1 Executive Summary

EXP Services Inc. (EXP) was retained by 2735841 Ontario Inc. (the "Client") to complete a Phase One Environmental Site Assessment (ESA) Update of the two (2) adjacent properties with the municipal address 1056 and 1060 Brant Street, in Burlington, Ontario, which is hereinafter referred to as the "Site".

For the purposes of this report the alignment of Brant Street is assumed to be in a north-south direction, with the Site being located on the west side of Brant Street.

The Site is a rectangular shaped parcel of land that is located on the west side of Brant Street. The Site measures approximately 0.16 hectares (0.41 acres). At the time of this Phase One ESA, the Site was vacant with two (2) former building footprints. Based on the records review, this Site buildings were developed circa 1954 and were demolished in 2024. The Site properties have the municipal addresses 1056 and 1060 Brant Street and occupy the southern and northern portions of the Site respectively. A concrete pad associated with a parking garage was observed to the west of the Site building at 1060 Brant Street. No other building or permanent structures were observed at the time of the Site visit.

Based on the information available at this time, the Site was inferred to be developed circa 1954 for residential use. The Site buildings were demolished in 2024. Prior to the development of the Site with the existing residential dwellings circa 1954, the Site was observed to be a vacant undeveloped parcel of land in the reviewed aerial photographs.

It is EXP's understanding that the Update is being completed to support the municipal Site Plan Approval. If this redevelopment of the Site will require a Record of Site Condition (RSC) to be filed, the investigation will support the filing of a Record of Site Condition (RSC) in accordance with Ontario Regulation 153/04, as amended (O.Reg.153/04).

A Phase One ESA is a systematic qualitative process to assess the environmental condition of a Site based on its historical and current uses. This Phase One ESA was conducted in accordance with the Phase One ESA standard as defined by O.Reg.153/04, and in accordance with generally accepted professional practices. Subject to this standard of care, EXP makes no express or implied warranties regarding its services and no third-party beneficiaries are intended. Limitation of liability, scope of report and third-party reliance are outlined in Appendix A.

It is noted that general environmental management and housekeeping practices were reviewed as part of this assessment insofar as they could impact the environmental condition of the property. However, a detailed review of regulatory compliance issues was beyond the scope of our investigation. This Phase One ESA does not constitute an audit of environmental management practices, indicate geotechnical conditions, or identify geologic hazards.

Based on the Phase One ESA findings, the following information is provided in Table 1-1 in support of the Phase One Qualified Person's (QP's) conclusion:

Table 1-1: Areas of Potential Environmental Concern

Area of Potential Environmental Concern (APEC)	Location of APEC on Phase One Property	Potentially Contaminating Activity (PCA)[1]	Location of PCA (on-Site or off-Site)	Contaminants of Potential Concern	Media Potentially Impacted (Groundwater, soil and/or sediment)
APEC 1: Presence of an AST for heating oil storage at 1056 Brant Street	Southern portion of the Site – location of the boiler room at 1056 Brant Street	PCA#28-Gasoline and Associated Products Storage in Fixed Tanks	On-Site	Petroleum hydrocarbons (PHCs), benzene, toluene, ethylbenzene and xylene (BTEX), polycyclic aromatic hydrocarbons (PAH) and Metals	Soil and Groundwater
APEC 1B: Application of De-icing salt on the on-Site paved areas	Asphalt-paved areas of the Site	PCA" Other"-Application of De-icing salt	On-Site	Electrical Conductivity (EC) and Sodium adsorption ratio (SAR)	Soil

(1) Potentially contaminating activity means a use or activity set out in Column A of Table 2 of Schedule D (O.Reg.153/04, as amended) that is occurring or has occurred in a phase one Study area.

Based on the findings of the Phase One ESA and conclusions, a Phase Two ESA is required to assess the soil and groundwater conditions at the Site prior to submitting an RSC (if required).

This executive summary is a brief synopsis of the report and should not be read in lieu of reading the report in its entirety.

2 Introduction

EXP Services Inc. (EXP) was retained by 2735841 Ontario Inc. (the "Client") to complete a Phase One Environmental Site Assessment (ESA) of the two (2) adjacent properties with the municipal address 1056 and 1060 Brant Street, in Burlington, Ontario, which is hereinafter referred to as the "Site".

For the purposes of this report the alignment of Brant Street is assumed to be in a north-south direction, with the Site being located on the west side of Brant Street.

The Site is a rectangular shaped parcel of land that is located on the west side of Brant Street. The Site measures approximately 0.16 hectares (0.41 acres). At the time of this Phase One ESA, the Site was vacant with two (2) former building footprints. Based on the records review, this Site buildings were developed circa 1954 and were demolished in 2024. The Site properties have the municipal addresses 1056 and 1060 Brant Street and occupy the southern and northern portions of the Site respectively.

A concrete pad associated with a parking garage was observed to the west of the Site building at 1060 Brant Street. No other building or permanent structures were observed at the time of the Site visit.

It is EXP's understanding that the Update is being completed to support the municipal Site Plan Approval. If this redevelopment of the Site will require a Record of Site Condition (RSC) to be filed, the investigation will support the filing of a Record of Site Condition (RSC) in accordance with Ontario Regulation 153/04, as amended (O.Reg.153/04).

A Phase One ESA is a systematic qualitative process to assess the environmental condition of a Site based on its historical and current uses. This Phase One ESA was conducted in accordance with the Phase One ESA standard as defined by O.Reg.153/04, and in accordance with generally accepted professional practices. Subject to this standard of care, EXP makes no express or implied warranties regarding its services and no third-party beneficiaries are intended. Limitation of liability, scope of report and third-party reliance are outlined in Appendix A.

It should be noted that the objective of this review was to identify any environmental concerns associated with the Site.

2.1 Site Information

Details of the Site are as follows:

Municipal Address	1056 and 1060 Brant Street, Burlington, ON
Current Land Use	Residential Use
Proposed Land Use	Residential Use
Legal Description	1056 Brant Street - Pt Lt 15, Rcp Pl99, As In 648614 Except Pt 13 Pe118; Burlington 1060 Brant Street - Pt Lt 15, Rcp Pl99, As In 803184; Burlington
Property Identification Number (PIN)	1056 Brant Steet – 07081-0259(LT) 1060 Brant Street – 07081-0260(LT)
Approximate Universal Transverse Mercator (UTM) coordinates	NAD83 17T 595675.92 m E 4799190.99 m N

Accuracy Estimate of UTM	10-15 m
Measurement Method	Global Positioning System (GPS)
Site Area	0.16 hectares (0.41 acres)
Property Owners, Address and Contact owner	2735841 Ontario Inc. 2235 Sheppard Ave E., Suite 1700 North York, ON M2J 5B5 Attention: Mr. Sam Mandelbaum
Any Other Person Who Engaged the QPESA	N/A

3 Scope of Investigation

The scope of work for the Phase One ESA consisted of the following activities:

- Reviewing the historical occupancy of the Site through the use of available archived and relevant municipal and business directories, fire insurance plans (FIPs), topographical maps, and aerial photographs;
- Contacting municipal and provincial agencies to determine the existence of records of environmental regulatory non-compliance, if any, and reviewing such records where available;
- Obtaining an Environmental Risk Information Services Ltd. (ERIS) report for the Site and surrounding properties within a 250 metre radius of the Site;
- Reviewing available geological maps, well records and utility maps for the vicinity of the Site;
- Obtaining and reviewing a chain of title and assessment rolls for the Site;
- Reviewing available reports previously completed at the Site;
- Conducting interviews with designated Site representative(s) as a resource for current and historical Site information, as well as to provide EXP staff with unrestricted access to all areas of the Site and Site buildings (as required by O.Reg. 153/04, as amended);
- Conducting a Site reconnaissance in order to identify any land use practices that may have impacted the environmental condition of the Site;
- Conducting a reconnaissance of the surrounding properties from the Site and publicly accessible areas in order to identify any land use practices that may have impacted the environmental condition of the Site; and,
- Preparing a report to document the findings.

The following sections summarize the information gathered by EXP during the Phase One ESA and identifies Potentially Contaminating Activities (PCAs) on the Phase One property and in the Phase One study area, and Areas of Potential Environmental Concern (APECs) associated with the Site. APECs and PCAs are defined in the O. Reg 153/04, as amended.

In completing the scope of work, EXP did not conduct any intrusive investigations, including sampling, analyses or monitoring.

EXP has confirmed neither the completeness nor the accuracy of any of the records that were obtained or any of the statements made by others.

EXP personnel who conducted assessment work for this project included Mr. Scott Grant-Hose, B.Sc. and Mr. Samuel Lee, M.Eng., P.Geo., QP_{ESA}. An outline of their qualifications is provided in Appendix C.

4 Record Review

4.1 General

4.1.1 Phase One Study Area Determination

The Phase One Study Area consists of properties within a distance of approximately 250 m from the Site boundaries. The Phase One Study Area consists of residential, commercial, and institutional property uses, there is also a hydro corridor to the northern portion of the Phase One Study Area. The Phase One Study Area is bound by the hydro corridor to the north, residential and institutional properties to the east, commercial properties to the south and residential properties to the west.

The Phase One Study Area and a Surrounding Land Use Plan are shown on Figure 2.

4.1.2 First Developed Use Determination

Based on the information available at this time, the Site was inferred to be developed circa 1954 for residential use. The Site buildings were demolished in 2024. Prior to the development of the Site with the former residential dwellings circa 1954, the Site was observed to be a vacant undeveloped parcel of land in the reviewed aerial photographs.

4.1.3 Fire Insurance Plans

A search for Fire Insurance Plans (FIPs) with coverage of the Site was completed by ERIS as part of the 2023 Phase One Environmental Site Assessment conducted by EXP. Based on the search, no FIPs were identified that had coverage of the Site.

The ERIS search did identify a FIP dated 1971 that had very limited coverage of the Phase One Study Area. The FIP only provided coverage of the southeast corner of Brant Street and Churchill Avenue. 2006 Churchill Avenue was developed with an apartment building and 2014 Churchill Avenue was developed with a building labeled “auto”. The review of the FIP didn’t identify any issues that would be associated with a PCA.

4.1.4 Chain of Title

The search for the historic chain of titles that comprise of the Site were requested to be completed for the 2023 Phase One ESA conducted by EXP by Dominic Bertucci, an independent title searcher on March 7, 2023. The completed chain of title will be provided in Appendix D.

Based on the chain of title documents, 1056 and 1060 Brant Street were Crown land in 1798.

From 1798 to 2020, 1056 Brant Street was owned by various individuals until it was purchased by 2059977 Ontario Inc. Ownership of this property was divided equally between 2059977 Ontario Inc and 2735841 Ontario Inc (current owners) in 2020.

From 1978 to 2020, 1060 Brant Street was owned by various individuals until it was purchased by 2060188 Ontario Inc. Ownership of this property was divided equally between 2060188 Ontario Inc and 2735842 Ontario Inc (current owners) in 2020.

Based on the names of the owners of the Site, no names were identified that would be associated with a PCA. A list of previous owners of the Site has been summarized in Table II.

