-2024	Mario Christian Kenel & Pamela Ruth Kenel			
2024-Present	1001048533 Ontario Inc.			

Notes:

1 - for each owner, specify one of the following types of property use (as defined in O.Reg. 153/04) that applies:

Agriculture or other use	Institutional use
Commercial use	Parkland use
Community use	Residential use
Industrial use	

2 - when submitting a record of site condition for filing, a copy of this table must be attached

Appendix A – Limitation of Liability

LIMITATIONS AND USE OF REPORT

BASIS OF REPORT

The Report is based on site conditions known or inferred by the investigation undertaken as of the date of the Report. Should changes occur which potentially impact the condition of the site the recommendations of exp may require re-evaluation. Where special concerns exist, or the Client has special considerations or requirements, these should be disclosed to exp to allow for additional or special investigations to be undertaken not otherwise within the scope of investigation conducted for the purpose of the Report.

Where applicable, recommended field services are the minimum necessary to ascertain that construction is being carried out in general conformity with building code guidelines, generally accepted practices and exp's recommendations. Any reduction in the level of services recommended will result in exp providing qualified opinions regarding the adequacy of the work. exp can assist design professionals or contractors retained by the Client to review applicable plans, drawings, and specifications as they relate to the Report or to conduct field reviews during construction.

RELIANCE ON INFORMATION PROVIDED

The evaluation and conclusions contained in the Report are based on conditions in evidence at the time of site inspections and information provided to exp by the Client and others. The Report has been prepared for the specific site, development, building, design or building assessment objectives and purpose as communicated by the Client. exp has relied in good faith upon such representations, information and instructions and accepts no responsibility for any deficiency, misstatement or inaccuracy contained in the Report as a result of any misstatements, omissions, misrepresentation or fraudulent acts of persons providing information. Unless specifically stated otherwise, the applicability and reliability of the findings, recommendations, suggestions or opinions expressed in the Report are only valid to the extent that there has been no material alteration to or variation from any of the information provided to exp.

STANDARD OF CARE

This report ("Report") has been prepared in a manner consistent with the degree of care and skill exercised by engineering consultants currently practicing under similar circumstances and locale. No other warranty, expressed or implied, is made. Unless specifically stated otherwise, the Report does not contain environmental consulting advice.

COMPLETE REPORT

All documents, records, data and files, whether electronic or otherwise, generated as part of this assignment form part of the Report. This material includes, but is not limited to, the terms of reference given to exp by the Client, communications between exp and the Client, other reports, proposals or documents prepared by exp for the Client in connection with the site described in the Report. In order to properly understand the suggestions, recommendations and opinions expressed in the Report, reference must be made to the Report in its entirety. exp is not responsible for use by any party of portions of the Report.

USE OF REPORT

The information and opinions expressed in the Report, or any document forming part of the Report, are for the sole benefit of the Client. No other party may use or rely upon the Report in whole or in part without the written consent of exp. Any use of the Report, or any portion of the Report, by a third party are the sole responsibility of such third party. exp is not responsible for damages suffered by any third party resulting from unauthorised use of the Report.

REPORT FORMAT

Where exp has submitted both electronic file and a hard copy of the Report, or any document forming part of the Report, only the signed and sealed hard copy shall be the original documents for record and working purposes. In the event of a dispute or discrepancy, the hard copy shall govern. Electronic files transmitted by exp utilize specific software and hardware systems. exp makes no representation about the compatibility of these files with the Client's current or future software and hardware systems. Regardless of format, the documents described herein are exp's instruments of professional service and shall not be altered without the written consent of exp.

Appendix C – Qualifications of Assessors

Qualifications of Assessors

The records review and Site visit was completed by Scott Grant-Hose, B.Sc., who has been trained to conduct conduct Phase I and II Environmental Site Assessments (ESAs) (in accordance with the applicable CSA Standards and O.Reg. 153/04). Mr. Grant-Hose completed Bachelor of Science degrees in Geoscience and Physical Science from McMaster University and a post graduate certificate in Environmental Management and Assessment from Niagara College.

The report was reviewed by Ms. Kate Miles, P.Eng. Kate Miles graduated from Queen's University with a Bachelor of Science in Chemical Engineering in 2010, and from Ryerson University's Chang School of Continuing Education with a certificate in Environmental Engineering Science in 2014. She has over eight years of experience in environmental consulting. She is a licensed professional engineer in Ontario.

EXP Services Inc. is a full-service consulting and engineering firm and provides a full range of environmental services through the Environmental Services Group. EXP's Environmental Services Group has developed a strong working relationship with clients in both the private and public sectors and has developed a positive relationship with the Ontario Ministry of the Environment. Personnel in the numerous branch offices form part of a large network of full-time dedicated environmental professionals in the EXP organization.

Executive Summary: Summary By Data Source

BORE - Borehole

A search of the BORE database, dated 1875-Jul 2018 has found that there are 1 BORE site(s) within approximately 0.25 kilometers of the project property.

Lower Elevation	Address	Direction	Distance (m)	Map Key
	ON	ENE	51.98	2

CFOT - Commercial Fuel Oil Tanks

A search of the CFOT database, dated Oct 2023 has found that there are 1 CFOT site(s) within approximately 0.25 kilometers of the project property.

Lower Elevation	Address	Direction	Distance (m)	Map Key
ANTHONY LEDSHAM	226 PLAINS RD E BURLINGTON ON	SSE	99.99	5

DTNK - Delisted Fuel Tanks

A search of the DTNK database, dated Oct 2023 has found that there are 1 DTNK site(s) within approximately 0.25 kilometers of the project property.

