Presentation Format

Presentation (30 Minutes)

- Land Acknowledgement
- Project Map
- General Scope of Work
- Schedule
- Budget
- Access and Additional Project Information

Question & Answer Period (30 Minutes)

- Please email specific questions concerning your property to : Chris.Onishi@Burlington.ca

Land Acknowledgement

Burlington as we know it today is rich in history and modern traditions of many First Nations and the Métis.

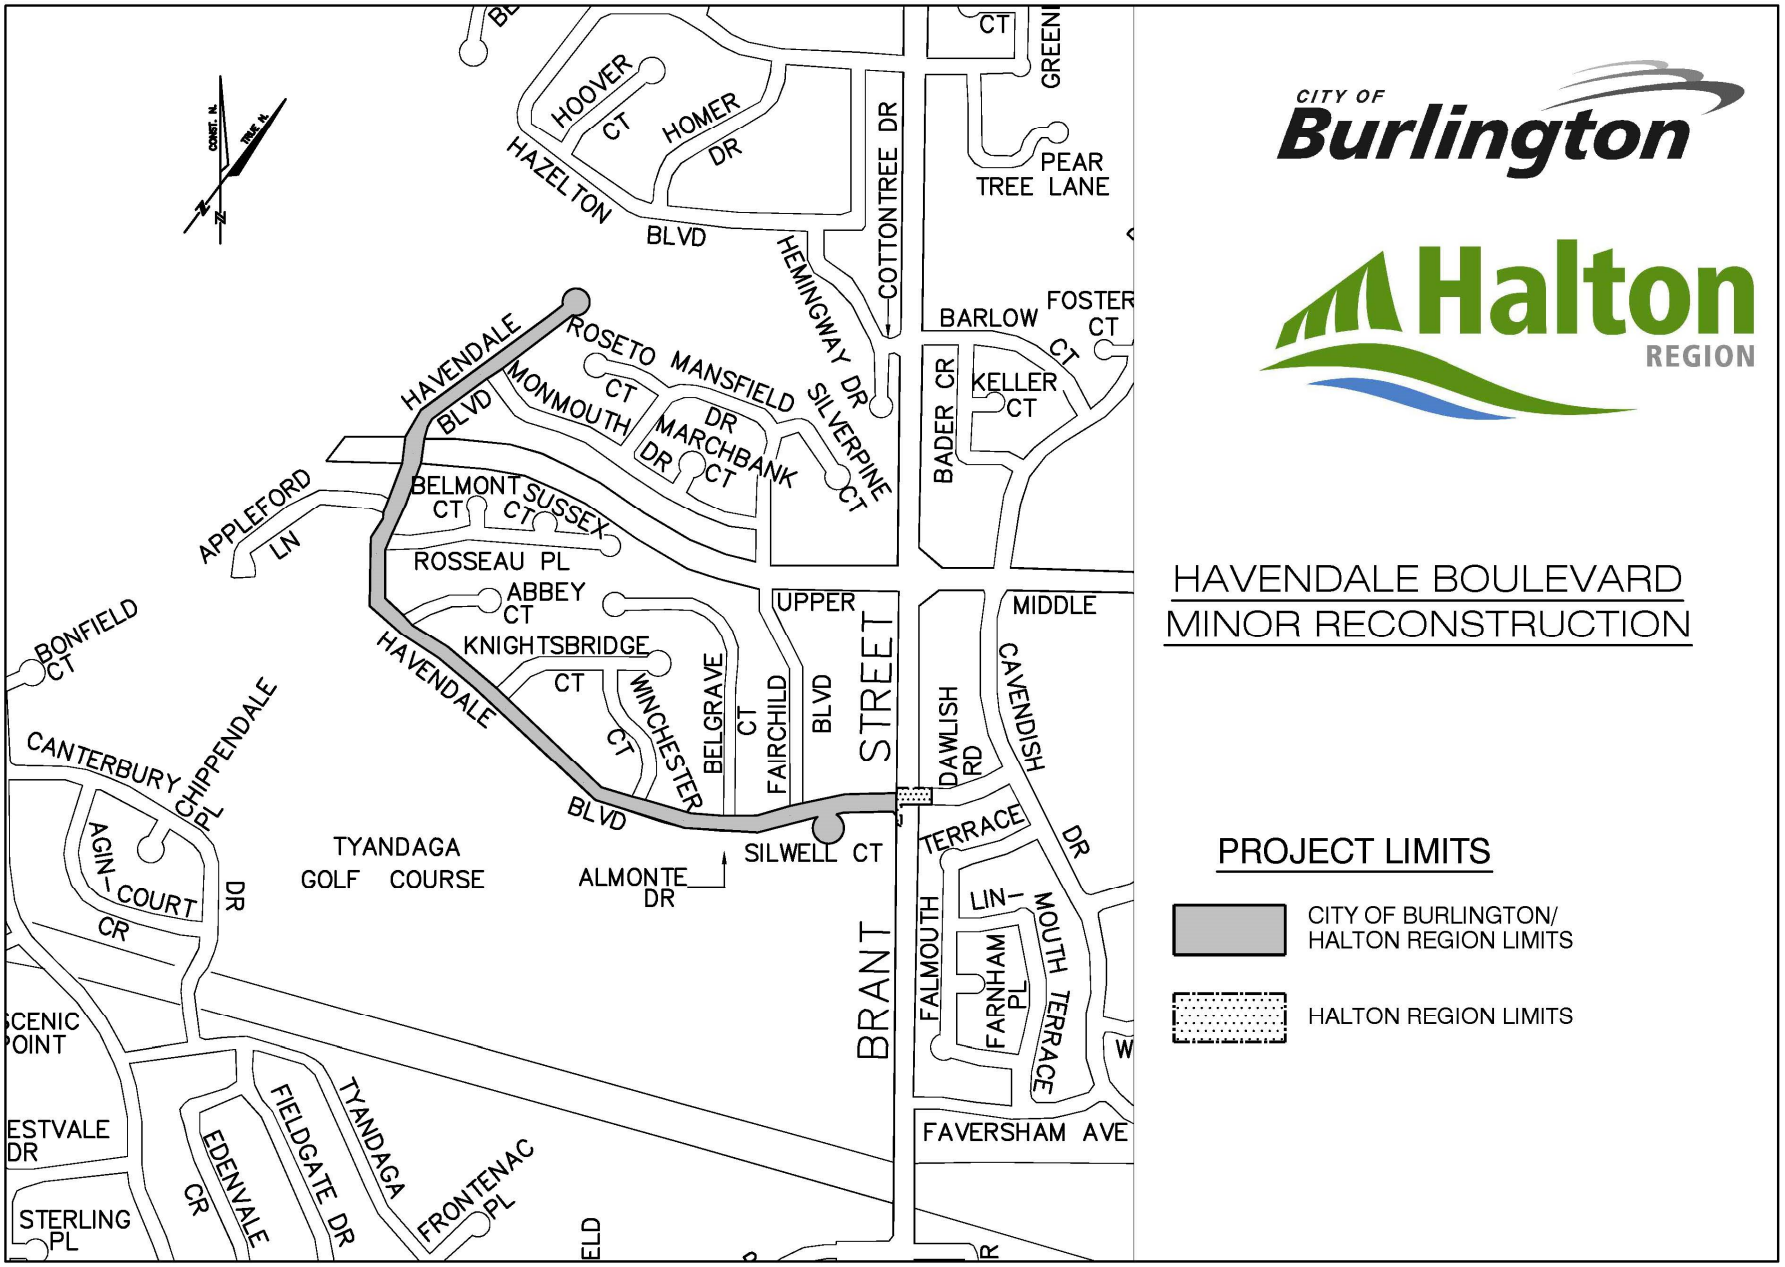

From the Anishinaabeg to the Haudenosaunee, and the Métis –

our lands spanning from Lake Ontario to the Niagara Escarpment are steeped in Indigenous history.

The territory is mutually covered by the Dish with One Spoon Wampum Belt Covenant, an agreement between the Iroquois Confederacy, the Ojibway and other allied Nations to peaceably share and care for the resources around the Great Lakes.