4.1.5 Environmental Reports

At the time of this Phase One ESA, the following previously completed environmental reports were available for review:

- *"Phase One Environmental Site Assessment – 1056-1060 Brant St, Burlington, Ontario"*, dated April 6, 2023, by EXP. The pertinent findings are summarized below:
    - The Site measures approximately 0.16 hectares (0.41 acres). At the time of this Phase One ESA, the Site was developed with two (2) apartment buildings. Based on the records review, this Site building was developed circa 1954. The Site building have the municipal address 1056 and 1060 Brant Street and occupy the southern and northern portions of the Site respectively.
    - A former heating oil AST was observed in the basement of 1056 Brant Street.
    - De-icing salt was applied to paved areas during winter months for vehicular and pedestrian safety.
    - A Phase Two ESA was recommended to assess soil and groundwater quality at the Site.
- *"Phase Two Environmental Site Assessment – 1056-1060 Brant St, Burlington, Ontario"*, dated May 10, 2023, by EXP. The pertinent findings are summarized below:
    - Five (5) boreholes were advanced by Altech between March 2nd and March 8th, 2023, to a maximum depth ranging between 3.66 to 11.28 metres below ground surface (m bgs) as part of the geotechnical and hydrogeological investigations. It is noted only four (4) boreholes were utilized for environmental purposes.
    - The general stratigraphy at the Site as observed in the borehole logs consisted of asphalt (overlying sandy gravel fill) or surficial topsoil in all boreholes, underlain by fill materials extending to approximately 1.5 to 4.5 m bgs. materials. The fill generally comprised of silty clay with some sand and trace gravel. At borehole location BH-2, trace brick and concrete fragments were encountered. A glacial deposit of silty clay till was encountered in all boreholes except at Borehole BH2, extended to depths of approximately 2.2 to 9.8 m bgs. A sandy silt till deposit was encountered below the fill in Borehole BH-2 and below the silty clay till in boreholes BH3 and BH4. Red shale bedrock of the Queenston Formation was encountered in all boreholes, except BH-5, underlying the till deposit at depths ranging from 6.1 to 7.1 m bgs.
    - The monitoring well network advanced as part of this Phase Two ESA consisted of four (4) newly installed monitoring wells (BH/MW1, BH/MW3, BH/MW4S and BH/MW4D). Based on the groundwater contour map delineated for the Site, on-Site groundwater appears to be to the southwest.
    - Soil samples were submitted for the analysis of Petroleum Hydrocarbons (PHCs), Benzene, Toluene, Ethylbenzene, and Xylenes (BTEX), Metals and Inorganics, Polycyclic Aromatic Hydrocarbons (PAHs) and Other Regulated Parameters (ORPs).
    - All parameters analyzed were either not detected at laboratory RDLs, or detected below the applicable Table 2 SCS, with the exception of BH3 SS2, which exceeded Table 2 SCS for Electrical Conductivity (EC). It is the QP's opinion that the elevated concentration of EC is associated with de-icing activities in the winter months for the safety of the public and vehicular traffic. As such, it is not considered to be in excess of the Table 2 SCS for the purposes of filing an RSC (if required) based on the exemption outlined in Section 49.1 of O.Reg. 153/04, and EC is not considered as COCs for the Site.
    - Groundwater samples were submitted for the analysis of PHCs including BTEX.
    - All parameters analyzed were not detected at laboratory RDLs. Laboratory RDLs below the Table 2 SCS.
    - Trace brick fragments and concrete fragments were encountered at Borehole BH2 in the fill material which ranged in depth from 0.15 to 4.57 m bgs. Based on the redevelopment plan on the Site, the multi-storey building will have two (2) levels of underground parking. Therefore, this fill material will be removed as part of the Site development plans.
    - Based on the findings of the Phase Two ESA, no further work is recommended at this time and as such, a Record of Site Condition may be filed.

4.2 Environmental Source Information

4.2.1 Federal and Provincial Database Search

A search of provincial, federal and private environmental databases for records pertaining to the Site and properties within the Phase One Study Area was completed by Environmental Risk Information Services (ERIS) on March 6, 2025. EXP has confirmed neither the completeness nor the accuracy of the records that were provided. The ERIS Report is provided in Appendix E.

A summary of the significant findings is provided below. It is noted that only records that are associated with a PCA/have information that pose an issue of environmental concern (e.g., large spills or generation of halogenated solvent wastes) were summarized in the table below:

Address	Description	Database	Associated PCA(s)
Site			
1056 Brant Street	Three (3) records of monitoring well observations wells were noted for the Site.	WWIS	N/A
Surrounding Properties			
1076 Brant Street (35 m north)	The property, occupied by Graphex Signs and Engraving was established in 1991 and described as a 'coated and laminated paper, not elsewhere classified / signs and advertising specialties / stationery and office supplies / industrial and personal service paper / paper bag and coated and treated paper manufacturing / sign manufacturing / stationery and office supplies wholesaler-distributors' operation.	*SCT*	PCA#45- Pulp, Paper and Paperboard Manufacturing and Processing
Brant Street and Plaints Road (210 m south)	A spill of oil in storm sewer was reported in 2001. Possible environmental impact was noted. A spill of 170 L of used cooking oil to road was reported in 2012. Possible environmental impact was noted. A spill of an unknown quantity of ink from cargo was reported in 1997. Environmental impact was not anticipated.	*SPL*	PCA"Other"- Spills with possible environmental impacts
1030 Brant Avenue (80 m south)	Mountain Equipment Co-Op was listed as a waste generator of oil skimmings & sludges from 2009 to 2019. Mountain Equipment Co-Operative was listed as a limited pesticide vendor.	*GEN* *PES*	None, based on commercial nature of operation (sport equipment retailer)
1035 Brant Street (90 m southeast)	Bayview Park Animal Hospital was listed as a waste generator of pathological wastes from 2018 to 2022	*GEN*	None, based on nature of operations.
1435 Plains Road East (150 m south)	Canadian Tire Corporation Limited organic laboratory chemicals and waste compressed gases from 2016 to 2022, polymeric resins, alkaline solutions – containing other metals and non-metals (not cyanide), wastes from the use of pigments, coatings and paints from 2018 to 2022 and organic acids in 2022.	*GEN*	None, based on commercial nature of operations. (Vehicles parts wholesale and distributors)
	Tawse Realco Inc. was listed as a waste generator of waste oils/sludges (petroleum based) from 2018 to 2022.	*GEN*	

Address	Description	Database	Associated PCA(s)
2043 Leighland Road (185 m east)	The property was listed for a leaking private dwelling fuel oil tank.	*INC*	PCA#28 – Gasoline and Associated Products in Fixed Tanks
1390 Leighland Road (190 m southwest)	Wyatt Art Pottery was established 1948 and described as a 'pottery products, not elsewhere classified / home furnishings / nondurable goods, not elsewhere classified / pottery, ceramics and plumbing fixture manufacturing' operation.	*SCT*	None, based on nature of operations.
Rambo Creek, across Court House at Plains Road East/Brant Street (230 m southeast)	A spill of unknown quantity of fuel to Rambo Creek was reported in 1994. Environmental impact was not anticipated.	*SPL*	None, based on no environmental impact anticipated.
1401 Plains Road East (145 m southwest)	Two RSCs were filed for the property by Mississauga Motors Limited. RSC# 45717 was filed on October 10, 2008. Property use was changing from commercial to residential. A Phase One and Two ESA were completed. Soil and Groundwater were analyzed and compared to MECP Table 5 SCS. Approximately 1,334 m^3 of soil was removed from the property and sent to a registered landfill. Approximately 1,334 m^3 of soil was brought to and deposited at the property. RSC# 58115 was filed on September 30, 2009. Property use was changing from commercial to residential. A Phase One and Two ESA were completed. Soil and Groundwater were analyzed and compared to MECP Table 5 SCS. Approximately 1,334 m^3 of soil was removed from the property and sent to a registered landfill. Approximately 1,334 m^3 of soil was brought to and deposited at the property.	*RSC*	PCA#52 – Storage, maintenance, fueling and repair of equipment, vehicles, and material used to maintain transportation systems.
	Holland Chev Olds was listed as a waste generator of light fuels from 2007 to 2008.	*GEN*	
Various locations	Five (5) boreholes and five (5) monitoring wells were noted within the Phase One Study Area. The following general stratigraphy was noted: gravel fill followed by brown sandy silt till / silty clay / silty sand from to a maximum 4.5 m bgs.	*BORE* *WWIS*	N/A

Databases:

BORE – Borehole
CA – Certificate of Approval
ECA – Environmental Compliance Approval

WWIS – Water Well Information System

4.2.2 Municipal Records

4.2.2.1 Municipal Directories

The available Vernon's City Directories dated 1957, 1960, 1965, 1975, 1980, 1985, 1990, 1995, 2005 and 2010, and digital directories dated 2012, 2017 and 2021 were reviewed by ERIS as part of the 2023 Phase One ESA conducted by EXP to identify the occupancy history of the Site and properties within the Phase One Study Area. A copy of the results from the ERIS search are included in Appendix F.

The following table summarizes the occupants at the Site and the Phase One Study Area that are associated with a PCA.

Address	Occupants	Years Occupied	PCA
Site			
No tenants were identified at the Site that would be associated with a PCA. Based on observations from the FIPs, ERIS, aerials and Site visit, since development, the Site has been occupied by residential dwellings.			
Surrounding Properties			
1035 Brant Steet (80 m southeast)	CDN Printing	2005, 2010, 2017, 2021	PCA#31 – Ink Manufacturing, Processing and Bulk Storage
	Lyn's Cleaners	2017	No waste generator record was registered for this business. It is likely that it was a depot, and it is not considered as PCA.
1400 Plain Road East (250 m southwest)	Smart Choice Auto Repairs	2000, 2005, 2010, 2012, 2017, 2021	PCA#52- Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems
	AAMCO Transmissions	1980	
	Westgate Muffler Centre	1980	
	Expert Auto	1985	
	Carline Muffler Centre	1985-1995	
	Burlington Auto Electric	1990	
	JP Motors	2010	
1401 Plains Road East (135 m southwest)	Holland Chevrolet Geo Oldmobile Ltd	1970-2005	PCA#52- Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems
1435 Plains Road East (150 m south)	Vickie's Esso Service Station	1990	PCA28-Gasoline and Associated Products Storage in Fixed Tanks
	Clan's ESSO Service Station	1970	

Address	Occupants	Years Occupied	PCA
	Imperial Gas Bar	1975-1980	PCA#52- Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems
	Greenwood L H Service Station	1957, 1960	
	Greenwood Motoring Service	1965	
1446 Plains Road East (240 m south)	Various Service Stations	1960-2021	PCA28-Gasoline and Associated Products Storage in Fixed Tanks PCA#52- Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems
	McEwan Automotive	1985	
2011 Plains Road East (145 m southeast)	Various Service Stations	1960-1985	PCA28-Gasoline and Associated Products Storage in Fixed Tanks
2016 Plains Road East (230 m southeast)	Burlington Hyundai	2005-2021	PCA#52- Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems
1020 Brant Street (150 m south)	Holland Chevrolet Geo	2005	PCA#52 – Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems
1076 Brant Street (35 m north)	Graphex Signs & Engraving	2000-2012	Based on the review of aerial photographs and street view of google map, the property at 1076 Brant Street was a residential lot. It is likely that the property was used as office of the business, and it is not considered as PCA.

4.2.3 Ontario Ministry of the Environment Records

4.2.3.1 Ministry of the Environment, Conservation and Parks (MECP)

The MECP was contacted through the Freedom of Information and Protection of Privacy Act (FOI) for copies of any records they had pertaining to the Site on March 6, 2025.

A written response from the MECP typically requires several months. Upon receipt of the response from the MECP, any significant environmental issues identified will be summarized in the report.

A copy of the response is provided in Appendix G.

4.2.3.2 Ministry of the Environment and Climate Change Databases

The ERIS report summarized in the Federal and Provincial Database Search section of the report included a summary of MECP databases (see section 4.2.1). The databases include the following: Environmental Bill of Rights (EBR), Brownfields Environmental Site Registry, Hazardous Waste Information Network (HWIN) and Waste Disposal Sites.

4.2.4 Technical Standards and Safety Authority

A request was made to the TSSA by email on March 6, 2025, for information regarding fuel storage at the Site and adjacent properties.

A written response for the TSSA was received on March 6, 2025. According to a search of their database, there are no records of fuel storage tanks at the Site, or the adjacent properties in the Phase One Study Area.

A copy of the e-mail correspondence with the TSSA is provided in Appendix G.

4.2.5 Record of Site Condition

A Record of Site Condition (RSC) summarizes the environmental conditions of a property as determined by a qualified person (QP) by conducting a Phase I ESA, and where necessary, a Phase II ESA, confirmatory sampling and risk assessment. Upon completion of the necessary environmental Site assessments, an RSC for an assessed property can be filed with the MECP and added to the Environmental Brownfields Site Registry database. This online, publicly available database can be searched to identify properties which may have potential environmental concerns.

Based on a search of the Environmental Brownfields Site Registry database and ERIS Report, the Site was not listed with an RSC.

RSC were filed for the following properties in the Phase One Study Area;

- An RSC was filed for 1401 Plains Rd E. the RSC ID is 45717, and the filing date was Oct 23, 2008. The RSC was filed when the property use changed from commercial to residential use. For the same property, there was another filing date, July 30, 2009, and the RSC ID was 58115. Phase One and Two ESA were completed for the property. Soil and groundwater were analyzed and compared to MECP Table 5 SCS. Approximately 1,334 m^3 of soil was removed from the property and sent to a registered landfill. Approximately 1,334 m^3 of soil was brought to and deposited at the property.