Equal/Higher Elevation	Address	Direction	Distance (m)	Map Key
ARC & FLAME WELDING	181 PLAINS RD E BURLINGTON ON	SW	224.42	16

EHS - ERIS Historical Searches

A search of the EHS database, dated 1999-Aug 31, 2025 has found that there are 6 EHS site(s) within approximately 0.25 kilometers of the project property.

Equal/Higher Elevation	Address	Direction	Distance (m)	Map Key
	185 Plains Road East Burlington ON L7T 2C4	SW	220.71	15

Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. ***Note:*** *Databases denoted with " * " indicates that the database will no longer be updated. See the individual database description for more information.*

Abandoned Aggregate Inventory: Provincial AAGR

The MAAP Program maintains a database of abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.*

Government Publication Date: Sept 2002*

Aggregate Inventory: Provincial AGR

This database of licensed and permitted pits and quarries is maintained by the Ontario Ministry of Natural Resources and Forestry (MNRF), as regulated under the Aggregate Resources Act, R.S.O. 1990. Aggregate site data has been divided into active and inactive sites. Active sites may be further subdivided into partial surrenders. In partial surrenders, defined areas of a site are inactive while the rest of the site remains active.

Government Publication Date: Up to Nov 2024

Abandoned Mine Information System: Provincial AMIS

The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

Government Publication Date: 1800-May 2025

Anderson's Waste Disposal Sites: Private ANDR

The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1860s-Present

Aboveground Storage Tanks: Provincial AST

Historical listing of aboveground storage tanks made available by the Department of Natural Resources and Forestry. Includes tanks used to hold water or petroleum. This dataset has been retired as of September 25, 2014 and will no longer be updated.

Government Publication Date: May 31, 2014

Automobile Wrecking & Supplies: Private AUWR

This database provides an inventory of known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

Government Publication Date: 1999-Apr 30, 2025

Borehole: Provincial BORE

A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW.

Government Publication Date: 1875-Jul 2018

Certificates of Approval: Provincial CA

This database contains the following types of approvals: Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA). Please refer to those individual databases for any information after Oct.31, 2011.

Government Publication Date: 1985-Oct 30, 2011*

Dry Cleaning Facilities: Federal CDRY

List of dry cleaning facilities made available by Environment and Climate Change Canada. Environment and Climate Change Canada's Tetrachloroethylene (Use in Dry Cleaning and Reporting Requirements) Regulations (SOR/2003-79) are intended to reduce releases of tetrachloroethylene to the environment from dry cleaning facilities.

Government Publication Date: Jan 2004-Dec 2023

Commercial Fuel Oil Tanks: Provincial CFOT

Locations of commercial underground fuel oil tanks. This is not a comprehensive or complete inventory of commercial fuel tanks in the province; this listing is a copy of records of registered commercial underground fuel oil tanks obtained under Access to Public Information.
Note that the following types of tanks do not require registration: waste oil tanks in apartments, office buildings, residences, etc.; aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Oct 2023

Chemical Manufacturers and Distributors: Private CHEM

This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.).

Government Publication Date: 1999-Jan 31, 2020

Chemical Register: Private CHM

This database includes a listing of locations of facilities within the Province or Territory that either manufacture and/or distributes chemicals.

Government Publication Date: 1999-Apr 30, 2025

Compressed Natural Gas Stations: Private CNG

Canada has a network of public access compressed natural gas (CNG) refuelling stations. These stations dispense natural gas in compressed form at 3,000 pounds per square inch (psi), the pressure which is allowed within the current Canadian codes and standards. The majority of natural gas refuelling is located at existing retail gasoline that have a separate refuelling island for natural gas. This list of stations is made available by the Canadian Natural Gas Vehicle Alliance.

Government Publication Date: Dec 2012 -Sep 2025

Inventory of Coal Gasification Plants and Coal Tar Sites: Provincial COAL

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.*

Government Publication Date: Apr 1987 and Nov 1988*

Compliance and Convictions: Provincial CONV

This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here have been found guilty of environmental offenses in Ontario courts of law.

Government Publication Date: 1989-Aug 2025

Certificates of Property Use: Provincial CPU

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include CPU's on the registry such as (EPA s. 168.6) - Certificate of Property Use.

Government Publication Date: 1994 - Sep 30, 2025

Drill Hole Database: Provincial DRL

The Ontario Drill Hole Database (ODHD) is offered by the Province of Ontario's Ministry of Mines. The dataset contains information for over 164,000 percussion, overburden, sonic and diamond-drill holes. The presence of assay results with cutoff values for gold, silver, copper, zinc, lead, nickel and platinum group elements is noted. Drill hole data are compiled from assessment files that have been submitted to the ministry in accordance with the Ontario Mining Act (OMA). Source assessment file numbers are captured for cross reference with the Ontario Assessment File Database (OAFD). Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed company map; or from submitted a "Report of Work".

Government Publication Date: 1886 - Jul 2025

Delisted Fuel Tanks: Provincial DTNK

List of fuel storage tank sites that were once found in - and have since been removed from - the list of fuel storage tanks made available by the regulatory agency under Access to Public Information.

Government Publication Date: Oct 2023

Environmental Activity and Sector Registry: Provincial EASR

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval), Please see our ECA database.

Government Publication Date: Oct 2011 - Oct 31, 2025

Environmental Registry: Provincial EBR

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

Government Publication Date: 1994 - Oct 31, 2025

Environmental Compliance Approval: Provincial ECA

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For certificates of approval prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

Government Publication Date: Oct 2011 - Oct 31, 2025

Environmental Effects Monitoring: Federal EEM

The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This database provides information on the mill name, geographical location and sub-lethal toxicity data.

Government Publication Date: 1992-2007*

ERIS Historical Searches: Private EHS

ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical Profile" page.

Government Publication Date: 1999-Aug 31, 2025

Environmental Issues Inventory System: Federal EIIS

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety; and to prevent future environmental problems. The EIIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed.