We would like to acknowledge that the land on which we gather is part of the Treaty Lands and Territory of the Mississaugas of the Credit.

Project Overview

Location	City Works	Region Works
Havendale Boulevard from Brant Street to cul-de-sac north of Monmouth Drive, including watermain connection at Dawlish Road.)	• Full asphalt replacement • Areas of sidewalk replacement • Areas of curb/gutter replacement • Localized storm sewer repairs • Streetlighting Upgrades	• Full Watermain and Water Service Replacement

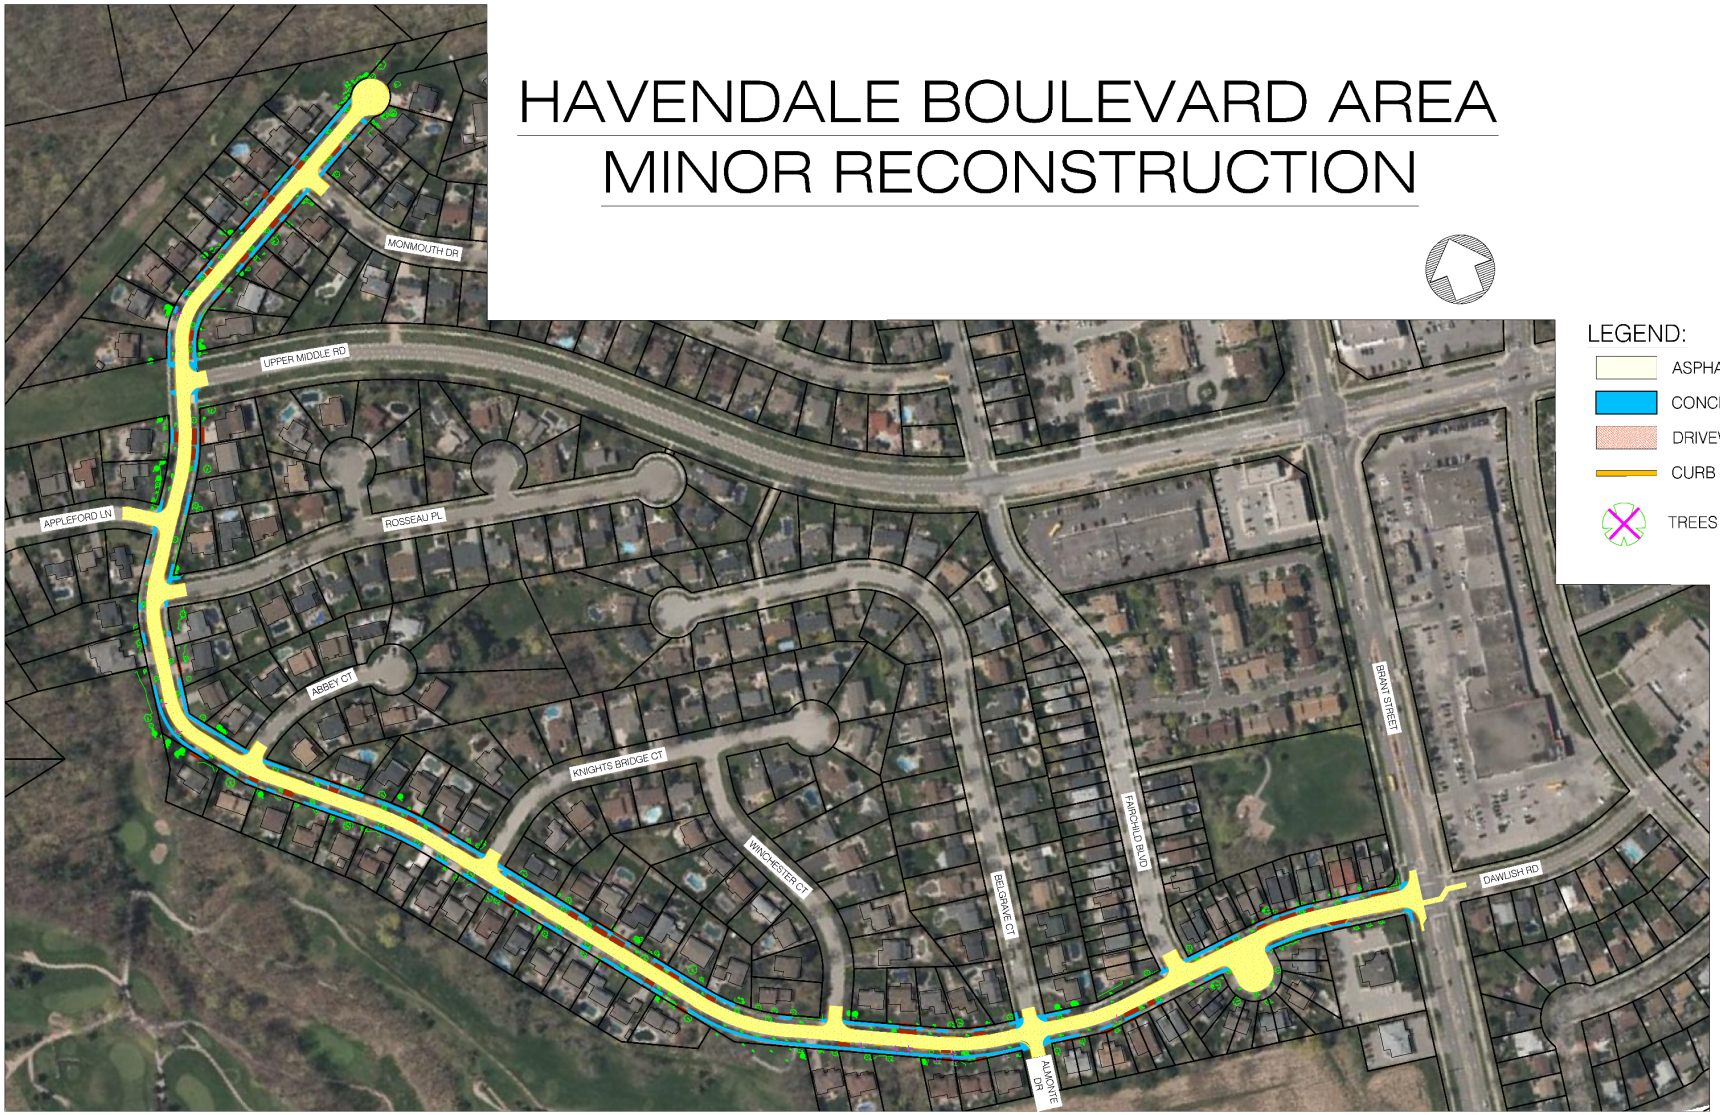

Budget &Tentative Project Schedule

Public Information Centre:	March 7, 2024
Tender Close:	April 2024
Construction:	Spring 2024 – Fall 2025

City Budget:	$ 3,400,000
Region Budget:	$ 8,000,000

Project Plans

HAVENDALE BOULEVARD AREA
MINOR RECONSTRUCTION

CITY OF Burlington
ENGINEERING SERVICES DEPARTMENT

Halton REGION

Halton REGION

CITY OF Burlington

Watermain Works

Scope

Halton Region is installing new watermains, hydrants, and water services on all streets within the project limits. The primary method of watermain and water service installation will by open-cut trench excavation. There will also be some watermain and services installed by trenchless means, i.e. directional drilling, torpedoing, etc.

Hydrant locations are being changed on this project. If a hydrant is being relocated to your property, a letter will be provided by Halton Region.

Water and Wastewater Interruptions

There will be disruptions to your water service during construction while completing watermain tie-ins and when transferring the houses to the new watermain. Halton Region will provide 48 hours advanced notice of all scheduled service interruptions.

Night Work

Some watermain installation and tie-in work may be required to take place at night. This work will be limited, but likely necessary for service tie-in works at the intersection of Brant Street and Havendale due to the traffic and access restrictions on Brant Street in 2025.

Notifications will be provided to residents ahead of any scheduled night work.