4.3 Physical Setting Sources

4.3.1 Aerial Photographs

Aerial photograph dated 1934, 1954, 1961, 1973, 1986, 1998, 2004, 2014 and 2024 were obtained in order to review the development and land use history of the Site as well as determine major developments at and in the immediate vicinity of the Site.

The development and land use history of the Site and adjacent properties as depicted on the reviewed aerial photography is summarized in the table below. Copies of the aerial photographs are included in Appendix H.

Aerial Photography Year	Observations
1934	• The Site was observed to be vacant undeveloped land. • Brant Street and Plains Road East have been developed. • Lands adjacent to Brant Street was observed to be vacant and undeveloped. • Lands adjacent to Plains Road East have been developed with buildings that are inferred to be predominantly residential dwellings. • An inferred rail line appeared to cross Plains Road East, east of Brant Street.

Aerial Photography Year	Observations
1954	• Finer details are difficult to discern due to poor resolution. • The Site has been developed with buildings that are inferred to be residential dwellings. One on the northern portion of the Site and one on the southern portion of the Site. • Churchill Avenue, Leighland Road, Helena Street, and Glendor Avenue appeared developed with mainly residential dwellings. • An inferred industrial building appeared developed east of Churchill Avenue. • A hydro corridor appeared constructed running perpendicular to Brant Street, north of the Site. • The remainder of the Phase One Study Area appeared similar to that observed in the 1934 aerial photograph.
1961	• The Queen Elizabeth Way (QEW) appeared to have been constructed north of the Site. • Properties along Plains Road East, appeared to be redeveloped as inferred commercial buildings. • The Site and remainder of the Phase One Study Area appeared similar to that observed in the 1954 aerial photograph.
1973	• Brant Street and Plains Road East have been widened. • A larger commercial/industrial building appeared to have been developed on the north side of Plains Road East, southwest of the Site. • The Site and remainder of the Phase One Study Area appeared similar to that observed in the 1961 aerial photograph.
1986	• Further development of commercial properties was observed adjacent to Plains Road East. • The Site and remainder of the Phase One Study Area appeared similar to that observed in the 1973 aerial photograph.
1998	• Properties between Palins Road East and Leighland Road, east of Brant Street appeared to be developed with inferred commercial buildings. • The entry/exit ramps leading on to the QEW have been developed along Brant Street, north of the Site. • Treeland Street and Gabiel Place appeared developed with inferred residential dwellings. • The Site and remainder of the Phase One Study Area appeared similar to that observed in the 1986 aerial photograph.
2004	• The Site and Phase One Study Area appeared similar to that observed in the 1998 aerial photograph.
2014	• The Site and Phase One Study Area appeared similar to that observed in the 2004 aerial photograph.
2024	• Site building at 1056 Brant Street appeared to have been demolished. • The remainder of the Site and Phase One Study Area appeared similar to that observed in the 2014 aerial photograph.

Based on the reviewed aerial photographs, no PCAs were identified for the Site.

The reviewed aerial photographs show that the Site was developed for residential use between 1934 and 1954.

4.3.2 Topography, Hydrology and Geology

The following physiographic, geological and soil maps were reviewed:

- "Toporama"; Natural Resources Canada. Map 030M11. Scale 1:15,000. 2008.
- Quaternary Geology of Ontario - geology_ll.shp [computer file], Ontario: Ontario Geological Survey, 2000.
- Bedrock Geology of Ontario - geology_ll.shp [computer file], Ontario: Ontario Geological Survey, 2000.

Based on the review of the above maps, the following information was obtained:

- The Site and surrounding areas slope to the south. Rambo Creek is located approximately 175 m west and flows south towards Lake Ontario. Lake Ontario is located 2.57 km south of the Site. Based on the information available at this time, the direction of groundwater flow in the area of the Site is inferred to be to the south.
- The Site is expected to consist of Halton Till, predominantly silt to silty clay matrix, high in matrix carbonate content and clast poor from the Pleistocene era.
- The bedrock in the general area of the Site is part of a group belonging to the Queenston Formation, consisting of shale, limestone, dolostone and siltstone.

4.3.3 Fill Materials

Fill material is typically brought to a property as a base for buildings and pavement areas. Fill can also be used to re-grade a property, and to backfill excavations.

Based on the findings of the Geotechnical Investigation and Phase Two ESA completed by EXP, fill materials extended to approximately 1.5 to 4.5 m bgs. Based on the visual observation of the soil samples from Geotechnical Investigation, the composition of soil type in the fill material layer is similar to the native material within the Site. Therefore, the fill material was classified as reworked native based on environmental perspective, and it is not considered as PCA. In addition, based on the information provided by the client, the basement of the former building was temporary backfilled by construction debris (i.e. bricks of the demolished buildings) and non-soil material (i.e. stone and gravel etc.). Therefore, it is not considered as PCA. Therefore, it is not considered as PCA.

4.3.4 Areas of Natural Significance

Based on the review of available resources from the Ministry of Natural Resources and Forestry website March 6, 2025, no areas of natural significance were identified at the Site or within 30 m of the Site.

4.3.5 Well Records

4.3.5.1 Water Wells

A search of the water well database was conducted by ERIS of the surrounding Phase One Study Area and Ontario Well Records Database to identify water wells within the Phase One Study Area.

The ERIS database report had three (3) records of monitoring wells being installed on-Site.

There were five (5) records of wells installed within the Phase One Study Area. The wells were installed between 2004 and 2021. According to the records, the wells were installed as monitoring wells or test holes. The review of these records, did not identify any additional information of environmental significance for the Site.

4.3.5.2 Oil, Gas, and Salt Wells

A search of the Oil, Gas & Salt Resources Library (2014) was completed by ERIS. According to the findings of ERIS's search, no oil, gas or salt wells are located on-Site or within the Phase One Study Area.

4.4 Site Operating Records

In general, a request is usually made to the property representative for copies of any operating records pertaining to the environmental conditions at the Site. Records would include: regulatory permits; Material Safety Data Sheets (MSDS) for all chemicals that were handled on-Site; underground utility drawings; inventories of chemicals, chemical usage, and chemical storage areas; inventory of aboveground storage tanks (ASTs) and underground storage tanks (USTs); environmental monitoring data; correspondence pertaining to an order or request by the MECP or TSSA; waste management records; process, production, and maintenance documents; records of spills and records of discharges of chemicals; emergency response and contingency plans, including spill prevention and contingency plans; environmental audit reports; and Site plans of the facility showing areas of production and manufacturing

There were no records of environmental significance available for review at the time of this Phase One ESA.

5. Interviews

Interviews were conducted by EXP staff with the individuals identified to be the most knowledgeable with respect to both the current and historical Site uses. The interviews were conducted during the Site reconnaissance in order to obtain information to assist in identifying details of potentially contaminating activities, potential contaminant pathways in, on, or below the Site, and areas of potential environmental concern.

During the completion of this Phase One ESA, the following individual was interviewed:

Mr. Sam Mandelbaum completed a questionnaire regarding the Site on March 10, 2025. Mr. Mandelbaum is the Project Monitor. Information collected from the Mr. Mandelbaum (herein after referred to as “Site representative”) was used in the completion of Section 6.0.

6. Site Reconnaissance

6.1 General Requirements

The Phase One Site reconnaissance was conducted on March 11, 2025, between 8:00 am and 9:00 am by Mr. Scott Grant-Hose under the supervision of Mr. Samuel Lee, P.Geo., QP_{ESA}, a Qualified Person as defined by O.Reg. 153/04, as amended. On the day of the Site reconnaissance, the weather was partly cloudy and approximately 8°C.

The Site and the adjoining properties were observed from the Site and/or publicly accessible areas. Photographs documenting the Site visit are included in Appendix I.

6.2 Specific Observations at Phase One ESA Property

6.2.1 Site Description and Buildings

The Site is a rectangular shaped parcel of land that is located on the west side of Brant Street. The Site measures approximately 0.16 hectares (0.41 acres). At the time of this Phase One ESA, the Site was vacant with two (2) former building footprints. Based on the records review, this Site buildings were developed circa 1954 and were demolished in 2024. The Site properties have the municipal addresses 1056 and 1060 Brant Street and occupy the southern and northern portions of the Site respectively.

A concrete pad associated with a parking garage was observed to the west of the Site building at 1060 Brant Street. No other building or permanent structures were observed at the time of the Site visit.

The areas to the south of 1056 Brant Street and north of 1060 Brant Street have been paved with asphalt. During the winter months, de-icing salt would have been applied to these areas to remove the snow/ice build up. This is associated with PCA" Other"-Application of De-icing salt.

The remainder of the Site had grass and tree cover.

6.2.2 Heating and Cooling Systems

During the Site Visit, the Site was vacant. Therefore, no heating or cooling systems were observed on-Site.

6.2.3 Site Utilities and Services

The Site utilities and services were identified at the Site based on information provided in environmental records, relevant utility infrastructure observed during the Site reconnaissance. The Site utilities are summarized in the table below and noted on Figure 3, where available. It is noted that the precise underground location of the utilities cannot be determined without professional locate services.

Utility	Source	Location	Site Entry
Natural Gas	Enbridge Gas	Underground	The natural gas meters were observed on the south walls of 1056 and 1060 Brant Street.
Sanitary Sewer	City of Toronto	Underground	Unknown
Storm Sewer	Toronto Hydro	Underground	Unknown
Water	City of Toronto	Underground	Unknown
Electricity	Alectra	Underground	Unknown
Telecommunications	Bell and Rogers	Underground	Unknown

6.2.4 Sewage and Wastewater Disposal

The Site and surrounding area are served by municipal sanitary and storm sewer systems.

6.2.5 Potable Water Sources

The Site was connected to the municipal water source.

6.2.6 Abandoned and Existing Wells

One (1) monitoring well was observed in the southwest corner of 1056 Brant Street and one (1) monitoring well was observed in the asphalt driveway of 1060 Brant Street.

No other wells were observed at the time of the Site visit.

6.2.7 Site Production and Manufacturing

There are no on-Site production or manufacturing activities.

6.2.8 Drains, Pits and Sumps

No drains, pits, or sumps were observed on the Site at the time of the Site visit.

6.2.9 Storage Tanks

The presence/absence and condition (if present) of underground storage tanks (USTs) and aboveground storage tanks (ASTs) at the Site were assessed during the Site visit.

The Site historically stored furnace oil in the AST in the basement of 1056 Brant Street. This is associated with PCA#28-Gasoline and Associated Products Storage in Fixed Tanks.

No other evidence of the presence of USTs (i.e., fill and vent pipes) or ASTs were identified at the time of the Site visit.

6.2.10 Water Wells

No potable water wells were observed at the time of the Site visit.

6.2.11 Site Housekeeping

The Site was well maintained, with no evidence of misplaced/excessive waste or spills being observed at the time of the Site visit.

6.2.12 Chemical Storage and Handling and Floor Condition

No evidence of hazardous chemical storage was noted at the time of the Site visit.

The Site historically stored furnace oil in the AST in the basement of 1056 Brant Street.

6.2.13 Areas of Stained Soil, Pavement or Stressed Vegetation

No evidence of significant staining was observed during the Site visit.

No stressed vegetation was noted at the time of the Site visit.

6.2.14 Fill and Debris

Fill material is typically brought to a property as a base for buildings and pavement areas. Fill can also be used to re-grade a property and to backfill excavations.

At the time of the Site visit two (2) former building footprints were observed. Based on the information provided by the client, the basement of the former building was temporary backfilled by construction debris (i.e. bricks of the demolished buildings) and non-soil material (i.e. stone and gravel etc.). Therefore, it is not considered as PCA.

6.2.15 Air Emissions

Air emissions in Ontario are regulated under the Environmental Protection Act (EPA) and its Regulations (O. Reg. 419/05, O. Reg. 245/11, O.Reg 1/17). Owners and operators of activities that may discharge a contaminant into the natural environment must seek permissions from the Ministry of Environment, Conservation and Parks (MECP) to carry out these activities. As of October 31, 2011, amendments to the EPA resulted in a two-path environmental approval process, the Environmental Compliance Approval (ECA) and Environmental Activity and Sector Registry (EASR). The EASR allows businesses to register certain activities with the ministry, rather than apply for approvals. The EASR is for common systems and processes, initially for heating systems, standby power systems and automotive refinishing, to which preset rules of operation can be applied. Effective January 3, 2017 additional activities were allowed through the EASR process based on the facility's North American Industry Classification System (NAICS) code but required full assessment for compliance of emissions under O.Reg. 419/05. Unless explicitly exempted, most industrial processes or modification to industrial processes and equipment require an ECA, formerly a Certificate of Approval (Air and Noise).