Government Publication Date: 1992-2001*

Emergency Management Historical Event: Provincial EMHE

List of locations of historical occurrences of emergency events, including those assigned to the Ministry of Natural Resources by Order-In-Council (OIC) under the Emergency Management and Civil Protection Act, as well as events where MNR provided requested emergency response assistance. Many of these events will have involved community evacuations, significant structural loss, and/or involvement of MNR emergency response staff. These events fall into one of ten (10) type categories: Dam Failure; Drought / Low Water; Erosion; Flood; Forest Fire; Soil and Bedrock Instability; Petroleum Resource Center Event, EMO Requested Assistance, Continuity of Operations Event, Other Requested Assistance. EMHE record details are reproduced by ERIS under License with the Ontario Ministry of Natural Resources © Queen's Printer for Ontario, 2017.

Government Publication Date: Apr 30, 2022

Environmental Offenders Registry: Federal EOR

The Environmental Offenders Registry, enforced by Environment and Climate Change Canada and Parks Canada, tracks corporations convicted under specific federal environmental laws. The registry includes corporate convictions resulting from court proceedings. Court prosecutions are one of several enforcement measures used when violations or potential violations are detected. Other measures like tickets, warning letters, or compliance orders may also be employed to restore compliance. Although not affected by the Environmental Enforcement Act, convictions obtained by Environment and Climate Change Canada under the Species at Risk Act and the Pollution Prevention Provisions of the Fisheries Act are also included.

Government Publication Date: Mar 31, 2025

Environmental Penalty Annual Report: Provincial EPAR

This database contains data from Ontario's annual environmental penalty report published by the Ministry of the Environment, Conservation and Parks (MECP). These reports provide information on environmental penalties for land or water violations issued to companies in one of the nine industrial sectors covered by the Municipal Industrial Strategy for Abatement (MISA) regulations.

Government Publication Date: Jan 1, 2011 - Dec 31, 2024

Excess Soil Registry: Provincial ESNR

The Excess Soil Registry is made available by the Resource Productivity and Recovery Authority (RPRA). Excess soil is soil dug up mainly during construction and excavation activities that must be removed from the development site because it cannot or will not be reused. The Minister of the Environment, Conservation and Parks directed the RPRA to establish and maintain the Excess Soil Registry, enabling regulated parties to comply with registration and filing notice requirements, the ministry to access data, and the public to view information from those filings. From January 1, 2023, construction and development project leaders, as well as operators and owners of soil Reuse Sites, and Residential Development Soil Depot sites, must file notices detailing how excess soil is reused and disposed of in compliance with Ontario's Excess Soil Regulation.

Government Publication Date: Aug 31, 2025

List of Expired Fuels Safety Facilities: Provincial EXP

List of facilities and tanks for which there was once a fuel registration. This is not a comprehensive or complete inventory of expired tanks/tank facilities in the province; this listing is a copy of previously registered tanks and facilities obtained under Access to Public Information. Includes private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc; includes tanks which have been removed from the ground.
Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Oct 2023

Federal Convictions: Federal FCON

Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty.

Government Publication Date: 1988-Jun 2007*

Contaminated Sites on Federal Land: Federal FCS

The Federal Contaminated Sites Inventory includes information on known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government. Includes fire training sites and sites at which Per- and Polyfluoroalkyl Substances (PFAS) are a concern.

Government Publication Date: Jun 2000-Sep 2025

Fisheries & Oceans Fuel Tanks: Federal FOFT

Fisheries & Oceans Canada maintains an inventory of aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation.

Government Publication Date: 1964-Sep 2019

Federal Identification Registry for Storage Tank Systems (FIRSTS): Federal FRST

A list of federally regulated Storage tanks from the Federal Identification Registry for Storage Tank Systems (FIRSTS). FIRSTS is Environment and Climate Change Canada's database of storage tank systems subject to the Storage Tank for Petroleum Products and Allied Petroleum Products Regulations. The main objective of the Regulations is to prevent soil and groundwater contamination from storage tank systems located on federal and aboriginal lands. Storage tank systems that do not have a valid identification number displayed in a readily visible location on or near the storage tank system may be refused product delivery.

Government Publication Date: Oct 31, 2021

Fuel Storage Tank: Provincial FST

List of registered private and retail fuel storage tanks. This is not a comprehensive or complete inventory of private and retail fuel storage tanks in the province; this listing is a copy of registered private and retail fuel storage tanks, obtained under Access to Public Information.
Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Oct 2023

Fuel Storage Tank - Historic: Provincial FSTH

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks. Public records of private fuel storage tanks are only available since the registration became effective in September 1989. This information is now collected by the Technical Standards and Safety Authority.

Government Publication Date: Pre-Jan 2010*

Ontario Regulation 347 Waste Generators Summary: Provincial GEN

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. As of January 1, 2023, businesses and institutions subject to the amended Reg. 347: General – Waste Management are required to report their activities and pay fees through Resource Productivity & Recovery Authority (RPRA) online Hazardous Waste Program Registry (HWPR) rather than the Hazardous Waste Information Network (HWIN) system previously operated by the Ministry of the Environment, Conservation and Parks (MECP). Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

Government Publication Date: 1986-Mar 31, 2025

Greenhouse Gas Emissions from Large Facilities: Federal GHG

List of greenhouse gas emissions from large facilities made available by Environment Canada. Greenhouse gas emissions in kilotonnes of carbon dioxide equivalents (kt CO2 eq).

Government Publication Date: 2013-Feb 2025

TSSA Historic Incidents: Provincial HINC

List of historic incidences of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen recorded by the TSSA in their previous incident tracking system. The TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of historical fuel spills and leaks in the province. This listing is a copy of the data captured at one moment in time and is hence limited by the record date provided here.

