Appleby Creek Flood Mitigation Addendum
Public Open House Comment Sheet

Appleby Creek Flood Mitigation Municipal Class Environmental Assessment Addendum

The City of Burlington (City) has initiated an Addendum to the Municipal Class Environmental Assessment (MCEA) for Appleby Creek Flood Mitigation between Fairview Street and New Street, completed in 2019. The 2019 MCEA study was completed to identify flood mitigation to reduce flooding risk and protect the natural heritage features and functions within the study corridor. Since the 2019 MCEA study, plans for land use intensification and proposed development have changed within the vicinity of the Fairview Street road crossing. A review of the Fairview Street road crossing was required to adequately address the flooding risks within the flood limits of adjacent development lands under Regional storm conditions.

Open House materials will be available online at: https://www.burlington.ca/applebyflood for review and comment until **June 28, 2024**.

This Comment Form provides you with an opportunity to offer your input to the Addendum. Your views are important to us. Should you have any questions about the comment form or Addendum process, please feel free to contact the project team members:

Arif Shahzad, M.Eng., P.Eng.