Based on the Site visit, there was no evidence of operations would require MECP approval for air emissions.

6.2.16 Polychlorinated Biphenyls (PCBs)

No evidence of PCB containing equipment was observed on the Site at the time of the Site visit.

6.3 Enhanced Investigation Property Observations

An Enhanced Investigation Property is "(i) a property used, or has ever been used, in whole or part, for an industrial purpose, or (ii) a commercial property used as a garage, a bulk liquid dispensing facility, including a gasoline outlet or for the operation of dry-cleaning equipment" (O.Reg. 153/04).

Based on the information reviewed on the historical and current use, the Site is not classified as an Enhanced Investigation Property.

6.4 Adjacent and Surrounding Properties

A visual reconnaissance of the adjacent properties, and properties within the Phase One Study Area was conducted from publicly accessible areas to identify the occupants; and document any PCAs that may be contributing to an APEC at the Site.

Based on the visual reconnaissance of adjacent and surrounding properties within the Phase One Study Area, the following properties were identified that would be associated with a PCA.

Direction	Address	Occupants	Associated PCA
Southeast	1035 Brant Street	Lyn's Cleaners	No waste generator record was registered for this business. It is likely

Direction	Address	Occupants	Associated PCA
			that it was a depot, and it is not considered as PCA.
Southeast	2016 Plains Road East	Burlington Hyundai (dealership with service centre)	PCA#52 – Storage, Maintenance, fueling and repair of equipment, vehicles, and material used to maintain transportation systems
South	1400 Plains Road East	Smart Choice Auto Repair Autosplash Auto Electric	PCA#10 – Commercial Autobody Shops PCA#52 – Storage, Maintenance, fueling and repair of equipment, vehicles, and material used to maintain transportation systems

6.5 Written Description of Investigation

A reconnaissance of the Site was conducted by EXP to examine the exterior of the Site. Access was provided to the entirety of the Phase One Property. The exterior portions of the Site were examined for evidence of utilities and related infrastructure; water wells; Site drainage and related infrastructure; stained areas; stressed vegetation; and evidence of fill material.

The reconnaissance of the Site included an examination of all properties within the Phase One Study Area from public access ways to document and characterize PCAs, water bodies and areas of natural significance.

7. Review and Evaluation of Information

7.1 Current and Past Uses

Based on the information available at this time, the Site was inferred to be developed circa 1954 for residential use. The residential dwellings were demolished in 2024. Prior to the development of the Site with the existing residential dwellings circa 1954, the Site was observed to be a vacant undeveloped parcel of land in the reviewed aerial photographs.

The current and past ownership of the Site is summarized in Table II.

7.2 Potentially Contaminating Activities (PCAs)

A list of all the PCAs identified at the Site and within the Phase One Study Area are listed in the CSM Appendix J and shown on Figure 2.

7.3 Areas of Potential Environmental Concern (APECs)

Based on information from the reviewed maps, groundwater in the Phase One Study Area is inferred to flow in a southerly direction. Based on this, properties north of the Site are inferred to be up-gradient to the south, and properties south of the Site are inferred to be down-gradient. Furthermore, any PCAs located significantly distant from the Site (>100 m) were considered to be too distant to be contributing to an APEC on the Site.

The following PCAs were considered to contribute to an APEC:

- PCAs identified at the Site; and
- PCAs located on immediately adjacent properties (off-Site) or situated up-gradient to the Site with respect to the anticipated groundwater flow direction.

The APECs identified at the Site are summarized in the CSM in Appendix J and on Figure 4.

8. Conclusions

8.1 Whether Phase Two ESA Required Before RSC Submitted

Based on the results and findings of the Phase One ESA, a Phase Two ESA is required before a RSC may be submitted to investigate the following APECs identified at the Site:

Area of Potential Environmental Concern (APEC)	Location of APEC on Phase One Property	Potentially Contaminating Activity (PCA)[1]	Location of PCA (on-Site or off-Site)	Contaminants of Potential Concern	Media Potentially Impacted (Groundwater, soil and/or sediment)
APEC 1: Presence of an AST for heating oil storage at 1056 Brant Street	Southern portion of the Site – location of the boiler room at 1056 Brant Street	PCA#28-Gasoline and Associated Products Storage in Fixed Tanks	On-Site	Petroleum hydrocarbons (PHCs), benzene, toluene, ethylbenzene and xylene (BTEX), polycyclic aromatic hydrocarbons (PAH) and Metals	Soil and Groundwater
APEC 1B: Application of De-icing salt on the on-Site paved areas	Asphalt-paved areas of the Site	PCA" Other"-Application of De-icing salt	On-Site	Electrical Conductivity (EC) and Sodium adsorption ratio (SAR)	Soil

(1) Potentially contaminating activity means a use or activity set out in Column A of Table 2 of Schedule D (O.Reg.153/04, as amended) that is occurring or has occurred in a phase one Study area.

8.2 RSC Based on Phase One ESA Alone

As such, an RSC (if required) cannot be filed based on the Phase One ESA alone.

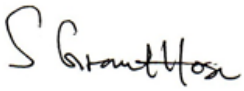

A Phase Two ESA is required to investigate the APECs identified in this Phase One ESA, prior to filing an RSC, if required.

9 Closure

We trust this report is satisfactory for your purposes. Should you have any questions, please do not hesitate to contact this office.

Yours truly,

Appendix A – Liability

LIMITATIONS AND USE OF REPORT

BASIS OF REPORT

The Report is based on site conditions known or inferred by the investigation undertaken as of the date of the Report. Should changes occur which potentially impact the condition of the site the recommendations of EXP may require re-evaluation. Where special concerns exist, or the Client has special considerations or requirements, these should be disclosed to EXP to allow for additional or special investigations to be undertaken not otherwise within the scope of investigation conducted for the purpose of the Report.

Where applicable, recommended field services are the minimum necessary to ascertain that construction is being carried out in general conformity with building code guidelines, generally accepted practices and EXP's recommendations. Any reduction in the level of services recommended will result in EXP providing qualified opinions regarding the adequacy of the work. EXP can assist design professionals or contractors retained by the Client to review applicable plans, drawings, and specifications as they relate to the Report or to conduct field reviews during construction.

RELIANCE ON INFORMATION PROVIDED

The evaluation and conclusions contained in the Report are based on conditions in evidence at the time of site inspections and information provided to EXP by the Client and others. The Report has been prepared for the specific site, development, building, design or building assessment objectives and purpose as communicated by the Client. EXP has relied in good faith upon such representations, information and instructions and accepts no responsibility for any deficiency, misstatement or inaccuracy contained in the Report as a result of any misstatements, omissions, misrepresentation or fraudulent acts of persons providing information. Unless specifically stated otherwise, the applicability and reliability of the findings, recommendations, suggestions or opinions expressed in the Report are only valid to the extent that there has been no material alteration to or variation from any of the information provided to EXP.

STANDARD OF CARE

This report ("Report") has been prepared in a manner consistent with the degree of care and skill exercised by engineering consultants currently practicing under similar circumstances and locale. No other warranty, expressed or implied, is made. Unless specifically stated otherwise, the Report does not contain environmental consulting advice.

COMPLETE REPORT

All documents, records, data and files, whether electronic or otherwise, generated as part of this assignment form part of the Report. This material includes, but is not limited to, the terms of reference given to EXP by the Client, communications between EXP and the Client, other reports, proposals or documents prepared by EXP for the Client in connection with the site described in the Report. In order to properly understand the suggestions, recommendations and opinions expressed in the Report, reference must be made to the Report in its entirety. EXP is not responsible for use by any party of portions of the Report.