Government Publication Date: 2006-June 2009*

Historical Business Activity Risk: Federal HIST RISK

Proprietary list of sites identified as potentially having engaged in business activity that poses a higher-than-normal risk of contamination. Records originate from historical city directories, and are included in this list based on broad business categories Potentially Hazardous Chemical Users and Fuel and Automotive, including but not limited to Dry Cleaners and Fuel Stations, Garages, etc. Inclusion in this list does not indicate that there is or ever has been contamination; rather, sites are included in this list due to their potential for having engaged in a business activity presenting an elevated risk of contamination. The list was compiled from various city directories including BC Directories, Hendersons, Mights, Sun Directories, Vernons, and Wrights; spanning roughly 1920s through 1960 depending on information available by city.

This list is currently limited to sites as reported in the following provinces: Alberta, British Columbia, Saskatchewan.

Government Publication Date: 1920s - 1960

Indian & Northern Affairs Fuel Tanks: Federal IAFT

The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

Government Publication Date: 1950-Aug 2003*

Fuel Oil Spills and Leaks: Provincial INC

Listing of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen reported to the Spills Action Centre (SAC). This is not a comprehensive or complete inventory of fuel-related leaks, spills, and incidents in the province; this listing in a copy of incidents reported to the SAC, obtained under Access to Public Information. Includes incidents from fuel-related hazards such as spills, fires, and explosions. Records are not verified for accuracy or completeness.

Government Publication Date: Oct 2023

Landfill Inventory Management Ontario: Provincial LIMO

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the Ministry of the Environment, Conservation and Parks compiles new and updated information. Includes small and large landfills currently operating as well as those which are closed and historic. Operators of larger landfills provide landfill information for the previous operating year to the ministry for LIMO including: estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills include information such as site owner, site location and certificate of approval # and status.

Government Publication Date: Mar 31, 2022

Canadian Mine Locations: Private MINE

This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database.

Government Publication Date: 1998-2009*

Mineral Occurrences: Provincial MNR

In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the plan metric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

Government Publication Date: 1846-Feb 2025

National Analysis of Trends in Emergencies System (NATES): Federal NATE

In 1974 Environment Canada established the National Analysis of Trends in Emergencies System (NATES) database, for the voluntary reporting of significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released.

Government Publication Date: 1974-1994*

Non-Compliance Reports: Provincial NCPL

The Ministry of the Environment Conservation and Parks (MECP) provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act. MECP publicly releases the Environmental Compliance Report (ECR) on the Ontario Data Catalogue. In Ontario, all facilities with regulated wastewater discharges or air emissions under the Ontario Water Resources Act and the Environmental Protection Act must monitor and report any cases where approved operating limits have been exceeded.

Government Publication Date: Dec 31, 2023

National Defense & Canadian Forces Fuel Tanks: Federal NDFT

The Department of National Defense and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on DND lands. Our inventory provides information on the base name, location, tank type & capacity, tank contents, tank class, date of tank installation, date tank last used, and status of tank as of May 2001. This database will no longer be updated due to the new National Security protocols which have prohibited any release of this database.

Government Publication Date: Up to May 2001*

National Defense & Canadian Forces Spills: Federal NDSP

The Department of National Defense and the Canadian Forces maintains an inventory of spills to land and water. All spill sites have been classified under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered.

Government Publication Date: Mar 1999-Nov 2023

National Defence & Canadian Forces Waste Disposal Sites: Federal NDWD

The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status.

Government Publication Date: 2001-Apr 2007*

National Energy Board Pipeline Incidents: Federal NEBI

Locations of pipeline incidents from 2008 to present, made available by the Canada Energy Regulator (CER) - previously the National Energy Board (NEB). Includes incidents reported under the Onshore Pipeline Regulations and the Processing Plant Regulations related to pipelines under federal jurisdiction, does not include incident data related to pipelines under provincial or territorial jurisdiction.

Government Publication Date: 2008-Aug 31, 2025

National Energy Board Wells: Federal NEBP

The NEBW database contains information on onshore & offshore oil and gas wells that are outside provincial jurisdiction(s) and are thereby regulated by the National Energy Board. Data is provided regarding the operator, well name, well ID No./UWI, status, classification, well depth, spud and release date.

Government Publication Date: 1920-Feb 2003*

National Environmental Emergencies System (NEES): Federal NEES

In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for previous Environment Canada spill datasets. NEES is composed of the historic datasets ' or Trends ' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.

Government Publication Date: 1974-2003*

National PCB Inventory: Federal NPCB

Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. Federal out-of-service PCB containing equipment and PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites. Some addresses provided may be Head Office addresses and are not necessarily the location of where the waste is being used or stored.

Government Publication Date: 1988-2008*

National Pollutant Release Inventory: Federal NPR2

The National Pollutant Release Inventory (NPRI) is Canada's public inventory of pollutant releases (to air, water and land), disposals, and transfers for recycling. The inventory, managed by Environment and Climate Change Canada, tracks over 300 substances. Under the authority of the Canadian Environmental Protection Act (CEPA), owners or operators of facilities that meet published reporting requirements are required to report to the NPRI.

Government Publication Date: Feb 2024

National Pollutant Release Inventory - Historic: Federal NPRI

Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances. This data holds historic records; current records are found in NPR2.

Government Publication Date: 1993-May 2017

Oil and Gas Wells: Private OGWE

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at www.nickles.com.

Government Publication Date: 1988-Aug 31, 2025

Ontario Oil and Gas Wells: Provincial OOGW

In 1998, the Ministry of Natural Resources (MNR) handed over to the Ontario Oil, Gas and Salt Resources (OGSR) Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database includes well owner/operator, location, permit issue date, and well cap date, license number, status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provided for each well record.