Parking

During normal construction hours, Monday to Friday, 7 a.m. to 5:30 p.m., vehicle access to and from your property may be difficult. Driveways may be temporarily closed when work is being carried out in the immediate area. When your driveway is inaccessible or closed, please park on a neighbouring street, or where no construction is taking place, and where on-street parking is permitted. If your vehicle will be in contradiction to the below by-law, register your vehicle for the On-Street Parking Exemption Program at:

www.burlington.ca/exemption

How does a parking exemption work?

It allows a vehicle to park on the street beyond the 5-hour limit or overnight between 1 a.m. to 6 a.m., up to 15 days per calendar year, per license plate.

The only two parking offences waived AFTER a vehicle is registered for a parking exemption are:

1. park exceeding 5-hour limit
2. park between 1 a.m. to 6 a.m.

All other parking offences apply as they are not part of the parking exemption program.

During City construction projects.

The extra days will not be included in the 15-day per year limit when your driveway is not accessible. However, it is important to register your vehicle for this program so that you will not receive a parking ticket.

Additional Information

Trees

Tree protection barriers will be erected around all trees in the right-of-way, within the construction limits, with an opening to allow homeowner access to maintain the area within.

An Arborist has reviewed the project and there will be 12 individual trees anticipated to be removed due to conflict with the installation of the new watermain.

Alternate watermain installation locations and methods have been reviewed in depth, but it has been determined that these removals are unavoidable. Trees removed will be replaced based on location of existing trees and space available. Homeowners adjacent to these removal will each be informed prior to removal. The specific trees that require removal can be viewed on the project drawings on the project website.

If additional trees require removal due to unforeseen impact or conflict, homeowners will be informed.

Lane Closures and Access

Lane closures and localized short-term road closures will be necessary to complete the proposed works.

Garbage Pick-up

Please continue to put your garbage and recycling out on the usual day. To help the contractor return your bins to you when they need to be relocated for pick-up, we ask that you write your house number on your garbage cans, recycling bins, and green carts.

Canada Post

Due to access concerns regarding door-to-door mail delivery, temporary single-point mail pick-up locations may be coordinated by Canada Post. Details will be provided via. mailout notification if this is required.

Additional Information…

School Bus Access

Due to reduced access through the site during construction, school bussing routes will require modification. Additional information will be provided by the service provider. Coordination will be made to ensure safe pick-up locations are maintained.

Irrigation

While replacing curb, sidewalk, and water services, there is potential for private irrigation systems to be damaged.

- Please flag your irrigation system heads and pipes prior to construction to limit damages.
- If damages occur to your irrigation system due to construction, please contact the City.
- Repairs to your irrigation system caused from construction damage will be completed by the property owner's irrigation contractor. Repair costs will typically be covered by the City.
- A detailed/itemized paid invoice will be required for the City to verify the damages were caused by construction and to process the reimbursement.

Pre-condition Survey

An exterior pre-condition survey is to be carried out on behalf of Halton Region to document the existing condition of homes within the project limits. This is to ensure that both the residents and the Contractor have record of condition in the case that disputes arise during or after construction. This inspection is optional and at no cost to the homeowner. Additional information will be provided to homeowners closer to the commencement of construction.

Additional Information…

Driveway Impacts

During replacement of existing curb and sidewalk, and the installation of new water services, portions of existing driveways within the right-of-way will require replacement. These driveways will be replaced full-width up to the limit of disturbance.

For driveways which require replacement and are identified for restoration this project –

If your driveway is in poor condition and you are intending to replace your entire driveway on your own, a credit for the cost of replacement is available and will be determined based on the project's limit of disturbance restoration area and the City's Contract unit cost rate the City has received for the work.

If the property owner receives a driveway credit:

- The City does not warranty the work.
- Any damage to road, curb etc., caused by the private driveway contractor is the responsibility of the property owner.

Street Lighting

42 new street lights and new streetlight poles will be installed on the project on within the City's road allowance to bring the existing lighting system to current standards.

COVID-19 Protocols and Guidelines

All current public health guidelines and protocols will be adhered to on this project.

What's Next

Once the project is awarded and a schedule is provided to the City, a project update will be mailed out to residents reiterating some of the points discussed above, as well as any additional information that has been acquired in the interim.