USE OF REPORT

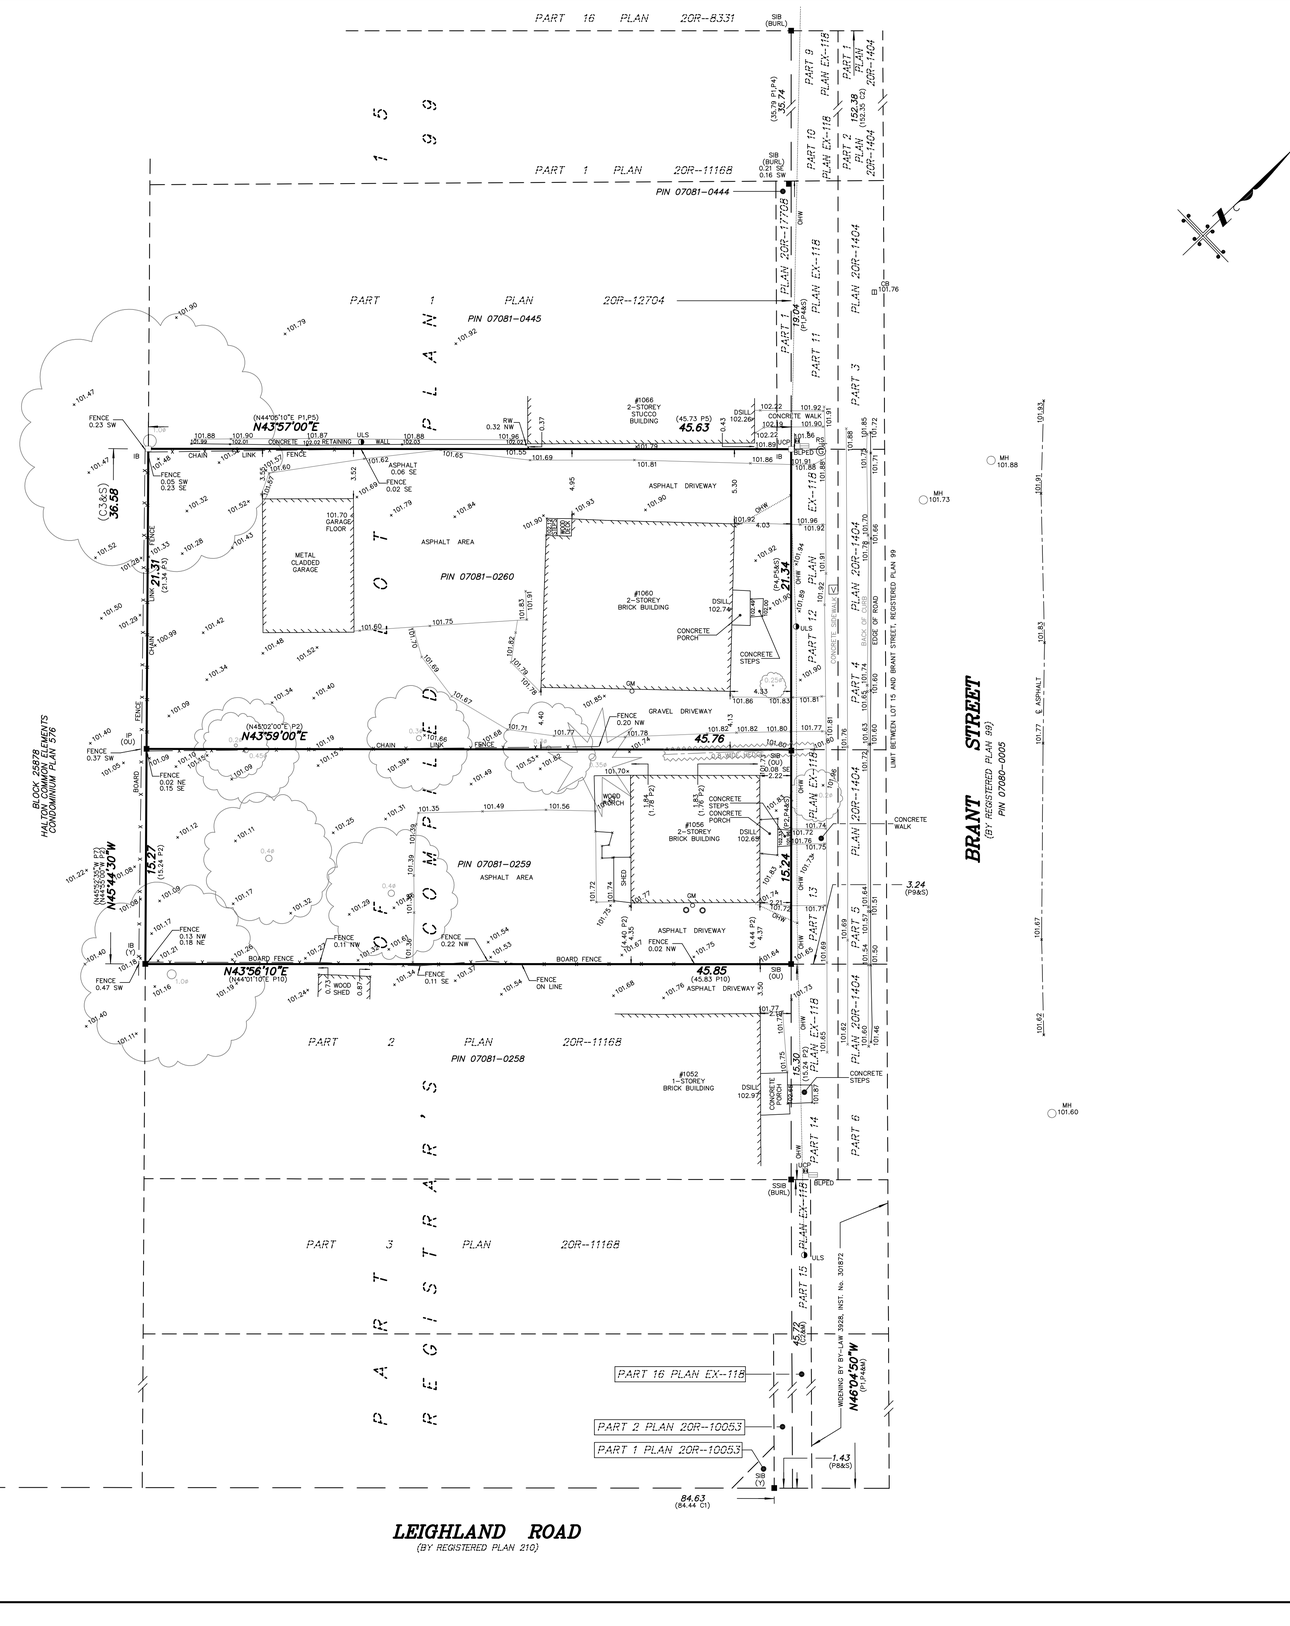

The information and opinions expressed in the Report, or any document forming part of the Report, are for the sole benefit of the Client. No other party may use or rely upon the Report in whole or in part without the written consent of EXP. Any use of the Report, or any portion of the Report, by a third party are the sole responsibility of such third party. EXP is not responsible for damages suffered by any third party resulting from unauthorised use of the Report.

REPORT FORMAT

Where EXP has submitted both electronic file and a hard copy of the Report, or any document forming part of the Report, only the signed and sealed hard copy shall be the original documents for record and working purposes. In the event of a dispute or discrepancy, the hard copy shall govern. Electronic files transmitted by EXP utilize specific software and hardware systems. EXP makes no representation about the compatibility of these files with the Client's current or future software and hardware systems. Regardless of format, the documents described herein are EXP's instruments of professional service and shall not be altered without the written consent of EXP.

Appendix C – Qualifications

Qualifications of Assessors

The records review and site visit was completed by Scott Grant-Hose, B.Sc., who has been trained to conduct conduct Phase I and II Environmental Site Assessments (ESAs) (in accordance with the applicable CSA Standards and O.Reg. 153/04). Mr. Grant-Hose completed Bachelor of Science degrees in Geoscience and Physical Science from McMaster University and a post graduate certificate in Environmental Management and Assessment from Niagara College.

The report was reviewed by Mr. Samuel Lee, P.Geo who is a Senior Project Manager at EXP with fifteen (15) years of environmental consulting experience in Canada. Mr. Lee has managed and conducted numerous Phase I and Phase II Environmental Site Assessments and Record of Site Condition as well as other due diligence projects and is a Qualified Person for Environmental Site Assessment.

EXP Services Inc. is a full-service consulting and engineering firm and provides a full range of environmental services through the Environmental Services Group. EXP's Environmental Services Group has developed a strong working relationship with clients in both the private and public sectors and has developed a positive relationship with the Ontario Ministry of the Environment. Personnel in the numerous branch offices form part of a large network of full-time dedicated environmental professionals in the EXP organization.

Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY

Reliance on information in Report: This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a database review of environmental records.

License for use of information in Report: No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

Your Liability for misuse: Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

No warranty of Accuracy or Liability for ERIS: The information contained in this report has been produced by ERIS Information Limited Partnership ("ERIS") using various sources of information, including information provided by Federal and Provincial government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

Trademark and Copyright: You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report (s) are protected by copyright owned by ERIS Information Limited Partnership. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

Executive Summary

Property Information:

Project Property:	*Phase One ESA Update* *1056 & 1060 Brant Street Burlington ON L7R 2J9*

Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. ***Note:*** *Databases denoted with " * " indicates that the database will no longer be updated. See the individual database description for more information.*

Abandoned Aggregate Inventory: Provincial AAGR

The MAAP Program maintains a database of abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.*

Government Publication Date: Sept 2002*

Aggregate Inventory: Provincial AGR

This database of licensed and permitted pits and quarries is maintained by the Ontario Ministry of Natural Resources and Forestry (MNRF), as regulated under the Aggregate Resources Act, R.S.O. 1990. Aggregate site data has been divided into active and inactive sites. Active sites may be further subdivided into partial surrenders. In partial surrenders, defined areas of a site are inactive while the rest of the site remains active.

Government Publication Date: Up to Nov 2024

Abandoned Mine Information System: Provincial AMIS

The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

Government Publication Date: 1800-Apr 2024

Anderson's Waste Disposal Sites: Private ANDR

The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1860s-Present

Aboveground Storage Tanks: Provincial AST

Historical listing of aboveground storage tanks made available by the Department of Natural Resources and Forestry. Includes tanks used to hold water or petroleum. This dataset has been retired as of September 25, 2014 and will no longer be updated.

Government Publication Date: May 31, 2014

Automobile Wrecking & Supplies: Private AUWR

This database provides an inventory of known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

Government Publication Date: 1999-Apr 30, 2024

Borehole: Provincial BORE

A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW.

Government Publication Date: 1875-Jul 2018

Certificates of Approval: Provincial CA

This database contains the following types of approvals: Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA). Please refer to those individual databases for any information after Oct.31, 2011.

Government Publication Date: 1985-Oct 30, 2011*

Dry Cleaning Facilities: Federal CDRY

List of dry cleaning facilities made available by Environment and Climate Change Canada. Environment and Climate Change Canada's Tetrachloroethylene (Use in Dry Cleaning and Reporting Requirements) Regulations (SOR/2003-79) are intended to reduce releases of tetrachloroethylene to the environment from dry cleaning facilities.

Government Publication Date: Jan 2004-Dec 2022

Commercial Fuel Oil Tanks: Provincial CFOT

Locations of commercial underground fuel oil tanks. This is not a comprehensive or complete inventory of commercial fuel tanks in the province; this listing is a copy of records of registered commercial underground fuel oil tanks obtained under Access to Public Information.
Note that the following types of tanks do not require registration: waste oil tanks in apartments, office buildings, residences, etc.; aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Oct 2023

Chemical Manufacturers and Distributors: Private CHEM

This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.).

Government Publication Date: 1999-Jan 31, 2020

Chemical Register: Private CHM

This database includes a listing of locations of facilities within the Province or Territory that either manufacture and/or distributes chemicals.

Government Publication Date: 1999-Apr 30, 2024

Compressed Natural Gas Stations: Private CNG

Canada has a network of public access compressed natural gas (CNG) refuelling stations. These stations dispense natural gas in compressed form at 3,000 pounds per square inch (psi), the pressure which is allowed within the current Canadian codes and standards. The majority of natural gas refuelling is located at existing retail gasoline that have a separate refuelling island for natural gas. This list of stations is made available by the Canadian Natural Gas Vehicle Alliance.

Government Publication Date: Dec 2012 -May 2024

Inventory of Coal Gasification Plants and Coal Tar Sites: Provincial COAL

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.*

Government Publication Date: Apr 1987 and Nov 1988*

Compliance and Convictions: Provincial CONV

This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here have been found guilty of environmental offenses in Ontario courts of law.

Government Publication Date: 1989-Dec 2024

Certificates of Property Use: Provincial CPU

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include CPU's on the registry such as (EPA s. 168.6) - Certificate of Property Use.

Government Publication Date: 1994 - Dec 31, 2024

Drill Hole Database: Provincial DRL

The Ontario Drill Hole Database (ODHD) is offered by the Province of Ontario's Ministry of Mines. The dataset contains information for over 164,000 percussion, overburden, sonic and diamond-drill holes. The presence of assay results with cutoff values for gold, silver, copper, zinc, lead, nickel and platinum group elements is noted. Drill hole data are compiled from assessment files that have been submitted to the ministry in accordance with the Ontario Mining Act (OMA). Source assessment file numbers are captured for cross reference with the Ontario Assessment File Database (OAFD). Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed company map; or from submitted a "Report of Work".

Government Publication Date: 1886 - Aug 2024

Delisted Fuel Tanks: Provincial DTNK

List of fuel storage tank sites that were once found in - and have since been removed from - the list of fuel storage tanks made available by the regulatory agency under Access to Public Information.

Government Publication Date: Oct 2023

Environmental Activity and Sector Registry: Provincial EASR

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval), Please see our ECA database.

Government Publication Date: Oct 2011-Dec 31, 2024

Environmental Registry: Provincial EBR

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

Government Publication Date: 1994 - Dec 31, 2024

Environmental Compliance Approval: Provincial ECA

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For certificates of approval prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

Government Publication Date: Oct 2011-Dec 31, 2024

Environmental Effects Monitoring: Federal EEM

The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This database provides information on the mill name, geographical location and sub-lethal toxicity data.

Government Publication Date: 1992-2007*

ERIS Historical Searches: Private EHS

ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical Profile" page.

Government Publication Date: 1999-Aug 31, 2024

Environmental Issues Inventory System: Federal EIIS

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety; and to prevent future environmental problems. The EIIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed.

Government Publication Date: 1992-2001*

Emergency Management Historical Event: Provincial EMHE

List of locations of historical occurrences of emergency events, including those assigned to the Ministry of Natural Resources by Order-In-Council (OIC) under the Emergency Management and Civil Protection Act, as well as events where MNR provided requested emergency response assistance. Many of these events will have involved community evacuations, significant structural loss, and/or involvement of MNR emergency response staff. These events fall into one of ten (10) type categories: Dam Failure; Drought / Low Water; Erosion; Flood; Forest Fire; Soil and Bedrock Instability; Petroleum Resource Center Event, EMO Requested Assistance, Continuity of Operations Event, Other Requested Assistance. EMHE record details are reproduced by ERIS under License with the Ontario Ministry of Natural Resources © Queen's Printer for Ontario, 2017.

Government Publication Date: Apr 30, 2022

Environmental Penalty Annual Report: Provincial EPAR

This database contains data from Ontario's annual environmental penalty report published by the Ministry of the Environment and Climate Change. These reports provide information on environmental penalties for land or water violations issued to companies in one of the nine industrial sectors covered by the Municipal Industrial Strategy for Abatement (MISA) regulations.

Government Publication Date: Jan 1, 2011 - Dec 31, 2023

List of Expired Fuels Safety Facilities: Provincial EXP

List of facilities and tanks for which there was once a fuel registration. This is not a comprehensive or complete inventory of expired tanks/tank facilities in the province; this listing is a copy of previously registered tanks and facilities obtained under Access to Public Information. Includes private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc; includes tanks which have been removed from the ground.
Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Oct 2023

Federal Convictions: Federal FCON

Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty.

Government Publication Date: 1988-Jun 2007*

Contaminated Sites on Federal Land: Federal FCS

The Federal Contaminated Sites Inventory includes information on known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government. Includes fire training sites and sites at which Per- and Polyfluoroalkyl Substances (PFAS) are a concern.

Government Publication Date: Jun 2000-Nov 2024

Fisheries & Oceans Fuel Tanks: Federal FOFT

Fisheries & Oceans Canada maintains an inventory of aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation.

Government Publication Date: 1964-Sep 2019

Federal Identification Registry for Storage Tank Systems (FIRSTS): Federal FRST

A list of federally regulated Storage tanks from the Federal Identification Registry for Storage Tank Systems (FIRSTS). FIRSTS is Environment and Climate Change Canada's database of storage tank systems subject to the Storage Tank for Petroleum Products and Allied Petroleum Products Regulations. The main objective of the Regulations is to prevent soil and groundwater contamination from storage tank systems located on federal and aboriginal lands. Storage tank systems that do not have a valid identification number displayed in a readily visible location on or near the storage tank system may be refused product delivery.