Government Publication Date: 1800-May 2025

Inventory of PCB Storage Sites: Provincial OPCB

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory.

Government Publication Date: 1987-Oct 2004; 2012-Dec 2013

Orders: Provincial ORD

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include Orders on the registry such as (EPA s. 17) - Order for remedial work, (EPA s. 18) - Order for preventative measures, (EPA s. 43) - Order for removal of waste and restoration of site, (EPA s. 44) - Order for conformity with Act for waste disposal sites, (EPA s. 136) - Order for performance of environmental measures.

Government Publication Date: 1994 - Sep 30, 2025

Canadian Pulp and Paper: Private PAP

This information is part of the Pulp and Paper Canada Directory. The Directory provides a comprehensive listing of the locations of pulp and paper mills and the products that they produce.

Government Publication Date: 1999, 2002, 2004, 2005, 2009-2014

Parks Canada Fuel Storage Tanks: Federal PCFT

Canadian Heritage maintains an inventory of known fuel storage tanks operated by Parks Canada, in both National Parks and at National Historic Sites. The database details information on site name, location, tank install/removal date, capacity, fuel type, facility type, tank design and owner/operator.

Government Publication Date: 1920-Jan 2005*

Pesticide Register: Provincial PES

The Ontario Ministry of the Environment and Climate Change maintains a database of licensed operators and vendors of registered pesticides.

Government Publication Date: Oct 2011 - Oct 31, 2025

Ontario PFAS Spills: Provincial PFAS

This specific list of spills includes those incidents where one or more of the listed contaminants are identified in the PFAS Structure List and/or PFAS Chemicals Without Explicit Structure List made available by the United States Environmental Protection Agency (US EPA), is originally sourced from the Ministry of the Environment, Conservation and Parks spills related data. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X.

Government Publication Date: 1988-Jun 2024; Aug 2024; Oct-Nov 2024

NPRI Reporters - PFAS Substances: Federal PFCH

The National Pollutant Release Inventory (NPRI) is Canada's public inventory of releases, disposals, and transfers, tracking over 320 pollutants. Per - and polyfluoroalkyl substances (PFAS) are a group of over 4,700 human-made substances for which adverse environmental and health effects have been observed. This listing of PFAS substance reporters includes those NPRI facilities that reported substances that are found in either: a) the Comprehensive Global Database of PFASs compiled by the Organisation for Economic Co-operation and Development (OECD), b) the US Environmental Protection Agency (US EPA) Master List of PFAS Substances, c) the US EPA list of PFAS chemicals without explicit structures, or d) the US EPA list of PFAS structures (encompassing the largest set of structures having sufficient levels of fluorination to potentially impart PFAS-type properties).

Government Publication Date: Feb 2024

Potential PFAS Handlers from NPRI: Federal PFHA

The National Pollutant Release Inventory (NPRI) is Canada's public inventory of releases, disposals, and transfers, tracking over 320 pollutants. Per - and polyfluoroalkyl substances (PFAS) are a group of over 4,700 human-made substances for which adverse environmental and health effects have been observed. This list of potential PFAS handlers includes those NPRI facilities that reported business activity (NAICS code) included in the US Environmental Protection Agency (US EPA) list of Potential PFAS-Handling Industry Sectors, further described as operating in industry sectors where literature reviews indicate that PFAS may be handled and/or released. Inclusion of a facility in this listing does not indicate that PFAS are being manufactured, processed, used, or released by the facility - these are facilities that potentially handle PFAS based on their industrial profile.

Government Publication Date: Feb 2024

Pipeline Incidents: Provincial PINC

List of pipeline incidents (strikes, leaks, spills). This is not a comprehensive or complete inventory of pipeline incidents in the province; this listing in an historical copy of records previously obtained under Access to Public Information. Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2021

Potential PFAS Handlers from EASR: Provincial PPHA

The Ontario Environmental Activity and Sector Registry (EASR), described in Ontario Regulation 245/11, allows businesses with less complex operations - and hence not requiring an Environmental Compliance Approval - to register their activities with the Ontario Ministry of the Environment, Conservation and Parks (MECP). This list of potential PFAS handlers includes those EASR facilities that reported business activity (NAICS code) included in the US Environmental Protection Agency (US EPA) list of Potential PFAS-Handling Industry Sectors, further described as operating in industry sectors where literature reviews indicate that PFAS may be handled and/or released. Inclusion of a facility in this listing does not indicate that PFAS are being manufactured, processed, used.

Government Publication Date: Jun 30, 2024

Private and Retail Fuel Storage Tanks: Provincial PRT

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks and licensed retail fuel outlets. This database includes an inventory of locations that have gasoline, oil, waste oil, natural gas and/or propane storage tanks on their property. The MCCR no longer collects this information. This information is now collected by the Technical Standards and Safety Authority (TSSA).

Government Publication Date: 1989-1996*

Permit to Take Water: Provincial PTTW

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include PTTW's on the registry such as OWRA s. 34 - Permit to take water.

Government Publication Date: 1994 - Oct 31, 2025

Ontario Regulation 347 Waste Receivers Summary: Provincial REC

Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data.

Government Publication Date: 1986-1990, 1992-2021

Record of Site Condition: Provincial RSC

The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental cleanup orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up. RSCs filed after July 1, 2011 will also be included as part of the new (O.Reg. 511/09). The Government of Ontario states that it is not responsible for the accuracy of the information in this Registry.

Government Publication Date: 1997-Sept 2001, Oct 2004 - 31 Oct, 2025

Retail Fuel Storage Tanks: Private RST

This database includes an inventory of retail fuel outlet locations (including marinas) that have on their property gasoline, oil, waste oil, natural gas and / or propane storage tanks.

Government Publication Date: 1999-Apr 30, 2025

Scott's Manufacturing Directory: Private SCT

Scott's Directories is a data bank containing information on over 200,000 manufacturers across Canada. Even though Scott's listings are voluntary, it is the most comprehensive database of Canadian manufacturers available. Information concerning a company's address, plant size, and main products are included in this database.

Government Publication Date: 1992-Mar 2011*

Ontario Spills: Provincial SPL

List of spills and incidents made available by the Ministry of the Environment, Conservation and Parks. This database identifies information such as location (approximate), type and quantity of contaminant, date of spill, environmental impact, cause, nature of impact, etc. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X.

Government Publication Date: 1988-Aug 2024;Oct 2024-Jul 2025

Wastewater Discharger Registration Database: Provincial SRDS

Facilities that report either municipal treated wastewater effluent or industrial wastewater discharges under the Effluent Monitoring and Effluent Limits (EMEL) and Municipal/Industrial Strategy for Abatement Regulations. The Municipal/Industrial Strategy for Abatement (MISA) division of the Ontario Ministry of Environment keeps record of direct dischargers of toxic pollutants within nine sectors including: Electric Power Generation, Mining, Petroleum Refining, Organic Chemicals, Inorganic Chemicals, Pulp & Paper, Metal Casting, Iron & Steel, and Quarries.

Government Publication Date: 1990-Dec 31, 2023

Anderson's Storage Tanks: Private TANK

The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit year, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1915-1953*

Transport Canada Fuel Storage Tanks: Federal TCFT

List of fuel storage tanks currently or previously owned or operated by Transport Canada. This inventory also includes tanks on The Pickering Lands, which refers to 7,530 hectares (18,600 acres) of land in Pickering, Markham, and Uxbridge owned by the Government of Canada since 1972; properties on this land has been leased by the government since 1975, and falls under the Site Management Policy of Transport Canada, but is administered by Public Works and Government Services Canada. This inventory provides information on the site name, location, tank age, capacity and fuel type.

Government Publication Date: 1970 - Apr 2024

Variances for Abandonment of Underground Storage Tanks: Provincial VAR

Listing of variances granted for storage tank abandonment. This is not a comprehensive or complete inventory of tank abandonment variances in the province; this listing is a copy of tank abandonment variance records previously obtained under Access to Public Information. In Ontario, registered underground storage tanks must be removed within two years of disuse; if removal of a tank is not feasible, an application may be sought for a variance from this code requirement.
Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2022

Waste Disposal Sites - MOE CA Inventory: Provincial WDS

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

Government Publication Date: Oct 2011 - Oct 31, 2025

Waste Disposal Sites - MOE 1991 Historical Approval Inventory: Provincial WDSH

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30st, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number.

Government Publication Date: Up to Oct 1990*

Water Well Information System: Provincial WWIS

This database consists of information submitted by well contractors detailing locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table. The database is provided by the Ontario Ministry of Environment, Conservation and Parks.

Government Publication Date: Jul 31, 2025

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

Appendix F – City Directories

RE: CITY DIRECTORY RESEARCH
235 Plains Road East and 1022 Gallagher Road
Burlington,ON L7T 2C5

Thank you for contacting ERIS regarding our City Directory Search services. Our staff has conducted a reverse listing City Directory search to determine prior occupants of the subject site and adjacent properties. When searching a range of addresses, all civic addresses within that range found in the Directory are included.

Note: Reverse Listing Directories generally are focused on highly developed areas, while newly developed areas may be covered in the more recent years, older directories tend to cover only "central" parts of the city. To complete the search, we have either utilized the Toronto Reference Library, Library & Archives Canada and multiple digitized directories. While these do not claim to be a complete collection of all reverse listing city directories produced, ERIS has made every effort to provide accurate and complete information. ERIS shall not be held liable for missing, incomplete, or inaccurate information. If you believe there are additional addresses or streets that require searching, please contact us.

Search Criteria:

ALL of Dalewood Ave
ALL of Filman Pl
ALL of Gallagher Rd
ALL of Merle Ave
ALL of Old Orchard Rd
160-310 of Plains Rd E
ALL of Plumtree Dr
920-END of Shadeland Ave
920-END of Tanager Ave
ALL of White Oak Dr

Search Notes:

Burlington, Ontario is last listed in 1957.

January 5, 2026

Mr. Scott Grant-Hose
EXP Services Inc.
1266 South Service Road, Suite C1-1
Stoney Creek, Ontario L8E 5R9
scott.grant-hose@exp.com

Dear Scott Grant-Hose:

RE: **MECP FOI A-2025-08363, Your Reference GTR-21016319-B0 – Decision Letter**

This letter is in response to your request made pursuant to the Freedom of Information and Protection of Privacy Act (the Act) relating to:

235 Plains Road East & 1022 Gallagher Road, Burlington

Timeframe: January 1, 1900 to December 5, 2025

After a thorough search through the ministry files, no records were located responsive to your request. The official responsible for making the access decision on your request is the undersigned. This file is now closed.

The ministry's District Office has advised that there may be inactive records in the Records Centre, Mississauga. If you would like us to retrieve these files, please submit a separate FOI request quoting this file number. The $5 application fee will be applied towards any costs incurred with the retrieval of the records from the Records Centre. Please note there is no guarantee that any records will be located responsive to your request.

You may request a review of my decision within 30 days from the date of this letter by contacting the Information and Privacy Commissioner/Ontario at http://www.ipc.on.ca. Please note there may be a fee associated with submitting the appeal.

If you have any questions, please contact Daniela Jaramillo at daniela.jaramillo@ontario.ca.

Yours truly,
Daniela Jaramillo

Hello ,

NO RECORDS FOUND IN CURRENT DATABASE:

- We confirm that there are NO **fuels records** in our database at the subject address(es).