Government Publication Date: Oct 31, 2021

Fuel Storage Tank: Provincial FST

List of registered private and retail fuel storage tanks. This is not a comprehensive or complete inventory of private and retail fuel storage tanks in the province; this listing is a copy of registered private and retail fuel storage tanks, obtained under Access to Public Information.
Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Oct 2023

Fuel Storage Tank - Historic: Provincial FSTH

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks. Public records of private fuel storage tanks are only available since the registration became effective in September 1989. This information is now collected by the Technical Standards and Safety Authority.

Government Publication Date: Pre-Jan 2010*

Ontario Regulation 347 Waste Generators Summary: Provincial GEN

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

Government Publication Date: 1986-Nov 30, 2022

Greenhouse Gas Emissions from Large Facilities: Federal GHG

List of greenhouse gas emissions from large facilities made available by Environment Canada. Greenhouse gas emissions in kilotonnes of carbon dioxide equivalents (kt CO2 eq).

Government Publication Date: 2013-Apr 2024

TSSA Historic Incidents: Provincial HINC

List of historic incidences of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen recorded by the TSSA in their previous incident tracking system. The TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of historical fuel spills and leaks in the province. This listing is a copy of the data captured at one moment in time and is hence limited by the record date provided here.

Government Publication Date: 2006-June 2009*

Indian & Northern Affairs Fuel Tanks: Federal IAFT

The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

Government Publication Date: 1950-Aug 2003*

Fuel Oil Spills and Leaks: Provincial INC

Listing of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen reported to the Spills Action Centre (SAC). This is not a comprehensive or complete inventory of fuel-related leaks, spills, and incidents in the province; this listing in a copy of incidents reported to the SAC, obtained under Access to Public Information. Includes incidents from fuel-related hazards such as spills, fires, and explosions. Records are not verified for accuracy or completeness.

Government Publication Date: 31 Oct, 2023

Landfill Inventory Management Ontario: Provincial LIMO

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the Ministry of the Environment, Conservation and Parks compiles new and updated information. Includes small and large landfills currently operating as well as those which are closed and historic. Operators of larger landfills provide landfill information for the previous operating year to the ministry for LIMO including: estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills include information such as site owner, site location and certificate of approval # and status.

Government Publication Date: Mar 31, 2022

Canadian Mine Locations: Private MINE

This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database.

Government Publication Date: 1998-2009*

Mineral Occurrences: Provincial MNR

In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the plan metric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

Government Publication Date: 1846-Feb 2024

National Analysis of Trends in Emergencies System (NATES): Federal NATE

In 1974 Environment Canada established the National Analysis of Trends in Emergencies System (NATES) database, for the voluntary reporting of significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released.

Government Publication Date: 1974-1994*

Non-Compliance Reports: Provincial NCPL

The Ministry of the Environment Conservation and Parks (MECP) provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act. MECP publicly releases the Environmental Compliance Report (ECR) on the Ontario Data Catalogue. In Ontario, all facilities with regulated wastewater discharges or air emissions under the Ontario Water Resources Act and the Environmental Protection Act must monitor and report any cases where approved operating limits have been exceeded.

Government Publication Date: Dec 31, 2023

National Defense & Canadian Forces Fuel Tanks: Federal NDFT

The Department of National Defense and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on DND lands. Our inventory provides information on the base name, location, tank type & capacity, tank contents, tank class, date of tank installation, date tank last used, and status of tank as of May 2001. This database will no longer be updated due to the new National Security protocols which have prohibited any release of this database.

Government Publication Date: Up to May 2001*

National Defense & Canadian Forces Spills: Federal NDSP

The Department of National Defense and the Canadian Forces maintains an inventory of spills to land and water. All spill sites have been classified under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered.

Government Publication Date: Mar 1999-Nov 2023

National Defence & Canadian Forces Waste Disposal Sites: Federal NDWD

The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status.

Government Publication Date: 2001-Apr 2007*

National Energy Board Pipeline Incidents: Federal NEBI

Locations of pipeline incidents from 2008 to present, made available by the Canada Energy Regulator (CER) - previously the National Energy Board (NEB). Includes incidents reported under the Onshore Pipeline Regulations and the Processing Plant Regulations related to pipelines under federal jurisdiction, does not include incident data related to pipelines under provincial or territorial jurisdiction.

Government Publication Date: 2008-Dec 31, 2024

National Energy Board Wells: Federal NEBP

The NEBW database contains information on onshore & offshore oil and gas wells that are outside provincial jurisdiction(s) and are thereby regulated by the National Energy Board. Data is provided regarding the operator, well name, well ID No./UWI, status, classification, well depth, spud and release date.

Government Publication Date: 1920-Feb 2003*

National Environmental Emergencies System (NEES): Federal NEES

In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for previous Environment Canada spill datasets. NEES is composed of the historic datasets ' or Trends ' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.

Government Publication Date: 1974-2003*

National PCB Inventory: Federal NPCB

Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. Federal out-of-service PCB containing equipment and PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites. Some addresses provided may be Head Office addresses and are not necessarily the location of where the waste is being used or stored.

Government Publication Date: 1988-2008*

National Pollutant Release Inventory: Federal NPR2

The National Pollutant Release Inventory (NPRI) is Canada's public inventory of pollutant releases (to air, water and land), disposals, and transfers for recycling. The inventory, managed by Environment and Climate Change Canada, tracks over 300 substances. Under the authority of the Canadian Environmental Protection Act (CEPA), owners or operators of facilities that meet published reporting requirements are required to report to the NPRI.

Government Publication Date: Feb 2024

National Pollutant Release Inventory - Historic: Federal NPRI

Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances. This data holds historic records; current records are found in NPR2.

Government Publication Date: 1993-May 2017

Oil and Gas Wells: Private OGWE

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at www.nickles.com.

Government Publication Date: 1988-May 31, 2024

Ontario Oil and Gas Wells: Provincial OOGW

In 1998, the Ministry of Natural Resources (MNR) handed over to the Ontario Oil, Gas and Salt Resources (OGSR) Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database includes well owner/operator, location, permit issue date, and well cap date, license number, status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provided for each well record.

Government Publication Date: 1800-Aug 2024

Inventory of PCB Storage Sites: Provincial OPCB

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory.

Government Publication Date: 1987-Oct 2004; 2012-Dec 2013

Orders: Provincial ORD

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include Orders on the registry such as (EPA s. 17) - Order for remedial work, (EPA s. 18) - Order for preventative measures, (EPA s. 43) - Order for removal of waste and restoration of site, (EPA s. 44) - Order for conformity with Act for waste disposal sites, (EPA s. 136) - Order for performance of environmental measures.

Government Publication Date: 1994 - Dec 31, 2024

Canadian Pulp and Paper: Private PAP

This information is part of the Pulp and Paper Canada Directory. The Directory provides a comprehensive listing of the locations of pulp and paper mills and the products that they produce.

Government Publication Date: 1999, 2002, 2004, 2005, 2009-2014

Parks Canada Fuel Storage Tanks: Federal PCFT

Canadian Heritage maintains an inventory of known fuel storage tanks operated by Parks Canada, in both National Parks and at National Historic Sites. The database details information on site name, location, tank install/removal date, capacity, fuel type, facility type, tank design and owner/operator.

Government Publication Date: 1920-Jan 2005*

Pesticide Register: Provincial PES

The Ontario Ministry of the Environment and Climate Change maintains a database of licensed operators and vendors of registered pesticides.

Government Publication Date: Oct 2011-Dec 31, 2024

Ontario PFAS Spills: Provincial PFAS

This specific list of spills includes those incidents where one or more of the listed contaminants are identified in the PFAS Structure List and/or PFAS Chemicals Without Explicit Structure List made available by the United States Environmental Protection Agency (US EPA), is originally sourced from the Ministry of the Environment, Conservation and Parks spills related data. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X.

Government Publication Date: 1988-Jun 2024; Aug 2024; Oct-Nov 2024

NPRI Reporters - PFAS Substances: Federal PFCH

The National Pollutant Release Inventory (NPRI) is Canada's public inventory of releases, disposals, and transfers, tracking over 320 pollutants. Per - and polyfluoroalkyl substances (PFAS) are a group of over 4,700 human-made substances for which adverse environmental and health effects have been observed. This listing of PFAS substance reporters includes those NPRI facilities that reported substances that are found in either: a) the Comprehensive Global Database of PFASs compiled by the Organisation for Economic Co-operation and Development (OECD), b) the US Environmental Protection Agency (US EPA) Master List of PFAS Substances, c) the US EPA list of PFAS chemicals without explicit structures, or d) the US EPA list of PFAS structures (encompassing the largest set of structures having sufficient levels of fluorination to potentially impart PFAS-type properties).

Government Publication Date: Feb 2024

Potential PFAS Handlers from NPRI: Federal PFHA

The National Pollutant Release Inventory (NPRI) is Canada's public inventory of releases, disposals, and transfers, tracking over 320 pollutants. Per - and polyfluoroalkyl substances (PFAS) are a group of over 4,700 human-made substances for which adverse environmental and health effects have been observed. This list of potential PFAS handlers includes those NPRI facilities that reported business activity (NAICS code) included in the US Environmental Protection Agency (US EPA) list of Potential PFAS-Handling Industry Sectors, further described as operating in industry sectors where literature reviews indicate that PFAS may be handled and/or released. Inclusion of a facility in this listing does not indicate that PFAS are being manufactured, processed, used, or released by the facility - these are facilities that potentially handle PFAS based on their industrial profile.

Government Publication Date: Feb 2024

Pipeline Incidents: Provincial PINC

List of pipeline incidents (strikes, leaks, spills). This is not a comprehensive or complete inventory of pipeline incidents in the province; this listing in an historical copy of records previously obtained under Access to Public Information. Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2021

Potential PFAS Handlers from EASR: Provincial PPHA

The Ontario Environmental Activity and Sector Registry (EASR), described in Ontario Regulation 245/11, allows businesses with less complex operations - and hence not requiring an Environmental Compliance Approval - to register their activities with the Ontario Ministry of the Environment, Conservation and Parks (MECP). This list of potential PFAS handlers includes those EASR facilities that reported business activity (NAICS code) included in the US Environmental Protection Agency (US EPA) list of Potential PFAS-Handling Industry Sectors, further described as operating in industry sectors where literature reviews indicate that PFAS may be handled and/or released. Inclusion of a facility in this listing does not indicate that PFAS are being manufactured, processed, used.

Government Publication Date: Jun 30, 2024

Private and Retail Fuel Storage Tanks: Provincial PRT

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks and licensed retail fuel outlets. This database includes an inventory of locations that have gasoline, oil, waste oil, natural gas and/or propane storage tanks on their property. The MCCR no longer collects this information. This information is now collected by the Technical Standards and Safety Authority (TSSA).

Government Publication Date: 1989-1996*

Permit to Take Water: Provincial PTTW

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include PTTW's on the registry such as OWRA s. 34 - Permit to take water.

Government Publication Date: 1994 - Dec 31, 2024

Ontario Regulation 347 Waste Receivers Summary: Provincial REC

Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data.

Government Publication Date: 1986-1990, 1992-2021

Record of Site Condition: Provincial RSC

The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental cleanup orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up. RSCs filed after July 1, 2011 will also be included as part of the new (O.Reg. 511/09). The Government of Ontario states that it is not responsible for the accuracy of the information in this Registry.

Government Publication Date: 1997-Sept 2001, Oct 2004-Jan 2025

Retail Fuel Storage Tanks: Private RST

This database includes an inventory of retail fuel outlet locations (including marinas) that have on their property gasoline, oil, waste oil, natural gas and / or propane storage tanks.

Government Publication Date: 1999-Apr 30, 2024

Scott's Manufacturing Directory: Private SCT

Scott's Directories is a data bank containing information on over 200,000 manufacturers across Canada. Even though Scott's listings are voluntary, it is the most comprehensive database of Canadian manufacturers available. Information concerning a company's address, plant size, and main products are included in this database.

Government Publication Date: 1992-Mar 2011*

Ontario Spills: Provincial SPL

List of spills and incidents made available by the Ministry of the Environment, Conservation and Parks. This database identifies information such as location (approximate), type and quantity of contaminant, date of spill, environmental impact, cause, nature of impact, etc. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X.

Government Publication Date: 1988-Jun 2024; Aug-Nov 2024

Wastewater Discharger Registration Database: Provincial SRDS

Facilities that report either municipal treated wastewater effluent or industrial wastewater discharges under the Effluent Monitoring and Effluent Limits (EMEL) and Municipal/Industrial Strategy for Abatement Regulations. The Municipal/Industrial Strategy for Abatement (MISA) division of the Ontario Ministry of Environment keeps record of direct dischargers of toxic pollutants within nine sectors including: Electric Power Generation, Mining, Petroleum Refining, Organic Chemicals, Inorganic Chemicals, Pulp & Paper, Metal Casting, Iron & Steel, and Quarries.

Government Publication Date: 1990-Dec 31, 2021

Anderson's Storage Tanks: Private TANK

The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit year, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1915-1953*

Transport Canada Fuel Storage Tanks: Federal TCFT

List of fuel storage tanks currently or previously owned or operated by Transport Canada. This inventory also includes tanks on The Pickering Lands, which refers to 7,530 hectares (18,600 acres) of land in Pickering, Markham, and Uxbridge owned by the Government of Canada since 1972; properties on this land has been leased by the government since 1975, and falls under the Site Management Policy of Transport Canada, but is administered by Public Works and Government Services Canada. This inventory provides information on the site name, location, tank age, capacity and fuel type.

Government Publication Date: 1970 - Apr 2024

Variances for Abandonment of Underground Storage Tanks: Provincial VAR

Listing of variances granted for storage tank abandonment. This is not a comprehensive or complete inventory of tank abandonment variances in the province; this listing is a copy of tank abandonment variance records previously obtained under Access to Public Information. In Ontario, registered underground storage tanks must be removed within two years of disuse; if removal of a tank is not feasible, an application may be sought for a variance from this code requirement.
Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2022

Waste Disposal Sites - MOE CA Inventory: Provincial WDS

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

Government Publication Date: Oct 2011 - Dec 31, 2024

Waste Disposal Sites - MOE 1991 Historical Approval Inventory: Provincial WDSH

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30st, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number.

Government Publication Date: Up to Oct 1990*

Water Well Information System: Provincial WWIS

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

Government Publication Date: Dec 31 2023

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

Appendix G – Regulatory Requests

Ministry of the Environment, Conservation and Parks

Corporate Services Branch
40 St. Clair Avenue West
Toronto ON M4V 1M2

Ministère de l'Environnement, de la Protection de la nature et des Parcs

Direction des services ministériels
40, avenue St. Clair Ouest
Toronto ON M4V 1M2

Ontario

March 10, 2025

Mr. Scott Grant-Hose
EXP Services Inc.
1266 South Service Road, Suite C1-1
Stoney Creek, Ontario L8E 5R9
scott.grant-hose@exp.com

Dear Scott Grant-Hose:

RE: **MECP FOI A-2025-01519 / Your Reference GTR-22029875-B0 – Acknowledgement Letter**

The Ministry is in receipt of your request made pursuant to the Freedom of Information and Protection of Privacy Act. **The search will be conducted on the following:**

1056 &1060 Brant Street, Burlington
Timeframe: January 1, 1930 to March 6, 2025

If there is any discrepancy, please contact us immediately.

Please note the file number that has been assigned to your request. This number should be referred to in all future communications with our office.

If you have any questions, please contact Louise Gagnon at 416-566-7682 or louise.gagnon@ontario.ca.

Yours truly,
MECP Access and Privacy Office

Ontario

Ministry of the Environment, Conservation and Parks

Freedom of Information Request for Property Information

Instructions

Use this form to:

- submit and pay for a new FOI request for access to records/information about a property
- pay for a deposit or a final fee on an existing FOI request

Fields marked with an asterisk (*) are mandatory.

Are you: *

☑ Submitting a new FOI Request for Property Information

☐ Paying a deposit or final fee for an existing FOI Request for Property Information

Section 1 – Description of Records Requested

Time Period for Records Requested

From (yyyy/mm/dd) * 1930/01/01

To (yyyy/mm/dd) * 2025/03/06

Type of Record(s) *

☑ All environmental records relating to the identified property/site exclusive of Environmental Approvals and Registrations

☑ Environmental Approvals and Registrations (e.g. Environmental Compliance Approvals; Certificate of Approval; Renewable Energy Approvals; Environmental Activity and Sector Registry Registrations)

Select only if you are seeking access to an Approval or Registration that is not publicly available or if you are also seeking supporting documents relating to the Approval or Registration.

Operator and vendor Pesticide Licenses from September 4, 2018, final Approvals and Registrations are publicly available on the Access Environment website at:
https://www.accessenvironment.ene.gov.on.ca/AEWeb/ae/GoSearch.action?search=basic&lang=en.

Records of Site Condition (RSC) records are publicly available on the Brownfields Environmental Site Registry (BSER).

- RSC records between 2004 to June 30, 2011 are available at: https://www.lrcsde.lrc.gov.on.ca/besrWebPublic/generalSearch
- RSC records filed after July 2011 are available at: https://www.lrcsde.lrc.gov.on.ca/BFISWebPublic/pub/earchFiledRsc_search?request_locale=en

☐ Other Specific Document(s)

Type of Approval/Registration *

☑ Drinking Water Licenses

☑ No Supporting Documents ☐ All Supporting Documents ☐ Some Supporting Documents

☑ Pesticide Licenses

Only pesticide licenses post September 2018 are available. Prior to September 2018, only Pesticide license applications and supporting documentation is available

☑ No Supporting Documents ☐ All Supporting Documents ☐ Some Supporting Documents

☑ Permits to Take Water

☑ No Supporting Documents ☐ All Supporting Documents ☐ Some Supporting Documents

Water Source *

☑ Groundwater ☑ Surface Water

☑ Noise Vibrations Approvals/Registrations

☑ No Supporting Documents ☐ All Supporting Documents ☐ Some Supporting Documents

☑ Air Emissions Approvals/Registrations

☑ No Supporting Documents ☐ All Supporting Documents ☐ Some Supporting Documents

☑ Water Approvals/Registrations - Ontario Water Resources Commission, treatment, ground level, standpipes & elevated storage, pumping stations (local & booster), mains

☑ No Supporting Documents ☐ All Supporting Documents ☐ Some Supporting Documents

☑ Sewage – Treatment, Stormwater, Storm, Leachate & Lieachate Treatment & Sewage pump stations, Sanitary

☑ No Supporting Documents ☐ All Supporting Documents ☐ Some Supporting Documents

☑ Waste Water - Industrial discharge

☑ No Supporting Documents ☐ All Supporting Documents ☐ Some Supporting Documents

☑ Waste Sites - Disposal, Landfill sites, Transfer stations, Processing sites, Incinerator sites

☑ No Supporting Documents ☐ All Supporting Documents ☐ Some Supporting Documents

☑ Waste Management Systems - haulers: sewage, non-hazardous & hazardous waste, mobile waste processing units, Polychlorinated Biphenyls (PCBs) storage, transfer or destruction, Waste Generator Systems)

☑ No Supporting Documents ☐ All Supporting Documents ☐ Some Supporting Documents

Company Name

☑ Waste Generator Registration - number/class

List any record(s) that should be excluded from the scope of your request (e.g. email correspondences; records originating from your organization/business; records already in your possession, prior year(s) annual reports for approvals)

Please provide any additional relevant information relating to your request. For example, does your request relate to any other ministry business? Please note that this information is being requested only in order to provide contextual information to the Access and Privacy Office and will not in any way affect or expedite the status of any related ministry business identified.

Section 2 – Requester Information

Last Name * Grant-Hose

First Name * Scott

Middle Initial

Business/Organization Name (if applicable or indicate "N/A") * EXP Services Inc

Project/Reference Number (if applicable) GTR-22029875-B0

Are you submitting this request on behalf of a client? *

☐ Yes ☑ No

Mailing Address

Unit Number

Street Number * 1266

Street Name * South Service Road

PO Box

City/Town * Stoney Creek

Province * ON

Postal Code * L8E 5R9

Telephone Number * 905-573-4000

ext.

Email Address * scott.grant-hose@exp.com

Is there an alternate contact (e.g. office admin)? *

☐ Yes ☑ No

Section 3 – Current Property Address Information

Is the property a:

☐ Park ☐ Lake ☐ First Nation Band ☐ Wind Farm ☐ Federal Land ☐ Island ☐ Unsurveyed Land

Are you requesting information about multiple addresses? *

☑ Yes ☐ No

Please only submit a request with multiple addresses if the property is one site. To be considered one site, addresses must be adjacent to each other and owned by the same owner(s).

Do the multiple addresses belong to one site? *

☑ Yes ☐ No

Please submit a separate FOI request for each address.

Site Name 1056 &1060 Brant Street, Burlington Ontario

Property Address

Address 1

Unit Number

Street Number 1056

Street Name Brant Street

Full Lot Number

Concession

Geographic Township

City/Town/Village * Burlington

Closest Intersection

Address 2

Unit Number | Street Number | Street Name

1060 Brant Street

Full Lot Number | Concession | Geographic Township

City/Town/Village *

Burlington

Closest Intersection

Section 4 – Previous Property Address Information

Do you want the ministry to search all prior historical addresses for this property/site for the time period of the records requested? *

☐ Yes ☑ No

Section 5 – Owner Information

Please provide all present and previous property owner and/or tenant names for the search years requested.

Current Property Owner/Tenant

Address 1

1056 Brant Street
Burlington

Owner Name: 2735841 Ontario Inc.

Hello ,

NO RECORDS FOUND IN CURRENT DATABASE:

- We confirm that there are NO **fuels records** in our database at the subject address(es).

This is not a confirmation that there are no records in the archives. For a further search in our archives, please go to the **TSSA Client Portal** to complete an Application for Release of Public Information.

Please refer to How to Submit a Public Information Request (tssa.org) for instructions.

The associated fee must be paid via credit card (Visa or MasterCard).

Once all steps have been successfully completed you will receive your payment receipt via email.

TSSA does not make any representations or warranties with respect to the accuracy or completeness of any records released. The requestor assumes all risk in using or relying on the information provided.

If you have any questions or concerns, please do not hesitate to contact our Public Information Release team at publicinformationservices@tssa.org.

Kind regards,

Aleena Tahir | Public Information & Records Agent

Subject: Request for Environmental Information

[CAUTION]: This email originated outside the organisation.
Please do not click links or open attachments unless you recognise the source of this email and know the content is safe.

Hello,

Could you please conduct a search of historical AST/UST at the following properties in **Burlington,** ON:

- 1040 Brant Street
- 1048 Brant Street
- 1052 Brant Street
- 1056 Brant Street
- 1060 Brant Street
- 1066 Brant Street
- 1070 Brant Street
- 1069 Brant Street
- 1053 Brant Street
- 2006 Churchill Avenue

We request that the Technical Standards and Safety Authority (TSSA), Safety Fuel Division, review its database to identify to us any records of aboveground/underground storage tanks, spills, incidents, complaints, notices, tanks removals and/or remediation etc. with the TSSA for the above-mentioned properties. Earliest attention to this matter is much appreciated. For your convenience you may e-mail me with any information you may have for the property

Thanks,
Scott

Scott Grant-Hose

Appendix J – Phase One Conceptual Site Model

Phase One ESA Conceptual Site Model-
1056 and 1060 Brant Street, Burlington, Ontario

This section presents the Phase One Conceptual Site Model (P1CSM), as it relates to the Site designated as 1056 and 1060 Brant Street in Burlington, Ontario, providing a narrative and graphical description integrating information related to the areas of potential environmental concern/potential contaminating activities and the presence and distribution of potential contaminants of concern. The P1CSM was completed in accordance with Ontario Regulation 153/04, as amended (O.Reg.153/04), as defined by the Ontario Ministry Environment, Conservation and Parks (MECP). There is no uncertainty or absence of information noted in the Phase One Environmental Site Assessment.

1.1 Introduction

For the purposes of this report the alignment of Brant Street is assumed to be in a north-south direction, with the Site being located on the west side of Brant Street.