This is not a confirmation that there are no records in the archives. For a further search in our archives, please go to the **TSSA Client Portal** to complete an Application for Release of Public Information.

Please refer to Training (tssa.org) for instructions on how to use the portal. Please refer to How to Submit a Public Information Request (tssa.org) for instructions.

The associated fee must be paid via credit card (Visa or MasterCard).

Once all steps have been successfully completed you will receive your payment receipt via email.

TSSA does not make any representations or warranties with respect to the accuracy or completeness of any records released. The requestor assumes all risk in using or relying on the information provided.

If you have any questions or concerns, please do not hesitate to contact our Public Information Release team at publicinformationservices@tssa.org.

Kind regards,

Slavka Zahrebelny | Public Information & Records Agent

[CAUTION]: THIS EMAIL ORIGINATED OUTSIDE THE ORGANISATION.
PLEASE DO NOT CLICK LINKS OR OPEN ATTACHMENTS UNLESS YOU RECOGNISE THE SOURCE OF THIS EMAIL AND KNOW THE CONTENT IS SAFE.

Hello,

Could you conduct a search of historical AST/UST at the following properties in Burlington, ON.

- 235 Plains Road East
- 1022 Gallagher Road
- 241 Plains Road East
- 261 Plains Road East
- 242 Plains Road East
- 236 Plains Road East
- 1026 Gallagher Road
- 226 Old Orchard Road
- 277 Plains Road East
- 1011 White Oak Drive

We request that the Technical Standards and Safety Authority (TSSA), Safety Fuel Division, review its database to identify to us any records of aboveground/underground storage tanks, spills, incidents, complaints, notices, tanks removals and/or remediation etc. with the TSSA for the above-mentioned properties. Earliest attention to this matter is much appreciated. For your convenience you may e-mail me with any information you may have for the property

Thanks
Scott

Appendix J – Phase One Conceptual Site Model

Phase One ESA Conceptual Site Model

1022 Gallagher Road and 235 Plains Road East, Burlington, Ontario

This section presents the Phase One Conceptual Site Model (P1CSM), as it relates to the Site with the municipal addresses of 1022 Gallagher Road and 235 Plains Road East, in Burlington, Ontario, providing a narrative and graphical description integrating information related to the areas of potential environmental concern/potential contaminating activities and the presence and distribution of potential contaminants of concern. The P1CSM was completed in accordance with Ontario Regulation 153/04, as amended (O.Reg. 153/04), as defined by the Ontario Ministry Environment, Conservation and Parks (MECP). There is no uncertainty or absence of information noted in the Phase One Environmental Site Assessment.

1.1 Introduction

The Site is located on the northwest side of Plains Road East, approximately 30 metres (m) northwest of the intersection of Plains Road East and Gallagher Road, in Burlington, Ontario (refer to Figure 1). The Site measures approximately 0.28 hectares (0.69 acres) and consists of two (2) residential properties. Further details of the Site are as follows:

- 235 Plains Road East – measures approximately 0.22 hectares (0.56 acres) and is occupied by one (1) two-storey residential dwelling with a building footprint measuring approximately 185 square m (m^2), (2,000 square feet [ft^2]). A detached garage is situated north of the residential building. This municipal address comprises the south portion of the Site.

- 1022 Gallagher Road – measures approximately 0.12 hectares (0.29 acres) and is occupied by one (1) two-storey residential dwelling with a footprint measuring approximately 150 square m (m^2), (1,615 square feet [ft^2]). This municipal address comprises the northeast portion of the Site.

Table 1: Site Identification Information

Municipal Address	235 Plains Road East, Burlington Ontario 1022 Gallagher Road, Burlington, Ontario
Current Land Use	Residential
Proposed Land Use	Residential
Legal Description	Part lot 5, Con 1 EF as in 437325 Part lot 5, Con 1 EF as In 570193
Property Identification Number (PIN)	07114-0158 (LT) 07114-0156 (LT)
Approximate Universal Transverse Mercator (UTM) coordinates	WGS84 17T 593617 m E 4796212 m N
Accuracy Estimate of UTM	10-15 m
Measurement Method	Global Positioning System (GPS)
Site Area	0.28 hectares (0.69 acres)

Property Owners, Owner Contact and Address	1001048533 Ontario Inc. Anndec Holdings Inc.
Name of Any Other Person Who Engaged the Qualified Person	Mr. Bryan Decunha BryDec Developments Inc 3324 Guelph Line Burlington, ON L7P 0S7

1.2 Background

Based on a review of historical aerial photographs, chain of title information, and interviews, the 235 Plains Road East portion of the Site has been occupied by an inferred residential dwelling since at least 1934. The 1022 Gallagher Road portion of the Site was developed with an inferred residential develop since at least 1974. The northwest portion of the Site addressed was part of a larger orchard in 1934. Both addresses comprising the Site are currently used for residential purposes.

1.3 Geological and Hydrogeological Conditions

The Site and surrounding area is expected to consist of one or more of the following:

- Post-Precambrian Bedrock consisting of undifferentiated carbonate and clastic sedimentary rock, exposed at surface or covered by a discontinuous, thin layer of drift from the Paleozoic period.
- Halton Till consisting of silt to silty clay matrix, high in matrix carbonate content and clast-poor from the Pleistocene period

According to the topographic map from Natural Resources of Canada (Toporama), the elevation of the Site is approximately 100 m above sea level. A review of the topographic map indicated that the closest body of water were intermittent tributaries of Falcon Creek, located approximately 425 m south-southeast of the Site, which flows in a southeasterly direction towards Lake Ontario. Lake Ontario is located approximately 1.0 km southeast of the Site. Based on local topography, the anticipated groundwater flow direction is to the south/southeast.