Details of the Site are as follows:

Municipal Address	1056 and 1060 Brant Street, Burlington, ON
Current Land Use	Residential Use
Proposed Land Use	Residential Use
Legal Description	1056 Brant Street - Pt Lt 15, Rcp Pl99, As In 648614 Except Pt 13 Pe118; Burlington 1060 Brant Street - Pt Lt 15, Rcp Pl99, As In 803184; Burlington
Property Identification Number (PIN)	1056 Brant Steet – 07081-0259(LT) 1060 Brant Street – 07081-0260(LT)
Approximate Universal Transverse Mercator (UTM) coordinates	NAD83 17T 595675.92 m E 4799190.99 m N
Accuracy Estimate of UTM	10-15 m
Measurement Method	Global Positioning System (GPS)
Site Area	0.16 hectares (0.41 acres)
Property Owners, Address and Contact owner	2735841 Ontario Inc. 2235 Sheppard Ave E., Suite 1700 North York, ON M2J 5B5 Attention: Mr. Sam Mandelbaum
Any Other Person Who Engaged the QPESA	N/A

1.2 Background

Based on the information available at this time, the Site was inferred to be developed circa 1954 for residential use. The residential dwellings were demolished in 2024. Prior to the development of the Site with the former residential dwellings, the Site was observed to be a vacant undeveloped parcel of land.

1.3 Geological and Hydrogeological Conditions

According to the Geology of Ontario Map, the surficial geology in the area of the Site is classified as Halton Till, predominantly silt to silty clay matrix, high in matrix carbonate content and clast poor from the Pleistocene era. The bedrock in the general area of the Site is part of a group belonging to the Queenston Formation, consisting of shale, limestone, dolostone and siltstone.

The Site and surrounding areas slope to the south. Rambo Creek is located approximately 175 m west and flows south towards Lake Ontario. Lake Ontario is located 2.57 km south of the Site. Based on the information available at this time, the direction of groundwater flow in the area of the Site is inferred to be to the south.

Based on the review of available resources from the Ministry of Natural Resources and Forestry website March 6, 2025, no areas of natural significance were identified at the Site or within 30 m of the Site.

1.4 Previous Investigations

At the time of this Phase One ESA, the following previously completed environmental reports were available for review:

- *"Phase One Environmental Site Assessment – 1056-1060 Brant St, Burlington, Ontario"*, dated April 6, 2023, by EXP. The pertinent findings are summarized below:
    - The Site measures approximately 0.16 hectares (0.41 acres). At the time of this Phase One ESA, the Site was developed with two (2) apartment buildings. Based on the records review, this Site building was developed circa 1954. The Site building have the municipal address 1056 and 1060 Brant Street and occupy the southern and northern portions of the Site respectively.
    - A former heating oil AST was observed in the basement of 1056 Brant Street.
    - De-icing salt was applied to paved areas during winter months for vehicular and pedestrian safety.
    - A Phase Two ESA was recommended to assess soil and groundwater quality at the Site.
- *"Phase Two Environmental Site Assessment – 1056-1060 Brant St, Burlington, Ontario"*, dated May 10, 2023, by EXP. The pertinent findings are summarized below:
    - Five (5) boreholes were advanced by Altech between March 2nd and March 8th, 2023, to a maximum depth ranging between 3.66 to 11.28 metres below ground surface (m bgs) as part of the geotechnical and hydrogeological investigations. It is noted only four (4) boreholes were utilized for environmental purposes.
    - The general stratigraphy at the Site as observed in the borehole logs consisted of asphalt (overlying sandy gravel fill) or surficial topsoil in all boreholes, underlain by fill materials extending to approximately 1.5 to 4.5 m bgs. materials. The fill generally comprised of silty clay with some sand and trace gravel. At borehole location BH-2, trace brick and concrete fragments were encountered. A glacial deposit of silty clay till was encountered in all boreholes except at Borehole BH2, extended to depths of approximately 2.2 to 9.8 m bgs. A sandy silt till deposit was encountered below the fill in Borehole BH-2 and below the silty clay till in boreholes BH3 and BH4. Red shale bedrock of the Queenston Formation was encountered in all boreholes, except BH-5, underlying the till deposit at depths ranging from 6.1 to 7.1 m bgs.
    - The monitoring well network advanced as part of this Phase Two ESA consisted of four (4) newly installed monitoring wells (BH/MW1, BH/MW3, BH/MW4S and BH/MW4D). Based on the groundwater contour map delineated for the Site, on-Site groundwater appears to be to the southwest.

- Soil samples were submitted for the analysis of Petroleum Hydrocarbons (PHCs), Benzene, Toluene, Ethylbenzene, and Xylenes (BTEX), Metals and Inorganics, Polycyclic Aromatic Hydrocarbons (PAHs) and Other Regulated Parameters (ORPs).
- All parameters analyzed were either not detected at laboratory RDLs, or detected below the applicable Table 2 SCS, with the exception of BH3 SS2, which exceeded Table 2 SCS for Electrical Conductivity (EC). It is the QP's opinion that the elevated concentration of EC is associated with de-icing activities in the winter months for the safety of the public and vehicular traffic. As such, it is not considered to be in excess of the Table 2 SCS for the purposes of filing an RSC (if required) based on the exemption outlined in Section 49.1 of O.Reg. 153/04, and EC is not considered as COCs for the Site.
- Groundwater samples were submitted for the analysis of PHCs including BTEX.
- All parameters analyzed were not detected at laboratory RDLs. Laboratory RDLs below the Table 2 SCS.
- Trace brick fragments and concrete fragments were encountered at Borehole BH2 in the fill material which ranged in depth from 0.15 to 4.57 m bgs. Based on the redevelopment plan on the Site, the multi-storey building will have two (2) levels of underground parking. Therefore, this fill material will be removed as part of the Site development plans.
- Based on the findings of the Phase Two ESA, no further work is recommended at this time and as such, a Record of Site Condition may be filed

1.5 Underground Utilities

The Site utilities and services were identified at the Site based on information provided in environmental records, relevant utility infrastructure observed during the Site reconnaissance. The Site utilities are summarized in the table below and noted on Figure 3, where available. It is noted that the precise underground location of the utilities cannot be determined without professional locate services.

Utility	Source	Location	Site Entry
Natural Gas	Enbridge Gas	Underground	Unknown
Sanitary Sewer	City of Toronto	Underground	Unknown
Storm Sewer	Toronto Hydro	Underground	Unknown
Water	City of Toronto	Underground	Unknown
Electricity	Alectra	Underground	Unknown
Telecommunications	Bell and Rogers	Underground	Unknown

1.6 Potentially Contaminating Activities and Areas of Potential Environmental Concern:

Refer to Table 2 and Figure 2 for the list of potentially contaminating activities (PCAs) that have occurred within the Phase One Study Area, which includes the Site and properties within 250 m radius of the Site boundaries.

Table 2: Potentially Contaminating Activities

PCA Identifier	Address	Location of Activity (in relation to Site)[1]	Potentially Contaminating Activity (PCA)[2]	Approximate timeline that PCA occurred	Contributes to APEC (Yes or No)?
Site					
1A	1056 Brant Street	On-Site	PCA#28-Gasoline and Associated Products Storage in Fixed Tanks	At the time of the Site visit, a steel AST for heating oil storage was observed in the basement of 1056 Brant Street.	Yes, due to the PCA occurring on-Site.
1B	1056 and 1060 Brant Street	On-Site – asphalt paved areas	PCA" Other"-Application of De-icing salt	Since development circa 1954, the Site has had paved areas. For de-icing purposes, road salt would have been applied during the winter months.	Yes, due to the PCA occurring on-Site.
Surrounding Properties					
2	Brant Street and Plaints Road	210 m south	PCA"Other"- Spills with possible environmental impacts	Based on the reviewed ERIS report, several spills were recorded at this intersection in 1997, 2001, and 2012. According to the record, environmental impact was a "possible" outcome of this spill and 2001 and 2012 and "not anticipated" in 1997.	No, based on the separation distance from the Site.

PCA Identifier	Address	Location of Activity (in relation to Site)[1]	Potentially Contaminating Activity (PCA)[2]	Approximate timeline that PCA occurred	Contributes to APEC (Yes or No)?
3	1446 Plains Rd E	240 m south	PCA#28-Gasoline and Associated Products Storage in Fixed Tanks PCA#52- Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems	Based on the reviewed city directories, the property was occupied by service stations from 1960-2021 and an automotive repair garage in 1985.	No, based on the separation distance from the Site.
4	1400 Plains Rd E	250 m southwest	PCA#52- Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems	Based on the reviewed city directories, this property was occupied by auto service repair shops from 1980-2021.	No, based on the separation distance from the Site.
5	1035 Brant Street	80 m southeast	PCA#31- Ink Manufacturing, Processing and Bulk Storage	Based on the reviewed city directories, the property was occupied by CDN Printing from 2005-2021.	No, based on the separation distance from the Site and the inferred down-gradient location relative to the direction of groundwater flow.
6	1401 Plains Road East	135 m southwest	PCA#52- Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems	Based on the reviewed city directories, the property was occupied by Holland Chevrolet Geo Oldmobile Ltd from 1970-2005.	No, based on the separation distance from the Site.
7	1435 Plains Road East	150 m south	PCA#28-Gasoline and Associated Products Storage in Fixed Tanks PCA#52- Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems	Based on the reviewed city directories, the property occupied by service stations from 1957 to 1990 and automotive service garage in 1965.	No, based on the separation distance from the Site.

PCA Identifier	Address	Location of Activity (in relation to Site)[1]	Potentially Contaminating Activity (PCA)[2]	Approximate timeline that PCA occurred	Contributes to APEC (Yes or No)?
8	2011 Plains Road East	145 m southeast	PCA#28-Gasoline and Associated Products Storage in Fixed Tanks	Based on the reviewed city directories, the property was occupied by various gasoline service stations from 1960-1985.	No, based on the separation distance from the Site.
9	2016 Plains Road East	230 m southeast	PCA#52- Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems	Based on the reviewed city directories, the property was occupied by Burlington Hyundai from 2005 -2021.	No, based on the separation distance from the Site.
10	2043 Leighland Road	185 m east	PCA#28 – Gasoline and Associated Products in Fixed Tanks	Based on the reviewed ERIS report, the property was listed for a leaking fuel oil tank.	No, based on the separation distance from the Site.
11	1020 Brant Street	150 m south	PCA#52 – Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems	Based on the reviewed city directories, the property was occupied by Holland Chevrolet Geo in 2005.	No, based on the separation distance from the Site.

(1) Distances are approximate. Precise distances are not possible due to the age of some listings and the aggregation and/or loss of addresses.

(2) Potentially contaminating activity means a use or activity set out in Column A of Table 2 of Schedule D (O.Reg 153/04, as amended) that is occurring or has occurred in a Phase One Study area.

It should be noted that Geotechnical Investigation and previous Phase One and Two ESA encountered the fill material extended to approximately 1.5 to 4.5 m bgs within entire Site. Based on the visual observation of the soil samples from Geotechnical Investigation, the composition of soil type in the fill material layer is similar to the native material within the Site. Therefore, the fill material was classified as reworked native based on environmental perspective, so it is not considered as PCA.

1.7 Areas of Potential Environmental Concern

Based on the evaluation of the PCAs located within the Phase One Study Area, the following areas of potential environmental concern (APECs) were identified, as presented in Figure 4.

Table 3: Areas of Potential Environmental Concern

Area of Potential Environmental Concern (APEC)	Location of APEC on Phase One Property	Potentially Contaminating Activity (PCA)[1]	Location of PCA (on-Site or off-Site)	Contaminants of Potential Concern	Media Potentially Impacted (Groundwater, soil and/or sediment)
APEC 1: Presence of an AST for heating oil storage at 1056 Brant Street	Southern portion of the Site – location of the boiler room at 1056 Brant Street	PCA#28-Gasoline and Associated Products Storage in Fixed Tanks	On-Site	Petroleum hydrocarbons (PHCs), benzene, toluene, ethylbenzene and xylene (BTEX), polycyclic aromatic hydrocarbons (PAH) and Metals	Soil and Groundwater
APEC 1B: Application of De-icing salt on the on-Site paved areas	Asphalt-paved areas of the Site	PCA" Other"-Application of De-icing salt	On-Site	Electrical Conductivity (EC) and Sodium adsorption ratio (SAR)	Soil

(1) Potentially contaminating activity means a use or activity set out in Column A of Table 2 of Schedule D (O.Reg.153/04, as amended) that is occurring or has occurred in a phase one Study area.

Based on the findings of the Phase One ESA and conclusions, a Phase Two ESA is required to assess the soil and groundwater conditions at the Site.