Based on the review of available resources from the Ministry of Natural Resources and Forestry website on December 5, 2025, no areas of natural significance were identified at the Site or within 30 m of the Site.

1.4 Previous Investigations

At the time of this Phase One ESA, no previously completed environmental reports were available for review.

1.5 Underground Utilities

The Site utilities and services were identified at the Site based on information provided in environmental records, relevant utility infrastructure observed during the Site reconnaissance. The Site utilities are summarized in the table below and noted on Figure 3, where available. It is noted that the precise underground location of the utilities cannot be determined without professional locate services.

Utility	Source	Location	Site Entry
Natural Gas	Enbridge	Unknown	Unknown
Sanitary Sewer	City of Burlington/Halton Region	Unknown	Unknown
Storm Sewer	City of Burlington/Halton Region	Unknown	Unknown

Utility	Source	Location	Site Entry
Water	City of Burlington/Halton Region	Unknown	Unknown
Electricity	Burlington Hydro	Unknown	Unknown
Telecommunications	Unknown	Unknown	Unknown

1.6 Potentially Contaminating Activities and Areas of Potential Environmental Concern:

Refer to Table 2 and Figure 2 for the list of potentially contaminating activities (PCAs) that have occurred within the Phase One Study Area, which includes the Site and properties within 250 m radius of the Site boundaries.

Table 2: Potentially Contaminating Activities

PCA Identifier	Address	Location of Activity (in location to Site)[1]	Potentially Contaminating Activity (PCA)[2]	Approximate timeline that PCA occurred	Contributes to APEC (Yes or No)?
Site					
1	235 Plains Road East	Northwest portion of the Site	PCA#40 – Pesticides (including Herbicides, Fungicides and Anti-Fouling Agents) Manufacturing, Processing, Bulk Storage and Large-Scale Applications	Based on a review of the aerial photographs, the northwest portion of the Site (235 Plains Road East) was formerly part of a larger orchard in 1934.	Yes, based on the PCA occurring within the Site.
Surrounding Properties					
2	226 Plains Road East	~35 m southeast	PCA#28 – Gasoline and Associated Products Storage in Fixed Tanks	Based on the reviewed ERIS report, Anthony Ledsham was listed for a fuel oil tank.	No, based on the down gradient location with respect to groundwater flow and distance from the Site.
3	1040 Gallagher Road	~55 m northwest	PCA#40 – Pesticides (including Herbicides, Fungicides and Anti-Fouling Agents) Manufacturing, Processing, Bulk Storage and Large-Scale Applications	Based on a search of the city directories, Gallagher Farms was present in 1960.	No, based on the immobile nature of potential contaminants of concern.
4a	195 Plains Road East	~125 m southwest	PCA#37 – Operation of Dry Cleaning Equipment (where chemicals are used)	Based on a review of the city directories and Site visit, various dry cleaning operations have occupied the property from 1980 to present.	No, based on the inferred trans-gradient location with respect to inferred groundwater flow
4b			PCA#8 – Chemical Manufacturing, Processing and Bulk Storage	Based on a review of the city directories, Chemical Lab Bulk Cleaning Store was a tenant of the property in 1990	

PCA Identifier	Address	Location of Activity (in location to Site)[1]	Potentially Contaminating Activity (PCA)[2]	Approximate timeline that PCA occurred	Contributes to APEC (Yes or No)?
5	15-185 Plains Road East	~125 m southwest	PCA#40 - Pesticides (including Herbicides, Fungicides and Anti-Fouling Agents) Manufacturing, Processing, Bulk Storage and Large-Scale Applications	Based on a review of the ERIS report, Royal Forest Pest Service Inc. was listed for a pesticide operator license.	No, based on the inferred trans-gradient location with respect to inferred groundwater flow
6	181 Plains Road East	~125 m southwest	PCA#33 - Metal Treatment, Coating, Plating and Finishing	Based on a review of the ERIS report, Arc & Flame Welding was listed as a tenant of the property.	No, based on the inferred trans-gradient location with respect to inferred groundwater flow

(1) Distances are approximate. Precise distances are not possible due to the age of some listings and the aggregation and/or loss of addresses.

(2) Potentially contaminating activity means a use or activity set out in Column A of Table 2 of Schedule D (O.Reg 153/04, as amended) that is occurring or has occurred in a phase one Study area.

1.7 Areas of Potential Environmental Concern

Based on the evaluation of the PCAs located within the Site, the following areas of potential environmental concern (APECs) were identified, as presented in Figure 4.

Table 3: Areas of Potential Environmental Concern

Area of Potential Environmental Concern (APEC) (1)	Location of APEC on Site[3)]	Potentially Contaminating Activity (PCA)[(2)]	Location of PCA (on-Site or off-Site)	Contaminants of Potential Concern	Media Potentially Impacted (Groundwater, soil and/or sediment)
APEC 1: Former Orchard On-Site *(PCA Identifier 1)*	Northwest portion of the Site	PCA#40 – Pesticides (including Herbicides, Fungicides and Anti-Fouling Agents) Manufacturing, Processing, Bulk Storage and Large-Scale Applications	On-Site	Organochlorine Pesticides (OCs), Metals, Hydride Forming Metals (HFMs)	Soil

(1) Area of Potential Environmental Concern means the area on, in or under a Phase One Study Area where one or more contaminants are potentially present, as determined through APU, including through (a) identification of post or present uses on, in or under the Project Area, and (b) identification of potentially contaminating activities.

(2) Potentially contaminating activity means a use or activity set out in Column A of Table 2 of Schedule D (O.Reg.153/04, as amended) that is occurring or has occurred in the Project Area.

It is noted that access was not provided onto the Site property or inside the Site buildings. There is potential for additional APECs to be added based on the Site observations.
